Thorburn's Seeds

ESCHSCHOLTZIA THORBURNI

(California Poppy)

The grandest of all Eschscholtzias. Almost barbaric in splendor.

The unopened buds on outer side of petals are of the deepest crimson, toning down in the inner side to bright flame color and molten gold.

Very large flowers, borne in great profusion.

We will mail a packet of this valuable novelty (regular price 15c.) and a copy of our beautifully illustrated catalogue, 144 large pages—the best seed annual published in America—for only 10c. Stamps or coin. Write to-day. No time like the present.

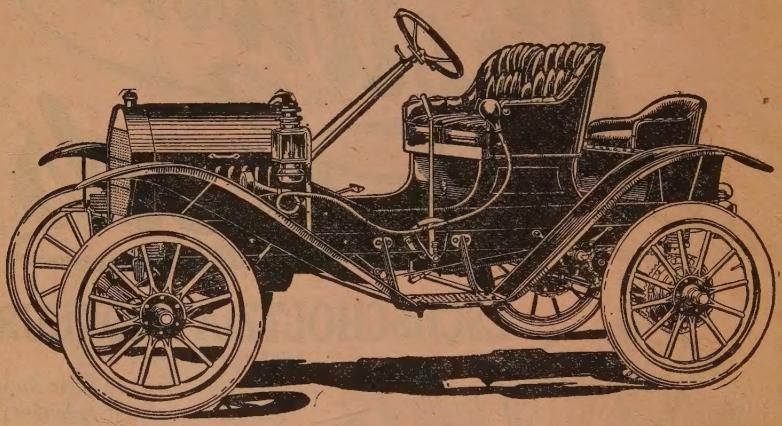
THE PENNSYLVANIA STATE COLLEGE
DEPARTMENT OF PHYSICS

Everyman's



THERE is absolutely no limit to the usefulness of the BRUSH. It is adapted to hundreds of business uses, as well as pleasure.

No matter what your occupation or profession, it will pay you to investigate this wonderful car thoroughly. Find out what it is doing for thousands of merchants, physicians, contractors, engineers, salesmen, farmers, mail carriers, artisans—in fact, for men (and women) in almost all walks of life.

If you investigate carefully you will find that the BRUSH is not an imitation nor an adaptation of any other automobile—all other low priced cars are. They have all the complications of the big car, but the parts are necessarily so small that they cannot stand the hard knocks.

You will find in the BRUSH a car so simple in design that all parts can be made strong enough to stand as hard usage as any automobile in existence.

After finding out all about the BRUSH, apply the result of your investigation to your every-day life. Figure out in dollars

BRUSH RUNA

MASSACHUSETTS AVE.,

Car—$485

Rumble Seat and Tool Box $20 Extra

and cents what it would mean to you to own an absolutely dependable little motor car which you can operate for one cent a mile or even less.

You would be positively independent, as far as all other modes of transportation are concerned. When you are ready to leave home in the morning, you would not be delayed by a tie-up on the street car line nor railroad.

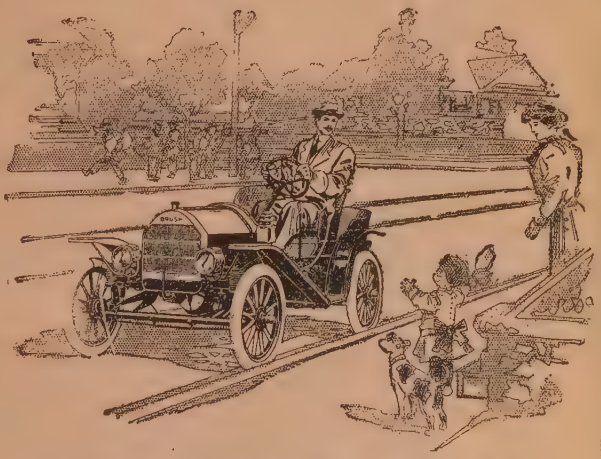
Suppose your business takes you to dozens or even to only several places during the day, the BRUSH affords to you a means of transportation by which you can go just where you want to go, at the instant you are ready. The saving in time is a great item, and the convenience cannot be estimated.

When the day's work is done, you don't have to hang to a strap in a foul-smelling street car or train, if you live in the city. You get the benefit of a ride home in the open air, which refreshes you and gives you an appetite for your evening meal.

After that evening meal, which you will enjoy, think what a spin around the boulevards or into the country will mean to you and yours!

During cold and rainy weather, a top and curtains, purchased at a small additional cost, will protect you completely.

No matter where you live, if you use any mode of transportation, it will pay you to investigate the BRUSH.



BOUT COMPANY

DETROIT, MICHIGAN

RHEUMATISM

Acute, sub-acute, chronic, rapidly and permanently cured by "The Wallace Treatment." No charge whatever until cured. Gout, Lumbago and Sciatica promptly and permanently cured. It is the only treatment that cures.

RHEUMATOID ARTHRITIS

Contains no narcotics or other deleterious substances. No diet. No stomach disturbances. Improves general health. In cases due to blood poisoning it not only cures but removes mercury, etc., from the system. Home attendance if desired. Refer, by permission, to those we have cured in New York and nearby towns.

Office hours, daily, 10-4. Tuesday and Thursday evening until 8, and by appointment. Write for booklet. Dept. D, The Rheumaticide Co., 1 E. 42d St., New York City, over drug store.

GOOD NEWS FOR THE DEAF.

NEW YORK, Sept. 13.—A celebrated New York Aurist has been selected to demonstrate to deaf people that deafness is a disease and can be cured rapidly and easily in your own home.

He proposes to prove this fact by sending to any person having trouble with their ears a trial treatment of this new method absolutely free. We advise all people who have trouble with their ears to immediately address Dr. Edward Gardner, Suite 200, No. 40 West Thirty-third street, New York City, and they will receive by return mail, absolutely free, a Trial Treatment.

2 Great Books for Every Man

Sayler's American Form Book

MORE than *one thousand correct legal forms for each State and Territory* for transactions carried on by business and professional men every day. Transactions that may save big losses if the forms are improperly drawn. In Sayler's American Form Book you have all the correct business forms as approved by the courts of each State and Territory—in one compact volume prepared by a former Judge of the Common Pleas Court at Cincinnati, John R. Sayler, and edited to date by a prominent lawyer of the Cincinnati Bar, Milton Sayler. Cross index places every subject before you instantly. Here is a list of the forms included:

Contracts	Wills	Partnership Agreements	Leases	Deeds
Mortgages	Bonds	Bills of Exchange	Bills of Sale	Patents
Promissory Notes	Mechanic's Liens	Assignments	Auctions	Power of Attorney

and hundreds of other forms required for the transaction of business affairs. 1 large volume, price $3.50.

Chamberlain's Principles of Business Law

ANSWERS questions that confront you every day. Questions which might involve you in legal difficulties later. All treated tersely and plainly by a master business lawyer and professor in the Western Reserve Law School at Cleveland. Turn to the index and you can put your finger immediately on any subject. 2,000 business questions answered! Among the important subjects treated are:

Agency	Bailments	Carriers	Chattel Mortgages
Contracts	Corporations	Real Property	Innkeepers
Partnership	Personal Property	Real Estate Mortgages	Sales of Property
	Landlord and Tenant	Suretyship	Trade-marks
	Commercial Paper	Slander and Libel	Trade-names

See these books at your dealer's. If he can't show them, send $3.50 for the first, $2.50 for the second, or $5.00 for both. We'll mail them postpaid subject to 10 days' examination and use.

INSURANCE IN ALL ITS BRANCHES

45 WILLIAM STREET, NEW YORK CITY

Fire, Marine, and Railroad Insurance effected on property located in any part of the United States. Life, Accident, Casualty, Liability, Fidelity, Bond, Rent, Elevator, Boiler, Sprinkler, Burglary and Theft, Tornado, and Plate Glass Insurance.

We have AGENTS and CORRESPONDENTS in all principal cities and abroad, and have special facilities for negotiating Insurance for Manufacturers, Merchants, Railroads, and property owners generally, at lowest possible rates, coupled with safest indemnity.

Our INSPECTION DEPARTMENT will analyze present Insurance Rates on our clients' properties for the purpose of discovering errors and overcharges; and will also suggest such changes and improvements as will tend to reduce the cost of their insurance.

We ADJUST ALL LOSSES for our customers without charge for our services, and have collected millions of dollars during the past fifty years. We have our own specialists in all branches of insurance whose technical knowledge and experience enable us to give best results to our clients.

We maintain a LAW DEPARTMENT in charge of our own Counsel, who passes upon all policies issued through our office and assists in the collection of our clients' losses. This Department is at the service of our clients in all matters connected with insurance law.

BUY DIRECT FROM FACTORY, THE BEST

MIXED PAINTS

At Wholesale Prices and Save Dealer's Profits

FROM THE OLDEST MIXED PAINT HOUSE IN AMERICA

Manufacturers of **INGERSOLL LIQUID PAINTS**, proved by 67 years' use to be the **most durable and color lasting.** Indorsed by the Grange.

SAVE ONE-HALF YOUR PAINT BILLS

When you buy paints from the store or supply house, only half your money goes to the man who made the paint—the other half is divided between the wholesale dealer, travelling salesman and local storekeeper, to cover their profits and expenses. **Quite a lot of people for you to help support.**

The store is nearer your house, but **I am nearer to you.** I am a manufacturer and **deal direct with you,** not through a whole chain of middlemen, each going into your pocket for his share of profit.

You save all dealer's profits by buying "direct from Ingersoll," and receive **full value** for your money in the **Best Paint.**

INGERSOLL PAINT BOOK FREE

Tells the whole story—all about paint and painting for durability. **How to** avoid the trouble and expense caused by paints fading, chalking and peeling; valuable information **free to you,** with Beautiful Sample Cards. If you want paint, write me. **Do it now. I can save you money. Satisfaction guaranteed.**

FREE

Try for yourself, without one cent of cost, what this marvelous oil will do. Sign your name and address in the triangle at the lower right hand of this ad—cut out around the black lines—and mail the coupon to us. We will send you immediately a generous sample bottle and full directions—do it now.

FOR PARLOR. 3 in One is the only oil on earth good for every house, cottage or castle. Removes all stains, wear marks, scratches and scars on piano or mahogany furniture. Restores original bright, beautiful finish. No grease—no acid—no varnish odors—helps everything—hurts nothing.

FOR LIVING ROOM. It quickly removes grime of use and time on library table, chairs, davenport, bookcase, at little cost and no work. Keeps all brass fixtures and chandeliers free from rust and tarnish. Best lubricant for grandfather clocks, alarm clocks.

FOR BEDROOM. Wood and enamel metal beds cleaned and polished with **3 in One** last longer and look better. It prevents grate fronts from rusting. Oils hinges and locks just right. For revolvers and guns it oils trigger and action, cleans out residue of burnt powder, prevents metal parts rusting.

3 SIZES. Small size, 1 oz., 10 cents; large size, 3 oz., 25 cents, Household size, 8 oz., 50 cents.

3 in One Oil Co.
71 BROADWAY
NEW YORK

FREE

Try for yourself, without one cent of cost, what this marvelous oil will do. Sign your name and address in the triangle at the lower right hand of this ad—cut out around the black lines—and mail the coupon to us. We will send you immediately a generous sample bottle and full directions—do it now.

FOR KITCHEN **3 in One** prevents red rust forming inside oven or anywhere on gas range. Try on wooden surface of kitchen cabinet. Makes ice cream freezer, coffee grinder, washing machine run easily, no selessly. Prevents rust on refrigerator's metal shelves. Leaves no odcr or grease or residue.

FOR DINING ROOM. Wring out soft cloth in cold water. Apply a few drops of **3 in One.** Go over surface of dining table, chairs, sideboard, buffet or cnina cabinet as though washing. Wipe thoroughly. Rub surface briskly with dry cloth. Easiest, cheapest, best method ever discovered for cleaning and polishing all veneered and varnished surfaces.

OTHER USES. Sewing machine repair men "knock" 3 IN ONE because a little of this good oil saves many dollars in repair bills. It makes every part of every machine work smoothly, easily. 3 IN ONE stops hard pumping. Prevents leg ache and "broken backs."

Typewriters work better and last twice as long when oiled with 3 IN ONE. Repair men won't tell you this—they have repairs and cheaper oils to sell. But don't take our word or their word. Just try 3 IN ONE once.

Middletown, Ohio

Licensed Manufacturers Under the International Metal Products Co.'s Patents.

Nerve Strength for the World

Activity—work or play—is a drain on nerve energy and body tissues. Under the high tension of modern life Nature's supply of nervous force is insufficient to meet our excessive demands. Rest is only temporary relief, you must recreate, rebuild, replace what has been destroyed.

Sanatogen
THE FOOD-TONIC

is endorsed by hundreds of thousands the world over as a reconstructive—a re-creator of nervous energy—a revitalizer. Famous men and women—authors, actors, statesmen, clergymen, etc., testify to its wonderful upbuilding powers. Over 12,000 physicians have given it their written endorsement.

Sanatogen is composed of the basic elements of existence—Albumen for the tissues and Sodium Glycero-phosphate for the nerve cells. It is a fine white powder, soluble in water, cocoa, milk, etc., and is eagerly and easily assimilated by the system.

Write for our Book on "Nerves" *free*

A well known physician-author has written a notable work on Neurasthenia. It is a book of vital interest to every American and is written in an entertaining style; free from morbid description but brimful of sound, common-sense suggestions.

Sanatogen is sold in three sizes—$1.00, $1.90, $3.60

Get it from your druggist—if not obtainable from him write the

BAUER CHEMICAL CO.
542 Everett Building
Union Square New York

David Belasco
the eminent dramatic author, says:

"It gives me pleasure to let you know the wonderful beneficial results I have experienced from the use of your Sanatogen. It has a most invigorating effect on the nerves and I heartily recommend it to all those, who, like myself, are obliged to overwork. After my personal experience I can readily vouch for its recuperating qualities."

Sir Gilbert Parker, M.P.
the distinguished statesman and novelist:

"I have used Sanatogen at intervals since last Autumn with extraordinary benefit. It is to my mind a true food tonic, feeding the nerves, increasing the energy and giving fresh vigor to the overworked body and mind."

George Ade,
the humorist, says:

"I have given Sanatogen a trial and I am convinced of it's merits."

Hall Caine,
the dramatist:

"My experience of Sanatogen has been that as a tonic nerve food it has on more than one occasion benefited me."

Do you use Press Clippings?

If you do not, drop a postal card to

Romeike's Press Clipping Bureau

and we will show you how Press Clippings can be used to your advantage.

Press Clippings are always interesting and profitable, they are indispensable to professional and business men alike.

Authors, artists, actors, singers and society leaders are supplied with reviews and criticisms.

We collect obituary notices and bind them in scrapbooks.

Lawyers, bankers, brokers, financial institutes depend largely on quick information from the columns of the press; we supply them.

To the manufacturer we show through the Clippings new markets for his products.

The inventor, the politician, the social reformer, in fact all who attract the attention of the press, are informed and kept up to date by Press Clippings.

A postal card will bring all the information.

"Here's the Job—Now PRODUCE!"

Suppose it were up to you—could you "make good"? Don't you know that your failure to get ahead is owing not to lack of brains—but to lack of training? What is the great difference between you and the fellow able to "produce" as a foreman or superintendent or manager? Training—that's all. A thousand jobs await the man able to "produce." Employers want him—are always eager to secure his services.

Every month there are received at the I. C. S. upwards of 300 voluntary letters from men that spare-time study has qualified to "produce." Those letters prove conclusively that there is a way for every man—for you—to get ready to "produce." The I. C. S. will give to you the same training that has qualified tens of thousands to rise to higher and better paid positions. The I. C. S. can help you. Are you willing to help yourself?

To find out all about how you can learn to "produce," mark and mail the coupon. Doing so will cost you only postage and will place you under absolutely no obligation. **Send the coupon NOW.**

Facts About Grand Pianos

A REAL GRAND PIANO is a musical instrument of orchestral character, *not a mere shape,* that can be reduced to any size. The desire of so many to have a grand piano has induced most makers to produce tiny "grands"—so little that they serve only to accent the value of the upright. The size of these pianos is a concession to convenience and fashion—a fad—that does not consider musical effect. When a piano is less than **5 feet 10 inches** in length it ceases to be a grand piano—it is an arrested development—it is only a pretty piece of furniture.

THE STEINWAY MINIATURE GRAND

"The Smallest Grand That's Safe to Buy"

has all the characteristics of our great concert grands, in modified volume. It is a *Real Grand Piano;* it occupies a distinctive position between the uprights and the larger grands; there is a scientific reason for its size, **5 feet 10 inches.** Come in and hear it—you will then know why we make nothing smaller in a grand piano.

Subway Express Station at the Door

A Revelation To The Deaf

You'll be delighted with the *Acousticon*. It enables you to hear as well as anyone. Yet so inconspicuous is it that none need know you are deaf.

Prove for yourself what the *Acousticon* means to you. You cannot buy it unless it makes you hear well.

Think what it would mean to you to hear normally without strain or effort. Yet that is what the *Acousticon* is doing for thousands of people. Some of these men and women were so deaf they couldn't hear the loudest conversation. Now they are as people with normal hearing.

The *Acousticon* makes you hear distinctly on the same principle as glasses make you see clearly. Just as glasses magnify objects, so does the *Acousticon* magnify sound.

And the *Acousticon* is adjusted to each individual's hearing as the sight is fitted by the optician.

Leading churches, theatres and public buildings are equipped with the *Acousticon*—a remarkable tribute to its efficiency.

You would not be without the *Acousticon* another day—if you knew how well you'll hear with it. Try it and see. Know what it means to have normal hearing.

Cut this out of **The World Almanac** now, while you think of it. If at a distance, write now. We will enable you to test the *Acousticon* in your own home.

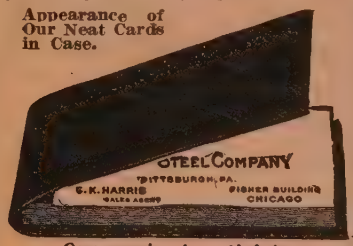
"Wouldn't Have Anything Else"

"Another Wiggins Card," was the remark of a successful business man, when another Wiggins user detached a *Peerless Patent Book Form Card* and handed it to the speaker. When questioned concerning his remark, he stated he had used the cards for years and "wouldn't have anything else."

You wouldn't have anything else either if you had ever used these famous cards. Surely the presentation of the card mentioned above made the best possible impression. *In fact, under the circumstances it would have been hurtful to have presented any other sort of card!* You may be proving to many men just now far from up-to-date you are by the card you present.

Appearance of Our Neat Cards in Case.



Our service is satisfying.

The Peerless Patent Book Card Form

is not merely a card. *It is an idea, an influence, an expression, a message.* It indicates good taste. It gives the man who receives it a real knowledge of the man who sends it in. It tells the story of an up-to-date man and opens the door to an interview.

Detached one by one as you hand them out, the cards are *always clean and perfectly flat*, and every edge is smooth. There is no possible indication of detachment. They defy detection. Send for a sample tab to-day and prove the fact to your own satisfaction. Send to-day.

We engrave and emboss opening announcements, removal notices, or anything that may be desired where only the best will satisfy.

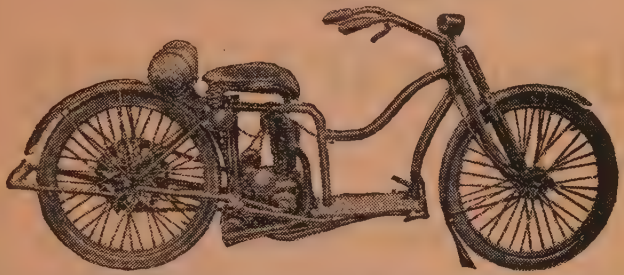
YOU CAN ALL HAVE A NEW ERA

Two-Speed Transmission. Free Motor. Motor Started by Means of a Crank. Comfortable Upholstered Form Seat. Foot Board. 62-Inch Wheel Base. Internal Expanding Brake. Cushion Spring Fork. No Pedals.



Why not be comfortable while riding a motor-cycle? You can be if your mount is a NEW ERA. The rider of a New Era Auto-Cycle will tell you that after riding a New Era nothing could induce him to go back to riding the old style pedal push motor-cycle. You are more comfortable in riding the New Era than you would be in riding in an automobile; in fact, the New Era is a two wheel automobile. It starts like one, operates like one, and after riding the New Era for a hundred miles you are just as fresh and comfortable as you were when starting. GREATEST HILL CLIMBER BUILT, 4 and 6 H. P. single cylinder ball bearing motors.

LIGHTNING
Kidney Tablets

FOR

Kidney and Bladder Troubles

SHATTERED NERVES AND POOR BLOOD.

The Fruit of Years of Research and Study.

A Scientifically Prepared Kidney Tonic for Men, Women and Children.

An Unfailing Kidney Tonic and Nerve Restorer.

Lightning Kidney Tablets are NOT a purgative medicine. They are NOT a cure-all. They contain nothing that could injure the most delicate system, but act upon the diseases dependent upon bad kidneys, poor nerves or watery blood.

Improvement follows a few days' use of **LIGHTNING KIDNEY TABLETS**, but permanent benefit and cure can only reasonably be expected when sufficient have been taken to enrich the blood, quiet the nerves and restore the kidneys to their normal duty.

To prove that these Tablets are all that we claim for them, we will send ONE regular 25c. size box **FREE. Write us to-day.**

The Herb Medicine Company,

Springfield, Ohio, U. S. A.

Manufacturers of the Celebrated Lightning Hot Drops.

DON'T STAY FAT

OBESITY QUICKLY AND SAFELY CURED

NO CHARGE TO TRY THE NEW KRESSLIN TREATMENT

Just Send Your Address and a Supply Will Be Sent You FREE—Do It To-Day

FAT people need no longer despair, for there is a home remedy to be had that will quickly and safely reduce their weight, and, in order to prove that it does take off superfluous flesh rapidly and without harm, a trial treatment will be sent, free of charge, to those who apply for it by simply sending name and address. It is called the KRESSLIN TREATMENT, and many people who have used it have been reduced as much as a pound a day, often forty pounds a month when large quantities of fat were to be taken off. No person is so fat but what it will have the desired effect, and no matter where the excess fat is located—stomach, bust, hips, cheeks, neck—it will quickly vanish without exercising, dieting, or in any way interfering with your customary habits. Rheumatism, Asthma, Kidney and Heart Troubles leave as fat is reduced. It does it in an ABSOLUTELY HARMLESS way, for there is not an atom in the treatment that is not beneficial to all the organs. So send name and address to Dr. J. Spillenger, Dept. 1250 E., 41 West 25th St., New York City, and you will receive a large trial treatment free, together with an illustrated book on the subject and letters of indorsement from those who have taken the treatment at home and reduced themselves to normal. All this will be sent without one cent to pay in any shape or form. Let him hear from you promptly.

This represents the effect the Kresslin Treatment has had in hundreds of cases.

The Problem Solved

How to Print 6, 8, 10, 12, 14 and 16 page Newspapers From One Roll of Paper and a Single Set of Plates.

THE "UNIQUE"

Single-Plate, Single-Roll Press

ALL PARTS OF THE MACHINE ALWAYS RUN AT FULL SPEED FOR ALL PRODUCTS

The printing portion is exactly similar to that in our best newspaper presses and has only two pairs of cylinders and two sets of inking rollers, USING THE REGULAR SEMI-CIRCULAR STEREOTYPE PLATES. The inking arrangement consists of two form rollers, five distributors, two distributing cylinders and one supply roller, and will produce the best newspaper printing.

It Prints

- 6, 8, 10, 12, 14 and 16 page Papers from One Roll of Paper and a Single Set of Plates, at a Running Speed of 10,000 an Hour.
- 4, 6 and 8 page Papers from One Roll of Paper and a Double Set of Plates, at 24,000 an Hour.
- 12 and 16 page Papers, Composed of Two 6-page and Two 8-page Sections, from One Roll of Paper and a Single Set of Plates, at 12,000 an Hour.

When made five pages wide will produce also 18-page Papers from 18 Plates and 20-page Papers from 20 Plates, at 10,000 Copies an Hour.

"Wasting Energy"

FOUR men, working in the WRONG way, fail to make a sale or convince a prospect, where ONE man, working along principles taught by THE SHELDON SCHOOL would easily succeed. Why?

It isn't MERE energy that sells goods or builds business.

It is knowing HOW TO APPLY the energy and the ability you have, with the LEAST POSSIBLE WASTE, that sets you up above the crowd as a successful man.

The Sheldon School will tell you how to sell MORE goods in LESS time—how to understand and apply those rules which go STRAIGHT to the point and CLINCH the business that other men lose.

Today more than 40,000 "live wires," the world over, are making EVERY OUNCE of power COUNT because they are SHELDON MEN. If YOU are to succeed, you must grasp NOW the methods that it will take years to learn in the "school of hard knocks," but which SHELDON teachings will impart to you quickly and easily in your spare time.

Start NOW to learn how you can develop MORE power and MORE salary thru the proper knowledge of how to employ your talents without the waste of energy. Start by asking for the SHELDON Literature, since it COSTS YOU NOTHING.

Simply send your name and address on the coupon herewith and learn how SHELDON METHODS will help you get the most out of your natural energies in your SPARE TIME AT HOME. Mail the coupon AT ONCE!

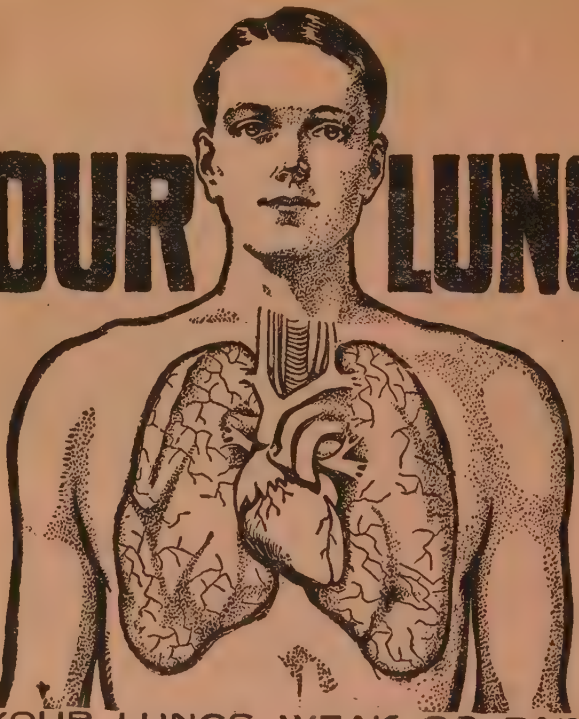
YOUR LUNGS



ARE YOUR LUNGS WEAK OR PAINFUL?

Do your lungs ever bleed?
Do you have night sweats?
Have you pains in chest and sides?
Do you spit yellow and black matter?
Are you continually hawking and coughing?
Do you have pains under your shoulder blades?

THESE ARE REGARDED AS SYMPTOMS OF LUNG TROUBLE AND

CONSUMPTION

You should take immediate steps to check the progress of these symptoms. The longer you allow them to advance and develop, the more deep seated and serious your condition becomes.

We Stand Ready to Prove to You absolutely that Lung Germine, the German Treatment, has cured completely and permanently case after case of advanced Consumption (Tuberculosis), Chronic Bronchitis, Catarrh of the Lungs, Catarrh of the Bronchial Tubes and other lung troubles. Many sufferers who had lost all hope and who had been given up by physicians have been permanently cured by Lung Germine. It is not only a cure for Consumption, but a preventative. If your lungs are merely weak and the disease has not yet manifested itself, you can prevent its development, you can build up your lungs and system to their normal strength and capacity. Lung Germine has cured advanced Consumption, in many cases over five years ago, and the patients remain strong and in splendid health to-day.

Let Us Send You the Proof—Proof that will Convince any Judge or Jury on Earth

We will gladly send you the proof of many remarkable cures, also a **FREE TRIAL** of Lung Germine, together with our new 40-page book (in colors) on the treatment and care of Consumption and Lung Trouble.

JUST SEND YOUR NAME. LUNG GERMINE CO., 603 Rae Block, Jackson, Mich.

Let Us Make You Fat

50c Box Free

We Will Prove at Our Own Expense That It Is No Longer Necessary to Be Thin, Scrawny, and Undeveloped.

"Gee! Look at that pair of skinny scarecrows! Why don't they try Sargol?"

This is a generous offer to every thin man or woman that reads this announcement. We positively guarantee to increase your weight to your own satisfaction or no pay. Think this over—think what it means. At our own risk, we offer to put 10, 15, yes, 30 pounds of good, solid "stay there" flesh on your bones, to fill out hollows in cheeks, neck or bust, to get rid of that "peaked" look, to rejuvenate and revitalize your whole body until it tingles with vibrant energy; to do this without drastic diet, "tonics," severe physical culture "stunts," detention from business or any irksome requirements—if we fail it costs you nothing.

We particularly wish to hear from the excessively thin, those who know the humiliation and embarrassment which only skinny people have to suffer in silence. We want to send a free 50-cent package of our new discovery to the people who are called "slats" and "bean poles," to bony women, whose clothes never look "anyhow," no matter how expensively dressed, to the skinny men who fail to gain social or business recognition on account of their starved appearance. We care not whether you have been thin from birth, whether you have lost flesh through sickness, how many flesh builders you have experimented with. We take the risk and assume it cheerfully. If we cannot put pounds and pounds of healthy flesh on your frame we don't want your money.

The new treatment increases the red corpuscles in the blood, strengthens the nerves and puts the digestive tract into such shape that your food is assimilated and turned into good, solid, healthy flesh instead of passing through the system undigested and unassimilated. It is a thoroughly scientific principle, this Sargol, and builds up the thin, weak and debilitated without any nauseous dosing. In many conditions it is better than cod liver oil and certainly is much pleasanter to take.

Send for the 50-cent box to-day. Convince us by your prompt acceptance of this offer that you are writing in good faith and really desire to gain in weight. The 50-cent package which we will send you free will be an eye-opener to you. We send it that you may see the simple, harmless nature of our new discovery, how easy it is to take, how you gain flesh privately without knowledge of friends or family until you astonish them by the prompt and unmistakable results.

It is only the astounding results of our new method of treatment that make such an offer and such a guarantee possible on our part. So cut off the coupon to-day and mail it at once to The Sargol Company, 200 Herald Bldg., Binghamton, N. Y., and please inclose 10c. with your letter to help pay distribution expenses. Take our word, you'll never regret it.

Free Sargol Coupon

This certificate, with ten cents to help pay postage and distribution expenses, entitles the holder to one 50-cent package of Sargol, the Flesh Builder. The Sargol Co., 200 Herald Bldg., Binghamton, N. Y.

A DELIGHTFUL EXPERIENCE TO GO THROUGH—The FATOFF Treatment—that unfailing corpulency reducer—involves nothing BUT cleanly, cooling, refreshing external applications, a *delightful* treatment from A to Z!

Works Marvelous Transformations—reduces superfluous flesh wherever applied, restores *normal* figure in 30 treatments, gives size desired in 60 treatments, leaving flesh firm, smooth and unwrinkled.

FATOFF May Be Used in Your Hot Bath

Appointments for expert treatment at your home made by phone or letter.

Literature (mailed in plain sealed wrapper) will win instant conviction.

PRICES: FOR DOUBLE CHIN (A Chin Reducing Wonder) Special Size Jar, $1.50.

How Can You Do Without It?

It will make your lamps give a light four times as bright—more brilliant than an incandescent gas light. It will cut your oil bills in half, because it will make one pint of oil do the work of two pints.

THE INDEX INCANDESCENT KEROSENE BURNER

will fit any and all lamps you now may have on hand. Easy to light and no parts to get out of order. NO ODOR. NO NOISE. Absolutely safe. Actually will save you 50 cents a month on every lamp you burn.

WONDER FOR AGENTS

The Index Burner can be demonstrated on the spot. Everybody delighted. Liberal terms and exclusive territory for good men.

Write for Special Offer.

FREDERICK W. GOTTSCHALK,
97 Chambers St., New York City.

TRY THIS $8 DUPLICATOR

It does all the work and just as much as the high priced machines. Does it just as perfectly and just as quickly. It is much simpler, many times handier. Will last a lifetime. Produces from 50 to 150 copies in ten minutes at a cost of less than one cent for the entire printing. Each copy as clear and neat as the original. No printing ink needed. No mussing and soiling of hands. Copies cannot smear or offset. Prints from one to four colors at the same time.

FREE TRIAL Don't send a penny, simply say you want to give the Shapirograph a trial. We will send you one. Use it in your own office for five days. You run no risks—you place yourself under no obligations. See for yourself the work it does. How quickly, how neatly—how much time and labor it saves. If after five days' test you decide to keep the Shapirograph, send us your check and the machine is yours. If you don't decide to keep it, send it back. That's all there is to it. So send for one now and give it a trial.

THE SHAPIROGRAPH CO.
97 Chambers St., New York City.
Five days' trial—no obligation whatever.

Chalmers "30" Touring Car, $1,500

Pony Tonneau	$1,600
Roadster	$1,500
Limousine	$3,000
Coupe	$2,400

Chalmers Motor Cars

for 1911

remain the same as the cars that won the title of Champion Cars during two years of competition in contests of all kinds—road and track races, endurance contests and hill climbs—the same as the car that won the 1910 Glidden Trophy in the most strenuous of all endurance contests.

The Chalmers cars have, however, been made smoother running, more luxurious and more beautiful in construction, line and finish, through minor changes and superior workmanship.

Compare the Chalmers, point by point, with other cars—then buy the best at the price.

Chalmers "40" Touring Car and Roadster, $2,750; Torpedo Type, $3,000.

Assists Nursing Mothers
Rebuilds Overworked Physiques
Your System Needs Such A Food as This
especially at this time of the year when winter has left you so susceptible to the ravages of sickness and disease. At this time, more than any other, your body requires a pure, wholesome, predigested liquid that is easily and quickly assimilated—one that will build up wasted tissues and weakened muscles—one that will strengthen and actually impart energy and vigor and life. That is why physicians everywhere recommend the use of
Pabst Extract
The "Best" Tonic
a perfect food welcomed by the weakest stomach—containing all the nutritive and digestive properties of pure, rich barley malt and the quieting and restorative qualities of choicest hops in predigested liquid form. It is the ideal spring food —giving men and women just the right energy and strength to take their part in the battle of life.
Pabst Extract, The "Best" Tonic, is used all over the world to strengthen the weak and build up the over-worked; to relieve insomnia and conquer dyspepsia; to help the anaemic and turn nerve exhaustion into active, healthy vim; to encourage listless convalescence to rapid recovery; to assist nursing mothers and reinvigorate old age.
Order a Dozen from Your Druggist--Insist Upon It Being Pabst
Encourages Listless Convalescence
Free booklet, "Health Darts" tells ALL uses and benefits of Pabst Extract. Write for it, a postal will do.
Library Slip, good for magazines and books with each bottle.
The U.S. Government specifically classifies Pabst Extract as an article of medicine—not an alcoholic beverage.

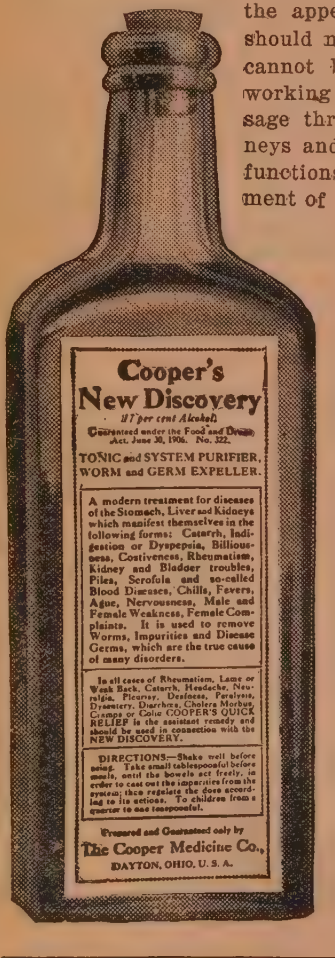
HOW'S YOUR STOMACH?

This question is becoming more vitally important every day. Sedentary and irregular habits of living have produced stomach trouble to an alarming degree among the American people. It is recognized as the curse of the century. Neglect or abuse of the digestive organs is responsible for untold misery.

In normal condition, a man or woman should feel hungry at meal-time—the appetite should be keen. And the food eaten should nourish the body to the fullest extent. This cannot be accomplished unless all the organs are working in harmony—the food must have a free passage through the system. The stomach, liver, kidneys and bowels must each perform their respective functions. Otherwise, they need attention. A treatment of



COOPER'S NEW DISCOVERY

will restore the organs to healthy activity, regenerate vitality, and assist nature in the process of recovery. It is the best tonic, system builder and blood purifier known to medical science. Stomach disorders of all kinds, indigestion, dyspepsia, catarrh, kidney, liver, bladder and bowel troubles, constipation, headaches, gastritis, distress after eating, etc., readily yield to its curative properties.

COOPER'S NEW DISCOVERY

is sold by all druggists everywhere.

Read How Two Men Made $12,000
A YEAR CLEAR PROFIT:

Successful Egg Farming

Among people who can afford luxuries there is a great demand for a regular supply of fresh eggs. The few growers who can furnish them **regularly**, Winter and Summer alike, get very high prices.

The Corning Egg Book

(entitled "**$6.41 Per Hen Per Year**"), tells how two men in poor health, starting five years ago, with only thirty hens, made from their little egg-farm a clear profit of **over $12,000** in 1908. It tells all about their experience, their failures, their methods; and how others, men or women with good sense, care and faithful work, can make money in the same way. Not a detail left out.

Here are some of the things that the CORNING EGG-BOOK tells:

The troubles of great hotels in getting reliable eggs.
The prices paid for CORNING eggs throughout the year.
The number of eggs sold each month throughout the year.
How to get the most eggs when other people get none.
When to hatch chicks that are to lay winter eggs.
How to grow juicy broilers in nine weeks.
How to mix the food that makes the most eggs.
How to have May chicks laying eggs in October.
How to prevent the drafts that kill chickens.
How to save 97 per cent. of the young chicks.
Why and how they make the hens scratch for food.
Why they send hens to roost with full crops.
How to make hens attend strictly to business.
Why they raise only white-shelled eggs.

Eleventh Edition now ready, revised and up-to-date.

The Corning Egg-Book is sold in combination with the Farm Journal, Philadelphia, Pa., and we have made arrangements to make this

Special Offer: For $1.00 (cash, money order or check), we will send postpaid the Corning Egg-Book and the Farm Journal for two years, and American Poultry Advocate two years—all for $1.00, if order is sent at once to

SPECIAL OFFER

FREE SEARCH OF PATENT OFFICE RECORDS

Send us a model, photograph or sketch and description of your invention, and we will make a *Free Search* of the *Patent Office Records* to ascertain if it is patentable. If we report the invention patentable, we will guarantee to obtain a patent or return our fee, and furnish a certificate of patentability backed by a bonded contract to that effect.

This Certificate of Patentability will protect the inventor and serve as proof of the invention until the case can be filed in the U. S. Patent Office.

VICTOR BUILDING
Our new $150,000 building, opposite the U. S. Patent Office, specially erected by us for our own use, designed and equipped with all modern appliances for our patent business.

OBTAINING ASSISTANCE FOR INVENTORS

Our certificate is of great assistance to inventors who require financial aid to obtain patents. It is useless to attempt to interest capital unless evidence is furnished that the invention is patentable. Our certificate gives this necessary assurance.

OUR FOUR BOOKS MAILED FREE

To any address. Send for these books; the finest publications ever issued for free distribution.

HOW TO OBTAIN A PATENT

Our illustrated eighty-page Guide Book is an invaluable book of reference for inventors, and contains 100 mechanical movements illustrated and described.

FORTUNES IN PATENTS

Tells how to invent for profit, and gives history of successful inventions.

WHAT TO INVENT

Contains a valuable list of Inventions Wanted and suggestions concerning profitable fields of invention. Also information regarding prizes offered for inventions, among which is

PRIZE OF ONE MILLION DOLLARS

offered for one invention, and $10,000 for others.

PATENTS THAT PAY

Contains fac-similes of unsolicited letters from our clients who have built up profitable enterprises founded upon patents procured by us. Also indorsements from prominent inventors, manufacturers, Senators, Congressmen, Governors, etc.

WE ADVERTISE OUR CLIENTS' INVENTIONS FREE

in a list of Sunday newspapers with two million circulation, in manufacturers' journals and in the *World's Progress*. Sample Copy Free. We also send a

LIST OF PATENT BUYERS

We not only save you time and money in securing patents, but obtain patents which PROTECT the invention and PAY. After the patent is granted we assist you

COUNTRY HOMES ON LONG ISLAND

For variety of scenery, for perfection of climate and other conditions that appeal to the lover of the Country Home, Long Island is the most tempting territory adjacent to New York City.

It lies between the Atlantic, with beautiful beaches along its southern shore, and the Long Island Sound. Upon the shores of the Sound and its picturesque bays are charming sites for Country Homes where magnificent views may be enjoyed amid surroundings of woods and meadow. The Central Section partakes of the characteristics of a farming country, and its soil and climatic conditions are admirably adapted to flower, vegetable and fruit culture.

Long Island's excellent school systems, churches of all denominations, clubs, and its delightful social life make it sought by those who desire a home outside of the city, but near enough to be quickly and conveniently reached.

Long Island Railroad trains now run under the East River to the Pennsylvania Station, New York City, Seventh Avenue and Thirty-second Street, the centre of New York's shopping, theatre, hotel and business district. The Interborough subway express trains run direct to the Flatbush Avenue station, Brooklyn, of the Long Island Railroad, reached from lower New York in ten minutes.

By these two great connecting links Long Island towns are brought in direct touch with up- and down-town Manhattan, the East River tunnels establishing a direct connection with the Pennsylvania Railroad for points South and West.

For specific information concerning Long Island, address the General Passenger Agent

Burpee's
Seeds Grow

Because they are thoroughly tested for vitality, genuineness, and quality of strain.

Because they are subjected to nature's laws upon which the planter must rely, and not to artificial methods beyond his reach.

Because Fordhook Farms at Doylestown, Pennsylvania, are the completest trial grounds in America, and the trial system in practice there is to show actualities, not theories.

Because thirty-three years in intelligent study and labor, experiment and experience have crystallized into positive knowledge which goes to the planter with every package of Burpee's Seeds.

Burpee's Seeds are the Best that Grow

Because they are so thoroughly and naturally tested; are fresh, clean and carefully handled; are of superior and definitely ascertained quality and produce true from the seed.

If you want the BEST SEEDS that can be grown, you should surely have a copy of

"THE SEAL OF QUALITY"

Burpee's Annual for 1911

so long known as the "Leading American Seed Catalog." WRITE TO-DAY.

SEED GROWERS,
Burpee Buildings, Philadelphia.

A Plan for HOME DECORATION FREE

VERY few people have any adequate idea of the beautiful and durable effects that can be produced simply and inexpensively by the use of the right paints, varnishes, stains, etc., in and about the home. For your information we have prepared this special Portfolio of ten color plates which illustrate a complete plan of decoration adaptable to the average house, both inside and out. Complete specifications are given to produce the effects shown, not only for the finishing of the walls, ceiling, woodwork, floors, etc., but also suggestions for the curtains and draperies, the rugs and furniture.

The outside suggestions include color schemes for the house to harmonize with any given background or setting, also definite suggestions for beautifying the grounds.

You can adapt any or all of the color combinations in our Cottage Bungalow or our Decorative Department will prepare special suggestions upon receipt of blue prints, drawings or descriptions of your home or other buildings. If you are interested in home decoration, by all means send for our Cottage Bungalow Portfolio today. Sent free on request.

NATHAN'S FOOT SPECIALTIES

For Weak Ankles Use **Nathan's Patent Ventilating Corset Ankle Support**

Good for sprained ankles, children learning to walk, Skating and Athletics. Are recommended by surgeons and physicians.

Nathan's Patent Anti-Crooked Heel Cushion
Keeps shoes from running over. Worn inside of shoes.
It's a pleasure to walk with them.
Price, 35c. pair, all sizes.

The arch of the foot is held together by various sets of ligaments whose tendency is to droop and weaken. This causes pain in the muscles of feet and ankles, and often extending to calf, knee, hip and back. The relief is simply by the insertion in the shoe of

Nathan's Flexible-Cushioned No-Metal Arch Support.

It is easily adjusted to any shoe and flexes readily with the muscles of the foot. Equipped with Nathan's Arch Supports any one can enjoy walking without the slightest annoyance from sore feet. The supports should be worn by everyone to protect the arch, if it be strong, and to relieve and strengthen it, if it be weak. Send for booklet W. A. on our various ankle supports, arch supports, heel cushions, etc. It tells a simple method to find out whether or not you have a falling arch or flat foot. FREE on request

CATARRH CURED, NO CURE NO PAY.

A Complete Home Treatment for the Nose and Throat

The Paris Medicine Company, 2622-28 Pine Street, St. Louis, Mo., manufacturers of LAXATIVE BROMO QUININE, GROVE'S TASTELESS CHILL TONIC and other standard preparations, have a new discovery—

Grove's New Discovery for Catarrh

and a recently invented device by which this new discovery can be applied to the nose as easily as brushing the teeth. If used according to directions it cures and prevents CATARRH and bad breath. No matter how clean the mouth may be kept, if the nose is not clean and healthy, the breath will be bad. The PARIS MEDICINE COMPANY wish to supply THIS COMPLETE OUTFIT to any sufferer from CATARRH, with the definite understanding that it will cost nothing if you are not satisfied. Price of Grove's New Discovery for Catarrh 50c; price of Grove's Throat and Mouth Antiseptic 25c; price of Grove's Common-Sense Nasal Douche 25c. If your druggist hasn't it, simply send us 50c in stamps, and we will send the COMPLETE OUTFIT to you by mail. If you are entirely satisfied, after using the treatment, you may send us the balance of 50c, otherwise we will, without question, return the 50c which you have already sent. Any druggist will tell you we will do exactly what we say. We make this liberal offer because of our great confidence in this remedy and knowing that every one that uses it will recommend it to their friends.

This May Be Your Last Opportunity

To Receive
A 25c Bottle of
Sandholm's Eczema Lotion and Dandruff Remedy—FREE

Hundreds of sufferers from skin and scalp diseases have been permanently cured with this small trial. All who have used it have been greatly benefited, and when the treatment was faithfully continued a complete and permanent cure was the reward.

Our Offer:

FREE Large Trial FREE

As in the past years, we will again give to readers of the World Almanac who have never used our remedy one **25c. Size Trial Bottle SANDHOLM'S ECZEMA LOTION AND DANDRUFF REMEDY** absolutely **FREE.** All we ask is that you inclose 10c. in stamps to help defray the expense of postage and packing, and the trial will be sent promptly, charges postpaid. **Write today** and sign your name plainly.

Note—10c. in stamps must accompany your letter, and only one trial bottle will be given to any one family.

If you are troubled with Eczema, Dandruff, Sunburn, Scalp Eczema, Scald Head, Barber's Itch, Cuban Itch, Doby Itch, Tetter, Hives, Enlarged Pores, Insect Bites, Falling Hair, Pimples, Blackheads, Acne, Salt Rheum, Psoriasis, Oily Skin, Redness of the Skin, Old Sores, &c., YOU NEED SANDHOLM'S ECZEMA LOTION AND DANDRUFF REMEDY. It is used externally and shows beneficial results right from the start.

It Cures By Absorption.

Use it on your scalp—it is the best Tonic for the hair known. It kills the Dandruff Germ. Use it on your face—as a massage it has no equal.

For sale by all leading druggists and barbers. Three sizes—25c., 50c. and $1.00. If your dealer will not supply you, send direct to us. We prepay express charges on the $1.00 size bottle.

Guaranteed under the Pure Food and Drugs Law of June 30, 1906. Serial No. 1646.

A LIVING FROM POULTRY

$1,500.00 from 60 Hens in Ten Months on a City Lot Forty Ft. Square.

To the average poultryman that would seem impossible, and when we tell you that we have actually done a $1,500 poultry business with 60 hens on a corner in the city garden, 40 feet wide by 40 feet long, we are simply stating facts. It would not be possible to get such returns by any one of the systems of poultry keeping recommended and practised by the American people, still it can be accomplished by THE PHILO SYSTEM

Photograph Showing a Portion of the Philo National Poultry Institute Poultry Plant Where There Are Now Over 5,000 Pedigree White Orpingtons on Less Than a Half Acre of Land

The Philo System Is Unlike All Other Ways of Keeping Poultry,

and in many respects just the reverse, accomplishing things in poultry work that have always been considered impossible, and getting unheard-of results that are hard to believe without seeing.

The New System Covers All Branches of the Work Necessary for Success

from selecting the breeders to marketing the product. It tells how to get eggs that will hatch, how to hatch nearly every egg and how to raise nearly all the chicks hatched. It gives complete plans in detail how to make everything necessary to run the business and at less than half the cost required to handle the poultry business in any other manner.

Two-Pound Broilers in Eight Weeks

are raised in a space of less than a square foot to the broiler, and the broilers are of the very best quality, bringing, here, 5 cents a pound above the highest market price.

Our Six-months-old Pullets Are Laying at the Rate of 24 Eggs Each per Month

in a space of two square feet for each bird. No green cut bone of any description is fed, and the food used is inexpensive as compared with food others are using.

Our new book, THE PHILO SYSTEM OF POULTRY KEEPING, gives full particulars regarding these wonderful discoveries, with simple, easy-to-understand directions that are right to the point, and 15 pages of illustrations showing all branches of the work from start to finish.

Don't Let the Chicks Die in the Shell

One of the secrets of success is to save all the chickens that are fully developed at hatching time, whether they can crack the shell or not. It is a simple trick and believed to be the secret of the ancient Egyptians and Chinese which enabled them to sell the chicks at 10 cents a dozen.

Chicken Feed at 15 Cents a Bushel

Our book tells how to make the best green food with but little trouble and have a good supply any day in the year, winter or summer. It is just as impossible to get a large egg yield without green food as it is to keep a cow without hay or fodder.

Our New Brooders Save Two Cents on Each Chicken

No lamps required. No danger of chilling, over-heating or burning up the chickens as with brooders using lamps or any kind of fire. They also keep all the lice off the chickens automatically or kill any that may be on them when placed in the brooder. Our book gives full plans and the right to make and use them. One can easily be made in an hour at a cost of 25 to 50 cents.

SPECIAL OFFER

Send $1.00 for one year's subscription to the Poultry Review, a monthly magazine devoted to progressive methods of poultry keeping, and we will include, without charge, a copy of the latest revised edition of the Philo System Book.

6 MONTHS' FREE TRIAL

In your own way, at your own work, try this Carborundum grinder free for six months, then if you wish send it back—the six months' use will cost you nothing. Prove how you can sharpen all kinds of tools with no danger of drawing temper, and do it 8 times faster than with emery wheels, 25 times faster than with grindstones.

Mechanics' Special Hand Power.

25 Times Faster than Grindstones

8 Times Faster than Emery.

LUTHER DIAMOND TOOL GRINDERS

are standard of the world, mechanically perfected, with genuine carborundum wheels made by the largest exclusive manufacturers of hand and foot power grinders in the world. Machine parts run in oil bath, spur cut gears, bronze dust proof bearings, malleable and steel construction—in every way is a compact and durable machine, and a wonderful work and tool saver.

Mechanics' Special Foot-Power, with Twist Drill Attachment.

CARBORUNDUM WHEELS CUT STEEL AS EMERY DOES COPPER.

Carborundum, the artificial diamond crystals produced in the intense heat beyond the measurement of science, scratches the genuine diamond itself. The hard, sharp crystals peel hardest tempered steel away in finest shavings, sharpening your tools by **cutting** steel away, **not wearing** it away. No pressure needed, no need of cooling with water. Special attachments enable inexperienced persons to do difficult grinding, such as gumming saws, sharpening twist drills, etc.

NO OBLIGATION OR RISK.

Send back this coupon for six months' free trial offer and an interesting booklet about Carborundum. Sharpen your own tools six months free; prove how this grinder saves work and saves tools—no risk or obligation of any sort. Return this coupon to-day for six months' free trial offer.

There are two classes of buyers who prefer

The Superb Haynes

To each of these classes this unusual car at $2,000 is an ideal car. You probably belong to one of these classes.

The first class is represented by those who could easily pay *two or three times* two thousand dollars, and who are only concerned in getting a car of reputation, proven merit and refinement.

The Haynes gives to such buyers everything they could expect to get if they were asked to pay an exorbitant price *for the famous Haynes name.*

The other class of buyers are those who *prefer* to pay *less* than two thousand dollars, but who insist upon *economy of operation* and recognize the big saving involved in buying a car built as the Haynes is *known* to be built.

To such buyers the purchase of a Haynes is a hard-headed, long-headed business deal—a purchase for the future as well as for the present.

The Haynes Model 20 for 1911 is a car of beautiful lines, an abundance of power (35-40 H. P.), 114-inch wheel base, and plenty of tonneau room.

The price of $2,000 includes *complete* equipment, of the best grade obtainable. For example, a big Type B Prest-o-lite tank is furnished instead of the customary small size, and the famous Warner Auto-Meter is put on *every* car. (Only a speed indicator of this quality is entitled to be used on a Haynes).

In addition to this Model 20, we will also build for 1911 a limited number of big seven-passenger cars of 50-60 horsepower for those who prefer a car of this size.

Ask for literature regarding these cars before you commit yourself to *any other make.*

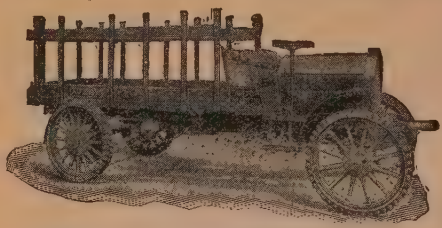
The Haynes name and reputation is your best possible safeguard in purchasing a car.

Haynes Automobile Company

275 Main Street ***Kokomo, Indiana.***

Licensed Under the Selden Patent.

AVERY POWER WAGON—FOR CITY OR FARM USE



THE AVERY FARM TRACTOR AND CITY TRUCK.

A Gasoline Farm Wagon and General Power Machine for the farm. A General Hauling Truck for city and town. For the farm it hauls all kinds of loads on its own body—pulls harrows and other farm machinery in the field—drives saws, threshers, etc., by belt power. It's the all-around Farm Power Machine that every one has been looking for for medium-sized farms. Many in successful use. For city it takes the place of from two to three teams and reduces the cost of hauling by a large per cent.

Ask for either our Farm Tractor or City Truck catalog, or both.

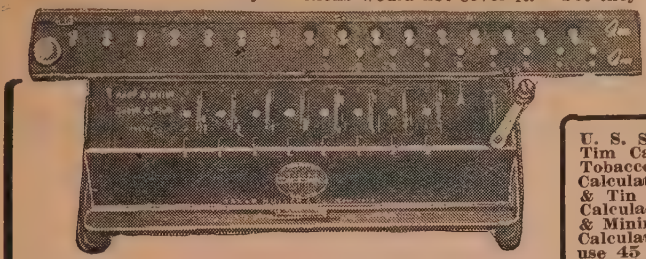
The Mightiest Institutions of Modern Times Use the Tim Calculating Machine

Because it has proved to their satisfaction that its calculations are accurate; because it calculates anything in a minimum of time, with a minimum of effort and expense. These concerns have money—millions would not cover it. Yet they chose the Tim. It could not have been price. It must have been quality of service, speed, accuracy and adaptability.



U. S. Steel Co. use 150 Tim Calculators; Amer. Tobacco Co. use 75 Tim Calculators; Amer. Sheet & Tin Co. use 50 Tim Calculators; Oliver Iron & Mining Co. use 25 Tim Calculators; Nat. Tube Co. use 45 Tim Calculators.

TIM CALCULATING MACHINE

Multiplies, Divides, Subtracts, Adds.

No matter what your business may be, it will have no more complicated problems than these immense organizations, with their intricate systems. And as the Tim can handle the work of such organizations, it will just as surely handle YOURS better than any other calculating machine. And its saving will be equally great on simple calculations as on the most complex. For if you want the best results in YOUR business, you need such a machine as the Tim. You need to see WHY it was that these big enterprises with money enough to buy the greater part of the calculating machine industry chose to use the Tim. **Will you merely find out?** Will you simply write me a note to-day and ask me to show you what it was that won the way for the Tim? I will tell you completely by return mail. Write to-day.

You Don't Have to Start With a *Strange* Crop!

in Oklahoma. Oklahoma is an *all-round* farming country with all-round conditions for all-round crops. Whether you are a wheat, corn, dairy, fruit or truck farmer, *your* experience, if transferred to Oklahoma's *richer* soil, *cheaper* land and *longer* growing season would *speed* up your gait to the goal of independence. All the crops that you now grow can be raised

in OKLAHOMA

Right now in Oklahoma there are thousands of acres of rich prairie land, practically *ready* to plow, that can be bought on easy terms at *bargain* prices—but every month means less land to be had and more money needed to buy it. The time is soon coming when this land will have doubled in value, and you can look back then and be *glad* that you got hold of it to-day when it is *cheap.* Twice each month the M., K. & T. Ry. runs low fare excursions to Oklahoma. Thousands of farmers are taking advantage of them to look into the good things Oklahoma offers. You should be among them—plan to go now.

The more you know about Oklahoma the more you'll want to know—after reading our interesting free booklet, you will be surer than ever that *your* opportunity is there. Let me send you this book—your name on a postal card asking for Book B will bring it—write *to-day.*

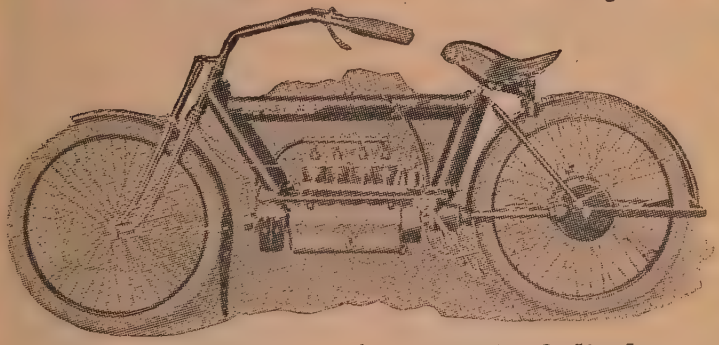
PIERCE

Pierce Vibrationless Motorcycles



Four Cylinder

In every industry there is one article or line that stands out ahead of all others. Among motorcycles, the Pierce Four Cylinder is premier. There is neither argument nor question. He who wants **the best motorcycle for any purpose** and seeks full value for his investment will purchase the Pierce Four Cylinder.

Single Cylinder

This, too, is a distinctive model, replete with advanced features of design and construction. For its purpose, which is doing everyday work in a workmanlike manner, it has no superior, and the moderate price serves to render it very popular among discriminating motorcycle riders.

PIERCE BICYCLES

Pierce bicycles have been manufactured for twenty years and during that time they have always been recognized as being in advance of all competition. Superiority in design and construction is an attribute of all Pierce products. We offer both chain and chainless models, made in rigid and cushion frames. Pierce bicycles will give service for ten or fifteen years, and not even the smallest detail of construction can be criticised. Frank L. Kramer, America's Champion bicycle rider, uses the Pierce as his exclusive mount.

BEST CATARRH DOCTOR

CURES CATARRH, ACUTE OR CHRONIC, OR MONEY BACK. FREE SAMPLE.

Exact Size

Would you pay one dollar to rid yourself of disgusting catarrh? Then go to-day and ask your druggist for a HYOMEI (pronounce it High-o-me) outfit and you will not only engage, but you will own outright a little catarrh doctor that has cured more cases of catarrh than all the catarrh specialists on earth.

In the box which contains the HYOMEI outfit you will find a little hard rubber vest pocket inhaler.

Into this inhaler you pour a few drops of HYOMEI. Then breathe through the little inhaler, either through the nose or mouth, according to where the catarrh is located.

When you breathe HYOMEI you breathe a powerful yet soothing antiseptic air which penetrates every fold and crevice and destroys germs completely.

Stomach dosing never cured catarrh; sprays and douches always fail; and why? Because they don't get where the germs are, and as catarrh is a germ disease you must kill the germs before you can cure catarrh.

HYOMEI is sold by druggists everywhere and guaranteed to cure catarrh, coughs, asthma, colds, croup and sore throat. HYOMEI contains no opium, cocaine or other injurious drug. It is made from Australian eucalyptus, combined with listerian antiseptics. **Complete outfit $1.00. Extra bottle, if needed, 50c. Mail orders filled, charges prepaid, by Booth's Hyomei Co., Dept. W. A., Buffalo, N. Y. Free trial sample on request.**

Obtained Superb Figures By this Free Treatment

Every woman wants to be attractive. A beautiful bust, prettily rounded neck and shoulders, smoothly moulded limbs are woman's greatest charm.

So absolutely sure are we that we can give every woman the additional flesh essential to a perfect figure, that we are willing and anxious to take all the risk and prove it at our expense.

No matter whether your thinness is caused by sickness or inheritance, Dr. Whitney's Flesh Builder will permanently build up and beautify your figure. It acts directly on the fat-producing cells and fills out all the hollow places.

Thousands of women owe their superb figures to my treatment. It will enlarge your bust measurement from two to six inches, round out your shoulders and arms, and develop your limbs. The free trial treatment proves this.

Remember, I am making this demonstration without cost to you. Nor does it involve any obligation on your part to purchase. This is a purely vegetable compound. Absolutely harmless. Different from anything you have ever seen or heard of.

If you are thin, you are not fair to yourself if you don't take advantage of this generous offer. So write to-day for your Free Treatment.

"Treatment No. 1" is a general system flesh builder for both men and women. "Treatment No. 8" is for giving development to the bust. Please say which treatment you prefer. Only one can be had.

Be sure to write to-day, NOW. This offer may be withdrawn any time. Address **The C. L. Jones Company, 50 Friend Building, Elmira, N. Y.,** and a generous free trial will be sent you in a plain package by return mail.

FRECKLES

How You Can Easily Remove These Unsightly Spots.

There is a reason in the climate why nearly everybody in this country freckles, but happily there is also a cure for the ugly blemishes, and no one need stay freckled.

Simply get from your druggist an ounce of othine, double strength, and apply a little of it to the freckles at night, and in the morning you will see that even the worst have begun to disappear while the light ones have vanished entirely. This wonderful drug, othine, double strength, is an absolute remedy for a freckled complexion, and druggists generally have so much faith in it that they sell it upon a guarantee to refund the money if it fails to remove the freckles.

No one should allow a beautiful complexion to be spoiled by freckles now that othine, double strength, can be obtained in almost every town and city.

OXYDONOR

Restores the Health if Sick Preserves the Health if Well

No matter from what disease you are suffering; no matter how long you have been sick; it is always possible that by using **OXYDONOR** you may be restored to good health, as thousands of people have been.

OXYDONOR revitalizes the devitalized blood by causing the body to absorb large quantities of oxygen, thus restoring the blood to its normal health-resistance of disease.

EVERY FORM OF DISEASE may therefore be successfully treated with **OXYDONOR** at any reasonable stage.

Mr. George B. Goodale, President Detroit Free Press Co., Detroit, Mich., writes: "I would not voluntarily forego the benefits of OXYDONOR for a deed in fee simple of Greater New York."

Send for free Books to-day.

There is but one genuine **OXYDONOR.** That has but one cord and Dr. Sanche's name on the metal.

GROTON, NEW YORK, U. S. A.

Agencies All Over the World.

Notice to

Commercial Traveling Men

The Start with Forty-Nine Members.

This Association was organized over twenty-eight years ago, with forty-nine charter members—all of them COMMERCIAL TRAVELERS.

The Object.

Our aim is always to give to this class of business men protection against loss resulting from all kinds of Accidental Injuries, and this object has never been lost sight of. We wish to make this very plain, for we are addressing COMMERCIAL TRAVELERS—who have reason to be vitally interested in the facts.

Insurance at Actual Cost.

No Commercial Traveler can afford to be without the protection this Association gives him. We offer Accident Insurance at actual cost, charging our members only what it costs to carry on the business and no more.

Benefits None Better.

Weekly Indemnity, 100 weeks, $25; loss of one eye, $1,000; loss of one leg and one arm, $5,000; death by accident, $5,000; loss of both arms or legs, $5,000; loss of both eyes, $5,000; loss of one arm or leg, $2,500.

More Than Twenty-Eight Years of Success.

For more than twenty-eight years this Association has been issuing Accident Insurance to Commercial Travelers at an average yearly cost of $7.75, the highest cost having been $9.00.

The Reserve Fund Makes It Financially the Strongest.

A reserve fund of over $500,000 (including building) has been accumulated, which makes this Association financially the strongest of its kind in the world.

A Membership of More than 66,000.

The membership now is more than sixty-six thousand, which makes this Association the largest of its kind numerically.

A Steady Growth.

Since its organization in 1883 the Association has grown steadily, not one year having passed in which no increase was shown. The first year we had a membership of five hundred and thirteen. To-day, as we have said, we have passed the sixty-six thousand mark.

Nearly Four Million Dollars of Prompt Payments.

The payments to members and their beneficiaries are made promptly. The first year we paid $774.78. Last year (1909) over $410,000.00, and the grand total for twenty-eight years is nearly *four million dollars.*

The following are the names of the officers of the Association, well known Business Men who are actively interested in its steady growth and prosperity:

HENRY D. PIXLEY, *President.* GEORGE S. DANA, *Secretary and Treasurer.*

PATENTS

Franklin H. Hough, Washington, D. C.

Law Offices, Washington Loan & Trust Bldg.

Member of the bar of the Supreme Court of the United States. Patent Practice before both the Courts and Patent Office. Patents secured in the United States and in all foreign countries. Searches made and opinions rendered as to scope and validity of patents, and fee for services in prosecuting applications before the U. S. Patent Office **contingent upon success in securing the patent.**

The value of a patent in all cases depends upon its scope and validity; therefore an invention should be intrusted to an experienced attorney, who will secure a patent which will fully protect the invention.

As a guarantee that business intrusted to me will receive prompt and careful attention, I place at the service of my clients an experience of more than twenty-five years' continuous practice before the courts and Patent Office. I insist in all cases upon **the grant of such patents as will fully cover every patentable feature involved in the invention and afford the greatest possible degree of protection.**

A large proportion of applications for patents are rejected. The prosecution of many of these are intrusted to attorneys who require full payment of their fees at the time of filing the applications and who may not exercise the same degree of energy in their efforts to secure the patents that they might had payment of their fee depended upon their success. I am frequently able to revive applications thus rejected and to prosecute them to an allowance of the patent.

In all cases in which I examine the Patent Office records and report that in my judgment I will be able to secure a patent, **I back my judgment by making my fee contingent upon my success in securing the patent and not payable until it is officially allowed.**

A booklet containing full instructions as to the course to take in securing patents, a statement as to fees, addresses of inventors in all sections of the country for whom I have secured patents and much other valuable information furnished free upon request. Send for "INVENTOR'S GUIDE."

Port Huron Mich
Dec 24th 1910

Mr Franklin H Hough
Washington D.C
My Dear Sir

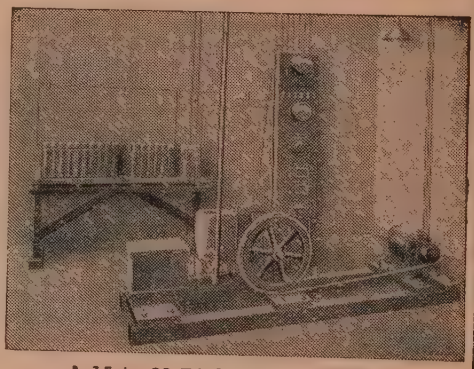
I am more than pleased with the splendid work you have done for me, as I look upon the claims you secured as first class in every way and your promptness has been a revelation to me. You may expect some more work from me even in fact of what you have done for me is a fair sample of your regular work you may expect all my work in the future

Yours very truly
John W Avery

How To Light Your Home By Electricity

THE use of electric lights—the most brilliant, safe, convenient and economical form of illumination—is now within the reach of every one.

If you don't live near a public lighting station you can now have your own electric lighting plant. A plant is inexpensive—$350 and up—is absolutely reliable, occupies only a small space, and is so simple that you can install and operate it yourself. A complete plant consists of a small gas engine, dynamo, switchboard and storage battery. Plants are in use all over the country and are guaranteed as represented by us.



A 15 to 20 Light Electric Plant.

You need only run the engine occasionally to charge the battery. The battery stores electricity ready for use at any time of the day or night. The storage battery is called

The "Chloride Accumulator"

It is the same battery as is used by the Electric Lighting Companies in New York, Chicago, Philadelphia, Boston and in many other large and small cities.

Write any of our Sales Offices to-day for one of our new books, "Electric Light Plants for Rural Districts." It will interest you.

For Automobile Owners

If you have experienced ignition troubles they can be eliminated by the use of the "Exide" Sparking Battery—a battery which will give a spark to develop the full horse-power from your engine.

If you operate an electric vehicle, remember that the "Exide" battery will give you the best possible service. Evidence of its superiority is the fact that it is used in over 90% of all "Electrics" manufactured.

Horse and Buggy 2 1/2 cts.
per passenger mile

I've Proved Just What You Want To Know

I invited the Contest Board of the American Automobile Association to conduct this test, in order that it might be in disinterested control. The Board appointed judges to attest its results. The two vehicles ran each day over a predetermined route about the streets of New York City and suburbs. Each ran continuously for six hours, regarded as a normal day's work. Account was kept of every item of expense entailed. The needs of each vehicle were supplied at roadside stores at current market prices.

It proved beyond dispute that the Maxwell Runabout is undoubtedly economical; that its pleasures are within the reach of men of moderate means; that it can travel three times as far, in the same time, as the horse and buggy, and, unlike the latter, can repeat the performance if found necessary; that its cost is about one-half; that it needs little or no care, as against constant care, and that while not in use expenses stop, while with the horse and buggy expenses never stop; that the Maxwell car is an efficient, economical, reliable, utility automobile, as near perfection as modern workmanship can make it.

J. D. Maxwell *President.*

Model "T-C" Truck, Full Panels...$1,350

Over bad roads—over good roads, in crowded streets—along open stretches, the CARTERCAR rolls on.

"I never had my hand on the throttle of an automobile until a week ago. I now run my CARTERCAR anywhere, up hill and down, on high or any speed without trouble of any kind," states a Portland, Oregon, man.

"I wouldn't trade my CARTERCAR for a factory full of the other two kinds I have owned," writes a New York owner.

The CARTERCAR is a simple car—it has but a few parts.

An inexperienced person can drive a CARTERCAR without injury to its mechanism.

The CARTERCAR has a Friction Transmission and Chain-in-Oil Drive.

Because of this, a very high percentage of the power developed in the motor is delivered to the rear wheels.

The CARTERCAR has no clutch to slip—no gears to strip—no grease packings to renew—no universal joints—no shaft drives—no bevel gears—and best of all, no noise.

It is controlled by a single lever, making it still easier to operate.

The Model "H-A" shown above has a 4-cylinder motor, 4-inch bore and 4-inch stroke, rated at 25 h.-p. It is roomy, stylish, substantially built, and an exceedingly practical automobile for hard service. Comes equipped with magneto, gas lamps, oil lamps, generator, tools, etc., and costs but $1,100.

Get the catalogue showing other models.

Warren-Detroit "30"

Standard Construction —But MORE than Standard Value

If every reader of this Almanac knew exactly what we meant by the words **"STANDARD CONSTRUCTION BUT MORE THAN STANDARD VALUE"** and knew how we had lived up to its full significance in the Quality and Price of the Warren-Detroit "30" there wouldn't be enough of them to go around.

We're going to try and tell you a little of what we mean here—and then we want you to send for our big, handsome catalogue showing ALL the Warren models—eight of them, ranging in price from $1,250 to $1,750.

First it means that the Warren "30," outwardly, is **STANDARD** in design—nothing freakish or experimental—that in beauty of outward lines—body design, finish, style, &c., it is not surpassed by any car.

Then it means that inside, the engine, the transmission, the axles, the wheels, the tires, the Bosch Magneto, the high-grade coil and the other vital parts that make this high-grade car, are all of the most approved standardized types.

And then we go a step further and say: "It means that in Quality of Workmanship and in Quality of Finish we excel any car near our price. The Warren '30' is so well built that it could just as well be sold for several hundred dollars more than we ask."

All this means that when it comes to **POWER, EASE OF RIDING, EASE OF CONTROL, EFFICIENCY AND ECONOMY OF OPERATION** the buyer of a **WARREN "30"** gets more for his money than he can get in any other car.

NOTE—We don't say that ours is the only good car, but we do say that when it comes to real bang-up automobile value you get MORE for your money in a Warren "30" than in any other machine built—bar none.

Now it's plainly up to you to learn more about the

Warren "30"

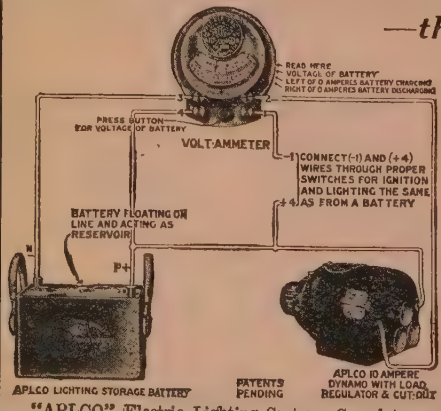
Light Your Automobile or Motor Boat the Modern Way

—the Electric Way



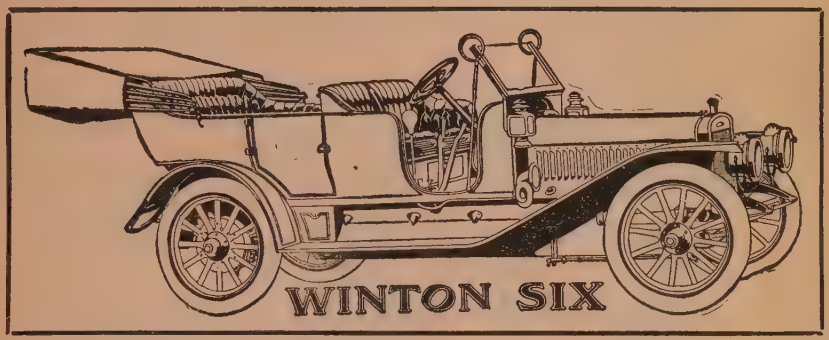
"APLCO" Electric Lighting System, Complete.

"APLCO" ELECTRIC HEADLIGHTS throw powerful beams of sunlight ahead of your car at night. A number of the users of **"Aplco"** Electric Lighting Systems for automobiles say, "We can see as far at night as in daylight," all by simply pressing the button. With the **"Aplco"** system you are always assured an abundance of electricity for accomplishing this, as it is generated on the car with your engine's power with the **"Aplco"** automobile dynamo positively geared to the engine. The **"Aplco"** system is so perfected that it can be installed on all makes of cars.

Write us giving the make and model of your car or boat, and we will send illustrated bulletins and recommend and price the proper equipment for a complete installation.

APPLE ELECTRIC COMPANY, 36 North Canal St., DAYTON, O.

What You Get When You Buy a



1—The highest type of car—a six-cylinder. And these are six-cylinder times.

2—A car that in four years of success has not required a single radical change in construction. It is a **standard** product, **not an experiment.**

3—The only motor in the world that **cranks itself.** A wonderful convenience and a labor saver.

4—A smooth-as-velvet 48 H. P. motor, with cylinders offset and every working part fully housed. Multiple-disc clutch and four-speed selective transmission, running on finest ball bearings. Bosch magneto and Exide storage battery. Winton-Stromberg carbureter. Frame narrowed in front to permit short turns, and raised over rear axle to allow low suspension of body and motor. Drop-forged front axle. Full floating-type rear axle.

5—A sweet-running, quiet, comfortable car, practically free from vibration.

6—A magnificent hill-climber.

7—An exceptionally flexible motor, doing 99 per cent. of its work on direct drive, minimizing gear shifting and saving fuel.

8—A motor absolutely free from wasteful "dead centers."

9—A motor having **continuous power,** saving gasoline, oil and tire expense.

10—The car that holds **the world's lowest upkeep record** — 77 cents per 1000 miles. Record made on 184,190 miles of travel by cars in service of individual owners. Sworn reports.

11—The product of that company which founded the American automobile industry, and has, therefore, a longer manufacturing experience than any other American company.

12—The product of the first company in the world to make six-cylinder cars exclusively. We have specialized on sixes since 1907.

13—The product of a company that stands behind its product all the time. As long as you use a Winton car, you will find the Winton Company actively interested in your successful enjoyment of your car.

14—A car of highest grade at the lowest possible price, $3000. Compare the Winton Six with the best other cars brought to your notice, and observe that in every such instance you are asked to pay a higher price for a car that cannot show higher quality.

Our catalog tells a plain, forceful, easily-understood story.

THE BAKER BURGLAR-PROOF METALLIC GRAVE VAULT

HOW WILL YOU BURY YOUR FAMILY?

This is a very important question that is worthy of your careful consideration now.

To-day death in your family may seem far in the future. But what may happen to-morrow? When death comes in your family you must think about burial then; but this is not the best time to reason out in your own mind just what will suit you best.

The last and final tribute of respect is worthy of much consideration. If by some oversight we should neglect to show some attention to the living, mistakes of this kind may be rectified, but mistakes by neglect at burial can never be. These regrets will linger with us through life.

If you are wealthy and can afford a modern mausoleum this is the ideal way to protect the remains of your dead. But mausoleums are beyond the reach of the masses, and their dead are just as dear to them and deserve just as much protection.

By using a Baker Grave Vault you can furnish practically as much protection and show just as much respect at a nominal cost, and at the same time provide a beautiful resting place for the dead.

Baker Vaults are made from heavy steel plates and malleable iron, securely riveted and caulked, and are just as water tight as any steam boiler. Ten massive concealed locks make them absolutely Burglar Proof. The lower part may be placed in the grave and cement flange filled with our special sealing cement in advance. All that is necessary at the burial is to lower the top into position. The locks work automatically and are practically noiseless. The horror of the grave is greatly modified by the presence of this massive and highly finished vault.

THE CHAMPION CHEMICAL CO.,
SPRINGFIELD, OHIO.

33 years manufacturing undertakers' supplies.

Write for illustrated booklet.

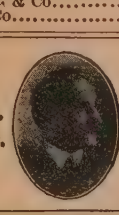
PROF. CRAIG.



Landscape Gardening

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes. **250-page catalog free. Write to-day.**

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

The Home Correspondence School, Dept. 99F, Springfield, Mass.

MONEY-MAKERS!

SEND 10 CENTS

to J. H. Goodwin, room 889, 1215 Broadway, New York, for a bunch of leaflets entitled "The NUTSHELL," advertising a three-dollar course in **BOOK-KEEPING.** Hand or send out these leaflets to persons INTERESTED in this subject, AND RECEIVE $1 IN CASH FOR EACH RESULTANT ORDER.

MICHELIN

"SEMELLE"

Anti-Skids

Prevent skidding, insuring car and passengers against accident and possible serious injury.

Tough, Flexible, Non Puncturing Leather Tread

Firmly Imbedded Hardened Steel Anti-Skid Rivets

Michelin Anti-Skids are easy riding, as the resilient rubber side walls are NOT confined by the leather tread.

ELECTRO-CHEMICAL RING

Copyright, 1894, '5, '6; 1902, '4 *and* 1909, *by W. G. Brownson.*

Reference, Northern National Bank, Toledo, Ohio.

THE following diseases are caused by acid in the blood and are cured by this ring, which takes from one day to two weeks, after the ring commences to work: according to disease and circumstances. The ring and the acid create an electro-chemical action, removing the excess of acid, which cures the disease and will keep it cured.

Bright's Disease. Diabetes—it is not a habit with children. Chorea—St. Vitus's Dance, Chlorosis—green sickness—Painful and Excessive Monthly Periods. Uremia, Syncope, Epilepsy, Nervous Prostration, Nosebleed, Internal Hemorrhages, Rhinolith—a stony concretion formed in nose—Adenoids, Polypus, Cataract, Goitre, Whooping Cough. Rheumatism—inflammatory, Gout, Lumbago, Articular, Sciatic, Muscular. Asthma, Headache, Neuralgia, Neuritis, Valvular Rheumatism of Heart, Rheumatic Fever, Rheumatic Paralysis—Brain, Hair, Eyes, Ears, Limbs. Pen, Operators, Typewriters. Dropsy, Obesity, Fatty Degeneration of Heart. Appendicitis—Inflammation of Bowels, Chronic Dysentery, Acidity of Stomach, which causes the worst kind of constipation—the other is caused by liver disease. Cancer—carcinoma, Cancerous Tumors, Congestion of Kidneys. Stone in Bladder, Prostatitis, Gravel, Gall-Stone, Calculi. Deposit on Teeth, White Spots on Nails. Psoriasis, Salt Rheum. Varicose Veins and ulcers. Varicocele—varicose veins in scrotum. Varicose Veins and Ulcers in Rectum—often mistaken for piles and fissure. The after effects of Diphtheria, Scarlet, Typhoid and Malarial Fevers.

This ring is not a cure-all. The ring will not cure liver disease and none of the liver diseases.

The ring will not work—deposit on ring and finger—unless it is necessary, but when it is necessary, it will work every second day and night, if it is a good fit and is used and cleaned as directed.

Price $2.00; Gold-covered $4.00. By Mail or will send by Express, Collect on Delivery, if you wish to pay charges. Send paper size of finger. Agents wanted at places not taken. Send for additional information. The $2.00 ring is sold on a three weeks' guarantee; ring can be returned and money will be refunded if not satisfactory. Not for sale by jewelers or druggists. Any person who uses our name or copies from our advertising is fraudulently trying to do business on the reputation of this ring and will be prosecuted.

This ring is not for sale by wholesale houses or any person advertising cheap rings and can only be obtained from us and our authorized agents.

PEOPLE WHO ARE SUBJECT TO RHEUMATIC, KIDNEY AND ALL ACID DISEASES HAVE EXPERIMENTED FOR HUNDREDS OF YEARS AND SPENT MILLIONS OF DOLLARS, TAKING AND APPLYING REMEDIES. The time will certainly come when intelligent people will not submit to be experimented with, to see if a medicine can be made to cure acid diseases.

Any reputable physician will advise you that a permanent cure in that manner is impossible, as the acid is liable to accumulate again at any time, after you quit using the best remedies or any other treatment. That acid in the blood caused a limited number of diseases has always been admitted, but the knowledge of the fact that an excess of acid is the cause of so many diseases of hitherto unknown pathology has been a revelation to the medical profession.

By the use of the Electro-Chemical Ring the best results are obtained by an electro-chemical action, as it acts directly on the acid; reducing the intensity and quantity, until there is no surplus, when the ring will quit working, and will work only when it is necessary to keep the acid reduced.

ELECTRO-CHEMICAL RING CO.

Commercial Department.

Annual Catalogue and Pamphlet, "SUCCESS IN REGENTS' EXAMINATIONS," sent on application to the Registrar.

SAMUEL F. BATES, Registrar.

Occurrences During Printing.

SOME months are occupied in printing a volume so bulky as THE WORLD ALMANAC, and it is necessarily put to press in parts or forms. Changes are in the meantime occurring. Advantage is taken of the going to press of the last form of the First Edition to insert information of the latest possible date which is done below. The readers of the ALMANAC are requested to observe these additions, corrections and changes, and it would be well to make note of them on the pages indicated.

126. Postal Savings Bank act—The President announced in his message to Congress that the postal savings bank service would be inaugurated January 1, 1911, in some cities and towns, to be followed by a gradual extension to the rest of the country.

136. The President sent to the Senate for confirmation the following slate for the newly created Commerce Court. For presiding judge, to serve for five years, Martin A. Knapp, of New York. Judges: Robert W. Archbald, of Pennsylvania, to serve four years; William H. Hunt, of Montana, to serve three years; John Emmet Carland, of South Dakota, to serve two years, and Julian W. Mack of Chicago, to serve one year. The new Commerce Court Judges are to rank as Circuit Court Judges. At the expiration of their terms the Supreme Court will select their successors and the present appointees will go on the circuit as Circuit Judges.

169. Record of Events—On December 14 Andrew Carnegie made a gift of $10,000,000 as a "Peace Fund" for the promotion of international peace. On December 19 an explosion at Grand Central Depot extension caused loss of life and destruction of adjacent property. On December 20 John D. Rockefeller made a final donation of $10,000,000 to Chicago University.

173. Death Roll of 1910—Melville De Lancey Landon ("Eli Perkins") (71), humorist and author, locomotor ataxia, Yonkers, N. Y., December 16.

222-3. Qualifications for Voting—Washington (State) has full woman suffrage.

224 Woman Suffrage—The State of Washington at the November election voted for full suffrage to women, making the fifth woman suffrage State. Oregon, Oklahoma and South Dakota at the same time voted against it.

273. Fire Insurance Statistics—National Fire Protection Association, composed of seventy-two subsidiary underwriters, electrical engineering and architectural associations. C. M. Goddard, President; H. C. Henley, Vice-President; Franklin H. Wentworth, 37 Milk Street, Boston, Secretary.

321. Farm Productions of the United States—The following are estimates of crop production and values for 1910 in the report of the Secretary of Agriculture: Value of all farm products in United States for 1910 was $8,926,000,000, the largest record made and an increase over 1909 of $305,000,000. Corn, 3,121,381,000 bushels, value, $1,500,000,000; cotton crop value, $900,000,000; hay, 60,116,000 tons, value $720,000,000; wheat crop, 691,767,000 bushels, value, $625,000,000; oats, 1,096,396,000 bushels, value, $380,000,000; beet sugar, 512,000 short tons, value, $51,000,000; cane sugar, 347,000 short tons, value, $28,000,000; tobacco crop value, $95,000,000, barley, 158,138,000 bushels; rye, 32,088,000 bushels, value, $23,000,000; rice, 1,000,000,000 pounds, value $16,000,000.

322. The Cotton Supply—The estimate of the crop of 1910, made by members of the New York Cotton Exchange November 23, was 11,927,000 bales.

341. Benefactions—Other bequests were: $1,500,000 by George L. Fox, a Brooklyn lawyer, to be distributed among hospitals, charitable organizations and employés. Mrs. Mary P. Hough bequeathed $35,000 to churches and charitable institutions. Columbia University received from an anonymous donor a gift of $100,000; from Edward D. Adams, of New York, $30,000, and from the estate of Caroline Phelps Stokes $20,000. Mrs. E. H. Harriman gave $100,000 to Yale University to endow a chair in forestry. James L. Kernan, of Baltimore, Md., bequeathed $100,000 to establish a hospital and industrial school for crippled children. Hugh Inman willed $60,000 at his death to churches and hospitals. Isaac Stern, dry goods merchant, willed $21,000 to various charities. $500,000 was raised in New York City for the American Red Cross. Mrs. Rosa Baubach left $60,000 to a hospital in Sandusky, Ohio. Mrs. Russel Sage donated $2,500,000 to build a town for families of moderate means. Andrew Carnegie gave $3,800,000 to the Pittsburgh Technical School and $10,000,000 for the promotion of international peace. John D. Rockefeller made a further gift of $10,000,000 to Chicago University, making a total to it of $35,000,000.

414. Six-day Bicycle Race at Madison Square Garden, December 4 to 10, 1910—Final score. *Root and Moran, 2,545 miles 3 laps; Ruhl and Clarke, 2,545 miles 3 laps; Fogler and Hill, 2,545 miles 3 laps, Hehir and Goullet, 2,545 miles 3 laps; Mitten and Thomas, 2,545 miles 2 laps; De Mara and West, 2,545 miles 1 lap; Cameron and Halstead, 2,545 miles. * Won by a wheel's length. The former record was 2,737 miles 1 lap made by McFarland and Moran in 1908.

468. American Learned Societies—American Association to Promote Teaching of Speech to the Deaf, united with The Volta Bureau, for the study of deafness. President, Dr. A. L. E. Crouter, principal Mt. Airy School for the Deaf; Vice-Presidents, Edmund Lyon, M. A., and Caroline Yale, LL. D.; Secretary; Z. F. Westervelt, LL. D., Corresponding Secretary, and Superintendent of Volta Bureau, F. W. Booth. Volta Building, Washington, D. C. Founded in 1890 by Alexander Graham Bell. Publishes *The Volta Review*, a monthly magazine for the deaf, and various works relating to deafness, at the Volta Building. Annual dues, $2.00, including official organ. No entrance fee. Active membership, 700.

515. Polar Exploration—The British South Polar Expedition under Captain Robert F. Scott sailed from New Zealand for the Antarctic November 29.

564. Orleanist Family—The Duke of Chartres, uncle of the Duke of Orleans, died December 5.

570. The British Parliament—The elections for the new House of Commons were in progress when the ALMANAC went to press and on December 10 the pollings had been 518, with 152 members yet to be elected. The returns at that date were: Liberals 191, Laborites 35, Nationalists 56, Independent Nationalists 7 (total Government coalition 239) Unionists 229. Government majority, 60.

598. Post-Office Department Officials—James J. Britt of North Carolina, has been appointed Third Assistant Postmaster-General, succeeding A. L. Lawshe.

626. Diplomatic Service—The President on December 6 nominated John W. Garrett, of Maryland, to be Minister to Venezuela and Charles S. Wilson of Maine to be Secretary of the Embassy at Rome.

750. Subways in New York City—The Public Service Commission accepted the subway construction offer of the Interborough Rapid Transit Company for new subways.

The Conference of Governors.

IN November, 1907, President Roosevelt issued an invitation to the Governors of the States and Territories of the Union to a conference with him on the subject of the Conservation of the Natural Resources of the country. The conference took place at the White House in Washington May 13, 14 and 15, 1908, and was attended by the Governors of thirty-seven States and Territories. (An account of the transactions of the conference was printed in THE WORLD ALMANAC for 1909, pages 105-107.)

At the close of the conference, in an adjourned meeting, the Governors appointed a committee to arrange the time and place for a session of the Governors in a body of their own independently of the President. The committee, of which Governor Willson, of Kentucky, was Chairman, called for a remeeting of the Governors at Washington on January 18-20, 1910. This, the first independent conference, was held at the time appointed and was largely attended. It resolved itself into a deliberative body to initiate, inspire and influence uniform laws and discussed many nation-wide problems of better government. Informal meetings were had with the National Civic Federation and the Association of Life Insurance Presidents, which held meetings in Washington at the same time.

The second independent conference of the Governors was convened at Frankfort, Ky., on November 29, 1910, and transferred to Louisville the following day and was in session five days. William George Jordan, of 172 West Eighty-first Street, New York, having been appointed by the committee after the last conference the permanent secretary. Governor Willson, of Kentucky, presided at the first session of this conference; other Governors presiding at subsequent sessions. The questions of Direct Primaries, Automobile, Reciprocity by States and Employers, Liability and Workmen's Compensation laws were the main matters of discussion. A resolution, introduced by Governor Hadley, of Missouri, that State Commissioners investigating the last named question, be directed to send the reports of their findings to all Governors, was adopted.

The principal business transacted at the conference was the adoption of a plan of permanent organization of the Conference of Governors. It embraced annual meetings to last a week each; requests to the State Legislatures for appropriations for maintenance and the selection in advance of subjects for discussion, to be submitted in advance of the meetings to the individual Governors.

Spring Lake, N. J., was chosen as the place for the next conference, to be held in the first week of September, 1911.

American Peace Society.

NATIONAL Headquarters, 31 Beacon Street, Boston, Mass. Organized in New York City, May 8, 1828 and formed by the merging of many State and local societies, the oldest of which, the New York, dated back to 1815. *President*, ——; *Treasurer*, Francis B. Sears, Boston, Mass.; *Secretary*, Benjamin F. Trueblood; *Field Secretary*, Charles E. Beals, 153 La Salle Street, Chicago, Ill.

Proposed Paris Exposition in 1920.

THE French Government on December 8, 1910, opened an official inquiry among the local chambers of commerce upon the advisability of holding an international exposition at Paris in the year 1920.

A World's Exposition at Winnipeg in 1914.

PLANS are being made at Winnipeg, Man., for a World's Exposition in the year 1914, and it is claimed that with the local subscriptions and expected contributions from the railways, $2,400,000 is in sight. The approbation and support of the Dominion Government is being sought.

An Exposition at Seville in 1914.

A SPANISH-AMERICAN exposition at Seville, Spain in 1914 is projected and will be held in connection with the opening of the canal at Tablada. The United States will be invited to take part.

(Addenda to Expositions. See Index.)

A Quality Watch

Ingersoll-Trenton

7 and 15 Jewel Models

$5 to $15

The Watch Beautiful
The Watch Accurate
The Watch of Long Service

Here is the one watch selling at a moderate price which will satisfy the requirements of the man who demands *unusual* accuracy. Each of these time-keepers is tested and regulated to the second in its individual case, at the factory.

By all who know it the I-T is regarded as an extraordinary production for the money.

It will give a generation of service and is as beautiful to look at as any watch made.

The $5 watch has 7 jewels and is in a solid nickel case.

The $15 watch has 15 jewels and is in a 25 year guaranteed gold filled case of the highest quality.

Equally accurate models in a variety of cases at $7, $8, $9, $10 and $12.

There is more watch-value for each dollar invested than you have ever seen before.

You can buy an Ingersoll-Trenton only from responsible jewelers who buy direct from the factory. 8000 jewelers sell it and usually display it in their windows.

We have the most informing watch book ever published. Write for a copy of "How to Judge a Watch."

Robt. H. Ingersoll & Bro. **222 Frankel Bldg., New York**

The Man Who Made a Million From Nothing

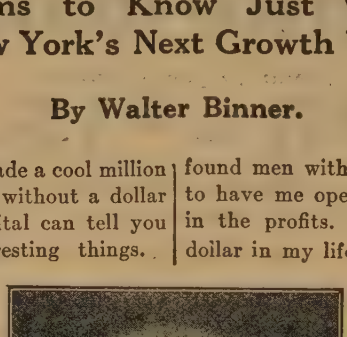
Remarkable Career of a Real Estate Wizard Who Seems to Know Just When and Where New York's Next Growth Will Occur.

By Walter Binner.

A MAN who has made a cool million in a few years without a dollar of original capital can tell you some extremely interesting things.

Good luck had seated me in the suburban train next to John W. Paris, President of the Real Estate Exchange of Long Island, and I got him talking.

"I began in real estate on my own account a little less than five years ago with a capital just a few hundreds less than nothing!" he said with a broad smile.



JOHN W. PARIS
President Real Estate Exchange of Long Island

"You newspaper men sometimes apply a month's hard study to some murder mystery. I decided to be a Sherlock Holmes to the real estate question.

"I studied the growth of the city for the past century and made tables showing the steady increase in values. I found out *why* growth occurred, and *where it would be quickest.*

"When I mastered my subject I soon found men with capital who were glad to have me operate for a half interest in the profits. I have never made a dollar in my life without at the same time making a dollar for someone else."

"Are there still some good opportunities left?" I ventured.

"There are more now than ever! For more than nine years the city was building the Queensboro Bridge, just now opened. For six years the Pennsylvania Railroad has been tunnelling the rivers, and that service is now open. That means opportunities by the hundreds!

"New York's growth goes forward as inevitably as the fall of the rain or the rise of the sun. It is the legacy of civilization to the largest city in the grandest country on the globe."

"What are the best profits you have made?"

"In active markets I have made for myself and my friends 500 per cent. per

annum. My first operation was to buy with only $7,000 cash a small acreage tract which we improved and retailed within one year for a net profit of $112,000. That is $16 to $1.

"Next I bought 33 acres at Woodside, L. I., to which another tract was added later. This was only five years ago. We organized a company which has now sold most of the land. *Above one million in dividends has already been divided by this company.* Our profits for four years were fully 250% per annum."

"But how are these enormous profits possible?" I exclaimed. "Are they not exceptional, and do you not at times make losses on some purchases?"

"Not only have I never made a loss on New York City property, but I have never made a purchase which did not show a substantial advance the first year. *Unless I am sure it will do that I will not buy.*

"The Woodside Heights Realty and Development Company gained and paid in five years *profits equal to 43 times its capital stock.* It has now been liquidated.

"The Queensboro Corporation paid 300% profits the first year, then increased its capital stock purely out of profits from $3,000 to $100,000. After that it paid 28% on the increased capitalization.

"The Paris-McDougall Company operated on a capital of $10,000 during four years' time. It has *paid out in dividends twenty times its capital stock* and has now been wound up.

"The awkwardness of beginning and liquidating so many companies suggested to me about two years ago the wisdom of creating a *permanent holding company,* capable of paying for, developing and handling a great many different purchases. With this in mind I organized, with a number of my associates, the Mutual Profit Realty Company, under a charter giving it the widest privileges.

"This company put up a cash capital of $100,000 as a guaranty fund, investing it in first-class free and clear real estate at the first station on the new Pennsylvania Tunnel lines, eight minutes from the heart of New York. To provide further capital for purchasing and handling desirable properties it issues Profit-Sharing Bonds which guarantee and pay 5% interest and in addition share in one-half the profits of all the company's operations.

"In addition to paying its operating expenses and 5% interest to bondholders, it has made splendid profits, the bondholders' share of which were 38% per annum on all they had invested during the last fiscal year.

"Such a profit as that in addition to a sure 5% interest certainly makes these bonds a very attractive investment. Do you accept small sums?

"Our bonds are sold at par in sizes of $100, $500 and $1,000 for spot cash; or on easy instalments of $5 monthly, $14.85 quarterly, $29.49 semi-annually, or $58.14 annually. I confidently believe this company will be able to repeat the big profit successes which I have shown in the past."

Soon after this interview, at my request, Mr. Paris sent me his book, "A Safe 5%, Plus Half Profits." Readers of The World Almanac are entitled to one free copy of this interesting book and the report of the Bondholders' Committee which recently examined the company's books and determined its profits. Simply address Mutual Profit Realty Company, Room 422, No. 66 West 35th Street, New York City.

SYRACUSE UNIVERSITY

Syracuse, N. Y.

The Campus with some of the buildings. Across the street, to the right of picture, is the Margaret Olivia Slocum Teachers College. The College of Medicine and College of Law are nearer the centre of the city.

Syracuse University

Six Colleges **3,300 Students**

50 Professors and Instructors

The College

Offers Classical, Philosophical, Science and Pedagogical Courses.

The College of Fine Arts

Offers Courses in Architecture, Belles Lettres, Music and Painting.

The College of Medicine

One of the oldest in the State, has a four-years' course. The late Chancellor Upson, of the Regents, unsolicited said: "It is admitted by all competent judges to be unsurpassed in this State."

The College of Law

Gives instruction by text-book and case system. On its faculty are some of the greatest lawyers of New York.

The College of Applied Science

Offers Mechanical Engineering, Civil Engineering, and Electrical Engineering Courses. New buildings and approved equipment. Complete Hydraulic Laboratory.

The Teachers College

Affords special opportunities for the preparation of teachers of secondary schools and supervisors of Music and Drawing, and confers degrees upon graduating students of the Science of Pedagogy.

Courses in Agriculture and Forestry

Have been established.

Over Forty

Of the leading Universities and Colleges of this country and Europe are represented by mature and progressive scholars on the faculty of the College of Liberal Arts. Only the highest talent to be found at home and abroad is permitted to give instruction in Fine Arts. The work is so arranged that students taking both their College and Medical or Law Courses at Syracuse save one year's time. Liberal electives. Both sexes are admitted. Tuition Expenses are moderate.

Summer School

July 5—August 16.

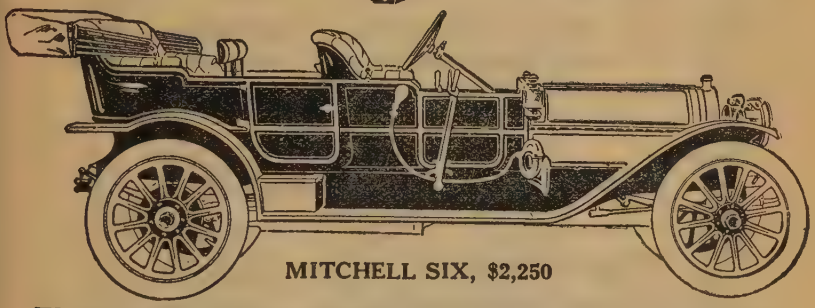
Mitchell



MITCHELL SIX, $2,250

The success of the Mitchell car has been made possible by the Company's attitude toward its patrons.

Today the Mitchell-Lewis Motor Company is the soundest and most reliable automobile concern in the world. It has become so, not alone because it makes a good car, but because it has religiously stood behind every car it has made and allowed no man to suffer for something it has failed to do or has done incorrectly.

The Make-Good Policy is the grandest asset this Company could have possibly had. ***It's the biggest thing in the world.***

Every agent of the Mitchell-Lewis Company has been taught that a patron's acquaintance and claims ***do not cease with the payment of the purchase price.*** He has been inoculated with the Mitchell-Lewis belief in ***moral responsibility.*** He is not permitted to dodge the issue when it is raised, and if he seeks to do so ***he can't sell Mitchell cars.***

Our agents are the same today as they were seven years ago. ***This policy has kept them.*** When Mitchell owners buy new cars they invariably buy Mitchells. ***This policy has kept them.*** They feel mighty secure with that bulwark to lean upon, and we therefore have ***the happiest family of owners that the automobile industry has ever known.***

The Car You Ought to Have at the Price You Ought to Pay.

PRESCRIPTIONS

FOR PAIN—(No matter where)
Dose:—Two tablets.
COLD-IN-THE-HEAD—(La Grippe)
Dose:—Two every three hours.
FEVER—(Feverish Conditions)
Dose:—One every two hours.
HEADACHE—(All Kinds)
Dose:—Two, repeat two hours.
HEAT EFFECTS—(Dizziness)
Dose:—Two every three hours.
MELANCHOLIA—(From Worry)
Dose:—One every two hours.
NEURALGIA—(All Kinds)
Dose:—One every two hours.
OVERWORK—EXCESSES
Dose:—One every two hours.
SHOPPER'S or SIGHTSEER'S HEADACHE
Dose:—Two every three hours.

Antikamnia Tablets

THE name itself suggests what Antikamnia Tablets are, and what their remedial characteristics are:—Anti (Greek *Αντί*). Opposed to—and Kamnia (Greek *Καμνος*). Pain—thus we have "ANTIKAMNIA" which means "OPPOSED TO PAIN," a remedy to relieve pain and suffering. The genuine Antikamnia Tablets always bear the AK monogram and are, on account of their convenience and accuracy, recognized as the most approved form for taking this remedy.

THE ONE BEST DRINK—WINE

A SHORT TALK ON HOW WINES ARE USED DAILY AT TABLE

By Louis James.

A writer on the Art of Living has said: "A meal without wine is like bread without butter; it is worse than that—it is no meal at all." In fact, no meal is complete without some kind of beverage, whether it be tea, coffee or wine.

There is no doubt that the American people have more and better food than any other people in the world. Therefore, every American family should have some wine not only in the house, but wine every day on the table, otherwise the daily meal is incomplete. If you do not think so you should see how millions of people in Europe live; how even the poorest peasant in France and Italy has his bottle of cheap, light wine with his humble meal. What the European peasant and workman can drink and enjoy with his dinner, we certainly should have in this country.

It is a mistake for us to regard wine as a luxury, as some of us do, because we think we must pay a high price for it. There is plenty of good, pure wine made in the United States, and it can be bought at such a price that almost every one can afford to drink a little wine with their meals. For example, you can buy a good, sound table wine such as claret, burgundy, etc., for 50 to 75 cents per gallon, and that will make the cost only 15 to 20 cents per quart, which makes the wine cheaper than most other beverages, for even many mineral waters cost more than wine.

The question is often asked: "Where can I get good wine?" You can get good wine at any reliable place. You can buy it at the grocery and department stores, and at all the family liquor stores. You can buy wine by the bottle, or you can buy it by the gallon and bottle it off yourself.

Again, some people ask: "What is the best kind of wine?" There are three classes of wines—dry or sour wines, sweet wines, and sparkling wines or champagnes. The first kind are called "dry" because the sugar has been fermented out, and, as they are light in alcohol, they are usually regarded as the most natural and desirable for every-day consumption. Thus the dry wines, such as claret, are used at meals, generally diluted with a little water. American champagne is just as good as the imported and half the cost.

Wine taken in moderate quantities with the meals is of great benefit to most people by aiding digestion and assimilation. In fact, wine has a food value and is an actual item of food; for example, in Europe people use wine in place of meat, which they do not often get; and the food value of wine is proved by the simple fact that the wine-drinking workingmen of Europe are strong and healthy, and they do as hard a day's work as the workingmen of this or any other country.

If you once "get the habit" of taking a little wine with your meals you will miss it when wine is not on the table. You do not know, until you try it, how much light wine aids digestion; how it helps the assimilation of food, and how it adds to the enjoyment of your whole meal.

As so many people want to know more about American wines, and their health-giving qualities, we have several interesting booklets on the subject, as "Temperance with Wine Drinking," by the Rev. Roland D. Sawyer; "How to Use and Serve Wines," by Louis James; "The Food Value of Wines," by Prof. E. H. Twight, etc. Sent free by writing to the American Wine Growers' Association, 302 Broadway, New York City.

The Master Cure for

RHEUMATISM

Dr. Muller's Famous Prescription 100384

Professional Education in Accountancy

Affords training for the practice of a new and uncrowded profession and for greater capacity and earning power in private employment.

Resident Schools.

A two-year professional course, preparing for practice and for examinations for degree of C. P. A., is given in each of the following resident schools of accountancy: *New York Institute of Accountancy*, Geo. E. Beck, Educational Director, 215 West 23d St., New York; *The Accountancy Institute of Brooklyn*, Milton J. Davies, Educational Director, 11 Bond St., Brooklyn; *Baltimore Institute of Accountancy*, Ralph R. Blackney, Educational Director, Baltimore, Md.; *Washington School of Accountancy*, Myron Jermain Jones, Educational Director, Washington, D. C.; *Los Angeles Institute of Accountancy*, Lloyd B. Austin, Educational Director, Los Angeles, Cal.; *New Jersey School of Accountancy*, H. A. Townsend, Educational Director, Newark, N. J.; *Cleveland School of Accountancy*, O. M. Miller, Educational Director, Cleveland, O.; *Buffalo School of Accountancy*, J. Gustav White, Educational Director, Buffalo, N. Y.; *Detroit Technical Institute*, William B. Van Aikin, Director, Detroit, Mich.

Extension Instruction.

The resident course is given by Extension for the benefit of those unable to attend resident schools, with privilege of transfer to resident courses, with credits for work accomplished and tuition paid, by

Pace Institute of Accountancy,

Hudson Terminal, 50 Church Street, New York.

A 70-page catalogue with full detail will be furnished upon application to any of the schools.

RATS AND MICE
KILLED BY SCIENCE

By the aid of the wonderful bacteriological preparation discovered and prepared by Dr. Jean Danysz, Director of the Laboratory of Agricultural Micro-Biology of the Pasteur Institute, Paris, science has at last successfully solved the problem of exterminating rats and mice.

DANYSZ VIRUS
(DANNIS VIRUS)

contains the germs of a disease peculiar to rats and mouselike rodents only, and is **harmless to birds, human beings and animals** other than mouselike rodents. The rodents always **die in the open** because of feverish condition. The disease is contagious to them. The Virus is easily prepared and applied.

Danysz Virus is distributed in France and Holland by the Government. At the Russian seaport, Odessa, a city of over 400,000 inhabitants, the whole city was freed from rats by an application of Danysz Virus. In England, Dr. Danysz was hailed as a modern Pied Piper.

The success of Danysz Virus in the United States has been phenomenal. First tried by the United States Superintendent of Warehouses in New York and declared by him as a **complete success**, it has been indorsed by the United States Naval Academy at Annapolis, college professors, doctors, steamship companies, warehousemen, theatre-owners, bakers, meat packers, manufacturers, farmers, private individuals, &c., throughout the United States and Canada.

How Much to Use—A small house, one tube; ordinary dwelling, three tubes (if rats are numerous, not less than six tubes); one or two dozen for large stable with hayloft and yard, or 5,000 square feet floor space in factories and warehouses; three to six tubes per acre in case of open fields, game preserves, &c. Price, one tube, 75c.; three tubes, $1.75; six tubes, $3.25; one dozen, $6.00; delivered.

ROACHES, ANTS, ETC., KILLED

Try our new scientific combination of chemical salts.

SAL INSECTA

Positively exterminates roaches and ants. Quarter-pound cans, 25c; one-pound 75c. Special prices on quantities.

If you are troubled with rats, mice, roaches or ants, send your order at once to

VIBRATION IS LIFE!

Read What Others Say

Here are a few of the hundreds of unsolicited testimonials from people who have used the White Cross Electric Vibrator and know what it has done. It may do the same for you.

PARALYSIS TREATED BY VIBRATION.

Upon the request of my sister, who urged me to use her great Electric Vibrator on my son when I was thoroughly hopeless of his cure from physicians' treatment, I write you this recommendation. My son is 16 years old, and eight months ago became paralyzed from the after-effects of diphtheria. He was so badly afflicted that his arms and limbs were twisted out of shape and was confined, all doubled up, in his bed. Medicine and attention did no good, and I had become discouraged in all ways. After treating first his spine at the base and then his limbs with your vibrator he felt such relief that I kept up the treatment regularly, with the result that we soon had him around in a wheel chair. Next he was going around on crutches and now, after three months' treatment, he is going around with a cane and will soon be entirely cured.

3122 Indiana Ave., Chicago.

MRS. C. KNIGHT.

WHAT A DOCTOR SAYS

I have received your Vibrator, and to say that I am well pleased with it is not enough. I wish I could tell every physician just now badly he needs one in his office. I am sure he would not hesitate to place his order for one at once.

Longmont, Colo.

DR. W. H. EASTER.

Here is a Picture of the wonderful WHITE CROSS ELECTRIC VIBRATOR,

the only vibrator in the world which combines the three great forces of vibration, Galvanic and Faradic Electricity. This is the very same machine which has relieved hundreds of cases which have been looked upon as very serious. Read the letters above, then send for free book at once.

The secret of the ages has been discovered in *Vibration.*

Great scientists tell us that we owe not only our health but even our life and strength to this wonderful force.

Vibration promotes life and vigor, strength and beauty.

Vibration is one of the most marvelous curative agents known. It is the remedy provided by nature for illness and disease.

The White Cross Electric Vibrator On Free Trial!

This wonderful instrument gives you the three greatest natural curative forces in the world—Vibration, Faradic and Galvanic electricity.

We want to prove to you at our expense what the great White Cross Electric Vibrator will do for you. We want you to actually feel its invigorating, health-giving thrill coursing through your own body.

Treat These Diseases

Rheumatism, Headache, Backache, Constipation, Kidney Disease, Lumbago, Catarrh, Scalp Diseases, Skin Diseases, Deafness, Weak Eyes, General Debility, Nervousness.

A Vibrating Chair Free

With the White Cross Vibrator you can make a splendid vibrating chair out of any chair. A chair which will give you the same results as the kind used in the biggest hospitals and sanitariums.

This Valuable Book, "Health and Beauty," NOW SENT FREE

This wonderful book describes the human body in health and disease so plainly and clearly that any one can understand. It tells how to get healthy and beautiful and how to keep so. This book tells you what vibration will do for you and how you can get the WHITE CROSS ELECTRIC VIBRATOR sent right to your home for an actual free trial.

Write To-Day

Get this valuable free book at once. No matter how healthy you may be now, the time will come when you may need this book *badly.* It may save your life or the life of some of your loved ones. Learn all about our offer—the most astounding and generous offer ever made. Don't wait. Send now.

LINDSTROM-SMITH CO.

CHICAGO, ILL.

How Rupture Can Be Cured Without Operation

No further expense of any kind on account of your rupture.

And you'll be able to work right along while being cured.

To find out all about this simple home cure—which you can get on trial—mail the coupon to-day.

It's a pity that you and so many other ruptured people have had to pay out dollar after dollar, year after year, without finding a truss or anything else that would do any good—

A pity that so many ruptured people, in spite of all the money they've paid out, have been getting worse all the time instead of better—

Getting nearer and nearer to the time when they won't be able to work—when an operation will be their only hope, and that only a life-or-death chance.

What a pity, when—had you but known it—you might long ago have been on the road to recovery.

For thousands of others—without operation, without losing a single day from work—have been completely cured.

Cured—at a cost of only a few dollars—simply by wearing Cluthe Trusses.

Signed letters from many of these people, giving their age, occupation, length of time ruptured and time required for cure, will be found in the free book which we ask you to send for.

It may be hard, after your experience with other trusses or appliances, to believe that any truss can cure.

But—as the thousands who have tried it know—the Cluthe Truss is in every way different from and better than all other trusses or appliances—so different that we hold 18 separate patents on it. And yet it's the *simplest* truss ever invented.

It is as *comfortable* as your *clothing*—no elastic or web band or belt, no waist springs, no leg straps—no chafing, pinching or squeezing.

It never shifts or slips away from the rupture or opening. It is the *only* self-adjusting truss—the *support* it gives is *automatically regulated*—automatically increased under any strain, as when you are working, so the ruptured parts never even *feel* any strain.

Thus there is never any danger of forcing the rupture out, which is tremendously important. For—as explained in our free book—a rupture is bound to get worse every time it comes out. Just as a broken bone grows worse if the bandages fail to hold the parts securely together.

Get It on Trial

To prove to you what a Cluthe Truss will do, we will send you one on *trial;* if it fails to keep your rupture from coming out—something which happens only in about one case out of every 500—the truss won't cost you a cent.

Another thing: While always keeping the rupture from coming out, a Cluthe Truss is constantly *strengthening* the ruptured parts—gradually overcoming the *weakness* which is the real *cause* of rupture.

Does that by *automatically massaging* the weak parts. *Massage*, you know, *strengthens*, just as *exercise* strengthens the arms or legs.

This massage—something no other truss gives—is so remarkably beneficial that the rupture begins to get better almost from the day a Cluthe Truss is put on; and in most cases soon results in complete cure.

Free Book Tells All About It

Too bad you didn't know about the Cluthe Truss long ago.

But it isn't too late. Just send for our free book and find out just what a Cluthe Truss can do for you—what it has done for others.

This book—which is cloth-bound—sums up all we have learned about rupture and its treatment and cure during 40 years of experience.

It explains the dangers of operations.

And it puts you on guard against worthless trusses and treatments—explains why elastic, belt and spring trusses fail to hold and why they usually do more harm than good.

And it tells all about the Cluthe Truss—how it is water-proof—how little it costs—how it ends all expense—how we will make you one especially for your case and how you can get it on *trial* without risking a single penny—and how we guarantee to fit you perfectly by *mail*, no matter where you live.

Book sent in plain, sealed envelope. If you hope ever to be well and sound again, write for it to-day. Just use the coupon, or simply say in a letter or postal, "Send me your book." In writing us please give our box number as below.

The World.

JOSEPH PULITZER.

STANDING on the threshold of 1911, THE WORLD doffs its hat to friends and opponents alike and pledges another year of increasing public service. It has a right to point with pride to its victories during 1910, because they are proof of promises kept and should be convincing evidence that THE WORLD will not be found lacking in courage in the future when the people need its aid. "Turn on the light!" has long been THE WORLD'S slogan. It believes that the people have a right to know the truth, the whole truth and nothing but the truth concerning public men and public affairs. It indorses and exemplifies the declaration of Lord Erskine, made in 1793, before the Court of King's Bench: "This is the true value of a free press: the more men are enlightened the better will they be qualified to be good subjects of a good government." And, coming down more than a century from Lord Erskine's day to 1911, THE WORLD still strives to put into action the wish of Joseph Pulitzer, uttered twenty-one years ago when the corner-stone of THE WORLD'S home was laid: "God grant that THE WORLD may forever strive toward the highest ideals, be both a daily schoolhouse and a daily forum, both a daily teacher and a daily tribune, an instrument of justice, a terror to crime, an aid to education, an exponent of true Americanism."

THE WORLD IN THE 1910 CAMPAIGN.

No fair-minded person will dispute the fact that THE WORLD, more than any other one journalistic instrument, helped to bring about in November, 1910, the political landslide which swept into greater power than it has held since Cleveland's second election the Democratic party of the United States. Day by day, with facts and figures which could not be disputed, THE WORLD showed the people the cost of Republican extravagances, the failure of the Republican party to fulfil its tariff revision pledges, and, above all, the dangers of the so-called "New Nationalism" as preached by Theodore Roosevelt. It recognized in Mr. Roosevelt and his utterances a serious menace to the peace of the country, and it urged all patriotic voters, irrespective of party, to aid, by their ballot, in rebuking him and eliminating him as a possible Presidential candidate in 1912.

To THE WORLD'S danger call the country responded nobly. The Waterloo for Roosevelt and the New Nationalism came on November 8. Mr. Roosevelt, after speaking many weeks in a skyrocket campaign, heard the people's answer. He was beaten decisively in his own State, where his personally conducted candidate was overwhelmed and the Republicans lost the Governorship for the first time in sixteen years. He was beaten in his own Congressional district. He was beaten in his home district in his own town, which was carried by John A. Dix. He was beaten in Massachusetts, where the people elected Mr. Foss Governor. He was beaten in Connecticut, where the people elected Judge Baldwin Governor. He was beaten in Ohio, where the people re-elected Judson Harmon Governor. He was beaten in New Jersey, where Woodrow Wilson made an Old Nationalism Democratic campaign against the vagaries of the New Nationalism. He was beaten in Indiana, where he campaigned for Senator Beveridge on a platform of false pretenses. He was beaten in Iowa, where a Republican majority of 74,000 was nearly wiped out.

On the day after election THE WORLD said editorially: "This is no partisan Democratic victory in the ordinary sense of that term. While it is a defeat for the Taft administration and for the Republican party, it is peculiarly a defeat for Theodore Roosevelt and his 1912 ambitions. It was brought about by the help of Republicans who were dissatisfied with the record of the Taft administration and the Aldrich-Cannon revision of the tariff. But it was also brought about by hundreds of thousands of patriotic Republicans who still believe in the Constitution of the United States, who still uphold the Supreme Court, and who will tolerate no third-term ambitions in any man, whatever the party name that masks his pretensions.

"THE WORLD repeats now what it said time and time again during the campaign. Republican victory would have been a Roosevelt victory. Republican defeat is a Roosevelt defeat. When the Republican convention in 1912 looks for this mysterious Moses whom Elihu Root has so eloquently described it will not look in the direction of Oyster Bay."

FIGHTING FOR LIBERTY OF THE PRESS.

In THE WORLD ALMANAC for 1910 was told, up to the time of going to press, the story of the libel suit of the Government of the United States against THE WORLD, better known as the Panama Canal case. The history of this case, briefly, up to 1910 was this:

During the last Presidential campaign, in October, 1908, THE WORLD printed six articles on the Panama Canal purchase and on the Panama revolution in 1903, giving currency to the charges that there was a syndicate of Americans who were interested in and received some of the $40,000,000 which the United States paid to the French company for the canal property and that the administration at Washington and some of the individuals who then composed it were cognizant of and had supported the plans for the revolution in Panama as a result of which the present Republic of Panama seceded from the Republic of Colombia and gave to the United States those sovereign rights over the Canal Zone which under its Constitution Colombia was unable to grant.

Mr. Roosevelt allowed the charges to remain unchallenged until after the election, when he made a scandalous personal attack upon Mr. Delavan Smith of the Indianapolis News, which paper had reprinted the articles from THE WORLD; then when challenged by THE WORLD he, on December 5, sent a special message to Congress in which he urged the Government to prosecute Mr. Joseph Pulitzer, editor and proprietor of THE WORLD, for libel.

Under orders from Mr. Roosevelt the Attorney-General instituted criminal proceedings in the courts of the District of Columbia against both THE WORLD and the Indianapolis News.

The Government was completely defeated in the Indianapolis News case. United States District-Attorney Keating of Indianapolis resigned his position rather than assist in the attempt to remove the defendants from their homes to the District of Columbia for trial. In his letter of resignation he said: "I am not in accord with the Government in its attempt to put a strained construction on the law. * * * I believe the principle involved is dangerous, striking at the very foundation of our form of government."

United States District Judge Anderson in discharging the defendants said: "To my mind that man has read the history of our institutions to little purpose who does not look with grave apprehension upon the possibility of the success of a proceeding such as this. If the history of liberty means anything, if constitutional guarantees are worth anything, this proceeding must fail."

In the face of this decision there was no attempt by the Government, nor has any been made since, to remove Mr. Pulitzer, Mr. Van Hamm and Mr. Lyman to the District of Columbia on the indictment pending against them in that district; but, as Mr. Roosevelt refused to allow the case to be brought before the courts of the State of New York and insisted that THE WORLD be prosecuted in the Federal courts, an indictment was obtained by United States Attorney Stimson from the Federal Grand Jury in the Circuit Court of the United States for the Southern District of New York charging the Press Publishing Company (the corporation which publishes THE WORLD) with criminal libel on the ground that it circulated twenty-nine copies of each of the issues containing the articles complained of in the military reservation

at West Point and one copy in the New York Post-Office, which building is the property of the Federal Government

The act on which the Government relied as authority for this prosecution was that of July 7, 1898, "An Act to Protect the Harbor Defenses and Fortifications Constructed or Used by the United States from Malicious Injury, and for Other Purposes." It was founded on the act of March 3, 1825, which was the first Federal enactment of this character. Eighty-five years had passed since Judge Story conceived this statute and since Congress made it a part of the law of the United States.

The case came on for trial before Judge Hough on January 25, 1910, in the United States Circuit Court in New York City. DeLancey Nicoll, counsel for THE WORLD, moved to quash the indictment on five grounds, one of which was that the court had no jurisdiction in the case.

Mr. Nicoll contended that the libels with which THE WORLD was charged, even if they were libels, were cognizable in the State courts and could have been punished there, that there was no Federal libel law, and that whatever the language of the act to protect harbor defenses the whole history of the law of libel in the United States, the history of the statutes and the history of the passage of the act of 1825 through Congress all plainly showed that Congress did not intend and the law did not authorize any such purpose as claimed by the Government.

On behalf of the Government United States Attorney Wise argued that the act under which the indictment was being pressed could be construed as a Federal libel law. He contended that newspapers are subject to prosecution for libel in the Federal courts as well as in the State courts, with the result that the President of the United States could instigate criminal libel proceedings against a newspaper in any or all of the 2 809 distinct and independent Federal jurisdictions in which it might happen to circulate and that a conviction in any one of these jurisdictions would not be a bar to further conviction in others and to further convictions (should such be obtainable) in each and every State in the Union.

Judge Hough refused to accept his view. In his judgment quashing the indictment he said: "The Court is relieved of much embarrassment by the form of one of the motions made. The jurisdiction of the court is peremptorily challenged by the motion to quash. Other motions have been made which will not be considered. But inasmuch as a decision under a motion to quash is now speedily reviewable by the highest court I shall dispose of the case under that motion. * * * I am of the opinion that the construction of this act claimed by the prosecution is opposed to the spirit and tenor of legislation for many years on the subject of national territorial jurisdiction. It is a novelty, and the burden of upholding a novelty is upon him who alleges it. * * * It is therefore ordered that a judgment of this court be entered quashing the indictment herein, because on the construction of the statute hereinbefore stated the indictment is not authorized by the statute upon which it rests."

In order that a matter of such great importance to the press of the United States might be settled for once and all by the highest tribunal THE WORLD called upon President Taft to appeal from Judge Hough's decision to the Supreme Court of the United States. This demand was voiced by hundreds of other papers throughout the country and on February 26 last the Government entered an appeal. On the day the writ of error was filed the Attorney-General said: "It was the Macedonian cry of THE WORLD for a Supreme Court review of the case which we have heard and appeased."

On Monday, October 24, 1910, the appeal was argued before the United States Supreme Court. A little less than two hours sufficed for the arguments of counsel, who closely followed the lines laid down in their respective briefs, copies of which were filed on October 20. The following Justices sat upon the bench: Mr. Justice Harlan, Mr. Justice White, Mr. Justice McKenna, Mr. Justice Holmes, Mr. Justice Day, Mr. Justice Lurton and Mr. Justice Hughes.

Attorney-General Wickersham took no part in the argument, the Government's case being presented to the court by Mr. James C. McReynolds, with whom was Mr. Stuart McNamara, special assistant to the Attorney-General. Mr. DeLancey Nicoll and Mr. John D. Lindsay, of the law firm of Nicoll, Anable, Lindsay & Fuller, appeared for the Press Publishing Company.

The Government's contention was for many jurisdictions. In the words of Mr. McReynolds it was: "Under the well-understood doctrine in respect of libel every publication, every passing of the paper containing the libel from one person to another, is a separate and distinct offense. West Point is a district under the exclusive jurisdiction of Congress, and offenses committed there cannot be punished by the New York law at all, and can only be punished, of course, by an act of Congress which directly provides for the punishment, or indirectly by adopting the State law. Offenses committed at West Point are offenses not against the State of New York, but against the United States, and how they shall be punished is a matter for Congress and Congress alone. In other words, in respect of libel West Point stands substantially in the same attitude as the District of Columbia, and it is not only within the power of Congress to provide for the punishment of libel circulated at West Point, but it is the duty of Congress to do it.

"There is no question here of whether or not a man may be indicted more than once, or whether for the same offense he may be indicted in more than one district, and if there is it is the settled law that in every county in the United States where a newspaper is circulated, if it contains a libel, somebody is guilty of libel and may be indicted there; and there is no more reason for permitting the circulation of slanderous papers within the confines of West Point than there would be to permit them to circulate in New Jersey with the same impunity."

Mr. DeLancey Nicoll, in behalf of THE WORLD, addressed the court at length. In brief, he answered the Government's proposition by saying:

"First, that the construction contended for by the Government is not within the spirit of the act of July 7, 1898. We answer it further by saying that it is not even within the letter of the act of July 7, 1898.

"Our first proposition is that even if the act of 1898 literally construed could be regarded as covering the case it ought not to be so construed for several reasons, which I will take up in order.

"The first is that the acquiescence of all legal minds for almost a century forbids the construction now for the first time asserted by the Government.

"The second is that the construction contended for by the Government would lead to injustice, oppression and absurd consequence.

"The third is that the construction is unnecessary to remedy the definite evil or mischief which the framers of the act of 1825, upon which the act of 1898 is modelled, had in mind; and that the construction would lead to another evil which it was the intention of the framers of that act to avoid.

"Our fourth contention is that the construction contended for by the Government is at variance with the whole life and history of the country."

Mr. Nicoll pointed out that the Crimes act of 1792 and the act of 1825 showed that where the State had power to punish an offense there was no intention to confer jurisdiction upon the Federal Government. He showed that the people have ever guarded jealously the liberty of the press. He made for that liberty, against injustice and oppression, a vigorous appeal. His analysis of law and history was clear and powerful. In concluding his address he said: "What I say is that the contention of the Government in this case runs counter to the whole policy of the law of New York relating to criminal libel. It is based upon a principle which is ignored by the statutes of the State of New York. While the Government is here in the attitude of applying the law of the State of New York to this offense, it is really asking a construction which is directly at variance with the policy of that law, for here this prosecution is based upon a small and incidental part of the circulation, which is entirely ignored by the New York law in its treatment of the case. Here the contention of the Government leads to a double punishment under a State statute which provides for but one punishment, for it is one of the peculiar results of this construction claimed by the Government that although for a publication of a libel in the State of New York he could be punished

but once in the State, and if you prosecute him try him, and convict or acquit him for it in another State. he could not again be prosecuted in the State of New York; yet, under this construction no matter whether he is acquitted or convicted in the State of New York he could still be prosecuted in the places within the geographical limits of the State of New York and, not only there. but in as many other ceded places throughout the United States as the Government deems it necessary to prosecute him in.

As a matter of fact the prosecution is premature. It is born before its time It belongs to that new dispensation when the Federal Government shall have taken to itself all power and all authority. when the States shall have been reduced to mere geographical divisions of the national domain, when the Federal tribunals shall no longer decide cases in accordance with precedent and authority and the law of the land. but in accordance with the need and spirit of the time as they may be interpreted by some great steward of the public welfare."

THE WORLD'S ENCOURAGEMENT OF AVIATION

THE WORLD, without boasting, can claim to have done more to encourage the science of aviation than any other newspaper or public agency. It dared to lead where others have followed

On January 31, 1909, THE WORLD, looking forward to the Hudson-Fulton celebration and realizing the universal interest felt in aeronautics, announced:

"To make this anniversary notable, to encourage the science of aerial navigation. to inspire effort to invention. to reward pioneer endeavor in aviation, to demonstrate beyond all question the commercial and scientific practicability of the dirigible balloon and the aeroplane THE NEW YORK WORLD makes the following offer:

"Ten thousand dollars will be paid by THE WORLD to the person who makes the journey from New York to Albany in an airship or flying machine mechanically propelled, thus duplicating in the air Fulton s famous steamboat trip of a century ago. If two or more competitors perform the journey on the same day, the one making the fastest time will receive the prize. This offer of THE WORLD, which is open to the aeronauts of Europe as well as of America, has been accepted by the Aero Club of America the recognized American and international authority in aerial matters."

After Capt. Thomas S. Baldwin and George T. Tomlinson, during the Hudson-Fulton celebration. tried for the $10,000 prize and failed, THE WORLD on October 10, 1909, printed this announcement: 'To the first person who makes the Fulton flight from New York to Albany, or from Albany to New York, by a continuous trip in a mechanically propelled airship either lighter or heavier than air, THE WORLD will pay $10 000. This offer holds good until October 10, 1910, and is made without any conditions whatsoever, except that the starting point must be somewhere in the limits of New York City and the finish somewhere in the limits of Albany, or vice versa, and that intending competitors must give at least twenty-four hours' notice to THE WORLD and the secretary of the Aero Club of America of their intention to start."

The civilized world knows how gloriously that prize was won on Sunday, May 29, 1910 by Glenn H. Curtiss, who flew from Albany to New York, 137 miles, in 152 minutes, breaking the long distance flight record in speed. At times Mr. Curtiss's machine sped sixty miles an hour. All records in aviation were broken by this flight. Records for speed, for distance, and for both combined, went down before the steady wing of the Curtiss aeroplane. The exact figures of the flight were: Start, Albany, 7.03 A. M.; landed at Gill's farm, Camelot, near Poughkeepsie, 75 miles from starting point, 8.26 A M.. left Gill's farm 9.26 A. M.: landed in Inwood, 62 miles from Gill's farm, 10 35 A. M.; left Inwood 11.42 A M.; landed at Governor's Island noon.

Congratulations poured in upon Mr. Curtiss and THE WORLD. President Taft made that night the following statement for THE WORLD: "I am intensely interested in what Mr. Curtiss has done It seems that the wonders of aviation will never cease. I would hesitate to say that the performance of Mr Curtiss is an epoch. because to-morrow we may hear that some man has flown from New York to St. Louis Mr Wright told me at the time the ten-mile flight from Fort Myer was made that the chief difficulty was in flying over unknown territory. Mr. Curtiss seems to have surmounted this and I am glad he has. His flight will live long in our memories as having been the greatest — *William H Taft*"

Three hours after Mr. Curtiss landed at Governor's Island he stood in THE WORLD'S editorial room, with his wife, surrounded by THE WORLD'S staff and other friends. Mr. Angus Shaw President and Treasurer of the Press Publishing Company (THE WORLD), handed the victor a check for $10.000, saying: "Mr. Curtiss, I congratulate you on your feat of to-day, and with great pleasure. I present you with a check for $10,000 as winner of THE WORLD'S prize for your flight from Albany to New York." Mr. Curtiss replied. "This is the quickest pay I have ever received. It took me longer to make the flight than it has taken THE WORLD to award the prize. I can only say that I appreciate the generosity of THE WORLD in offering so generous a prize." The aviator then turned the check over to Mrs. Curtiss. remarking that she would have got it eventually anyway. Thus ended the happy incident

On Tuesday evening, May 31, at a dinner given to Mr. Curtiss at the Hotel Astor Mayor Gaynor who presided, announced that "to further encourage aviators, and to inspire the brave and heroic pioneers in air travel to still greater feats, THE NEW YORK WORLD and the St. Louis Post-Dispatch now offer a prize of $30 000 for the first successful aeroplane flight between New York and St. Louis."

Official announcement of this prize was made on July 16, 1910, as follows:

"THE NEW YORK WORLD and the St. Louis Post-Dispatch will give thirty thousand dollars to the first aviator who between August 15, 1910, and January 1, 1911, flies from New York to St Louis or from St. Louis to New York within one hundred consecutive hours, using the same aeroplane from start to finish.

"The only condition attached to this offer is that at least three days' notice of intention to start for this prize must be given to either THE NEW YORK WORLD or the St Louis Post-Dispatch in order that announcement may be made of the actual starting and finishing points, the approximate route and other details as agreed upon. (Signed) THE WORLD."

Throughout the world of aviation this splendid offer was applauded. Messages of congratulation on the enterprise of THE WORLD and Post-Dispatch came from all the leading aviators in America England. Germany. Austria. France and other countries. Army and Navy men everywhere also became instantly and keenly interested and the press of Europe and the United States accorded generous praise for the hanging up of such a worth-while purse to encourage aerial science. The general opinion expressed was that the flight can be accomplished and the prize won by airships of the present state of development Some of the most famous aviators of the world have expressed desire or intention to try for the big trophy Among the competitors entered soon after the offer were Glenn H. Curtiss. Orville Wright. C. K. Hamilton. Capt. T. S. Baldwin, Joseph Seymour, J. C. Mars and Charles W. Miller. Later entries have included Edwin Cleary. Walter Brookins, Arch Hoxsey, Duval La Chappelle. Leon Morane, Frank Coffyn. James Radley. Louis Paulhan and others.

On November 14, 1910, THE WORLD'S plan for a flight by aeroplane from a vessel at sea to shore. adopted by the Navy Department. was given a test and proved an unqualified success. Eugene B Ely in the Curtiss biplane Hudson Flyer, the machine used by Curtiss in the Albany-New York flight for THE WORLD'S $10.000 prize, flew from the deck of a United States warship anchored in Hampton Roads to shore five miles away. He started at 3.16 P. M. and five minutes later was safe on the soil of Virginia, a few miles north of Norfolk.

Capt. Washington Chambers said the flight was a grand success. "I confess that the efforts on the part of THE NEW YORK WORLD spurred us on and did much to arouse the keen interest displayed all around in the experiment," said Captain Chambers. "The flight to-day proved to me that the aeroplane is a big factor in naval movements of the immediate future. Every cruiser should be equipped

with a collapsable platform and two or more aeroplanes. I think the time not far distant when the powers of the world will be doing just this. We have been behind in aviation, but our experiment to-day has placed us up even with the other big countries in the development of the science." Ely's flight was made in a pouring rain and in the face of a stiff, cutting, freezing southeast wind.

Military and naval men everywhere were interested when in June, 1910, Glenn H. Curtiss, for THE WORLD, flying at an altitude of 900 feet, dropped a quaker bomb upon an outlined battleship in Lake Keuka, N. Y. This and Mr. Curtiss's feats a little later off Atlantic City, N. J., when day after day he flew out over the sea the pathway of all the great navies, constituted the airship's first invasion of the domain of the battleship. The experiments evoked much instructive discussion by experts and the press, world-wide interest being aroused. Admiral Bridge, S. C. B., of the Royal Navy of Great Britain, author of "The Art of Naval Warfare," and one of the leading authorities on armor plate and projectiles, wrote to THE WORLD on August 3, from London, a long and valuable expression of opinion. He said: "THE WORLD is to be congratulated on having initiated a very interesting experiment. In my opinion, though no doubt other experiments must be made, Mr. Curtiss's proceedings at Keuka Lake go a long way in helping us to settle the value in war of the aeroplane operating against ships."

A CHECK ON REBATING.

Evidence obtained and given to Federal authorities by THE WORLD led Adrian Gips, general manager in this country of the Holland-American Steamship Company, to plead guilty in the United States Circuit Court to having accepted rebates from railroads, in contravention of the Elkins law prohibiting that favorite practice of the trusts, the one they have found so effective in the destruction of competition. Judge Holt imposed fines aggregating $4,000 on Gips, the items being $2,000 on each of the two counts in the indictments, the truth of which Gips had admitted. A week later, David O Ives, head of the Board of Transportation of the Boston Merchants' Association, took the same course as Gips, pleaded guilty and was fined $1,000. Four others later paid fines.

COMMISSIONERS CONFIRM WORLD'S DISCLOSURES.

On October 4, 1910, THE WORLD'S exposures of abuses in the management of the State's forest preserve bore fruit when James S. Whipple resigned from the office of Forest, Fish and Game Commissioner, which he had held since 1905, and Governor Hughes promptly took his name off the official rolls. The immediate occasion for this step was furnished by a report on the Whipple administration by Roger P. Clark and H. Leroy Austin, specially appointed by the Governor to investigate, after THE WORLD'S sweeping charges. Their work had been continuous since February, 1910, and confirmed throughout the original exposure by THE WORLD. Governor Hughes and Speaker Wadsworth advised Whipple to resign immediately, which he did, to avoid the embarrassment of removal.

Frank K. Bell, of Glens Falls, resigned on September 24, when it was learned that he had combined the functions of special counsel to the Forest, Fish and Game Department and legislative agent for the International Paper Company. Whipple, in his letter of resignation, derided the facts brought out by the investigators. Governor Hughes, replying to this, said that he did not charge wrong intention, but that the report made reform in the department imperative. "It is impossible for me adequately to express the regret that I feel at the conditions which the investigation of your department has shown to exist," the Governor wrote in part. "I accept your statement that you have not been guilty of wrong intention. But the conditions which have been shown to exist cannot be ignored and must be immediately rectified."

Proving the truth of THE WORLD'S disclosures, the entire report, sixty-three pages, criticised the administration of the State forests, finding that Whipple did not prevent trespass on at least 150 pieces of land which both the Constitution and statute law declare to be reserved expressly as wild State property. Carelessness in dealing with trespass cases was also charged against the Commissioner. The investigators said that notwithstanding the notoriety that attended these cases through the persistent exposures of THE WORLD, the State had not received in damages and penalties the actual value of timber stolen in the last five years. They expressed the opinion that if the Commissioner had started out vigorously to prevent trespass, many of the cases of timber thieving that occurred in the latter part of his administration would have been prevented. In other words, had THE WORLD'S voice been sooner heeded much would have been saved to the State.

On November 11, 1910, sweeping changes in the staff of the Forest, Fish and Game Department, as a result of the recent investigation of that department, were made by Commissioner Austin who succeeded James S. Whipple, who retired after the investigation. Ernest H. Johnson resigned as Assistant Superintendent of Forests. While employed by the State at $2,000 a year he also acted as superintendent of the Harry Payne Whitney preserve in the Adirondacks at $1,600 per annum. Commissioner Austin removed two superintendents of fire and ten game protectors "for the good of the service."

HELPING WOULD-BE CITIZENS ALONG.

On the first day of the new year, 1910, Congressman William S. Bennet said to THE WORLD anent its campaign in behalf of immigrants who are delayed in getting their first naturalization papers:

"THE WORLD has done a splendid and timely piece of work in calling attention to the hardships that now confront the honest seeker after naturalization. I am chairman of the Sub-Committee on Naturalization and I feel certain that most of the troubles made public by THE WORLD will be remedied by Congress within the next few months. There will be no party lines in the matter, The New York Congressmen will work together."

On January 4, as a direct result of the public and official interest aroused in the troubles of the seeker after citizenship by the facts reported in THE WORLD, new clerks were at work in the State and Federal bureaus of naturalization. United States Commissioner Shields said: "I have seldom seen such quick results following a demand for a public reform as have followed the stories in THE WORLD calling attention to the troubles of seekers after naturalization. Officials have known of these unspeakable bad conditions for a long time, but had grown hopeless."

On January 12 Mr. Bennet's bill passed the House of Representatives. By it the Clerk of the United States Court for the Southern District of New York was authorized to use all naturalization fees received in his office that may be necessary to maintain a sufficient clerical force to expedite the issuance of citizenship papers. This meant practically the abolishment of the "Citizens' Bread Line" of the metropolis. On January 22 THE WORLD was glad to announce that the following week ten new clerks would begin work in the two naturalization bureaus in New York, the County Clerk being authorized to employ four at the expense of the United States by Secretary Nagle of the Department of Commerce and Labor. Thus many delays were since prevented.

Among the foreign-born residents of New York generous praise was given to THE WORLD for its successful contest to do away with the hardships just discussed. The newspapers printed in foreign languages were prompt to credit THE WORLD for its work. Among these were the Staats-Zeitung, Szabadsag (Liberty), Vorwaerts, and Il Progresso Italo-Americano. Many grateful letters were also received from foreign-born residents.

Figures given out by the Naturalization Bureau on December 7, 1910, strikingly showed the results of THE WORLD'S campaign. In 1909, Chief Clerk Saylor records, there were five clerks employed in the bureau at an aggregate salary of $11,500 a year. During 1910 seven clerks were used, their services costing the Government $8,800. In 1909 the bureau took in $8,336 in fees, a net loss of $3 164, while up to December 7, 1910, $33,516 had been received, a profit of $24,716. A total of 3,028 "first papers" were taken out in 1909, and 1,327 "second papers," against 15,108 "first papers" and 4,692 "second papers" this year. The members of the County Court House naturalization staff claim that they have handled twice as many cases in 1910 as both naturalization offices in the Federal Building combined. County Clerk Schneider,

leaving on December 7 for Washington, to try to get still greater facilities for his office, said to a reporter for THE WORLD: "I don't know what we would have done without the assistance of THE WORLD. Its efforts for improvement of conditions in the Naturalization Bureau have been invaluable."

ROTTEN EGG INDUSTRY EXPOSED BY WORLD.

A widespread sensation was caused on November 10, 1910, when Bayard Clarke Fuller, for nineteen years Supervising Inspector of Food for New York City, was suspended by Health Commissioner Lederle, as the outcome of an investigation conducted by THE WORLD into the trade in rotten eggs in New York City. Philip Holz and Hugh H. Masterson, two of the inspectors under Fuller, recognized generally in the Department of Health and out of it as his "right hand men," were also suspended by Commissioner Lederle.

The facts developed by THE WORLD'S investigators proved: 1. That an enormous business in purchase and sale of putrid and decomposing eggs, known in the jargon of the trade as "rots and spots," exists in New York City. 2. That these eggs are disposed of to bakers and cake manufacturers, who use them in the manufacture of sponge cake, pound cake, lady fingers and other cake stuff that are yellow-hued and made principally of eggs. 3. That this trade has been carried on for years under the tacit permission, if not the active assistance, of the men intrusted by the city with the inspection and care of the food of the city.

The investigation by THE WORLD proved that there was not the slightest difficulty in the way of any firm or person who desired to enter upon the business of buying and selling "rots and spots." The experience of the firm of Lasar & Thompson, which began such a business at No. 194 Duane Street about two weeks before THE WORLD'S exposure, was the subject of THE WORLD'S investigation and they disclosed that not only are the best customers for these horrible eggs the wholesale dealers in bakers' supplies, but the demand was actually far in excess of the supply. It has been estimated that fully 1,000 cases of decomposed eggs are disposed of in this way every day in New York City alone.

When Commissioner Lederle heard the facts he promptly placed THE WORLD'S representatives in communication with Commissioner of Accounts Fosdick. Mr. Fosdick immediately took the matter up with Mayor Gayner, who told him to go ahead and spare nobody that might be shown to have countenanced any trade in decayed eggs for food purposes.

Dr. H. W. Wiley, Chief of the Bureau of Chemistry of the Board of Agriculture of the United States at Washington, expressed himself as immensely gratified that THE WORLD had undertaken the task of exposing the illegal traffic, and by Dr. Wiley's direction the United States Food Inspectors in New York at once began a rigid investigation.

On December 1, 1910, THE WORLD'S charges, printed on November 11, that an enormous industry in the sale of decomposed eggs—"rots and spots" as the trade knows them—for food purposes, had grown up under the fostering eye of the Food Inspection Bureau of the Health Department, were fully borne out and amplified by the report of Commissioner of Accounts, Raymond B. Fosdick, which was made public after Mayor Gaynor had read it over.

The Commissioner recommended that Hugh H. Masterson, one of the trusted inspectors of the Food Inspection Bureau, in whom Sanitary Superintendent Bensel said he had "the utmost confidence," be summarily dismissed, and that the District-Attorney be requested to take such action as may be possible, in view of evidence to the effect that Masterson was paid money by men engaged in handling "rots and spots." Commissioner Fosdick also recommended that Chief Inspector Fuller, head of the Food Inspection Bureau and the intimate friend of Superintendent Bensel, remain under suspension pending the continuation of an exhaustive inquiry into the activities of the bureau in other lines besides eggs.

In the course of his report Mr. Fosdick made public the names of some baking concerns and egg dealers who dealt with the recognized dealers in "rots and spots." He did not include the names of all those firms that came under his observation in this respect, as he intends to make a searching inquiry concerning the relations between some of these firms and certain members of the Health Department. To publish all he has learned, Commissioner Fosdick is convinced, would defeat the object at which he aims, namely, a thorough cleaning up of the Health Department from top to bottom.

To THE WORLD Commissioner Fosdick wrote on November 30, 1910:

"THE WORLD is entitled to the credit of placing before this Commission the facts upon the basis of which the investigation of the use of decayed eggs for food purposes was begun."

THE WORLD'S STRUGGLE FOR SUBWAYS.

So far as the Public Service Commission was concerned, THE WORLD'S fight for the "pay-as-you-go" system for building new subways was won in March, 1910, when the Commission decided, a year after THE WORLD'S persistent fight began, that practically all subways planned by the Commission should be built according to suggestions advanced by THE WORLD. The Comptroller of New York had then fixed the city's debt limit at $47,000,000, but more cash was in sight. A total annual expenditure of $25,000,000 was regarded as a minimum, ample to carry out all the plans of the Commission.

On April 5, in a speech urging the immediate official adoption of rapid transit routes for the entire city, Chairman William B. Ellison of the Citizen's Committee, nominated by civic bodies through THE WORLD, struck the keynote to which other speeches were attuned, in the hearing in the Aldermanic Chamber, before the Board of Estimate Rapid Transit Committee, consisting of Mayor Gaynor, President Mitchel of the Board of Aldermen, and Comptroller Prendergast. Mr. Ellison had been designated by Mayor Gaynor as the first speaker. He gave credit to THE WORLD as the medium of initiation of the citizen's movement, and after several who followed him had declared their allegiance to him and to the Citizen's Committee, Mayor Gaynor added official indorsement by saying: "We are all in favor of the general plan." The hearing drew a crowd which filled the Aldermanic Chamber and choked the outer corridor. It was one of the largest and most enthusiastic assemblages ever gathered before an official body to urge rapid transit.

Throughout the year THE WORLD continued to turn the light upon the long-played game of obstruction by the Interborough people. After their boasting that the Morgan interests stood ready to supply them with $100,000,000 for new subway construction, and Chairman Willcox, of the Public Service Commission invited them to submit proposals to build subway extensions with their own money, THE WORLD, on November 18, urged editorially: "Let the Interborough people go ahead and build the lines they profess to want if they are in earnest. They should have no trouble finding private capital to carry out their east and west side extensions. The traffic awaits them, and it will be far heavier by the time their lines can be completed."

On the same day William G. McAdoo, in behalf of the Hudson and Manhattan Company, made a definite offer to equip and operate the $100,000,000 triborough subway as soon as completed, provided certain changes in the route are made. Coming as a surprise to the Public Service Commission, the McAdoo offer completely changed the outlook for subways. By his offer he demolished the chief argument of the opposition to the new routes that no operator would ever be found for the proposed lines. Of Mr. McAdoo's offer THE WORLD said: "Here is a chance for New York to obtain not only an operator for the triborough lines but a comprehensive system competing with the Interborough and reaching all the great centres of traffic. Mr. McAdoo's proposals deserve most careful consideration from the Public Service Commission and the Board of Estimate. Nobody is justified in expressing a definite opinion as to the merit of the plans until the offer has been studied in detail, but convincing proof is again furnished that this city is not at the mercy of the Interborough monopoly."

WAGING WAR ON THE "MILK TRUST."

THE WORLD commenced to wage war on the "Milk Trust" in November, 1909, and as a result as

told in last year's WORLD ALMANAC, Attorney-General O'Malley appointed John B. Coleman as a Special Deputy Attorney-General to inquire into the milk dealers' methods. This inquiry was carried into 1910, before William Grant Brown, referee. The fruit of this investigation was the submitting to the Legislature in April, of recommendations by Attorney-General O'Malley, which, if carried into law, would effectually regulate and control all corporations in New York State dealing in food products and other necessities of life. To THE WORLD the Attorney-General gave full credit for bringing the "Milk Trust" to book. He said: "THE WORLD made a great fight and I appreciated its help. It is worthy of great praise for the work it performed." Attorney-General O'Malley's report to the Legislature substantially proved to be true every charge made by THE WORLD concerning the existence of a "Milk Trust": of a combination to raise the price of milk from eight to nine cents without any fair excuse; that nine cents a quart was and is, an unjustifiable price for household milk; that the combination of dealers fixes a low price to farmers and a high price to consumers; and that at eight cents a quart big milk concerns made enormous profits and paid large dividends on watered stock.

It was the evidence published in THE WORLD before he assumed office, that led District-Attorney Whitman of New York to take an active part in the milk investigation started by this paper. It was THE WORLD that was denounced by the big milk concerns, when the Alex. Campbell Milk Company, one of Brooklyn's largest retailers, announced that it would go back to eight cents on February 1, and other retailers did likewise. It was THE WORLD that spurred the Grand Jury to go after the "Milk Trust," with the result that a dozen or more dealers were indicted for conspiring to fix milk prices.

GRAND JURIES STIRRED BY THE WORLD.

It was THE WORLD'S exposures, too, of cold storage conditions that led Prosecutor Garven, of Hudson County, N. J., to start a Grand Jury investigation as to what the big meat packers knew about the extent to which cold storage figured in keeping up the price of meat. THE WORLD showed the way to the finding of a dozen indictments.

It was THE WORLD'S exposures of the existence in New York of a poultry trust that led to the returning of three blanket indictments, involving eighty-seven defendants, by the January Grand Jury which investigated the matter.

To sum it in a few words, THE WORLD has steadily led all papers in accomplishing reductions in the prices for necessities and in sustaining the protest of all people against the high cost of living. THE WORLD has familiarized the people with the part cold storage plays in keeping down the visible supply and how the various trusts make consumers pay to swell the fortunes of the trust magnates. And this righteous fight of THE WORLD for all the people all the time has only just begun!

FOR SAFETY AND SANITY IN AUTOMOBILING.

In the interests of public safety THE WORLD has fought hard for strict automobile laws. In the beginning of its campaign it declared that the great increase in the use of automobiles had created new conditions which called for reform along four general lines. These were: (1) A check to reckless driving; (2) greater public safety on the highways; (3) automobile owners to pay more for the use of highways; (4) more fairness in speed regulations, which now are often arbitrary and impossible to obey.

THE WORLD'S campaign for these things culminated on January 13, 1910, in decisive action, when the Automobile Club of America, representing 2,000 persons who own cars, issued a statement declaring in favor of new regulations and setting forth its views. A conference of city officials, club representatives, magistrates and others interested was held in the rooms of the National Highways Protective Association. As a result, the Legislature was called on to enact laws along the lines advocated by THE WORLD.

In the Callen Motor Vehicle bill were included many of the recommendations made by THE WORLD for safeguarding life, the elimination and punishment of the "joy rider" and the ready identification of reckless drivers. Not only were speed maniacs hard hit, but under this bill it was made difficult for an autoist to injure a person and escape detection, THE WORLD'S suggestions as to number plates and lamps being adopted. THE WORLD'S demand for the proper examination of chauffeurs was also met. It is estimated that the State's revenue under the new automobile law, which became effective on August 1, will be fully a million and a half dollars annually, to be devoted to the maintenance and improvement of the highways of New York State.

Through THE WORLD'S efforts, too, the doom of automobile racing on the highways of Nassau County was pronounced on October 6, when the Grand Prix event, which was scheduled for October 15, was declared off. Representatives of the Motor Cups Holding Company, which held the Vanderbilt Cup race the week previous, said that the reflection of public sentiment printed in THE WORLD was directly responsible for the abandonment of the 278-mile contest against speed and death. Seventeen entries had been received, but two of the entrants refused to participate in the race unless safety was guaranteed. THE WORLD was widely praised for its sturdy stand against the Grand Prix contest.

VICTORIES IN AQUEDUCT FIGHT.

THE WORLD won a signal victory on February 24, 1910, in its fight against waste of city money in acquiring land for the new Catskill Aqueduct. Following the suggestions made by THE WORLD and taken up by Mayor Gaynor, Corporation Counsel Watson dismissed more than half the staff of expensive appraisers and informed Mayor Gaynor that in curtailing expenses pointed out by THE WORLD he would save the city $700,000. The Corporation Counsel's investigation confirmed every charge THE WORLD has made in its three years' fight against flagrant abuses. He learned that men were appointed under the McClellan administration for political and social reasons, and that they did little work. He learned that scores of men received enormous salaries and fees unnecessarily. He learned that the work done was small in comparison with the tremendous cost.

Seventy-nine men, some of whom received $50 a day for their services, although none was a commissioner, were dismissed as a beginning and more were later discharged. Drastic changes in methods have since been enforced, and the extravagance of which THE WORLD has complained can hardly occur again.

In its exposures of the aqueduct project, THE WORLD has the record of having shown: That the award of construction contract to McArthur Bros. and Winston was for $2,345,425 more than the lowest bidder; that official figures prove cost of condemnation proceedings was frequently more than the value of land acquired; that enormous expense bills attended small services by many commissions; that political influence was used in the appointment of the appraisers and clerks dismissed; that the water wasted in the present Croton region would supply the city without the costly Catskill project; that fabulous claims for damages were made by property owners in the Catskill region, and that thousands of dollars were paid to lawyers and claim agents in fees out of the city treasury.

EXPOSED ROBBERY BY LIGHT AND TELEPHONE TRUSTS.

Not until THE WORLD discovered it, on November 17, 1910, and next day printed the facts, did the public know that because the referees' hearings in the suits brought by the city against the Consolidated Telegraph and Electrical Subway Company and the Empire City Subway Company, the two concerns that control the conduits through which all electrical wires of every description must be carried, have been conducted so quietly, sensational disclosures had been made which prove that gross frauds have been committed by the lighting and telephone monopolies in New York.

The city is suing for forfeiture of the conduits and for the recovery of millions of dollars due it for rentals. In the suit now being heard against the Consolidated Company the following facts developed: (1) That books of records in which construction accounts amounting to nearly $5,000,000 were kept have been destroyed. (2) That $4,750,000 mortgage bonds issued for construction work were sold at 90 and 60 cents on the dollar and charged in the accounts on which the city would settle for its share of the

profits at par. (3) That the telephone and lighting trusts organized construction companies one after the other each of which credited itself with at least 15 per cent. commission and sometimes as high as 30 and 45 per cent., there sometimes being two commissions on the one job, and (4) that other accountings to the city have been based on figures which, to say the least, left their honesty greatly in doubt

CASH AND HONORS FOR NEW PLAYWRIGHTS.

With the object of increasing the number of successful American plays by American authors and of discovering new playwrights and new dramatic material, THE SUNDAY WORLD, in its issue of June 27, 1909, offered $1,000 in prizes for the best six play ideas or scenarios submitted in open competition. The contest closed October 14, 1909, but as 3,000 manuscripts were received, decision could not be rendered until April 3, 1910. The jury of award were Miss Martha Morton, Henry B. Harris, Wilton Lackaye, Louis V. De Foe and Maurice Campbell.

The first prize, $500 cash and the guarantee of a New York production, was won by Mrs. Martha Fletcher Bellinger, of New York City, for her scenario entitled "A Woman's Sphere." Five prizes of $100 each, were awarded to Herbert Franke, Ithaca, N. Y.; Walter Scott Howard, of Cambridge Mass; Mary Rider Mechtold, Stapleton, Staten Island; P. S. Adamson, New York City. Special honorable mention of scenarios by Amelia Weed Holbrook, Jean Drew and Mrs. Alexander C. Davie, all of New York City, was made by the judges. Many others received honorable mention. Mrs. Bellinger the winner of the first prize, will receive, in addition to the $500 from THE SUNDAY WORLD, royalties ranging from 4 to 7½ per cent. of gross weekly box receipts of the play.

ELLIS ISLAND FOR SICK BABIES.

Moved by the appalling mortality among the babies of the city during the heated season THE WORLD fought hard to procure as temporary seaside hospitals for infants the new but unused Ellis Island hospitals, which were deemed ideal in location and equipment. THE WORLD'S revelations as to the pitiable needs of sick babies at once aroused the interest of many charitable societies, institutions and individuals in the city. Such men as Health Commissioner Lederle, Prof. William H. Burr, President of St. John's Guild; Homer Folks Secretary of the State Charities Aid Association; R. Fulton Cutting, President of the Fresh Air Board of the Association for the Improvement of the Condition of the Poor, and others of equal note in philanthropic work, warmly supported THE WORLD'S efforts to obtain the permission of the Federal Government to use the Ellis Island buildings for the purposes named.

FIGHTING FRANCHISE TAX DODGERS.

The results of THE WORLD'S fight against Franchise tax dodgers continued to be eminently satisfactory in 1910. In May the settlement of the suits against the Metropolitan Street Railway brought the amount realized by New York City in franchise taxes since January 1, 1909, up to about $20,000,000. In referring to his success in cleaning up the franchise tax litigation, Attorney-General O'Malley said:

"The assistance that THE WORLD has given me in fighting for the collection of this tax has been valuable. It has been a consistent and fearless advocate of the enforcement of the special Franchise tax law which was put on the statute books largely through the campaign waged by that newspaper." THE WORLD worked ten years to have this law enacted.

The Attorney-General estimated that the Ford Franchise law will in the future net the State annually a revenue of about $9,000,000. Nine million dollars a year saved to the people through THE WORLD'S influence and efforts is an item worth considering.

FIGHT FOR MORAL MOVING PICTURES.

During the year THE WORLD has contended strongly for the elimination of immoral pictures in moving picture shows. Of this campaign District-Attorney Charles S. Whitman said: "I think that THE WORLD is doing excellent service to the public in its articles upon the moving-picture shows that are giving to the patrons of such places scenes that are debauching to the young mind. I am heartily with the position taken by THE WORLD and congratulate it upon its wise stand. The production of moving-picture films after all is a commercial proposition. When publication of the fact that they are turning out harmful products brings them to a sense of what they are doing, makers of films will turn quickly toward getting out a better product. Thus we get to a better condition from the publicity THE WORLD gives to the bad features of the shows." The work of THE WORLD against objectionable films was praised by W. Frank Persons, a member of the General Committee of the National Board of Censorship of Motion Pictures. Matthew P. Adams, another member of this committee, indorsed THE WORLD'S suggestion that the Board of Aldermen create a paid commission to inspect all moving pictures and suppress those that depict crime or suggest immorality.

BROUGHT REFORMS IN WALL STREET.

In March, 1910, the Governors of the New York Stock Exchange began to take serious notice of THE WORLD'S campaign against certain undesirable methods of the Exchange. By drastic resolutions they dealt a staggering blow to the group of gamblers among the membership whose operations had recently involved the institution in a series of scandals. These scandals caused a widespread demand for legislation that will afford a greater measure of protection to the persons who invest their money in Wall Street securities.

The work of the governors took definite shape on March 30, in the adoption of a set of resolutions which granted many of THE WORLD'S demands for reforms and which have put an end to some methods of manipulation that had been in use by the professional traders for a quarter of a century. Had the resolutions adopted as a result of THE WORLD'S fight been in operation years ago, some of the biggest speculative deals carried out in the financial district in recent years would have been very difficult if not impossible, of accomplishment. In brief, "wash" sales, matched orders and pool manipulation were practically stamped out by these resolutions, which went into effect on April 4. The creation of false market prices for pooled stocks by fictitious buying and selling orders is not easy now.

HARD HITS AT TELEPHONE GRAFT.

Upon the announcement in March by Mayor Gaynor that members of the old Aqueduct Board had maintained telephones in their homes at the expense of the city, THE WORLD sought and obtained a list of more than 300 city employes for whose private telephone service the city paid under the McClellan administration. It was ascertained also that in all but eight cases the telephone service was of no practical use whatever to the public. In nearly ninety per cent. of the cases, also, the telephone service contracted for was not to be supplied at the minimum rate, the "party wire," apparently, not being considered good enough. In many instances, as well, the title of the city employé was not even given in the telephone book after the name, and in many cases the residence telephone was not even listed. Over half the employés receiving the service, furthermore, could not properly be classed as "city officials."

THE WORLD also ascertained that for the year 1908—the latest period for which full details were available—the taxpayers paid for these private telephones $14,085.76. Of this sum over $10,000 was paid on contracts, $1,947 for local messages in excess of the contract allowance, and $2,121 for messages sent by the city employé from his home to some place out of the city. These disclosures by THE WORLD led to a complete and speedy reform. District-Attorney Jerome was the first to send to the city treasury his check for $69.50, and others followed him with their refunds. Mr. Jerome said he had given orders to avoid the misuse of his 'phone at public expense.

JAPANESE STATESMEN IN WORLD FORUM.

THE WORLD'S reputation as an international forum in which the opinions of leaders of all nations have been expressed, was sustained in 1910. Among the most notable instances of the use of THE WORLD'S columns in this manner was the publication in August, 1910, of an interview at Tokio, by Don C. Seitz

of THE WORLD, with the Premier of Japan, Gen. Marquis Taro Katsura. In this interview, the Japanese statesman declared that America is revered by his countrymen, that outbursts of jingoism in the United States pains them, that war between Japan and the United States is impossible and that we should help solve the great problem that China offers, not only for Japan, but for the whole world. On September 25, THE WORLD published interviews with Baron Shimpei Goto, Minister of Communications and President of the Imperial Railways of Japan; Baron Takahashi, President of the Yokohama Specie Bank and Vice-Governor of the Bank of Japan; Baron Matsuo, Governor of the Bank of Japan, and President Soyeda, of the Industrial Bank of Japan. On October 2, followed interviews with Count Okuma, Baron Shibusawa and Ichiro Tokutomi. All of the men named are of first importance in the affairs of Japan; and all the talks were of convincing force and historic value to students of the situation in the Far East.

SUNDAY WORLD FIELD DAYS.

In 1910 THE WORLD greatly extended its work of encouraging healthful outdoor recreation among the pupils attending the New York public schools. The great series of athletic games for boys in the grammar schools of the city, known as THE SUNDAY WORLD Field Days, increased their success of previous years. One hundred and fifty-four schools held these separate athletic meets and 36,000 boys competed in the games in the presence of no less than 250,000 of their schoolmates. Three thousand four hundred and sixty medals and 166 banners were awarded by THE WORLD in these games. Since THE SUNDAY WORLD Field Days were inaugurated under the auspices of the Public Schools Athletic League of New York City in 1906 more than 125,000 boys have competed in the games.

In conjunction with the Bureau of Recreation of the New York Department of Parks THE WORLD in 1910 was also instrumental in making the playground parks of New York places of pleasant recreation for thousands of children in the Summer months. A system of organized play was instituted under competent supervision at each park. Two thousand medals and other prizes were dispensed by THE WORLD in these "SUNDAY WORLD Vacation Games." Included with them was the third annual series of THE SUNDAY WORLD Baseball League, in which 200 boys' teams competed on fourteen fields in Manhattan.

SOME OTHER ACCOMPLISHMENTS WORTH WHILE.

The admission of Edgar Allan Poe to the Hall of Fame was largely due to a canvass made by THE WORLD early in the Summer, when it asked readers for an expression of their opinion concerning candidates. Poe led from the first in this vote. In his final triumph in the balloting by the Hall of Fame electors he received 69 votes out of 97 cast, only Harriet Beecher Stowe leading him.

The adoption by the Board of Health of Dr. Ernst J. Lederle's proposed amendment to the Sanitary Code prohibiting the sale of morphine except upon a prescription followed THE WORLD'S advocacy of stamping out the evil of the illicit selling of drugs. After THE WORLD'S crusade had caused the passage of a law making it a punishable offense to sell cocaine without a prescription and requiring a complete record of every sale Dr. Lederle turned his attention to other drugs. The placing of morphine upon what is termed the prohibitive list of drugs is only the first step in the fight he is making against the illegitimate drug traffic. Through the Spofford Fund, created at the suggestion of THE WORLD, forty-three arrests were made and thirty-five convictions secured by Food Inspector Fuller in his cocaine crusade.

On February 18, 1910, Fire Commissioner Waldo issued an order regarding the inspection of theatres by firemen detailed at the playhouses that, he said, was a direct result of the reports given in THE WORLD of conditions at certain theatres throughout the city. "Just after taking office," said the Commissioner, "my attention was called to conditions in some theatres by stories in THE WORLD pointing out some things that appeared to be dangerous. I ordered an investigation at once. It is impossible for the Fire Commissioner to remedy all the apparent defects, but in the order just issued I have tried to do all that is possible under the law." Under this order the utmost care is now taken to guard audiences and actors from every danger by fire.

Following the publication in THE WORLD of an article showing that deficient blind children are compelled to study with the children of the idiot ward on Randall's Island many public educators and men and women interested in the instruction of the blind agreed to lend their services and advice to the Board of Education in the hope of having a special class for backward blind children established in one of the public schools. Miss D. Fiske Rogers of the Social Service Committee of the New York Association for the Blind said: "I am glad THE WORLD has brought this subject to the attention of the public, for the mentally deficient blind children should be given the same chance as other defectives in the public schools and a public discussion of the question will hasten the establishment of a class for them."

The plans of THE WORLD to make Park Avenue one of the most beautiful streets in New York have deeply interested property owners and residents along that thoroughfare. In interviews published in THE WORLD in February, 1910, these people most concerned heartily approved of the suggestions made by this paper for the beautification of the avenue. They have also all agreed that to obtain action the organization of a Park Avenue improvement society is necessary, so that there shall be harmony of effort and that there shall be concentration upon some one practicable plan. There is enthusiasm over THE WORLD'S proposition that the railroad tunnel be covered and that a garden be planted down the centre of the street.

In Delancey Street the pushing to completion of long-delayed improvements was freely credited to THE WORLD. Said President Jacob Ratz, of the Taxpayers' Association of that section: "The people of the east side owe THE WORLD a debt of gratitude for its aid in the fight to put Delancey Street in proper condition. The contractors are a year behind in their work in the building of the subway loop and probably would have taken another year, thus keeping the street in a dilapidated condition, had not THE WORLD exposed the condition of affairs."

THREE OTHER FAMOUS WORLDS.

In the evening newspaper field in Greater New York and the suburbs THE EVENING WORLD so far distances its competitors in circulation, popularity and influence that it has long continued to remain in a class by itself. Happily combining the latest news with striking "feature" stories and interviews and with magazine pages of wide reputation it satisfies all classes of readers. In it the business man, the sporting man, the literary man, the housewife, the politician and the student find daily what they want and served in the way they like it. Its news service, through numerous regular editions and many extras, is always instant and reliable. Editorially, like THE WORLD, it knows no fear when fighting for the right.

THE SUNDAY WORLD, with its wide, international reputation, is still America's greatest Sunday newspaper. This distinction is so freely accorded to it by hundreds of friendly contemporaries that the fact seems well established. It has long been the forum in which the leaders of earth's human family have discussed every conceivable question. The monarchs of many nations have spoken through it. Men and women of science, art, literature, the stage, the church, the political and industrial fields—in brief, from every walk of life—have disseminated the light of their views through THE SUNDAY WORLD. Three news sections carry the news of the globe. The Magazine Section, splendidly illustrated in colors, contains the best obtainable feature stories from week to week. The Funny Side pages, rich in humor, but always free from vulgarity, form an unequalled comic supplement. In the Metropolitan Section the fads, foibles and follies of New York are reflected in a manner quite as pleasing and instructive to out-of-town readers as to those who live in the metropolis. THE SUNDAY WORLD comes close to being a perfect type of Sunday journalism.

THE THRICE-A-WEEK WORLD needs no introduction to the great army of country readers who find in it every other day the best features of the DAILY WORLD. It admirably serves its purpose as a general educator and steadily grows in circulation and influence.

Pawnbrokers' Regulations in the City of New York.

PAWNBROKERS in New York City are regulated by statute. The rate of interest fixed by law is 3 per cent. a month or any fraction of a month for the first six months, and 2 per cent. per month for each succeeding month upon any loan not exceeding $100, and 2 per cent. a month for the first six months and 1 per cent. a month for each succeeding month on any loan exceeding $100. Pledges cannot be sold until after they have been kept one year, and then at public auction by a licensed auctioneer, after publication of at least six days in two daily newspapers designated by the Mayor. Pawnbrokers pay a yearly license fee of $500 to the city and are under the control of the Mayor. The license is issued through the Bureau of Licenses, and their books must be kept open to the Mayor, Criminal Courts, Magistrates, and Police.

PROVIDENT LOAN SOCIETY (EXECUTIVE OFFICE. 346 FOURTH AVE., COR. 25TH ST.) LOANING OFFICES: 346 FOURTH AVE., 186 ELDRIDGE ST., 736 SEVENTH AVE., 105 E. 125TH ST., 409 GRAND ST. BROOKLYN. 24 GRAHAM AVE. BRONX, COURTLANDT AVE., AT 148TH ST.

Office hours: 9 A. M. to 5 P. M.; Saturday to 6 P. M. Ticket good for one year only. Loans may be paid by instalments, in sums not less than $1. Rates of interest: One per cent. per month, or any fraction thereof. Only one-half month interest charged on all loans redeemed within two weeks after date of pledge. Condition of loan, agreed to by the holder of the ticket in consideration of interest being charged at less than the rate allowed by law. The Provident Loan Society of New York shall not be liable for loss or damage by fire, breakage, dampness, theft, or moths; nor shall it be liable in any event for more than 25 per cent. in addition to the amount loaned. Otto T. Bannard, President; Frank Tucker, Vice-President; James Speyer, Treasurer; Mortimer L. Schiff, Secretary.

When making payment by instalment, the full amount of interest due on the sum loaned must be included, and the ticket must be returned. The interest due on the loan cannot be paid by instalment. The Society has thus far limited the classes of personal property on which it has made loans to clothing and so-called "jewelry," including under that designation all articles of gold or silver, precious stones, opera-glasses, eye-glasses, also men's clothing in good condition, and ladies' and men's furs.

Parks in Brooklyn and Queens.

SHOWING SIZE, BOUNDARIES, AND VALUE.

Prospect, 526 acres, 9th Ave., 15th St., Coney Island, Fort Hamilton, Ocean and Flatbush Aves., value $27,735,000.

Fort Greene, 30 acres, De Kalb Ave., Washington Park, Ashland Pl., Willoughby St., Canton St. and Myrtle Ave., value $1,890,000.

Bedford, 4 acres, Brooklyn and Kingston Aves., Park Pl. and Prospect Pl., value $150,000.

Brooklyn Heights, 5 parks, comprising one acre, Columbia Heights, fronting on Furman St.

Tompkins, 8 acres, Tompkins, Greene, Marcy and Lafayette Aves., value $400,000.

City, 7¼ acres, Canton and Navy Sts., Park and Flushing Aves., value $325,000.

City Hall, 1¾ acre, junction of Court and Fulton Sts., value $100,000.

Carroll, 2 acres, President, Court, Carroll and Smith Sts., value $390,000.

Winthrop, 9 acres, Nassau and Driggs Aves., Monitor and Russell Sts., value $325,000.

Highland, terminus of Eastern Parkway Extension, 60 acres, Force Tube Ave., facing Sunnyside Ave., value $250,000

Sunset, 24½ acres, 41st to 45th Sts., 5th to 7th Ave., value $200,000.

Red Hook, 5¼ acres, Richards, Dwight, Verona and William Sts., value $150,000

Bushwick, 7 acres, Knickerbocker and Irving Aves., Starr and Suydam Sts., value $150,000.

Institute Garden, 69 acres, Washington Ave., Eastern Parkway and Flatbush Ave., value $1,250,000.

Parade Ground, 40 acres, Coney Island Ave., Caton Ave., Fort Hamiltou Ave. and Parade Pl., value $1,290,000

Coney Island Concourse, 70 acres, foot of Ocean Parkway, Atlantic Ocean.

Dyker Beach, 140 acres, 7th Ave., New York Bay, Bay 8th St., Cropsey and 14th Aves., value $300,000

Kings, 11½ acres, Fulton, Alsop and Ray Sts, and Sheldon Ave., Jamaica

Greenpoint, 43 acres, Perry St., Nassau Ave. and Lorimer St

McKinley, 11 acres, Fort Hamilton Ave. and 73d St.

Rainey, 4 acres, Vernon Ave., Pierce Ave., Sandford St. and East River.

Bensonhurst Beach, 13 acres, Bay Parkway, Gravesend Bay, 21st and Cropsey Aves., value $38,000

Lincoln Terrace, 7½ acres, Eastern Parkway, Buffalo Ave., President St. and Rochester Ave., value $120,000.

Canarsie, 30½ acres, Rockaway Parkway and Jamaica Bay, value $105,000.

New Lots Playground, 2¼ acres, Sackman St., Newport, Christopher and Riverdale Aves., value $16,000.

Cooper, 6 acres, Maspeth and Morgan Aves., Sharon and Guilford Sts., value $55,000

Irving Sq., 3 acres, Hamburg and Knickerbocker Aves., Halsey and Weirfield Sts., value $70,000.

Saratoga Sq., 3½ acres, Saratoga and Howard Aves., Halsey and Macon Sts., value $121,000

Linton, 2½ acres, Bradford St., Blake, Dumont and Miller Aves., value $35,000.

Forest, 536 acres, between Jamaica Ave. and Union Turnpike, Flushing and Myrtle Aves., Richmond Hill, value $1,250,000

Fort Hamilton, 4½ acres, 4th Ave., De Nyse St., Fort Hamilton Ave., and New York Bay.

PARKWAYS.

Ocean Parkway, 5½ miles, Prospect Park to Coney Island, value $4,000,000.

Eastern Parkway, 2½ miles, Prospect Park to Ralph Ave., value $3,000,000.

Eastern Parkway Extension, 2¼ miles, Ralph Ave. to Highland Park, value $1,300,000.

Fort Hamilton Parkway, 4½ miles Ocean Parkway to Fort Hamilton, value $1,000,000

Bay Parkway, 3 miles (formerly 22d Ave.), Ocean Parkway to Bensonhurst Beach, value $1,000,000

Bay Ridge Parkway (Shore Drive), 3 miles, Fort Hamilton Ave., along shore New York Bay to Fort Hamilton, value $3,500,000

Rockaway Parkway, 4 miles, Buffalo Ave. to Canarsie Beach.

THE WORLD ALMANAC will welcome suggestions for the improvement of this page.

THE astronomical calculations in this work were expressly made for it by Dr. J. Morrison, and are given in local *Mean Time.*

Chronological Eras.

The year 1911 corresponds to the year 7819-20 of the Byzantine era; to 5671-72 of the Jewish era, the year 5672 commencing at sunset on September 22; to 2664 since the foundation of Rome according to Varro; to 2687 of the Olympiads (the third year of the 672d Olympiad commencing July 1, 1911); to 2571 of the Japanese era, and to the 44th of the Meiji; to 1329 of the Mohammedan era, the year 1329 commencing on January 2 and ending on December 21, 1911. The 136th year of the Independence of the United States of America begins on July 4, 1911.

Church Fasts.

THE Roman Catholic Days of fasting are the forty days of Lent, the Ember Days, the Fridays of the four weeks in Advent, and certain vigils or evenings prior to the greater feasts. In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty Days before Christmas.

Divisions of Time.

THE interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a *Sidereal* Day, and is invariable while the interval between two consecutive transits of the Sun over any meridian is called an *Apparent* Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit, and the inclination of this orbit to the equator on which time is measured.

A *Mean* Solar Day is the average or mean of all the apparent solar days in a year. *Mean Solar Time* is that shown by a well-regulated clock or watch while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 21 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight. The Sidereal and Mean Solar Days are both invariable, but one day of the latter is equal to 1 day, 3 minutes, and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days, 6 hours, 9 minutes, and 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the Sun to the Vernal Equinox. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the disturbing influence of the Moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrograde mean motion of 50″.26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 23.6 seconds; the Tropical Year, therefore, consists of 365 days, 5 hours, 48 minutes, and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .595 second per century, but this variation will not always continue.

Julius Cæsar, in B. C. 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends of March *twice*, hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from 1st of March to the 1st of January, and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian year is therefore 365¼ days, which however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A. D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B. C. 45, when this mode of reckoning time was introduced.

The Gregorian Calendar was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4 and the centurial years which are exactly divisible by 400 contain 366 days; and it in addition to this arbitrary arrangement the centurial years exactly divisible by 4,000 contain 366 days, the error in the Gregorian system will amount to only one day in about 200 centuries. If, however, 31 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian Year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A. D. 325, when the festival of Easter was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 13 days. Russia and the Greek Church still employ the Julian Calendar for civil and ecclesiastical purposes.

Standard Time.

PRIMARILY, for the convenience of the railroads, a standard of time was established by mutual agreement in 1883, by which trains are run and local time regulated. According to this system, the United States extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour, commencing with the 75th meridian. The first (eastern) section includes all territory between the Atlantic Coast and an irregular line drawn from Detroit to Charleston, S. C., the latter being its most southern point. The second (central) section includes all the territory between the last-named line and an irregular line from Bismarck, N. D., to the mouth of the Rio Grande. The third (mountain) section includes all territory between the last-named line and nearly the western borders of Idaho, Utah, and Arizona. The fourth (Pacific) section covers the rest of the country to the Pacific Coast. Standard time is uniform inside each of these sections, and the time of each section differs from that next to it by exactly one hour. Thus at 12 noon in New York City (eastern time), the time at Chicago (central time) is 11 o'clock A. M.; at Denver (mountain time), 10 o'clock A. M., and at San Francisco (Pacific time), 9 o'clock A. M. Standard time is 16 minutes slower at Boston than true local time, 4 minutes slower at New York, 8 minutes faster at Washington, 19 minutes faster at Charleston, 28 minutes slower at Detroit, 18 minutes faster at Kansas City, 10 minutes slower at Chicago, 1 minute faster at St. Louis, 28 minutes faster at Salt Lake City, and 10 minutes faster at San Francisco.

31	396	....	455	....	516	....	577	608	...	669	..	730

The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.

EXAMPLE.—To find the number of days between June 3, 1900, and February 16, 1901: The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412. Subtract the first from the second product—*i. e.*, 154 from 412, and the result is 258, the number of days between the two dates.

Easter Sunday.

In 1911 in States holding such elections the date is November 7

NOVEMBER — 1911. THANKSGIVING DAY (usually the fourth Thursday in November). Is observed in all the States, and in the District of Columbia, though in some States it is not a statutory holiday.

DECEMBER 25. CHRISTMAS DAY: In all the States, (except Kansas), and District of Columbia.

Sundays and Fast Days are legal holidays in all the States which designate them as such.

There are no statutory holidays in Mississippi, but by common consent the Fourth of July, Thanksgiving, and Christmas are observed. In New Mexico, Washington's Birthday, Decoration Day, Labor Day, Flag Day (June 14), and Arbor Day are holidays when so designated by the Governor. In South Carolina, Thursday of Fair Week is a legal holiday

ARBOR DAY is a legal holiday in Arizona, Florida, Maryland, New Mexico, Wisconsin, and Wyoming, the day being set by the Governor; in Texas, February 22; Nebraska, April 22; Utah, April 15; Rhode Island, second Friday in May; Montana, second Tuesday in May; Georgia, first Friday in December; Colorado and Maine (school holiday only), third Friday in April; in Oklahoma, the Friday following the second Monday in March; in Arkansas, first Saturday in March.

Every Saturday after 12 o'clock noon is a legal holiday in California in public offices, Illinois (in cities of 200,000 or more inhabitants), Maryland, Michigan, New York, New Jersey, Ohio, Pennsylvania, Rhode Island, Virginia, the District of Columbia (for banking purposes), and in New Orleans, La., and Charleston, S. C.; in Louisiana in all cities exceeding 15,000 inhabitants, in Missouri in cities of 100,000 or more inhabitants; in Tennessee, for State and county officers, and in Colorado during June, July, and August; in Indiana, first Saturday in June to last Saturday in October, inclusive, for all public offices in counties having a county-seat of 100,000 population or more.

There is no national holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the Fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays for commercial purposes, but, with the exception named, there is no general statute on the subject. The proclamation of the President designating a day of Thanksgiving only makes it a legal holiday in the District of Columbia and the Territories.

Ember and Rogation Days.

EMBER and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually) are the Wednesday, Friday, and Saturday after the first Sunday in Lent, after the feast of Pentecost (Whit Sunday), after the festival of the Holy Cross, and after the festival of St Lucia. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days are the three days immediately preceding Holy Thursday or Ascension Day.

(c) "Mountain" Includes: Denver, Leadville, Colorado Springs, Helena, Regina (N. W. T.), etc.

(d) "Pacific" includes. San Francisco. Portland (Oregon). Victoria, Vancouver Tacoma Seattle etc.

Old English Holidays.

These holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed generally or in some parts of Britain.

January 6 Twelfth Day, or Twelfth-tide, sometimes called Old Christmas Day the same as Epiphany The previous evening is Twelfth Night, with which many social rites have long been connected.

February 2 Candlemas Festival of the Purification of the Virgin Consecration of the lighted candles to be used in the church during the year.

February 14. Old Candlemas: St Valentine's Day.

March 25 Lady Day. Annunciation of the Virgin. April 6 is old Lady Day.

June 24 Midsummer Day: Feast of the Nativity of John the Baptist July 7 is old Midsummer Day.

July 15 St. Swithin's Day. There was an old superstition that if rain fell on this day it would continue forty days

August 1. Lammas Day. Originally in England the festival of the wheat harvest In the Church the festival of St Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

September 29. Michaelmas Feast of St. Michael the Archangel Old Michaelmas is October 11

November 1. All-hallowmas All hallows, or All Saints' Day. The previous evening is All-hallow-e'en, observed by home gatherings and old-time festive rites.

November 2. All Souls Day: Day of prayer for the souls of the dead.

November 11. Martinmas Feast of St. Martin. Old Martinmas is November 23.

December 28. Childermas: Holy Innocents Day.

Lady Day, Midsummer Day. Michaelmas and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas, and Lammas Day in Scotland

Shrove Tuesday the day before Ash Wednesday and Maundy Thursday, the day before Good Friday are observed by the Church. Mothering Sunday is Mid Lent Sunday in which the old rural custom obtains of visiting one's parents and making them presents.

The Magnetic Poles.

The geographical poles of the earth are the extremities of the imaginary line passing through its centre of gravity and about which it revolves, and are therefore symmetrically located with regard to the equator

The magnetic poles, however are not coincident with the geographical poles, nor are they diametrically opposite to each other Prior to the recent attempt of Amundsen to determine the north magnetic pole, the only other was by Capt. James Ross in June, 1831, who found the dip of the magnetic needle to be 89° 59' .5, in latitude 70° 5' .2 N. and longitude 96° 45' .8 W., which is in northern Canada, in King William Land. The result of Amundsen's observations has not yet been published by the Norwegian authorities.

The position of the south magnetic pole has been located in latitude 72° 23' S. and longitude 154° E., by Prof. Edward David and Mr. Douglas Marson, members of Lieut. Shackleton's expedition to the South Pole, which left New Zealand on January 1, 1908.

By reason of the annual variation of the magnetic needle, it is believed that the magnetic poles are not stationary, but have a slow motion around the geographical poles. The subject is shrouded in mystery and constitutes one of the many as yet unsolved problems in terrestrial physics.

Table of Memorable Dates.

B. C.
1183 Fall of Troy.
1082 Era of the Great Pyramid.
878 Carthage founded.
776 Olympic Era began.
753 Foundation of Rome.
588 Jerusalem taken by Nebuchadnezzar.
536 Restoration of the Jews under Cyrus.
509 Expulsion of Tarquins from Rome.
480 Xerxes defeated Greeks at Thermopylæ.
55 Cæsar conquered Britain.
4 Birth of Jesus Christ.

A. D.
29 The Crucifixion.
70 Jerusalem was destroyed by Titus.
313 Constantine converted to Christianity
410 The Romans abandoned Britain.
827 Egbert, first king of all England, Oct. 14.
1066 Battle of Hastings, Norman Conquest
1096 The Crusades began.
1172 Ireland was conquered by Henry II.
1215 King John granted Magna Charta, June 15.
1265 First Representative Parliament in England.
1415 Battle of Agincourt, Oct. 25.
1431 Joan of Arc was burnt, May 30.
1453 Constantinople taken by the Turks.
1455 The Wars of the Roses began.
1462 The Bible was first printed at Mentz.
1471 Caxton set up his printing press.
1486 The feuds of York and Lancaster ended.
1492 Columbus discovered America, Oct. 12
1517 The Reformation began in Germany.
1519 Cortez began the conquest of Mexico.
1535 The first English Bible printed.
1539 Monasteries were closed in England.
1558 Accession of Queen Elizabeth, Nov. 17
1565 Revolt of the Netherlands began.
1565 St. Augustine, Florida, settled.
1572 The St. Bartholomew Massacre, Aug. 24
1588 The Spanish Armada defeated, July.
1600 East India Company first chartered.
1603 Union of England and Scotland.
1605 The Gunpowder Plot in England.
1607 Jamestown, Va., was settled.
1609 Hudson River first explored.
1616 Shakespeare died, April 23.
1618 Thirty Years' War in Germany began.
1620 Pilgrims by the Mayflower landed.
1623 Manhattan Island settled.
1634 Maryland settled by Roman Catholics
1636 Rhode Island settled by Roger Williams
1640 Cromwell's Long Parliament assembled.
1649 Charles I. was beheaded, Jan. 30.
1653 Oliver Cromwell became Lord Protector.
1660 Restoration of the Stuarts.
1664 New York conquered from the Dutch.
1664 The great plague of London.
1666 The great fire of London began Sept. 2.
1679 Habeas Corpus Act passed in England.
A. D.
1682 Pennsylvania settled by William Penn.
1685 Revocation of the Edict of Nantes, Oct. 22.
1688 James II. abdicated, Dec. 11.
1690 Battle of the Boyne, July 1.
1690 First newspaper in America; at Boston.
1704 Gibraltar was taken by the English.
1713 Peace of Utrecht, April 11.
1714 Accession of House of Hanover, Aug. 1
1715 First Jacobite Rebellion in Great Britain.
1720 South Sea Bubble.
1745 Battle of Fontenoy, April 30.
1745 Second Jacobite Rebellion in Great Britain.
1756 Black Hole Suffocation in Calcutta.
1757 Clive won Battle of Plassey in India.
1759 Canada was taken from the French.
1765 Stamp Act enacted.
1773 Steam engine perfected by Watt.
1773 Tea destroyed in Boston Harbor, Dec. 16.
1775 Battle of Lexington, April 19.
1775 Battle of Bunker Hill, June 17.
1776 Declaration of Independence, July 4.
1777 Burgoyne's surrender, Oct. 17.
1779 Capt. Cook was killed, Feb. 14.
1781 Cornwallis' surrender at Yorktown, Oct. 19.
1788 First settlement in Australia, Jan. 26.
1789 The French Revolution began July 14
1789 Washington first inaug'ted President
1793 Cotton-gin invented by Whitney.
1793 Louis XVI. of France executed, Jan. 21
1796 Vaccination discovered by Jenner.
1798 The Irish Rebellion.
1799 Battle of Seringapatam; death of Tippoo.
1799 Bonaparte declared First Consul, Nov. 10.
1801 Union of Great Britain and Ireland, Jan. 1.
1803 Louisiana purchased from the French
1804 Bonaparte became Emperor of France
1805 Battle of Trafalgar; death of Nelson.
1807 Fulton's first steamboat voyage.
1812 Second war with Great Britain.
1812 The French expedition to Moscow.
1813 Perry's victory on Lake Erie, Sept. 10.
1814 The printing machine invented.
1814 Scott's "Waverley" published.
1815 Battle of New Orleans, Jan. 8.
1815 Battle of Waterloo, June 18.
1819 First steamship crossed the Atlantic.
1820 Missouri Compromise adopted.
1823 Monroe Doctrine declared, Dec. 2.
1828 First passenger railroad in U. S.
1830 Revolution in France, Orleanist succession.
1832 South Carolina Nullification Ordinance.
1835 Morse invented the telegraph.
1835 Seminole War in Florida began.
1837 Accession of Queen Victoria, June 20
1845 Texas annexed.
A. D.
1846 Sewing machine completed by Howe.
1846 The Irish Potato Famine.
1846 British Corn laws repealed, June 26.
1846 War with Mexico began.
1848 French Revolution. Republic succeeded.
1848 Gold discovered in California, Sept.
1851 Gold discovered in Australia, Feb. 12
1851 First International Exhibition, London.
1852 Louis Napoleon became Emperor.
1853 Crimean War began.
1854 Japan opened by Commodore Perry.
1857 The Great Mutiny in India.
1857 The Dred Scott decision.
1857 First Atlantic cable message, Aug. 4.
1859 John Brown's raid into Virginia.
1860 South Carolina seceded, Dec. 20.
1861 Emancipation of the Russian serfs.
1863 Lincoln's Emancipation Proclamation, Jan. 1.
1863 Battle of Gettysburg, July 1-3.
1865 Lee surrendered at Appomattox, April 9.
1865 President Lincoln assassinated, April 14.
1866 Battle of Sadowa. Prussia beat Austria.
1867 Maximilian of Mexico executed.
1867 The Dominion of Canada established
1870 Franco-German War began, July 19.
1870 Capitulation of French at Sedan, Sept. 1.
1870 Rome became the capital of Italy.
1871 The German Empire re-established.
1871 The Irish Church was disestablished.
1871 The great fire in Chicago, Oct. 8-11.
1872 The great fire in Boston, Nov. 9.
1876 Prof. Bell perfected the telephone.
1876 Centennial Exposition at Philadelphia
1881 President Garfield shot, July 2.
1889 Brazil became a Republic.
1889 Johnstown, Pa., flood, May 31.
1893 World's Fair at Chicago.
1894 Chinese-Japanese War began.
1895 Cuban Revolution began, Feb. 20.
1897 The Turkish-Greek War.
1898 The Spanish-American War.
1899 Universal Peace Conference.
1899 The South African War began.
1900 Boxer Insurrection in China.
1900 The Galveston tornado, Sept. 8.
1901 Death of Queen Victoria.
1901 Assassination of President McKinley
1902 Martinique destroyed by volcano.
1903 Republic of Panama established.
1904 The Great Fire in Baltimore, Feb. 7.
1904 The Russo-Japanese War began.
1906 San Francisco earthquake and conflagration.
1908 Emperor and Dowager Empress of China died. Pi Yu ascended throne.
1908 American Battleship fleet nearly circumnavigated the Globe.
1908 Great Earthquake in Southern Italy.
1909 The North Pole discovered.
1910. Revolution in Portugal. Republic established.

The French Revolutionary Era.

In September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true autumnal equinox, and that each succeeding year should begin at the midnight of the day on which the true autumnal equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complimentary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian calendar, used throughout the rest of Europe, was resumed. The following were the dates for the year 1804, the last complete year of this style of reckoning:

Vendemiaire	(Vintage),	September 23 to October 22.	Germinal	(Budding),	March 22 to April 21.
Brumaire	(Foggy),	October 23 to November 22.	Floreal	(Flowery),	April 21 to May 20.
Frimaire	(Sleety),	November 22 to December 21.	Prairial	(Pasture),	May 21 to June 20.
Nivose	(Snowy),	December 22 to January 21.	Messidor	(Harvest),	June 20 to July 19.
Pluviose	(Rainy),	January 21 to February 20.	Thermidor	(Hot),	July 20 to August 19.
Ventose	(Windy),	February 20 to March 19.	Fructidor	(Fruit),	August 19 to September 18.

The months were divided into three decades of ten days each, but to make up the 365 five were added at the end of September: Primidi, dedicated to Virtue; Duodi, to Genius; Tridi, to Labor; Quartidi, to Opinion, and Quintidi, to Rewards. To Leap Year, called Olympic, a sixth day, September 22 or 23, Sextidi, "the day of the Revolution," was added.

To each tenth day, thirty-six in all, were assigned thirty-six "Fetes Decadaires," decreed by the National Convention on the eighteenth Prairial, in honor of the Supreme Being and Nature, the Human Race, the French People, Benefactors of Humanity, Martyrs for Liberty, Liberty and Equality, the Republic, Liberty of the World, Love of Country, Hatred of Tyrants and Traitors, Truth, Justice, Modesty, Glory and Immortality, Friendship, Frugality, Courage, Good Faith, Heroism, Disinterestedness, Stoicism, Love, Conjugal Fidelity, Paternal Love, Maternal Tenderness, Filial Piety, Infancy, Childhood, Manhood, Old Age, Sickness, Agriculture, Industry, Our Ancestors, Our Posterity, Goodness.

June 3. King George V. born, 1865.
June 14. Flag Day in the United States.
June 15. King John granted Magna Charter at Runnymede, 1215.
June 17. Battle of Bunker Hill, 1775.
June 18. Battle of Waterloo, 1815.
June 28. Battle of Fort Moultrie, Charleston, S. C., 1776.
July 1 Dominion Day in Canada.
July 1-3. Battle of Gettysburg, 1863.
July 2. President Garfield shot, 1881.
July 3. Cervera's fleet was destroyed off Santiago, 1898.
July 4. Declaration of Independence, 1776.
July 12. Orangemen's Day.
July 14. The Bastile was destroyed, 1789.
July 16. Santiago surrendered, 1898.
July 21. Battle of Bull Run, 1861.
Aug. 7. Gen. Nathanael Greene born, 1742.
Aug. 13. Manila surrendered to Americans, 1898.
Aug. 16. Battle of Bennington, Vt., 1777.
Aug. 28. Montenegro became a kingdom, 1910.
Sep. 1. Capitulation of Sedan, 1870.
Sep. 6. President McKinley shot at Buffalo, 1901.
Sep. 10. Battle of Lake Erie, Perry's victory, 1813.
Sep. 11. Battle of Lake Champlain, McDonough's victory, 1814.
Sep. 13. Battle of Chapultepec, 1847.
Sep. 14. City of Mexico taken by U. S. troops, 1847.
Sep. 15. William H. Taft born, 1857.
Sep. 17. Battle of Antietam, 1862.
Sep. 19-20. Battle of Chickamauga, 1863.
Sep. 20. Italians occupied Rome, 1870.
Oct. 8-11. Great fire of Chicago, 1871.
Oct. 12. Columbus discovered America, 1492.
Oct. 17. Burgoyne surrendered at Saratoga, 1777.
Oct. 19. Cornwallis surrendered, Yorktown, 1781.
Oct. 27. Theodore Roosevelt born, 1858.
Nov. 5. Guy Fawkes Day in England. The Gunpowder Plot discovered, 1604.
Nov. 9. Great fire of Boston, 1872.
Nov. 10. Martin Luther born, 1483.
Nov. 25. British evacuated New York, 1783
Dec. 2. Battle of Austerlitz, 1805.
Dec. 14. Washington died, 1799.
Dec. 16. Boston "Tea Party," 1773.
Dec. 16. The great fire in New York, 1835.
Dec. 22. Mayflower pilgrims landed at Plymouth Rock, 1620.
Dec. 25-26. Battle of Trenton, N. J., 1776.

Ready-Reference Calendar.—1.

For ascertaining the Day of the Week for any given Time from the Beginning of the Christian Era to the Year 2200.

RULE.—To the day of the Month, add Factors for Month, Century, and Year, and divide the total by 7.

If there is no remainder,	the day is	Sunday.	Should the total be less than 7, it is to be taken as a remainder.
" 1 is the remainder	"	Monday.	
" 2	"	Tuesday.	
" 3	"	Wednesday.	
" 4	"	Thursday.	
" 5	"	Friday.	
" 6	"	Saturday.	

EXAMPLE:

Week-day of Washington's Birthday, February 22, 1911.

Factors for

Day. Month. Century. Year.

22 + 5 + 5 + 6 = 38

38 divided by 7 leaves 3 remainder, therefore the day will be *Wednesday*.

MONTHS.

For Leap years figures in heavier type to be taken.

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Factors.	2	5	5	1	3	6	1	4	0	2	5	0
	1	**4**										

CENTURIES (Cardinal Numbers),

The year 00 of Centuries in heavier type was, or will be, a Leap year.

Old Style, ended Sept. 2, 1752—a Wednesday.	**2**	**1**	**0**	6	5	4	3

NOTE.—The letters in the list of "*Years* from 1753 to 1952," refer to the table headed with the *Months*, the figures in which refer to the same figures at the head of the table of *Days*. For example: To know on what day July 4, 1911, will fall look for 1911 in the table of *Years*. The letter "p" is attached. Look for the same letter in the table of *Months* and in a parallel line under July is the figure 6, which directs to column 6 in the table of *Days* below, in which it will be seen that July 4 falls on Tuesday.

Ritualistic Calendar.

COLORS FOR THE ALTAR IN USE IN RITUALISTIC EPISCOPAL CHURCHES IN THE UNITED STATES.

White.—From the First Service (First Vespers) of Christmas Day to the Octave of Epiphany, inclusive (except on the Feasts of Martyrs); on Maundy Thursday (for the celebration); from the First Service of Easter Day to the Vigil of Pentecost (except on Feasts of Martyrs and Rogation Days); on Trinity Sunday, Conversion of St. Paul, Purification, Annunciation, St. John Baptist, St. Michael, St. Luke, All Saints, Saints who are not Martyrs, and Patron Saints (Transfiguration and Dedication of Church).

Red.—From First Vespers of Pentecost to the First Vespers of Trinity Sunday (which includes Ember Days), Holy Innocents (if on a Sunday), and Feasts of all Martyrs.

Violet.—From Septuagesima to Maundy Thursday (Easter Eve); Advent Sunday to Christmas Eve; Vigils, Ember Days (except in Whitsun Week), and Rogation Days; Holy Innocents (unless on Sunday). *Black.*—Good Friday and at funerals. *Green.*—All other days.

These regulations as to colors are general. A more minute code changing with each year is published in the church almanacs.

Uranus	1781.9	30686.82	4.2	31,900	14.7	65	0.22	0.91
Neptune	2791.6	60181.11	3.4	34,800	17.1	85	0.20	0.88

The number of asteroids discovered up to present date is about 465. A number of these small planets have not been observed since their discovery, and are practically lost. Consequently it is now sometimes a matter of doubt, until the elements have been computed, whether the supposed new planet is really new, or only an old one rediscovered.

Our Moon.

Of all the secondary planets the earth's satellite is by far the most interesting and important. The moon completes her circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of her motion in common with the earth around the sun, the mean duration of the lunar month, that is, the time from new moon to new moon, is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period. If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence her distance from the earth varies during the course of a lunar month. Her mean distance from the earth is 238,850 miles. Her maximum distance, however, may reach 252,830 miles, and the least distance to which she can approach the earth is 221,520 miles. Her diameter is 2,162 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon, viz., 3,962 and 1,081 miles respectively, we shall have for the nearest approach of the surfaces of the two bodies 216,477 miles. Her orbit is a very intricate one, because the earth in moving around the sun carries the moon along with it; hence the latter is sometimes within and sometimes without the earth's orbit. Its form is that of a serpentine curve, always *concave* toward the sun, and inclined to the plane of the earth's orbit at an angle of 5° 9′, in consequence of which our satellite appears sometimes above and sometimes below the plane of the earth's orbit, through which she passes twice in a revolution. These points or positions are called nodes, and no two consecutive nodes occupy positions diametrically opposite on the lunar orbit. The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years, 218 days, 21 hours, 22 minutes and 48 seconds. This motion was well known to the ancients, who called it the Saros, and was made use of by them in roughly predicting eclipses.

The moon always presents the same face to us, as is evident from the permanency of the various markings on its surface. This circumstance proves that with respect to the earth she revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth, viz., 27.32166 days. The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′. In consequence of this fact, and of the inclination of the lunar orbit to that of the ecliptic, the poles of the moon lean alternately to and from the earth. When the north pole leans toward the earth we see somewhat more of the region surrounding it, and somewhat less when it leans the contrary way. This displacement is known by the name of libration in latitude.

The moon's motion on her axis is uniform, but her angular velocity in her orbit is subject to slight variations by reason of the form of her orbit; hence it happens that we sometimes see a little more of the eastern or western edge at one time than at another. This phenomenon is known as libration in longitude.

The moon's surface contains about 14,685,000 square miles, or nearly four times the area of Europe. Her volume is 1-49 and her mass 1-81 that of the earth, and hence her density is about 3-5 that of the earth, or about 3 2-5 that of water. At the lunar surface gravity is only 3-20 of what it is at the earth, and therefore a body which weighs 20 pounds here would weigh only 3 pounds there.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth; it is 1,063 miles below the surface.

The attractive force of the moon acting on the water of our oceans is mainly instrumental in raising them into protuberances or tides in such a manner as to give the total mass a spheroidal figure whose principal axis would continually coincide with the line joining the centres of the earth and moon, but in consequence of the resistance which this movement of the water encounters from continents and islands, as well as from the liquid molecules themselves, the tidal wave can never arrive at any place until about one hour after the moon has crossed the meridian of the place.

The moon has no atmosphere and no water. The suddenness with which stars are occulted by the moon is regarded as a conclusive proof that a lunar atmosphere does not exist, and the spectroscope furnishes negative evidence of the same character.

In remote ages the lunar surface was the theatre of violent volcanic action, being elevated into cones and ridges exceeding 20,000 feet high, and at other places rent into furrows or depressions of corresponding depth. The lunar volcanoes are now extinct. A profound silence reigns over the desolate and rugged surface. It is a dead world, utterly unfit to support animal or vegetable life.

THE EARTH'S ATMOSPHERE.

The earth's sensible atmosphere is generally supposed to extend some forty miles in height, probably further, but becoming at only a few miles from the surface of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the sun, and, when laden with clouds, hindering the earth from radiating its acquired heat into space. — *Whitaker.*

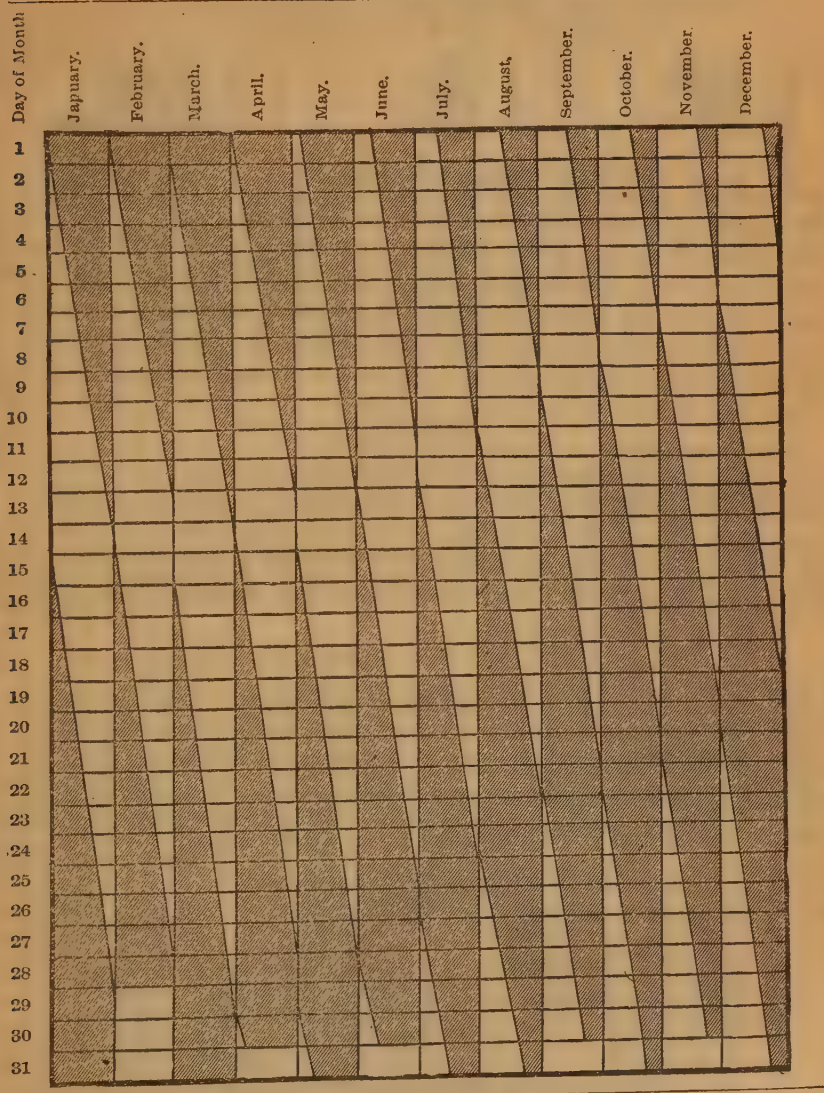
Moonlight Chart, 1911.



EXPLANATION.—The white spaces show the amount of moonlight each night. January 8, February 7, etc., the moon sets at or near midnight when the former half of the night has moonlight; January 14, February 14, etc. full moon, moonlight all night; January 21, February 20, etc., when the moon rises at or near midnight, the latter half of the night having moonlight; January 30, February 1, etc. new moon, no moonlight during the whole night.

Astronomical Phenomena for the Year 1911.

ASTRONOMICAL SIGNS AND SYMBOLS.

☉	The Sun.	♂	Mars.	☌	Conjunction.
☾	The Moon.	♃	Jupiter.	□	Quadrature.
☿	Mercury.	♄	Saturn.	☍	Opposition.
♀	Venus.	♅	Uranus.	☊	Ascending Node.
⊕	The Earth.	♆	Neptune.	☋	Descending Node.

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian*, *i. e.*, when one is due *north* or *south* of the other: if the bodies are near each other as seen from the earth, they will rise and set at the same time: they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises just as the other is setting. "Quadrature" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun: the planet is then generally most favorably situated for observation. Mercury can only be seen with the naked eye at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is crossing the plane of the earth's orbit. The term "Perihelion" means nearest, and "Aphelion" furthest, from the sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the moon.

I.—ECLIPSES.

In the year 1911 there will be two eclipses, both of the sun.

1. A total eclipse of the sun April 28, invisible in New York and New England, but visible as a partial eclipse over that portion of the United States lying south of a line drawn through Cape Henlopen, Pittsburgh, Toledo, Racine, Prairie du Chien, Fort Sully, Gallatin City, and Astoria.

The path of the total eclipse, which is a very large one, lies wholly in the Pacific Ocean, commencing at sunrise near the southeast corner of Australia, passing over the Friendly Islands, Nassau Islands, and terminates at sunset on the southern coast of Guatemala. The greatest duration of totality is 4 minutes 57 seconds.

Places.	Eclipse Begins.				Eclipse Ends.			
	D.	H.	M.	s.	H.	M.	s.	
St. Louis	April 28,	5	33	0 P.M.	6	32	6	P.M.
Denver	"	4	25	35 P.M.	5	35	33	P.M.
San Francisco	"	2	54	31 P.M.	4	29	9	P.M.

Along the eastern coast of the United States south of Washington, there will be a very small partial eclipse, the sun setting with the eclipse on it.

2. An annular eclipse of the sun October 21-22, invisible in America. The path of the annulus begins on the east coast of the Sea of Aral and moving in a southeast direction passes over the islands of Hainan and New Guinea and terminates in the South Pacific Ocean. As a partial eclipse it is visible over nearly all Asia, Australia and the northern portion of New Zealand.

II.—PLANETARY CONFIGURATIONS, 1911.

The Galaxy or Milky Way.

DURING any clear night when the moon is absent a faint white band, somewhat irregular in breadth and intensity, can be seen extending obliquely across the sky. This girdling belt or band is commonly known as the Galaxy or Milky Way, from its whitish or milky appearance, and has been an object of study by astronomers from the remotest antiquity.

Disregarding slight deviations in its brightness, breadth, and direction, its course is that of a great circle inclined at an angle of about 63° to the celestial equator and cutting this circle in points whose right ascension are 6h. 47m. and 18h. 47m., and therefore its poles are situated in right ascension 12h. 47m. and declination 27° N., and right ascension 0h. 47m. and declination 27° S. At the point of nearest approach to the South Pole, and where it is brightest, there is seen a dark, vacant space about 8° long by 5° broad, so conspicuous as to attract the notice of the most superficial observer; it is called by navigators the "Coal Sack." In it only one solitary star is visible to the naked eye, but it is by no means devoid of telescopic stars. Its striking blackness is probably due in part to the effect of contrast with the brilliant star-ground by which it is surrounded.

The brightness of the Milky Way in this neighborhood is very striking compared with that in its most northern course, and conveys the idea of greater proximity. This circumstance has led astronomers to believe that the visible heavens is in the form of a flat ring like a discus or quoit, of immense and irregular breadth and thickness, within which we are eccentrically situated, nearer to the southern than to the northern portion.

It is absolutely impossible to give even a faint idea of the number of stars crowded together in this wonderful band.

More than 120,000 have passed across the field of view of a telescope in fifteen minutes. The total number is absolutely incalculable. Although composed of a vast assemblage of stars, there are about fifty vacant spaces wholly devoid of stars so far as we are at present able to determine. One of the most remarkable of these is situated in the constellation Sagittarius, in right ascension 17h. 57m. and declination 27° 51′ S., and therefore visible in our latitude.

Not even an approximate estimate can be made of the distance of the telescopic stars in the Milky Way. Their light has doubtless been many thousand, perhaps millions, of years travelling to us at the rate of 186,000 miles per second. Their distance is inconceivable. If the universe of visible stars, to which our solar system belongs, and of which the Milky Way forms the outer edge or boundary, is of such prodigious dimensions, what must be the size and distance of the gaseous nebulæ—those island universes—which our large telescopes have revealed far beyond the confines of the Milky Way? The question cannot be answered; it is beyond human comprehension.

The Sun's Right Ascension and Declination.

(WASHINGTON—APPARENT NOON).

From June 16 to August 1 both the upper and lower transits take place during daylight. The azimuth at the time of greatest eastern or western elongation can be easily computed from the formula:

$$\sin A = \frac{\sin p}{\cos l},$$

where A denotes the azimuth, p the polar distance, and l the latitude of the place.

DATE OF GREATEST ELONGATION.

To find the time of greatest eastern or western elongation, let H denote the hour angle, and l and p as before, then we shall have

$$\cos H = \tan p \tan l.$$

And the hour angle in *mean time* is

$$H_m = H^e \times 0.0664846.$$

This quantity, H_m, added to or subtracted from the time of transit given above, according to the elongation required, will give the *mean time* of the *greatest* elongation at any place whose north latitude is l.

Star Table.

FOR IDENTIFYING THE PRINCIPAL FIXED STARS.

Name of Star.	Declination	On Meridian.		Name of Star.	Declination	On Meridian.	
	° ′	Upper. H. M.	Lower. H. M.		° ′	Upper. H. M.	Lower. H. M.

βOrionis (Rigel)	S 8 19	+ 3 47.6	+15 45.6	αAquilæ (Altair)	N 8 36	+18 21.4	+ 6 19.4
αOrionis (Betelguese)	N 7 23	+ 4 27.6	+16 25.6	αCygni (Deneb)	N 44 55	+19 13.5	+ 7 11.5
αCanis Majoris (Sirius)	S 16 35	+ 5 18.4	+17 16.4	αCephei	N 62 9	+19 51.5	+ 7 49.5
αGeminorum (Castor)	N 32 7	+ 6 5.7	+18 3.7	αAquarii	S 0 49	+20 35.8	+ 8 33.8
βGeminorum (Pollux)	N 28 15	+ 6 16.6	+18 14.6	αPiscis Aus.	S 30 10	+21 27.1	+ 9 25.1
αCanis Minor	N 5 29	+ 6 11.6	+18 9.6	αPegasi (Markab)	N 14 39	+21 34.7	+ 9 32.7

To find the time of the star's transit add or subtract, according to the sign, the numbers in the second column of figures to the date of the transit of the pole star given above. Thus, for α Andromedæ February 1, Lower Transit of Polar Star is 4 h. 42 m. 9 s. A. M., to which add 10 h. 40 m. and we have 3 h. 22 m. 9 s. P. M.; for December 1, we find 6 h. 9 m. 18 s. P. M., etc.

APPROXIMATE PARALLAX AND DISTANCE IN LIGHT-YEARS OF SOME OF THE PRINCIPAL FIXED STARS.

By light-years is to be understood the number of years light requires to travel from the star to us.

	Parallax.	Light-Years.		Parallax.	Light-Years.
	″			″	
Polaris (Pole Star)	0.073	45	α Lyræ (Vega)	0.140	23
α Aurigæ (Capella)	0.046	71	61 Cygni	0.348—0.564	6—8
α Canis Majoris (Sirius)	0.233	15	β Cassiopeiæ	0.187	17
α Canis Minoris (Procyon)	0.123	27	γ Draconis	0.127	26
α Bootis (Arcturus)	0.127	28	85 Pegasi	0.054	60
α Centauri	0.916	3.6			

The determination of stellar parallax is one of the most difficult and refined problems in practical or observational astronomy. It is to find the angle which the semi-diameter of the earth's orbit subtends at the star—an angle always very small as seen from the above table and which cannot be measured directly, but by various processes too complicated to be explained here.

Duration of Sunshine on United States Territory.

The acquisition of Porto Rico, the Sandwich and Philippine Islands, and a portion of the Navigator or Samoan Group has very considerably affected the duration of continuous sunshine on our territory. The mathematical discussion of this subject would be out of place here, but any one who desires to inform himself on this matter can easily and satisfactorily do so by using a terrestrial globe having an artificial horizon attached to it, and carefully complying with the following instructions: Place the globe so that the North Pole shall be directed toward the north, and elevate it 23° above the horizon as indicated by the brass meridian. Assuming, of course, that the sun is in the zenith, this will be the position of the earth in reference to the sun at the Summer solstice, June 21. As we turn the globe on its axis from west to east, the sun will be rising at all places on the western and setting at all places on the eastern horizon, and we shall find on turning the globe through an entire revolution that some portion or other of our territory—including the islands named above—will always be above the horizon or will have continuous sunshine during the twenty-four hours. If we now depress the North Pole 23° below the horizon we shall have the relative position of things at the Winter solstice, December 21, and we shall find the opposite conditions to prevail; that is to say, the sun will not now shine continuously on our territory, but some portion of it will always be involved in darkness or *below* the horizon.

Again, if we place the poles of the globe in the horizon, which is the relative position at the equinoxes, March 21 and September 21, and turn the globe through a complete revolution, we shall find that for a very short time during the twenty-four hours the whole of our territory will be below the horizon or in darkness. Finally, let us elevate the North Pole about 5° above the horizon, then we shall find, as we revolve the globe on its axis, that some portion of our territory is always above the horizon or has sunshine. Therefore, we conclude that when the sun's northern declination exceeds 5°, or from the 3d of April to the 10th of September, the sun will shine continuously over some part or other of United States territory.

If we consider the effect of refraction, which accelerates the time of rising and retards the time of setting, the above dates may be practically extended to within two or three days of the equinoxes.

Great Britain, France, and Holland are the only nations on whose dominions the sun never sets. Those of Great Britain are very extensive and scattered far and wide over both hemispheres, so that while the sun may be setting at one, it is rising on another. The French possessions consists for the most part of numerous small islands in the Atlantic, Indian, and Pacific Oceans, with continental territories in South America, Africa, and Asia, and accordingly are so distributed that the sun is always above the horizon of some of them. The foreign possessions of Holland are far more extensive than most people imagine. With the exception of Dutch Guiana in South America, they consist of two groups of islands—one on the coast of Venezuela and the other embracing Sumatra, Java, Celebes, portions of Borneo and New Guinea and a host of smaller islands scattered throughout the East Indian Archipelago, extending over 46° of longitude. These, with Holland itself, are so situated as to their difference of longitude that the sun is always shining on some of them.

Comets.

(By J. Morrison, M. D., Ph. D.)

From time immemorial comets have been regarded by the ignorant and superstitious as the forerunners of some great physical or civil commotions such as earthquakes, wars, famine, etc., but it is hardly necessary to remind people in this enlightened age that the arrival of these celestial visitors from time to time has no connection whatever with terrestrial affairs. Their appearance at the time of an earthquake or a war, etc., is a mere coincidence and nothing more.

The questions which people frequently ask are: What are comets? Whence do they come? Whither are they going? What is their destiny? Are they destined to continue forever or do they contain within themselves the elements of their own decay and death?

In order to give an intelligent answer to these questions it is necessary to interrogate the sidereal heavens for evidence as to their original constitution.

When we direct the telescope to the celestial vault we find numerous nebulous masses of prodigious magnitude scattered throughout the illimitable regions of space. The spectroscope shows these masses to consist of incandescent gas having in general an oval or globular figure, but very many of them are very irregular in outline and frequently show a spiral form, which implies a rotation on an axis passing, of course, through its centre of gravity. Comparatively small patches or wisps of gas either wholly or partially detached frequently appear on the circumference.

It is believed that these gaseous masses become separated or thrown off like drops of water from a revolving grindstone and set out on a career of their own. These huge masses of intensely hot gas soon assume an approximately spherical figure by reason of the mutual attraction of their particles, and in traversing the interstellar space, in which an intensely low temperature prevails the mineral portions first condense or solidify and probably gravitate toward the centre, while the more volatile portions subsequently liquefy and congeal, binding the whole into one spheroidal, conglomerate mass. Such we conceive to be the constitution of the head or nucleus of a comet, as subsequent phenomena confirm.

As an illustration, we may imagine a pile of loose stones on which a stream of water is poured during a very low temperature. As the water runs down among the stones it will freeze and bind the whole pile into one solid mass which can be rolled over and over as one entire boulder, and in a similar way the nucleus of a comet is formed.

It would thus appear that comets are formed from the debris resulting from the condensation of nebulæ which are in process of development into solar systems similar to our own.

After being set free from the nebula or parent mass they may traverse space in a straight line for ages, but ultimately they will come within the sphere of attraction of some sun like our own and be captured or made prisoners. Out of this captivity there is no escape—there they will finish their career and die, and their mineral portions scattered far and wide throughout space.

APPEARANCE OF COMETS

When a comet is at a very great distance from the sun, on the confines of the solar system, for instance, it appears as an oval or globular body with a bright star-like centre called the nucleus or head, surrounded by a hazy or gaseous envelope. As it approaches the sun the solidified gases are volatilized by the solar heat and a tail is developed, which increases in length and diameter until perihelion (the nearest point to the sun) is reached, after which the tail gradually shortens and finally fades away. The head, too, frequently expands and becomes more or less disintegrated, as was the case with the great comet of 1882. In order to convey to the reader a tolerably correct idea of the formation and nature of the tail, which the spectroscope shows to consist principally of carbon gases—carbon dioxide CO_2, methane or marsh gas, CH_4, etc., the following illustration will tend to make the matter clear: Imagine a steamer sailing away during a perfect calm at the rate of fifteen or twenty miles an hour; it will leave behind it a long tail of smoke which gradually becomes dissipated through the air, and in a precisely similar way the tail of a comet is formed. The smoke of the steamer is composed of fine particles of carbon and is a loss or waste of fuel, the result of imperfect combustion.

So likewise the tail of a comet is a waste or dissipation of its gaseous substance which will eventually result in its final dissolution or disintegration, an instance of which will be given farther on. The tail of a comet which we saw yesterday is not the tail we see to-day nor the tail we shall see to-morrow, no more than the smoke which leaves the steamer sailing out of the harbor of New York is the same smoke that issues from its funnel on entering the port of Liverpool.

VOLUME.

Comets are the most voluminous bodies in the solar system, the sun excepted, but the mass or quantity of matter in them is comparatively small, probably much less than that of our own moon. In 1770 Lexell's comet, which was quite large and very conspicuous, passed in close proximity to Jupiter's satellites without deranging their motion in the least perceptible degree, but on its next return, in 1779-80, it passed so near Jupiter that it was almost completely wrecked and thrown into an orbit so greatly enlarged that it no longer comes near enough to the earth to be visible. This comet is also remarkable for having made the nearest approach to the earth of any other on record. On July 1, 1770, its distance from the earth was less than a million and a half of miles.

The heads are frequently of vast dimensions. That of the great comet of 1811 had a diameter of over a million miles; that of Halley's comet in 1836 a diameter of over 350,000 miles; that of Encke's comet in 1828 a diameter of over 300,000 miles, and that of the great comet of 1843 was about 30,000 miles.

The nuclei or *solid* portions of the head do not, so far as they have been accurately determined, exceed a few hundred miles in diameter for example, that of the comet of 1811 was about 428 miles and that of Donati's comet of 1858 less than 500 miles.

The tails are sometimes of prodigious dimensions. Sir Isaac Newton estimated the tail of the great comet of 1680 to have been 123,000,000 miles in length. The remarkable comet of 1843 had a tail 108,000,000 miles long. Other comets have displayed tails varying from fifty to ninety million miles in length. The apparent dimensions and direction of the tail depend upon the distance and position of the earth by reason of the effect of perspective

DIRECTION OF THE TAIL.

The general direction of the tail is very nearly, but not always exactly in the prolongation of the line joining the centres of the sun and head, or of the radius vector of the comet, that is to say, in all positions of the comet in its orbit the tail is directed away from the sun. The quantity of matter in the tail must be very considerable by reason of its prodigious dimensions and this matter, gaseous though it is, is subject to the law of universal gravitation as well as the matter in the nucleus.

It is quite evident then that this matter moves under the influence of two central forces, viz., the attraction of the sun and that of the head, and for this reason must necessarily acquire a greater velocity and therefore must always keep in advance of the head, not only in approaching but also in receding from the sun.

The entire phenomena exhibited in the motion of a comet's tail are in strict harmony with the law of

COMETS—*Continued.*

gravitation. There is no necessity whatever for assuming that the sun exercises an attractive and a repulsive force at the same instant—the very acme of absurdity.

ORBITS OF COMETS.

The mass of the sun is such that it is capable of giving to a body falling directly to it from the region of the "fixed stars" a velocity of about 383 miles per second when it arrives at the sun's surface. Now, if a comet enters the solar system with a velocity *greater* than the sun can communicate to it at that distance, it will sweep around the sun and retire into space, never to return. The sun's attraction is not powerful enough to control it, or rather to capture it. The orbit of the comet will be a hyperbola which is not a closed curve. Such orbits are comparatively rare. The comet Fabry, which visited our solar system some twenty-four years ago, moved in a hyperbolic orbit. If, on the other hand, the comet enters the system with a velocity less than the sun can give it, it will be made a prisoner and move in an elliptic orbit.

Again, if the velocity on entering the system is just equal to what the sun is able to communicate to it it will move in a parabola, assuming in all these cases that there is no planetary disturbance—a circumstance, however, which can never happen. The motion of every comet is always more or less influenced by the attraction of the planets, and therefore a parabolic orbit is converted into an elliptic or hyperbolic one.

PERIODS OF REVOLUTION.

Owing to the fact that comets describe only a small portion of their orbits during the period of their visibility, the determination of the exact elements of their orbits is a problem not only of great difficulty but also of considerable uncertainty, especially when the periods of revolution extend into the centuries. As an example of this uncertainty, periods of 743 and 852 years have been assigned to the great comet of 1882. The only correct method of obtaining the period of a comet's revolution is by comparing the times of its successive perihelion passages.

In this way the average or mean period of Halley's comet has been found to be very nearly 77 years, but in consequence of planetary disturbance this period may be increased or diminished by at least one and a half years. A comet cannot always be identified at its second appearance by its aspect, for this is subject to great changes. It can only be recognized by its moving in an orbit identical or nearly so with that it described in previous visitations, but even here this method sometimes fails, since the orbit may experience great alterations in its size and position by reason of planetary attraction.

There are about 230 observed comets whose mean distance from the sun exceeds that of Neptune. About an equal number of each have a direct and a retrograde motion, and more than two-thirds of the perihelia of their orbits fall within the orbit of the earth. The aphelia lie far beyond the orbit of Neptune. Thus the perihelion distance of Halley's comet, which has recently disappeared from unaided vision, was 54,488,000 miles, which is within the orbit of Venus, but its aphelion distance is no less than 3,275,860,000 miles, which is 484,260,000 miles beyond Neptune, at which prodigious distance the sun still has control over it. Halley's comet has a retrograde motion—that is to say, in a direction opposite to that in which the planets move. Its nearest distance from the earth was 14,450,000 miles on May 18, 1910.

Some comets have at their perihelion passage come into close proximity to the sun; thus the great comet of 1680, according to Sir Isaac Newton, came 166 times nearer to the sun than the earth is, and the comets of 1843 and 1882 were less than 75,000 miles from the sun's surface at their perihelion passage. Their orbital velocity was tremendous—372 miles per second—and they accomplished a semi-revolution around the sun in less than three hours.

SHORT PERIOD COMETS.

There are a number of comets whose elliptic orbits have been determined with considerable accuracy from observations made at the period of their first discovery, but which have not since been seen. Five of this class have periods varying from five to seven years and two with periods of 10 and 16 years respectively, while seven have periods from 3 1-3 to 7 1-2 years. Five form a distinct class having periods varying from 72 to 77 years, such as Halley's, Pons's, etc. Several noted comets have disappeared from one cause or another. De Vico's comet—a short period one of between five and six years—has not been seen since 1844. Tempel's famous comet, having a period of a little over thirty-three years, was disintegrated by the dissipation of its gaseous constituents, and in its place we have a stream of meteoric matter which crosses the earth's path about the middle of November every 33 years. The first encounter of this stream with the earth took place November 12, 1833, which was the grandest display of meteoric bodies on record; the second was in November, 1866, which was seen chiefly in Europe, and the third in 1899, but the last two were quite insignificant compared to the first. The debris of this comet is by this time probably distributed throughout the entire orbit, and therefore a few meteors may be looked for about the middle of every subsequent November. All meteors are no doubt the remains of disintegrated comets whose careers have been brought to an end through the very nature of their constitution, and have thus disappeared forever from human vision.

Several of the national and university museums of Europe and America are replete with the fragments of meteors which once formed part of the nucleus of a comet disintegrated probably a million of years ago. If the history of these meteoric masses could be written, what an amazing record it would present. Thrown off originally as a mass of incandescent gas from the irregular surface of some nebula which subsequently developed into a solar system similar to our own, it traversed the illimitable regions of space for an inconceivably long period of time, to be at last captured by our own sun, about which it may have revolved for millions of years, but only to suffer final extinction forever. Thus it is that "change and decay in all around we see" throughout the entire realm of material creation.

Periodic Comets.

Age of the Earth.

(From the Smithsonian Miscellaneous Collections by George P. Becker, Published June, 1910.)

So long ago as 1860 John Phillips, the originator of the mechanical theory of slaty cleavage, estimated that the time required for the deposition of the stratified rocks lay between 38 and 96 million years. So far as my reading goes, this was the only reasonable estimate prior to Kelvin's truly epoch-making paper of 1862. During the last 20 years much energy has been expended upon the study of the maximum thickness of strata and the time-rate of their deposition. In 1890 de Lapparent thus estimated a period of from 67 to 90 millions of years. The most careful investigation of this kind yet made is due to Mr. Charles D. Walcott who, in 1893, carried out minute and cautious studies of the rate of deposition and of the amount of accumulation, both mechanical and chemical. His estimate for the lapse of time since the base of the Cambrian is 27,640,000 years and he allows for the Algonkian a period of 17,500,000 years. As a matter of course this last figure rests on extremely imperfect data and should probably be increased. Mr. Walcott considered 70 millions the maximum age. In 1899 Sir Archibald Geikie stated that, so far as he was able to form an opinion, 100 million years would suffice for the formation of the stratified rocks, and in 1900 Mr. W. J. Sollas, assuming a constant rate of deposition, reached an age of 26 ½ million years. In 1909 Mr. Sollas increased this estimate to nearly 34 million years, but in view of erosions and the uncertainties involved he inclines to believe, as do many others, that the pre-Cambrian sediments took as much time for their deposition as those from the base of the Cambrian to the top of the column. Making also an allowance for gaps, he thinks the stratigraphical column, if complete, might indicate 80 million years. He draws especial attention to the discrepancy between stratigraphical estimates and those from sodium accumulation in the ocean. If Mr. Walcott's estimate for time since the base of the Cambrian be doubled in accordance with the opinions stated above, it gives 55 million years.

The introduction into modern geology of estimates founded on chemical denudation is due to T. Mellard Reade, but Mr. J. Joly was the first to show that sodium is the only element which can be trusted to afford good estimates of the lapse of time involved in denudation. Adopting the hypothesis that the sodium content of the ocean is derived at a constant rate from that of the rocks, Mr. Joly, in 1899, arrived at an age of between 80 and 90 million years, and this he increased by 10 million in 1900. In 1909 Mr. Sollas made a very searching inquiry into this subject, availing himself of much material published since Mr. Joly's papers, and, on the same hypothesis of uniformity, placed the age of the ocean between 80 million and 150 million years. * * *

Kevlin in 1862 first discussed the age of the earth considered as a cooling body. His results were for years received with sorrow and indignation by most geologists and especially by evolutionists, who then desired unlimited time in which to effect the development of species. More mature study has convinced the scientific world that there is no necessary discrepancy between Kevlin's 20 to 400 million years, with a probable 98 million, and the conclusions of geologists or paleontologists. In 1893 Clarence King, with the aid of Mr. Carl Barus, introduced the important criterion of tidal stability and reached the conclusion that 24 million years best represented the conditions. This result was accepted by Kelvin in 1897 and he then placed the limits at 20 and 40 million years. The earths considered had uniform initial temperatures. In 1908 I showed that such a distribution of temperature necessarily involved a prolonged period of tidal instability and discussed a globe the initial temperature of the outer shell of which increased in simple proportion to the distance from the surface.

Only Sir George H. Darwin has discussed the age of the earth from a purely astronomical point of view. From his theory of the earth-moon system he derived an estimate of more than 56 million years, which for a long time stood rather alone between groups of higher and lower figures.

Earthquake Areas of the Earth.

Major de Montessus de Balore, after years of labor, has drawn up a catalogue of 130,000 shocks, of which trustworthy details have been procured, and this indicates with some scientific accuracy how the symptoms of seismic activity are manifested over the earth's surface. The period of observation includes generally the last fifty years; but there is no reason to suppose that a longer time would materially affect the proportionate numbers. The appended figures, drawn from M. de Montessus' statistics, will give an idea of the general result:

Area.	Earthquakes.	Area.	Earthquakes.	Area.	Earthquakes.
Scandinavia	646	Greece	10,306	Atlantic Coast	937
British Isles	1,139	Russia	258	Mexico	5,586
France	2,793	Asia Minor	4,451	Central America	2,739
Spain and Portugal	2,656	India	813	West Indies	2,561
Switzerland	3,795	Japan	27,562	South America	8,051
Italy	27,672	Africa	179	Java	2,155
Holland and North Germany	2,326	Atlantic Islands	1,704	Australia and Tasmania	83
Sicily	4,331	United States, Pacific Coast	4,467	New Zealand	1,925

The most shaken countries of the world are Italy, Japan, Greece, South America (the Pacific Coast), Java, Sicily, and Asia Minor. The lands most free from these convulsions are Africa, Australia, Russia, Siberia, Scandinavia, and Canada. As a rule, where earthquakes are most frequent they are most severe. But to this general statement there are exceptions—Indian shocks, though less numerous, being often very disastrous. Loss of life in many cases depends, however, on density of population rather than on the intensity of the earth movement. Numerically, also, France has registered more seismic tremors than Spain and Portugal, but France in historic times has experienced no earthquake disaster approaching the havoc wrought by the one calamity at Lisbon.

Facts About the Earth.

ACCORDING to Clark, the equatorial semi-diameter is 20,926,202 feet=3963.296 miles, and the polar semi-diameter is 20,854,895 feet=3950.738 miles. One degree of latitude at the pole=69.407 miles. One degree of latitude at the equator=68.704 miles.

POPULATION OF THE EARTH BY CONTINENTS.

CONTINENTAL DIVISIONS.	Area in Square Miles.	INHABITANTS. Number	Per Sq. Mile.	CONTINENTAL DIVISIONS.	Area in Square Miles.	INHABITANTS. Number.	Per Sq. Mile.
Africa	11,513,579	127,000,000	11.00	Australasia	3,456,290	5,200,000	1.50
America, N.	8,037,714	115,000,000	14.31	Europe	3,754,282	380,000,000	101.10
America, S.	6,851,306	45,000,000	6.70	Polar Reg.	4,970,265	300,000	0.06
Asia	17,057,666	850,000,000	49.08	Total	55,641,102	1,522,700,000	27.10

The estimate in areas in the above table is the newest made by a competent geographer and is by Professor Supan of Gotha in his work entitled "Bevolkerung der Erde." It varies considerably from previous estimates. Central America and the West Indies are included in the estimate for North America. The estimate of population is based on one made by Ernest George Ravenstein, F. R. G. S. in 1890, with additions since that date in the Americas and Australasia, bringing it down to 1910.

Ravenstein's estimate of the earth's fertile region, in square miles, is 28,269,200; steppe, 13,901,000; desert, 4,180,000; polar regions, 4,888,800.

The population of the earth at the death of the Emperor Augustus, estimated by Bodio, was 54,000,000. The population of Europe hardly exceeded 50,000,000 before the fifteenth century.—*Mulhall.*

The area and cubic contents of the earth, according to the data of Clark, given above, are: Surface, 196,971,984 square miles; cubic contents, 259,944,035,515 cubic miles.

Murray (Challenger expedition) states the greatest depth of the Atlantic Ocean at 27,366 feet; Pacific Ocean, 30,000 feet; Indian Ocean, 18,582 feet; Southern Ocean, 25,200 feet; Arctic Ocean, 9,000 feet. The United States Collier Nero obtained a depth of 31,614 feet in the Pacific Ocean, near Guam November 14, 1899. The Atlantic Ocean has an area, in square miles, of 24,536,000; Pacific Ocean, 50,309,000; Indian Ocean, 17,084,000; Arctic Ocean, 4,781,000; Southern Ocean, 30,592,000. The highest mountain is believed to be Deodhunga or Everest, one of the Himalayas, 29,002 feet.

For population of the earth according to creed, see RELIGIOUS STATISTICS.

POPULATION OF THE EARTH ACCORDING TO RACE.

(Based on estimate by John Bartholomew, F. R. G. S., Edinburgh, revised to 1910.)

RACE.	Location.	Number.	RACE.	Location.	Number.
Indo-Germanic or Aryan (white)	Europe, Persia, etc.	625,000,000	Hottentot and Bushman (black)	South Africa	150,000
Mongolian or Turanian (yellow and brown)	Greater part of Asia	630,000,000	Malay and Polynesian (brown)	Australasia & Polynesia	35,000,000
Semitic or Hamitic (white)	North Africa, Arabia	65,000,000	American Indian (red)	North & So. America	15,000,000
Negro and Bantu (black)	Central Africa	150,000,000	Total		1,520,150,000

The human family is subject to fifty principal governments. As to their form they may be classified as follows: *Absolute monarchies*, Abyssinia, Afghanistan, China, Morocco, Siam; *Limited monarchies*, Austria-Hungary, Belgium, British Empire, Bulgaria, Denmark, Germany, Greece, Italy, Japan, Montenegro, Netherlands, Norway, Persia, Portugal, Roumania, Russia, Servia, Sweden, Spain, Turkey; *Republics*, Argentine Republic, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, France, Guatemala, Hayti, Honduras, Liberia, Mexico, Nicaragua, Panama, Paraguay, Peru, Salvador, Switzerland, United States of America, Uruguay, Venezuela. Besides these are the undefined despotisms of Central Africa, and a few insignificant independent States.

The average duration of human life is about 33 years. One-quarter of the people on the earth die before age 6, one-half before age 16, and only about 1 person of each 100 born lives to age 65.

EUROPEAN LANGUAGES SPOKEN.

LANGUAGES.	NUMBER OF PERSONS SPOKEN BY, 1801.	1901.	PROPORTION OF THE WHOLE, 1801.	1901.	LANGUAGES.	NUMBER OF PERSONS SPOKEN BY, 1801.	1901.	PROPORTION OF THE WHOLE, 1801.	1901.
English	20,520,000	130,300,000	12.7	29.2	Portuguese	7,480,000	15,000,000	4.7	3.3
French	31,450,000	52,100,000	19.4	11.7	Russian	30,770,000	85,000,000	19.0	19.0
German	30,320,000	84,200,000	18.7	18.8					
Italian	15,070,000	34,000,000	9.3	7.6	Total	161,800,000	447,100,000	100.0	100.0
Spanish	26,190,000	46,500,000	16.2	10.4					

These estimates (that for 1801 being by Mulhall) exhibit the superior growth of the English language in the last century.

The Geological Strata.

THE strata composing the earth's crust is divided by most geologists into two great classes: 1. Those generally attributed to the agency of water. 2. To the action of fire; which may be subdivided as follows: (*a*) Aqueous formations, stratified, rarely crystalline (sedimentary or fossiliferous rocks; metamorphic or unfossiliferous). (*b*) Igneous formations, unstratified, crystalline (volcanic, as basalt; plutonic, as granite).

The geological record is classified into five main divisions or periods: 1. The Archæan, lifeless and dawn of life. 2. The Palæozoic (ancient life). 3. The Mesozoic (middle life). 4. The Cenozoic (recent life). 5. Quaternary, the age in which man's first appearance is indicated.

A Table of Principal American Rivers.

Names.	Sources.	Mouths.	Length Miles.
Alabama	Junction of Coosa and Talapoosa, Ala	Mobile River	175
Alleghany	Allegany Co., N. Y	Ohio River	460
Androscoggin	Umbagog Lake, Maine	Atlantic Ocean	140
Appalachicola	Junction of Chattahoochee and Flint R. Ga	Gulf of Mexico	110
Arkansas	Rocky Mountains, Col	Mississippi River	2170
Black	Adirondack Lakes, N. Y	Lake Ontario	126
Black Warrior	Formed by Locus and Mulberry, Forks, Ala	Tombigbee River	300
Brazos	Highlands, Texas	Gulf of Mexico	750
Cape Fear	Junction of Haw and Deep Rivers, N. C	Atlantic Ocean	250
Chattahoochee	Alleghany Mountains, Ga	Appalachicola River	430
Chowan	Mott and Meherin, N. C	Albemarle Sound	250
Colorado	Llano Estacado, Tex	Gulf of Mexico	690
Colorado	Junction of Green and Grand Rivers, Utah	Gulf of Colorado	1360
Columbia	Lewis's and Clark's Fork	Pacific Ocean	750
Connecticut	Connecticut Lake, Vt	Long Island Sound	410
Coosa	Junction of Oostenaula and Etowah Rivers, Ga	Alabama River	275
Cumberland	Junction of Poor and Straight Forks, Ky	Ohio River	360
Delaware	Catskill Mountains, N. Y	Delaware Bay	300
Des Moines	Lake Shetek, Minn	Mississippi River	400
Flint	Alleghany Mountains, Ga	Appalachicola River	275
Genesee	Allegany County, N. Y	Lake Ontario	145
Gila	Sierra Madre Mountains, N. M	Colorado River	650
Grand	Southern Iowa	Missouri River	200
Grand	Highlands, Mich	Lake Michigan	280
Grande del Norte	Rocky Mountains, Col	Gulf of Mexico	1800
Great Pedee	Yadkin River, N. C	Atlantic Ocean	375
Green	Cumberland Mountains, Ky	Ohio River	520
Housatonic	Taghanic Mountains, Mass	Long Island Sound	150
Hudson	Lake Sanford, Adirondack Mountains, N. Y	New York Bay	280
Illinois	Des Plaines River, Wis	Mississippi River	435
James	Jackson and Pastur Rivers, Va	Chesapeake Bay	450
Kalamazoo	Highlands, Mich	Lake Michigan	200
Kanawha	Junction of Greenbrier and New Rivers, Va	Ohio River	400
Kansas	Smoky Hill River, Kan	Missouri River	600
Kaskaskia	Grand Prairie, Ill	Mississippi River	320
Kennebec	Moosehead Lake, Me	Atlantic Ocean	160
Kentucky	"Forks" Cumberland Mountains, Ky	Ohio River	300
Lewis's Fork	Rocky Mountains, Ore	Columbia River	750
Menominee	Junction Brule and Mequacumecum Rivers, Wis	Green Bay	160
Merrimac	White Mountains, N. H	Atlantic Ocean	150
Minnesota	Eastern Dakota	Mississippi River	334
Mississippi	Itasca Lake, Minn	Gulf of Mexico	3160
Missouri	Rocky Mountains, junction of Jefferson, Madison, Gallatin Rivers, Mont.	Mississippi River	3100
Mobile	Junction of Tombigbee and Ala. R., Ala	Gulf of Mexico	50
Mohawk	Oneida County, N. Y	Hudson River	135
Monongahela	Rich Mountains, W. Va	Ohio River	300
Nebraska	Junction of Sweet Water and North Fork, Wyo	Missouri River	1260
Neenah	Highlands, Wis	Green Bay	180
Neuse	Table-lands, N. C	Pamlico Sound	250
Ocmulgee	Alleghany Mountains, Ga	Altamaha River	250
Ohio	Junction of Alleghany and Monon. R., Pa	Mississippi River	950
Osage	Osage County, Kan	Missouri River	460
Penobscot	East, Sebocis Lake, Me	Atlantic Ocean	270
Potomac	Alleghany Mountains, Md	Chesapeake Bay	380
Red	Llano Estacado, Tex	Mississippi River	1600
Red (of the North)	Pine Lake, Minn	Winnipeg Lake	700
Roanoke	Dan and Staunton, Va	Albemarle Sound	255
Rock	Koshkonong Lake, Wis	Mississippi River	330
Sabine	Highlands, Tex	Gulf of Mexico	460
Sacramento	Junction of North and South Fork, Sierra Madre Mountains, Cal	Bay of San Francisco	450
Saginaw	Highlands, Mich	Lake Huron	110
St. Croix	Ontonagon Ridge, Wis	Mississippi River	200
St. Francis	Highlands, Mo	Mississippi River	460
St. John	Everglades, Fla	Atlantic Ocean	230
St. Joseph	Highlands, Ind	Lake Michigan	260
San Joaquin	Sierra Nevada Mountains, Cal	Bay of San Francisco	350
Santee	Junction of Wateree and Congaree, N. C	Atlantic Ocean	350
Savannah	Alleghany Mountains S. C	Atlantic Ocean	335
Scioto	Table-lands, O	Ohio River	200
Susquehanna	E. Branch, Otsego Lake, N. Y		256
	W. Branch, Alleghany Mountains, N. Y	Susquehanna River	208
	Main, Junction of East and West Branches, Pa	Chesapeake Bay	153
			617
Tallapoosa	Alleghany Mountains, Ga	Alabama River	175
Tennessee	" " N. C	Ohio River	1200
Tombigbee	" " Miss	Mobile River	475
Trinity	Highlands, Tex	Gulf of Mexico	530
Wabash	Table-lands, O	Ohio River	520
Washita	Potean Hills, Ark	Red River	450
White	Boston Mountains, Ark	Arkansas River	650
Willamette	Cascade, Ore	Columbia River	250
Wisconsin	Ontonagon Ridge, Wis	Mississippi River	400
Yazoo	Junction of Coldwater and Tallahatchee Rivers, Miss	Mississippi River	340
Yellowstone	National Park, Yellowstone Lake	Missouri River	1000
Yukon	Eastern Alaska	Behring Bay	2000

The American Indian.

THE annual reports of the various Indian superintendents showed as of June 30, 1909, that the Indian population was 299,293, distributed in the several States as follows:

Arizona	37,236	Kansas	1,351	New Mexico	18,627	South Dakota	20,221
California	19,942	Maine	410	New York	5,455	Texas	470
Colorado	806	Michigan	6,743	North Carolina	1,896	Utah	1,777
Florida	358	Minnesota	10,008	North Dakota	7,990	Washington	8,484
Idaho	4,073	Montana	10,426	Oklahoma	117,370	Wisconsin	10,031
Indiana	243	Nebraska	3,744	Oregon	3,680	Wyoming	1,670
Iowa	352	Nevada	5,870	South Carolina	60	Total	299,293

The expenditures of the United States on account of the Indians in the fiscal year ending June 30, 1910, were $15,506,845. The expenditures from 1789 to 1909, inclusive, have been $489,670,762.

The appropriation made by Congress for Indian schools for the fiscal year ending June 30, 1910, was $3,757,909. The Government supports 106 boarding schools, and 219 day schools. In addition to these there are 53 mission schools conducted by various churches and religious societies.

The five civilized tribes, Oklahoma—Cherokee, 41,701; Chickasaw, 10,984; Choctaws, 26,762; Creeks, 18,717; Seminoles, 3,123. Total 101,287.

This total of 101,287 includes 23,345 colored freedmen and 2,582 intermarried whites.

Rules for Foretelling the Weather.

ADAPTED FOR USE WITH ANEROID BAROMETERS.

A RISING BAROMETER.

A RAPID rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A STEADY BAROMETER.

With dry air and seasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry, or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail, or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the northward.

The above printed rules are in use by the Seawanhaka Corinthian Yacht Club of New York.

DURATION OF DIFFERENT KINDS OF WEATHER IN THE SEVERAL STORMS—VICINITY OF NEW YORK.

CRITICAL WINDS.	Clear Hours.	Cloudy Hours.	Rain Hours.	Clearing Hours.
South to Southwest	9	8	8.3	14
South to Southeast	14	13.4	15.6	15.4
East to Northeast	20	17.6	31	20.6

WEATHER WISDOM.

SUNSET COLORS.—A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

HALO (SUN DOGS).—By halo we mean the large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates a storm.

CORONA.—By this term we mean the small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain; growing larger, fair weather.

RAINBOWS.—A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather.

SKY COLOR.—A deep-blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm.

FOGS.—Fogs indicate settled weather. A morning fog usually breaks away before noon.

VISIBILITY.—Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain.

FROST.—The first frost and last frost are usually preceded by a temperature very much above the mean.

OBJECTS VISIBLE AT SEA-LEVEL IN CLEAR WEATHER.

The following table shows the distance at sea-level at which objects are visible at certain elevations:

ELEVATION—FEET.	Miles.	ELEVATION—FEET.	Miles.	ELEVATION—FEET.	Miles.
1	1.31	30	7.25	90	12.25

The lowest point of dry land in the United States is in Death Valley, Cal., 278 feet below sea level.

NOTE.—The above table was prepared for THE WORLD ALMANAC by the Geographic Branch of the United States Geological Survey. It should be stated in connection with this table that it presents only points whose heights are matters of record, and that in several cases in the high mountain region of the far West and the Pacific Slope it is well known that there are higher points within the State or Territory whose heights are not yet known with accuracy, and consequently cannot be given.

This table was revised by the United States Geological Survey to September 1, 1910.

Weather Flags

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

THE Weather Bureau furnishes, when practicable, for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone and mail or by means of flags or steam whistles. The flags adopted for this purpose are five in number, and of the forms and colors indicated below:

EXPLANATION OF WEATHER FLAGS.

No. 1. White Flag.	No. 2. Blue Flag.	No. 3. White and Blue Flag.	No. 4. Black Triangular Flag.	No. 5. White Flag with black square in centre.
Fair weather.	Rain or snow.	Local rain or snow.	Temperature.	Cold wave.

When number 4 is placed above number 1, 2, or 3, it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary. During the late Spring and early Fall the cold-wave flag is also used to indicate anticipated frosts.

WHISTLE SIGNALS.

A warning blast of from fifteen to twenty seconds duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds duration) refer to weather, and shorter blasts (of from one to three seconds duration) refer to temperature; those for weather are sounded first.

Blasts.	Indicate.
One long	Fair weather.
Two long	Rain or snow.
Three long	Local rain or snow.

Blasts.	Indicate.
One short	Lower temperature.
Two short	Higher temperature
Three short	Cold wave.

By repeating each combination a few times, with intervals of ten seconds, liability to error in reading the signals may be avoided.

As far as practicable the forecast messages are telegraphed at the expense of the Weather Bureau; but if this is impracticable, they are furnished at the regular commercial rates and sent "collect." In no case are the forecasts sent to a second address in any place, except at the expense of the applicant.

Persons desiring to display the flags or sound the whistle signals for the benefit of the public should communicate with the Weather Bureau officials in charge of the central stations of their respective States, which are as follows:

Alabama, Montgomery.
Arizona, Phœnix.
Arkansas, Little Rock.
California, San Francisco.
Colorado, Denver.
Florida, Jacksonville.
Georgia, Atlanta.
Idaho, Boisé.
Illinois, Springfield.
Indiana, Indianapolis.
Iowa, Des Moines.
Kansas, Topeka.

Wyoming, Cheyenne.

The Ancient and Modern Year.

THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

Storm and Hurricane Warnings

OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

STORM WARNINGS.

Northeasterly winds. Southeasterly winds. Northwesterly winds. Southwesterly winds. Red, black centre.

Storm Warnings.—A red flag with a black centre indicates that a storm of marked violence is expected.

The pennants displayed with the flags indicate the direction of the wind; red, easterly (from northeast to south); white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from the southerly quadrants.

By night a red light indicates easterly winds, and a white light below a red light westerly winds.

Hurricane Warnings.—Two red flags with black centres, displayed one above the other, indicate the expected approach of a tropical hurricane, and also one of those extremely severe and dangerous storms which occasionally move across the Lakes and Northern Atlantic Coast.

Velocity of Winds in the United States.

AVERAGE hourly velocity of the wind at selected stations of the United States Weather Bureau, also the highest velocity ever reported for a period of five minutes. (Prepared by W. L. Moore, Chief of the U. S. Weather Bureau, and revised to January 1, 1910, for THE WORLD ALMANAC.)

Loss by Lightning in the United States.

THE Weather Bureau of the United States Department of Agriculture in October, 1900, issued a bulletin giving these facts: In 1899 the total number of strokes of lightning which caused damage was 5,527; number of buildings injured, 6,256; value of property lost, $3,016,520; number of deaths by lightning during the year, 563; number of persons injured, 820; number of live stock killed in the fields, 4,251; value, $129,955. These are the latest available statistics.

The Chronicle Fire Tables record 3,012 fires caused by lightning in the United States in 1902, the property loss occasioned thereby being $3,396,810. These are the latest reported statistics on the subject,

The Principal Languages of the World.

THERE are said to be 3,424 spoken languages or dialects in the world. These are distributed as follows:

America.....1,624 | Asia.....937 | Europe.....587 | Africa.....276

The English language is spoken by more than 150,000,000 of people.
The German " " " " " " 120,000,000 " "
The Russian " " " " " " 90,000,000 " "
The French " " " " " " 60,000,000 " "
The Spanish " " " " " " 55,000,000 " "
The Italian " " " " " " 40,000,000 " "
The Portuguese " " " " " " 30,000,000 " "

The English language contains approximately 600,000 words. Of this total nearly one-half consists of scientific terminology seldom met outside of text-books and of archaic, obsolescent or obsolete terms.

An examination of 100,000 words of the language shows them to comprise:

60,000 words of Teutonic origin.
30,000 words of Greek or Latin origin.
10,000 words derived from other (miscellaneous) foreign sources.

As regards the number of words in the principal other languages no estimate of any practical value has been made in recent years, but existing dictionaries show the following facts:

The vocabulary of the New Standard Dictionary of the English Language aggregates approximately 425,000 words.

The German word-book (Kürschner's Universal-Konversations-Lexikon) contains not mow than 300,000 words including personal names.

Grimm's Dictionary of the German Language contains approximately 150,000 words.

Littre's Dictionary of the French Language contains approximately 210,000 words.

Dahl's Dictionary of the Russian Language contains approximately 140,000 words.

Carlos de Ochoa's Dictionary of the Spanish Language contains approximately 120,000 words.

Petrocchi's Dictionary of the Italian Language contains approximately 140,000 words.

This table was prepared by F. H. Vizetelly, Managing Editor of the "Standard Dictionary."

* At Buffalo. The record in the above table is kept by the State Superintendent of Public Works.

Metric System of Weights and Measures.

THE METRIC SYSTEM has been adopted by Mexico, Brazil, Chile, Peru, etc., and except Russia and Great Britain, where it is permissive, by all European nations. Various names of the preceding systems are, however, frequently used: In Germany, ½ kilogram = 1 pound; in Switzerland, 3-10 of a metre = 1 foot, etc. If the first letters of the prefixes *deka*, *hecto*, *kilo*, *myria*, from the Greek, and *deci*, *centi*, *mili*, from the Latin, are used in preference to our plain English, 10, 100, etc., it is best to employ capital letters for the multiples and small letters for the subdivisions, to avoid ambiguities in abbreviations: 1 dekametre or 10 metres = 1 dm.; 1 decimetre or 1-10 of a metre = 1 dm.

The METRE, unit of length, is nearly the ten-millionth part of a quadrant of a meridian, of the distance between Equator and Pole. The International Standard Metre is, practically, nothing else but a length defined by the distance between two lines on a platinum-iridium bar at 0° Centigrade, deposited at the International Bureau of Weights and Measures, Paris, France.

The LITRE, unit of capacity, is derived from the weight of one kilogram pure water at greatest density, a cube whose edge is one-tenth of a metre and, therefore, the one-thousandth part of a metric ton.

The GRAM, unit of weight, is a cube of pure water at greatest density, whose edge is one-hundredth of a metre, and, therefore, the one-thousandth part of a kilogram, and the one-millionth part of a metric ton.

The Metric System was legalized in the United States on July 28, 1866, when Congress enacted as follows:

"The tables in the schedule hereto annexed shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system, and the tables may lawfully be used for computing, determining, and expressing in customary weights and measures the weights and measures of the metric system."

The following are the tables annexed to the above:

MEASURES OF LENGTH.

Metric Denominations and Values.		Equivalents in Denominations in Use.	
Myriametre	10,000 metres.	6.2137	miles.
Kilometre	1,000 metres.	0.62137	mile, or 3,280 feet 10 inches.
Hectometre	100 metres.	328	feet 1 inch.
Dekametre	10 metres.	393.7	inches.
Metre	1 metre.	39.37	inches.
Decimetre	1-10 of a metre.	3.937	inches.
Centimetre	1-100 of a metre.	0.3937	inch.
Millimetre	1-1000 of a metre.	0.0394	inch.

MEASURES OF SURFACE.

Metric Denominations and Values.		Equivalents in Denominations in Use.	
Hectare	10,000 square metres.	2.471	acres.
Are	100 square metres.	119.6	square yards.
Centare	1 square metre.	1,550	square inches.

MEASURES OF CAPACITY.

METRIC DENOMINATIONS AND VALUES.			EQUIVALENTS IN DENOMINATIONS IN USE.	
Names.	Number of Litres.	Cubic Measure.	Dry Measure.	Liquid or Wine Measure.
Kilolitre or stere.	1,000	1 cubic metre	1.308 cubic yards	264.17 gallons.
Hectolitre	100	1-10 of a cubic metre	2 bush. and 3.35 pecks	26.417 gallons.
Dekalitre	10	10 cubic decimetres	9.08 quarts	2.6417 gallons.
Litre	1	1 cubic decimetre	0.908 quart	1.0567 quarts.
Decilitre	1-10	1-10 of a cubic decimetre	6.1022 cubic inches	0.845 gill.
Centilitre	1-100	10 cubic centimetres	0.6102 cubic inch	0.338 fluid ounce.
Millilitre	1-1000	1 cubic centimetre	0.061 cubic inch	0.27 fluid dram.

METRIC SYSTEM—*Continued.*

WEIGHTS.

Metric Denominations and Values.			Equivalents in Denominations in Use.
Names.	Number of Grams.	Weight of What Quantity of Water at Maximum Density.	Avoirdupois Weight.
Miller or tonneau	1,000,000	1 cubic metre	2204.6 pounds.
Quintal	100,000	1 hectolitre	220.46 pounds.
Myriagram	10,000	10 litres	22.046 pounds.
Kilogram or kilo	1,000	1 litre	2.2046 pounds.
Hectogram	100	1 decilitre	3.5274 ounces.
Dekagram	10	10 cubic centimetres	0.3527 ounce.
Gram	1	1 cubic centimetre	15.432 grains.
Decigram	1-10	1-10 of a cubic centimetre	1.5432 grains.
Centigram	1-100	10 cubic millimetres	0.1543 grain.
Milligram	1-1000	1 cubic millimetre	0.0154 grain

TABLES FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO CUSTOMARY UNITED STATES EQUIVALENTS AND THE REVERSE.

From the legal equivalents are deduced the following tables for converting United States weights and measures:

METRIC TO CUSTOMARY.

CUSTOMARY TO METRIC.

Linear Measure.

Metres = Ins.	*Metres = Feet.*	*Metres = Yards.*	*Kilometres = Miles.*	*Ins. = Centimetres*	*Feet = Metres.*	*Yards = Metres.*	*Miles = Kilometres.*

THE METRIC SYSTEM SIMPLIFIED.

The following tables of the metric system of weights and measures have been simplified as much as possible for THE WORLD ALMANAC by omitting such denominations as are not in practical, everyday use in the countries where the system is used exclusively.

TABLES OF THE SYSTEM.

Length.—The denominations in practical use are millimetres (mm.), centimetres (cm.), metres (m.), and kilometres (km.).
10 mm. = 1 cm.; 100 cm. = 1 m.; 1,000 m. = 1 km. NOTE.—A decimetre is 10 cm.
Weight.—The denominations in use are grams (g.), kilos* (kg.), and tons (metric tons).
1,000 g. = 1 kg.; 1,000 kg. = 1 metric ton.
Capacity.—The denominations in use are cubic centimetres (c. c.) and litres (l.).
1,000 c. c. = 1 l. NOTE.—A hectolitre is 100 l. (seldom used).
Relation of capacity and weight to length: A cubic decimetre is a litre, and a litre of water weighs a kilo.

APPROXIMATE EQUIVALENTS.

A metre is about a yard; a kilo is about 2 pounds; a litre is about a quart; a centimetre is about ⅖ inch; a metric ton is about same as a ton; a kilometre is about ⅝ mile; a cubic centimetre is about a thimbleful; a nickel weighs about 5 grams.

PRECISE EQUIVALENTS.

1 acre =	.40	hectar. =	.4047	1 mile =	1.6
1 bushel =	35	litres =	35.24	1 millimetre =	.039
1 centimetre =	.39	inch =	.3937	1 ounce (av'd) =	28
1 cubic centimetre =	.061	cubic inch =	.0610	1 ounce (Troy) =	31
1 cubic foot =	.028	cubic metre. =	.0283	1 peck =	8.8
1 cubic inch =	16	cubic cent, † =	16.39	1 pint =	.47
1 cubic metre =	35	cubic feet =	35.31	1 pound =	.45
1 cubic metre =	1.3	cubic yards =	1.308	1 quart (dry) =	1.1
1 cubic yard =	.76	cubic metre =	.7645	1 quart (liquid) =	.95
1 foot =	30	centimetres =	30.48	1 sq. centimetre =	.15

ton (2,240 lbs.) =	.9842		
metre =	.9144		

*Contraction for kilogram. †Centimetres.

Minimum Weights of Produce.

THE following are minimum weights of certain articles of produce according to the laws of the United States:

	Per Bushel.
Wheat	60 lbs.
Corn, in the ear	70 "
Corn, shelled	56 "
Rye	56 "
Buckwheat	48 "
Barley	48 "
Oats	32 "
Peas	60 "
White Beans	60 "
Castor Beans	46 "

	Per Bushel.
White Potatoes	60 lbs.
Sweet Potatoes	55 "
Onions	57 "
Turnips	55 "
Dried Peaches	33 "
Dried Apples	26 "
Clover Seed	60 "
Flax Seed	56 "
Millet Seed	50 "

	Per Bushel.
Hungarian Grass Seed	50 lbs.
Timothy Seed	45 "
Blue Grass Seed	44 "
Hemp Seed	44 "
Salt (see note below).	
Corn Meal	48 "
Ground Peas	24 "
Malt	34 "
Bran	20 "

SALT.—Weight per bushel as adopted by different States ranges from 50 to 80 pounds Coarse salt in Pennsylvania is reckoned at 80 pounds, and in Illinois at 50 pounds per bushel. Fine salt in Pennsylvania is reckoned at 62 pounds, in Kentucky and Illinois at 55 pounds per bushel.

Measures and Weights of Great Britain.

THE measures of length and the weights are nearly, practically, the same as those in use in the United States. The English ton is 2,240 lbs. avoirdupois, the same as the long ton, or shipping ton of the United States. The English hundredweight is 112 lbs. avoirdupois, the same as the long hundredweight of the United States. The metre has been legalized at 39.37079 inches, but the length of 39.370432 inches, as adopted by France, Germany, Belgium, and Russia, is frequently used.

The Imperial gallon, the basis of the system of capacity, involves an error of about 1 part in 1,836: 10 lbs. of water = 277.123 cubic inches.

The English statute mile is 1,760 yards or 5,280 feet. The following are measures of capacity :

NAMES.		Pounds of Water.	Cubic Inches.	Litres.	United States Equivalents.
4 gills	= 1 pint	1.25	34.66	0.56793	1.20032 liquid pints.
2 pints	= 1 quart	2.5	69.32	1.18586	1.20032 " quarts.
2 quarts	= 1 pottle	5	138.64	2.27173	2.40064 " "
2 pottles	= 1 gallon	10	277.27	4.54346	1.20032 " gallons.
2 gallons	= 1 peck	20	554.55	9.08692	1.03152 dry pecks.
4 pecks	= 1 bushel	80	2218.19	36.34766	1.03152 " bushels.
4 bushels	= 1 coomb	320	8872.77	145.39062	4.12606 " "
2 coombs	= 1 quarter	640	17745.54	290.7813	8.2521 " "

Dry measure

A cubic foot of pure gold weighs 1,210 pounds; pure silver, 655 pounds; cast iron, 450 pounds; copper, 550 pounds; lead, 710 pounds; pure platinum, 1,220 pounds; tin, 456 pounds; aluminum, 163 pounds.

Stone—A measure of weight (avoirdupois) usually equal to half of the quarter of 28 pounds, or one-eighth hundredth weight of 112 pounds (termed the horseman's weight); for butcher's meat, one-fourteenth of a hundred pounds.

Domestic Weights and Measures.

Apothecaries' Weight: 20 grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce; 12 ounces = 1 pound.

Avoirdupois Weight (short ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 25 pounds = 1 quarter; 4 quarters = 1 cwt.; 20 cwt. = 1 ton.

Avoirdupois Weight (long ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 112 pounds = 1 cwt.; 20 cwt. = 1 ton.

Troy Weight: 24 grains = 1 pennyweight; 20 pennyweights = 1 ounce; 12 ounces = 1 pound.

Circular Measure: 60 seconds = 1 minute; 60 minutes = 1 degree; 30 degrees = 1 sign; 12 signs 1 circle or circumference.

Cubic Measure: 1,728 cubic inches = 1 cubic foot; 27 cubic feet = 1 cubic yard.

Dry Measure: 2 pints = 1 quart; 8 quarts = 1 peck; 4 pecks = 1 bushel.

Liquid Measure: 4 gills = 1 pint; 2 pints = 1 quart; 4 quarts = 1 gallon; 31½ gallons = 1 barrel; 2 barrels = 1 hogshead.

Long Measure: 12 inches = 1 foot; 3 feet = 1 yard; 5½ yards = 1 rod or pole; 40 rods = 1 furlong; 8 furlongs = 1 statute mile (1,760 yards or 5,280 feet); 3 miles = 1 league.

Mariner's Measure: 6 feet = 1 fathom; 120 fathoms = 1 cable length; 7½ cable lengths = 1 mile; 5,280 feet = 1 statute mile; 6,085 feet = 1 nautical mile.

Paper Measure: 24 sheets = 1 quire; 20 quires = 1 ream (480 sheets); 2 reams = 1 bundle; 5 bundles = 1 bale.

Square Measure: 144 square inches = 1 square foot; 9 square feet = 1 square yard; 30¼ square yards = 1 square rod or perch; 40 square rods = 1 rood; 4 roods = 1 acre; 640 acres = 1 square mile; 36 square miles (6 miles square) = 1 township.

Time Measure: 60 seconds = 1 minute; 60 minutes = 1 hour; 24 hours = 1 day; 7 days = 1 week; 365 days = 1 year; 366 days = 1 leap year.

MEDICAL SIGNS AND ABBREVIATIONS.

℞ (Lat. Recipe), take; āā, of each; ℔, pound; ʒ, ounce; ʒ, drachm; ℈, scruple; ♏, minim, or drop; O or o, pint; f ʒ, fluid ounce; f ʒ, fluid drachm; as, ʒ ss, half an ounce; ʒ i, one ounce; ʒ iss, one ounce and a half; ʒ ij, two ounces; gr., grain; Q. S., as much as sufficient; Ft. Mist., let a mixture be made; Ft. Haust., let a draught be made; Ad., add to; Ad lib., at pleasure; Aq., water; M., mix; Mac., macerate; Pulv., powder; Pil., pill; Solv., dissolve; St., let it stand; Sum., to be taken; D., dose; Dil., dilute; Filt., filter; Lot., a wash; Garg., a gargle; Hor. Decub., at bed time; Inject., injection; Gtt., drops; ss, one-half; Ess., essence.

TEXAS LAND MEASURE.

(Also used in Mexico, New Mexico, Arizona, and California.)

26,000,000	square varas (square of 5,099 varas)	= 1 league and 1 labor	= 4,605.5 acres.
1,000,000	square varas (square of 1,000 varas)	= 1 labor	= 177.136 acres.
25,000,000	square varas (square of 5,000 varas)	= 1 league	= 4,428.4 acres.
12,500,000	square varas (square of 3,535.5 varas)	= ½ league	= 2,214.2 acres.
8,333,333	square varas (square of 2,886.7 varas)	= ⅓ league	= 1,476.13 acres.
6,250,000	square varas (square of 2,500 varas)	= ¼ league	= 1,107.1 acres.
7,225,600	square varas (square of 2,688 varas)		= 1,280 acres.
3,612,800	square varas (square of 1,900.8 varas)	= 1 section	= 640 acres.
1,806,400	square varas (square of 1,344 varas)	= ½ section	= 320 acres.
903,200	square varas (square of 950.44 varas)	= ¼ section	= 160 acres.
451,600	square varas (square of 672 varas)	= ⅛ section	= 80 acres.
225,800	square varas (square of 475 varas)	= 1-16 section	= 40 acres.
5,645.376	square varas (square of 75.137 varas)	= 4,840 square yards	= 1 acre.

To find the number of acres in any number of square varas, multiply the latter by 177 (or to be more exact, by 177½), and cut off six decimals.

1 vara = 33⅓ inches. 1,900.8 varas = 1 mile.

WEIGHTS AND MEASURES OF THE PHILIPPINES.

1 pulgada (12 linea)	= .927 inch.		1 libra (16 onzo)	= 1.0144 lb. av.	
1 pie	= 11.125 inches.		1 arroba	= 25.360 lb. av.	
1 vara	= 33.375 inches.		1 catty (16 tael)	= 1.594 lb. av.	
1 gantah	= .8796 gallon.		1 pecul (100 catty)	= 139.482 lb. av.	
1 caban	= 21.991 gallons.				

Knots and Miles.

THE **Statute Mile** is 5,280 feet.
The **British Admiralty Knot** or **Nautical Mile** is 6,080 feet.
The **Statute Knot** is 6,082.66 feet, and is generally considered the standard. The number of feet in a statute knot is arrived at thus: The circumference of the earth is divided into 360 degrees, each degree containing 60 knots or (360x60), 21,600 knots to the circumference. 21,600 divided into 131,385,456—the number of feet in the earth's circumference—gives 6,082.66 feet—the length of a standard mile.

1 knot = 1.151 miles	4 knots = 4.606 miles	20 knots = 23.030 miles	600 feet	= 1 cable
2 knots = 2.303 miles	5 knots = 5.757 miles	25 knots = 28.787 miles	10 cables	= 1 knot
3 knots = 3.454 miles	10 knots = 11.515 miles	6 feet = 1 fathom		

Ancient Greek and Roman Weights and Measures,

WITH AMERICAN EQUIVALENTS.

WEIGHTS.

The Roman libra or pound = 10 oz. 18 pwt. 13 5-7 gr., Troy.
The Attica mina or pound = 11 oz. 7 pwt. 16 2-7 gr. Troy.
The Attica talent (60 minæ) 56 lbs. 11 oz. 0 pwt. 17 1-7 gr., Troy.

DRY MEASURE.

The Roman modus = 1 pk. 2-9 pint.
The Attic chœnix = nearly 1⅛ pints.
The Attic medimnus = 4 pk. 6 1-10 pints.

LIQUID MEASURE.

The cotyle = a little over ½ pint.
The cyathus = a little over 1½ pints.
The chus = a little over 6⅔ pints.

LONG MEASURE.

The Roman foot = 11 3-5 inches.
The Roman cubit = 1 ft. 5⅔ inches.
The Roman pace = 4 ft. 10 inches.
The Roman furlong = 604 ft. 10 inches.
The Roman mile = 4,835 feet.
The Grecian cubit = 1 ft. 6⅓ inches.
The Grecian furlong = 504 ft. 4 1-5 inches.
The Grecian mile = 4030 ft.

MONEY.

The quadrans = 1 1-10 mills.
The as = 1 3-10 mills.
The sestertius = 3.58 + cents.
The sestertium (1,000 sestertii) = $35.80+.
The denarius = 14.35 + cents.
The Attic obolus = 2.39 + cents.
The drachma = 14.35 + cents, *
The mina (100 drachmæ) = $14.35+.
The talent (60 minæ) = $861.00+.
The Greek stater = aureus (same as the Roman †) = $3.58,79.
The stater = daricus = $7.16,66.

*The modern drachma equals 19.3 cents. † Did not remain at all periods, at this value. but this is the value indicated by Tacitus.

BIBLICAL WEIGHTS REDUCED TO TROY WEIGHT.

	Lbs.	Oz.	Pwt.	Gr.
The Gerah, one-twentieth of a Shekel	0	0	0	12
The Bekah, half a Shekel	0	0	5	0
The Shekel	0	0	10	0
The Maneh, 60 Shekels	2	6	0	0
The Talent, 50 manehs, or 3,000 Shekels	125	0	0	0

Electrical Units.

Name.	Symbol.	Unit of	How Obtained.	CGS*	Equivalent.
Ohm	R	Resistance	The electrical resistance of a column of mercury 106 centimetres long and of 1 square millimetre section.	10^9	1 true ohm = 1.0112 British Association ohms.
Ampère	C	Current	Is that current of electricity that decomposes .0 009324 gramme of water per second.	10^1	Deposits 1.118 milligrams of silver per second.
Volt	E	Electromotive force	One ampère of current passing through a substance having 1 ohm of resistance = 1 volt.	10^8	.926 of a standard Daniel Cell.
Coulomb	Q	Quantity	A current of 1 ampère during 1 second of time.	10^1	Deposits 1.118 milligrams of silver.
Farad	K	Capacity	The capacity that a current of 1 ampère for 1 second (=1 coulomb) charges it to potential of 1 volt.	10^9	2.5 knots of D. U. S. cable.
Microfarad	"		1-millionth of farad.	10^{15}	
Watt	Pw.	Power	Power of 1 ampère current passing through resistance of 1 ohm.	10^7	.0013405 $\left(\text{or } \frac{1}{746}\right)$ of a horse power.
Jou	W. j.	Work	Is the work done by 1 watt of electrical power in 1 second.	10^7	.238 unit of heat (Therm).

*C. G. S. = Electro-magnetic units. Consult technical works in electricity.

Foreign Moneys.

English Money: 4 farthings = 1 penny (*d*); 12 pence = 1 shilling (*s*); 20 shillings = 1 pound (£). 21 shillings = one guinea; 5 shillings = one crown.
French Money: 10 centimes = 1 decime; 10 decimes = 1 franc.
German Money: 100 pfennig = 1 mark.
Russian Money: 100 copecks = 1 ruble.
Austro-Hungarian Money: 100 kreutzer = 1 florin.
For United States equivalents, see table of "Value of Foreign Coins in U. S. Money."

Table of Geometrical Progression.

(WHEREBY any questions of Geometrical Progression and of Double Ratio may be solved by Inspection, the Number of Terms not exceeding 56.)

Standard Newspaper Measure.

THE Standard Newspaper Measure, as recognized and now in general use is 13 ems pica. The standard of measurement of all sizes of type is the "em quad," not the letter "m."

The basis of measurements adopted by the International Typographical Union is the lower-case alphabet, from "a" to "z" inclusive, and the ems used are the same body as the type measured.

The weight of a cubic foot of distilled water at a temperature of 60° F. is 1,000 ounces Avoirdupois, *very nearly*, therefore the weight (in ounces, Avoirdupois) of a cubic foot of any of the substances in the above table is found by multiplying the specific gravities by 10, thus:—one cubic foot of oak weighs 1,170 ounces; one cubic foot of marble 2,700 ounces, and so on.

*Compared with water.

Freezing, Fusing, and Boiling Points.

Substances.	Reaumur.	Centigrade.	Fahrenheit.	Substances.	Reaumur.	Centigrade.	Fahrenheit.
Bromine freezes at	— 17.6°	— 22°	— 7.6°	Silver fuses at	800°	1,000°	1,832°

Tensile Strength is the resistance of the fibres or particles of a body to separation. It is therefore proportional to their number, or to the area of its transverse section. The fibres of wood are strongest near the centre of the trunk or limb of a tree.

Seed Planting in the United States.

(Compiled from reports of the Department of Agriculture.)

NEW ENGLAND.

Kind of Crop.	Date of Planting.	Best Soil.	Amount of Manure per Acre.	Amount of Seed per Acre (1).	Weeks to Maturity.
Corn	May 10 to 30	Sandy or clay loam	8 to 12 tons	8 to 12 qts	14-17
Wheat	Fall or Spring	Clay loam	18 tons	2 bush	20
Oats	Apr. to May	Strong loam	6 to 8 tons	2 to 3 bush	11-15

(1) The standard varieties of seed planted in the several sections of the United States are as follows: Corn—New England, leaming, sanford, flint; Middle States, leaming, white dent, yellow dent; Central and Western States, leaming, sanford, flint, white dent; Southern States, hickory king, goard-seed, Cox prolific. Wheat—Middle States, fultz; Central and Western States, fultz, poole, fife; Southern States, fulcaster. Oats—New England, white; Middle States, white, black; Central and Western States, gray Norway, silver mine, Russian; Southern States Texas rustproof. Barley—Middle States, mansbury; Southern States, Tennessee Winter. Rye—New England, white; Middle States, white, Winter; Central and Western States, Winter; Southern States, excelsior Winter. Buckwheat—Middle States, silver hull; Central and Western States, silver hull. Potatoes—New England, green mountain, carmen 3, rose; Middle States, rose, carmen 3, rural 2; Central and Western States, hebron, rural, early rose, early Ohio. Tobacco—Central and Western States, yellow prior, Spanish, white burley. Hay, clover—Middle States, medium red. Sweet Potatoes—Middle States, yellow Jersey; Southern States, yellow Jersey. Cotton—Southern States, Texas storm proof. Spring wheat is to some extent grown in Ohio, Indiana, Illinois and many other States. It matures in eighteen to twenty weeks.

(2) In Texas the black loam is a good soil for cotton, corn, wheat and most other field crops.

Constitution of the United States.

Preamble.

WE, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this CONSTITUTION for the United States of America.

ARTICLE I.

Legislative powers.

SECTION I. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

House of Representatives.

SECTION II. 1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

Qualifications of Representatives.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

Apportionment of Representatives.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia, 3.*

Vacancies, how filled.

4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

Officers, how appointed.

5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Senate.

SECTION III. 1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

Classification of Senators.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature, which shall then fill such vacancies.

Qualifications of Senators.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

President of the Senate.

4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice-President, or when he shall exercise the office of President of the United States.

Senate a court for trial of impeachments.

6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

Judgment in case of conviction.

7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Elections of Senators and Representatives.

SECTION IV. 1. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

Meeting of Congress.

2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Organization of Congress.

SECTION V. 1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

Rule of proceedings.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

Journals of each House.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

Adjournment of Congress.

4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Pay and privileges of members.

SECTION VI. 1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place.

Other offices prohibited.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Revenue bills.

SECTION VII. 1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

How bills become laws.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

* See Article XIV., Amendments.

Approval and veto powers of the President.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Powers vested in Congress.

SECTION VIII. 1. The Congress shall have power:

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel Invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Immigrants, how admitted.

SECTION IX. 1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

Habeas corpus.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

Attainder.

3. No bill of attainder or ex post facto law shall be passed.

Direct taxes.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

Regulations regarding customs duties.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

Moneys, how drawn.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

Titles of nobility prohibited.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Powers of States defined.

SECTION X. 1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Executive power, in whom vested.

SECTION I. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

Electors.

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

Proceedings of electors.

3. [The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.]*

Proceedings of the House of Representatives.

Time of choosing electors.

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

* This clause is superseded by Article XII., Amendments.

Qualifications of the President.

5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

Provision in case of his disability.

6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

Salary of the President.

7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Oath of the President.

8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Duties of the President.

SECTION II. 1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

May make treaties, appoint ambassadors, judges, etc.

2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

May fill vacancies.

3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

May make recommendations to and convene Congress.

SECTION III. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

How officers may be removed.

SECTION IV. The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors

ARTICLE III.

Judicial power, how invested.

SECTION I. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

To what cases it extends.

SECTION II. 1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens, or subjects.

Jurisdiction of the Supreme Court.

2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before-mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

Rules respecting trials.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the tria. shall be at such place or places as the Congress may by law have directed.

Treason defined.

SECTION III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

How punished.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

Rights of States and records.

SECTION I. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Privileges of citizens.

SECTION II. 1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

Executive requisitions.

2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

Laws regulating service or labor.

3. No person held to service or labor in one State, under the laws thereof, escaping into another shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

New States, how formed and admitted.

SECTION III. 1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

Power of Congress over public lands.

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Republican government guaranteed.

SECTION IV. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

Constitution, how amended.

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress: provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

Validity of debts recognized.

1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

Supreme law of the land defined.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

Oath; of whom required and for what.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

Ratification of the Constitution.

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

AMENDMENTS TO THE CONSTITUTION.

ARTICLE I.

Religion and free speech.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

ARTICLE II.

Right to bear arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

Soldiers in time of peace.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

Right of search.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

Capital crimes and arrest therefor.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

Right to speedy trial.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence.

ARTICLE VII.

Trial by jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive bail.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

Enumeration of rights.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

Reserved rights of States.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI.

Judicial power.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign State.

ARTICLE XII.

Electors in Presidential elections.

The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

Vice-President.

ARTICLE XIII.

Slavery prohibited.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

CONSTITUTION OF THE UNITED STATES—*Continued.*

ARTICLE XIV.

Protection for all citizens.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Rebellion against the United States.

3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

The public debt.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

Right of suffrage.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

RATIFICATION OF THE CONSTITUTION.

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787, unanimously.
Pennsylvania, December 12, 1787, vote 46 to 23.
New Jersey, December 18, 1787, unanimously.
Georgia, January 2, 1788, unanimously.
Connecticut, January 9, 1788, vote 128 to 40.
Massachusetts, February 6, 1788, vote 187 to 168.
Maryland, April 28, 1788, vote 63 to 12.
South Carolina, May 23, 1788, vote 149 to 73.
New Hampshire, June 21, 1788, vote 57 to 46.
Virginia, June 25, 1788, vote 89 to 79.
New York, July 26, 1788, vote 30 to 28.
North Carolina, November 21, 1789, vote 193 to 75.
Rhode Island, May 29, 1790, vote 34 to 32.

RATIFICATION OF THE AMENDMENTS.

I. to X. inclusive were declared in force December 15, 1791.

XI. was declared in force January 8, 1798.

XII., regulating elections, was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire, which rejected it. It was declared in force September 28, 1804.

XIII. The emancipation amendment was ratified by 31 of the 36 States; rejected by Delaware and Kentucky, not acted on by Texas; conditionally ratified by Alabama and Mississippi. Proclaimed December 18, 1865.

XIV. Reconstruction amendment was ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland, and 10 Southern States, and not acted on by California. The 10 Southern States subsequently ratified under pressure. Proclaimed July 28, 1868.

XV. Negro citizenship amendment was not acted on by Tennessee, rejected by California, Delaware, Kentucky, Maryland, New Jersey, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. Proclaimed March 30, 1870.

The National Flag.

THE official flag of the United States bears forty-six white stars in a blue field, arranged in six rows—the first, third, fourth and sixth rows having eight stars each, and the other two rows seven stars each. When Arizona and New Mexico are formally admitted to the Union after having adopted State constitutions which must be approved by Congress, the blue field of the flag will bear forty-eight stars arranged in six rows of eight stars each. The garrison flag of the Army is made of bunting, thirty-six feet fly and twenty feet hoist; thirteen stripes, and in the upper quarter, next the staff, is the field or "union" of stars, equal to the number of States, on blue field, over one-third length of the flag, extending to the lower edge of the fourth red stripe from the top. The storm flag is twenty feet by ten feet, and the recruiting flag nine feet nine inches by four feet four inches. The "American Jack" is the "union" or blue field of the flag. The Revenue Marine Service flag, authorized by act of Congress, March 2, 1799, was originally prescribed to "consist of sixteen perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field." The sixteen stripes represented the number of States which had been admitted to the Union at that time, and no change has been made since. June 14, the anniversary of the adoption of the flag, is celebrated as Flag Day in a large part of the Union.

IN ORDER TO SHOW PROPER RESPECT FOR THE FLAG THE FOLLOWING CEREMONY SHOULD BE OBSERVED:

It should not be hoisted before sunrise nor allowed to remain up after sunset.

At "retreat," sunset, civilian spectators should stand at "attention" and uncover during the playing of the "Star Spangled Banner." Military spectators are required by regulation to stand at "attention" and give the military salute.

When the National colors are passing on parade, or in review, the spectator should, if walking, halt, and if sitting, arise and stand at attention and uncover.

When the flag is flown at half staff as a sign of mourning it should be hoisted to full staff at the conclusion of the funeral.

In placing the flag at half staff, it should first be hoisted to the top of the staff and then lowered to position, and preliminary to lowering from half staff, it should be first raised to the top.

On Memorial Day, May 30, the flag should fly at half staff from sunrise to noon and full staff from noon to sunset. —*Sons of the Revolution in the State of New York.*

Declaration of Independence.

IN CONGRESS JULY 4, 1776.

THE unanimous declaration of the thirteen United States of America. When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitles them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow-Citizens taken captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms:

DECLARATION OF INDEPENDENCE—*Continued.*

Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which, would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, IN GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, We mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

SIGNERS OF THE DECLARATION OF INDEPENDENCE.

Washington's Farewell Address.

EXTRACTS FROM HIS ADDRESS COUNSELLING THE MAINTENANCE OF THE UNION.—CONFINEMENT OF THE GENERAL GOVERNMENT TO ITS CONSTITUTIONAL LIMITATIONS, AND AVOIDANCE OF RELATIONS WITH FOREIGN POLITICAL AFFAIRS.

(To the People of the United States on His Approaching Retirement from the Presidency.

Here, perhaps, I ought to stop; but a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments, which are the result of much reflection, of no inconsiderable observation, and which appear to me all-important to the permanency of your felicity as a people. These will be afforded to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel; nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

PRESERVATION OF THE UNION.

The unity of government, which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence—the support of your tranquillity at home, your peace abroad, of your safety, of your prosperity, of that very liberty which you so highly prize. But as it is easy to foresee that, from different causes and from different quarters, much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth; as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed—it is of infinite moment that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual and immovable attachment to it; accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth or choice of a common country, that country has a right to concentrate your affections. The name of America, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess are the work of joint counsels and joint efforts, of common dangers, sufferings, and successes.

ENCROACHMENTS BY THE GOVERNMENT.

It is important, likewise, that the habits of thinking, in a free country, should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding, in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power, and proneness to abuse it which predominates in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal, against invasions by the others, has been evinced by experiments, ancient and modern; some of them in our own country, and under our own eyes. To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be, in any particular, wrong, let it be corrected by an amendment in the way which the Constitution designates. But let there be no change or usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance, in permanent evil, and partial or transient benefit which the use can, at any time, yield.

Observe good faith and justice toward all nations; cultivate peace and harmony with all; religion and morality enjoin this conduct; and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that, in the course of times and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

ENTANGLEMENTS WITH FOREIGN POWERS.

Against the insidious wiles of foreign influence (I conjure you to believe me, fellow-citizens) the jealousy of a free people ought to constantly awake; since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful, must be impartial; else it becomes the instrument of the very influence to be avoided, instead of a defence against it. Excessive partiality for one foreign nation, and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil, and even second, the arts

of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

PARTING COUNSELS.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope that they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which hitherto has marked the destiny of nations; but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigues, to guard against the impostures of pretended patriotism; this hope will be full recompense for the solicitude for your welfare by which they have been dictated.

United States, September 17, 1796. GEORGE WASHINGTON.

Lincoln's Gettysburg Speech.

(*Address at the Dedication of Gettysburg Cemetery, November* 19, 1863.)

Fourscore and seven years ago our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work that they have thus far so nobly carried on. It is rather for us to be here dedicated to the great task remaining before us; that from these honored dead we take increased devotion to the cause for which they here gave the last full measure of devotion; that we here highly resolve that the dead shall not have died in vain; that the nation shall, under God, have a new birth of freedom, and that government of the people, by the people, and for the people, shall not perish from the earth.

The Monroe Doctrine.

"THE Monroe doctrine" was enunciated in the following words in President Monroe's message to Congress December 2, 1823:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power. * * * We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

Secretary of State Olney in his despatch of July 20, 1895, on the Venezuelan Boundary Dispute, said:

"It (the Monroe doctrine) does not establish any general protectorate by the United States over other American States. It does not relieve any American State from its obligations as fixed by international law, nor prevent any European power directly interested from enforcing such obligations or from inflicting merited punishment for the breach of them."

President Roosevelt in a speech in 1902 upon the results of the Spanish-American war, said:

"The Monroe doctrine is simply a statement of our very firm belief that the nations now existing on this continent must be left to work out their own destinies among themselves, and that this continent is no longer to be regarded as the colonizing ground of any European power. The one power on the continent that can make the power effective is, of course, ourselves; for in the world as it is, a nation which advances a given doctrine, likely to interfere in any way with other nations, must possess the power to back it up, if it wishes the doctrine to be respected."

United States Customs Duties.

A TABLE OF LEADING ARTICLES IMPORTED, GIVING RATES AT ENTRY BY THE NEW TARIFF ACT OF 1909, COMPARED WITH THE DINGLEY TARIFF ACT OF 1897.

(The following table covers only the articles of principal importance imported into the United States. The Tariff Act of 1909 contains 480 paragraphs each relating to an article or a group of articles.)
(ad val.—ad valorem; n.s.p.f.—not specially provided for; n.e.—not enumerated.)

*In the entire Silk Schedule the classification was so changed in the new law as to make tabulated comparison with the classifications under the Dingley Law impracticable. In general increases were made.

ARTICLES.	Rates of Duty Under.	
	Dingley Law. of 1897.	New Law of 1909.
SCHEDULE A—CHEMICALS, OILS AND PAINTS.		
Alcoholic compounds, n.s.p.f.	60c. lb. and 45 p.c. ad. val.	60c. lb. and 25 p.c. ad. val.
Alkalies, alkaloids, distilled oils, essential oils and all combinations of the foregoing	25 p.c. ad val.	25 p.c. ad val.
Ammonia, carbonite of	1½c. lb.	1½c. lb.
Drugs	1¼c lb. and 10 p.c. ad val.	1¼ c. lb. and 10 p.c ad. val.
Glue, value not above 10c. per lb	2½c. lb.	2½c. lb.
Oil, castor, gals.	35c. gal.	35c. gal.
Oil, cod liver, gals.	15c. gal.	15c. gal.
Oil, olive in bottles, etc., gals	50c. gal.	50c. gal.
Oil, whale, gals.	8c. gal.	8c. gal.
Opium, crude and not adulterated, containing 9 per cent. and over of morphia, lbs.	$1 lb.	$1.50 lb.
Phosphorus, lbs.	18c. lb.	18c. lb.
Perfumery, cosmetics, containing alcohol	60c. lb. and 45 p.c. ad val.	60c. lb. and 50 p.c ad. val.
Perfumery, cosmetics, not containing alcohol	50 p.c. ad val.	50 p.c. ad val.
Soap, Castile	1¼c. lb.	1¼ c. lb.
Soap, perfumed toilet	50 p.c. ad val.	50 p.c. ad val.
Soda, bicarbonate of	¾c. lb.	5-8c. lb.
SCHEDULE B—EARTHS, EARTHENWARE AND GLASSWARE		
Cement, Roman, Portland, in barrels and sacks, lbs.	8c. 100 lbs.	8c. 100 lbs.
Earthenware, porcelain, decorated	60 p.c. ad val.	60 p.c. ad val.
Earthenware, common	25 p.c. ad val.	25 p.c. ad val.
Glassware, plain and cut, decorated	60 p.c. ad val.	60 p.c. ad val.
Glassware, plain and cut, undecorated	55 p.c. ad val.	55 p.c. ad val.
Marble, in block	65c. cubic foot.	65c. cubic foot.
Marble, manufactures of, except for jewelry	50 p.c. ad val.	50 p.c. ad val.
Sponges	20 p.c. ad val.	20 p.c. ad val.
Sulphur, refined	$8 ton.	$4 ton.
Sumac, ground	3-10c. lb.	3-10c. lb.
SCHEDULE C—METALS AND MANUFACTURES OF.		
Iron ore, tons	40c. ton.	15c. ton.
Iron in pigs, wrought and cast, tons	$4 ton.	$1 ton.
Iron, bar	6-10c. lb.	6-10c. lb.
Automobiles and finished parts not including tires	45 p.c. ad val.	45 p.c. ad val.
Cast iron pipe, lbs.	4 1-10c. lb.	¼c. lb.
Nails, horseshoe	3¼c. lb.	1½c. lb.
Copper plates, lbs.	21½c. lb.	2½c. lb.
Pens, metallic, except gold pens	12c. gross.	12c. gross.
Table and kitchen utensils, metal	40 p.c. ad val.	40 p.c. ad val.
Tin plates	1½c. lb.	1 2-10c. lb.
Pins, not jewelry	35 p.c. ad val.	35 p.c. ad val.
Iron, manufactures of	45 p.c. ad val.	45 p.c. ad val.
SCHEDULE D—WOOD AND MANUFACTURES OF.		
Timber	1c. cubic foot.	½c. cubic foot.
Lumber, boards, planks, not planed	$1 per 1,000 feet.	50c. per 1,000 feet.
Lumber, finished on four sides	$4 per 1,000 feet.	$2.75 per 1,000 ft.
Staves	10 p.c. ad val.	10 p.c. ad val.
Shingles	30c. per 1,000.	50c. per 1,000.
Wood, manufactures of, n.s.p.f.	35 p.c. ad val.	35 p.c. ad val.
SCHEDULE E—SUGAR, MOLASSES AND MANUFACTURES OF.		
Sugar (not above No. 16 Dutch standard) beet	95c. lb. to 1.68, 5c. lb.	95c. lb. to $1.68, 5c. lb.
Sugar (same) cane	95c. lb. to 1.75, 5c. lb.	95c. lb. to $1.75, 5c. lb.
Molasses, not above 40 degrees	20 p.c. ad val.	20 p.c. ad val.
Maple sugar	4c. lb.	4c. lb.
Glucose or grape sugar	1½c. lb.	1½c. lb.
Sugar candy, valued at more than 15 cents per pound	50c. ad val.	50c. ad val.
SCHEDULE F—TOBACCO AND MANUFACTURES OF.		
Tobacco, unmanufactured, lbs.	$1.85 lb. to $2.50 lb.	$1.85 lb. to $2.50 lb.
Snuff, lbs.	55c. lb.	55c. lb.
Cigars and cigarettes	$4.50 lb. and 25 p.c. ad val.	$4.50 lb. and 25 p.c. ad val.

UNITED STATES CUSTOMS DUTIES—*Continued.*

ARTICLES.	Rates of Duty Under. Dingley Law of 1897.	New Law of 1909.
SCHEDULE G—AGRICULTURAL PRODUCTS AND PROVISIONS.		
Cattle, one year old or over, valued over $14 per head	27½ p.c. ad val.	27½ p.c. ad val.
Horses, mules, valued at $150 or less	$30 head.	$30 head.
Horses, mules, valued at over $150	25 p.c. ad val.	25 p.c. ad val.
Barley, bushel	30c. bushel.	30c. bushel.
Barley malt, bushel	45c. bushel.	45c. bushel.
Oats, bushel	15c. bushel.	15c. bushel.
Rice, cleaned, bushel	2c. lb.	2c. lb.
Rye, bushel	10c. bushel.	10c. bushel.
Butter and cheese, and substitutes for	6c. lb.	6c. lb.
Eggs, n.s.p.f., doz	5c. dozen.	5c. dozen.
Hay	$4 ton.	$4 ton.
Honey	20c. gallon.	20c. gallon.
Hops	12c. lb.	16c. lb.
Potatoes	25c. bushel.	25c. bushel.
Seeds, castor, flaxseed	25c. bushel.	25c. bushel.
Fish, mackerel, halibut, salmon, fresh	1c. lb.	1c. lb.
Fish, smoked, salted	n.e.	¾c. lb.
Fruits, apples, peaches	25c. bushel.	25c. bushel.
Fruits, preserved	2c. lb.	2c. lb.
Fruits, oranges, grapefruit	1c. lb.	1c. lb.
Fruits, lemons	1c. lb.	1½c. lb.
Fruits, pineapples in bulk	$7 per 1,000.	$8 per 1,000.
Salt, in sacks and barrels	12c. 100 lbs.	11c. 100 lbs.
Salt, in bulk	8c. 100 lbs.	7c. 100 lbs.
SCHEDULE H—SPIRITS AND WINES.		
Alcohol, proof, gallons	$2.25 gal.	$2.60 gal.
Brandy, gin, whiskey, cordials, proof, gallons	$2.25 gal.	$2.60 gal.
Wines, champagne, quarts	$8 per doz.	$9.60 per doz.

†See note following Free List.

THE FREE LIST.

The following is a list of the principal articles imported, which are put on the Free List by the Tariff of 1909. There are 236 articles in the list:

Aconite, agates, unmanufactured; albumen, n.s.p.f.; amber and ambergris, ammonia, sulphate of; arsenic, analine salts, animals for breeding, exhibition or racing purposes; articles of growth or manufacture of the U. S. returned; barks, quinine; beeswax; birds, land and water fowl; bismuth; books, maps, music, engravings, bound or unbound, and charts, printed more than twenty years at the date of importation, and publications issued for subscribers or exchanges by scientific and literary associations or academies, or publications for gratuitous private circulation, and public documents of foreign governments; books and pamphlets in raised print, used exclusively by the blind; books, maps, music, specially imported, not more than two copies in any one invoice, for the use of any society or institution solely for religious, philosophical, educational, scientific or literary purposes; books, libraries, furniture, and similar household effects of persons or families from foreign countries, used abroad by them not less than one year; bristles, crude; bullion, gold and silver; camphor, crude; chalk, crude; coal, anthracite; coal tar, crude; cocoa, coffee; coins, copper ore; cotton and cotton waste. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including glaziers' and engravers' diamonds not set. Drugs, crude, n.s.p.f.; fans, common palm leaf, not ornamented; fish, fresh, frozen, or packed in ice, caught in fresh waters by citizens of the United States, and all other fish, the products of American fisheries; furs, undressed; glass, enamel white, for watch and clock dials; guano, manures; hides (see note); ice; India rubber, crude; indigo; iodine, crude; iridium; ivory tusks; kyanite or cyanite; leeches; life boats and life saving apparatus; lithographic stones, not engraved; manuscripts; medals of gold, silver, or copper, and other metallic articles accepted as honorary distinctions; meerschaum, unmanufactured; minerals, crude, n.s.p.f.; models of inventions; needles, hand, sewing and darning; newspapers and periodicals; nuts, Brazil nuts, cream nuts, cocoanuts in the shell and broken cocoanut meat or copra, not prepared; nux vomica; oakum; oil cake; oils, almond, amber, crude and rectified ambergris; anise or anise seed, aniline, only for manure, bergamot, caraway, cassia, cinnamon, chamomile, citronella or lemon grass, civet, cocoanut, (not refined and deodorized), cottonseed, croton, fennel, ichthyol, jasmine, juniper, lavender; lemon, limes, mace; naroli or orange flower; liquid and solid primal flower essences not compounded; nut oil or oil of nuts, olive oil prepared solely for mechanical or industrial purposes by denaturing or process rendering it unfit for any edible use, attar of roses, palm, rosemary, thyme, red or white valerian; and also spermaceti, whale, and other fish oils of American fisheries, and all fish and other products of such fisheries; petroleum, crude or refined, including kerosene, benzine, gasoline, naphtha, and similar oils produced from petroleum.

Ores of gold, silver and nickel; paper stock, crude, of every description; paraffin, parchment and vellum. Personal effects, not merchandise, of citizens of the United States dying in foreign countries. Philosophical and scientific apparatus, specially imported for religious, philosophical, educational scientific, or literary purposes. Phosphates, crude; platinum, unmanufactured; potash, crude. Professional books, implements, instruments, and tools of trade, occupation, or employment, in the actual possession at the time of arrival, of persons emigrating to the United States. Quinia, sulphate of and salts of cinchona bark; radium; statuary and casts for art and educational purposes only; sausages, bologna. Seeds, anise, canary, caraway, cauliflower, cotton, cummin, fennel, hemp, hoarhound, mangelwurzel, mustard, rape, sugar beet, sorghum or sugar cane for seed; bulbs and bulbous roots, not edible and n.s.p.f. Shrimps and other shellfish; silk, raw; silk cocoons and silkworm eggs; skeletons and other preparations for anatomy; spices, when unground; ginger root, unground and not preserved or candied; stamps, foreign postage; stone and sand, n.s.p.f.; sulphur, lac or precipitated; sulphuric acid; tapioca, cassava; tar and pitch of wood; tea; teeth, natural. Tin ore, and tin in bars, blocks, pigs, or grain or granulated. Provided, all but tin ore shall pay 4c. lb. when mines of United States produce 1,500 tons of cassiterite and tin per year. Tobacco stems; turpentine, spirits of; turtles; vaccine virus; wax, vegetable or mineral; wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States not exceeding $100 in value. Wood, logs and round unmanufactured timber including pulp woods, n.s.p.f.; woods, in the log, rough or hewn only; works of art, and science, brought by professional artists or scientists arriving from abroad, temporarily for exhibition or imported in good faith for exhibition and not intended for sale; works of art productions of American artists residing temporarily abroad or other works of art imported expressly for public institutions; works of art, which are proved to the satisfaction of the Secretary of the Treasury to have been in existence more than twenty years prior to the date of their importation; other works of art, (except rugs and carpets), which shall have been produced more than one hundred years prior to the date of importation.

NOTE—After the Tariff Law of 1909 was passed, but before it was signed by the President, the following concurrent resolution regarding hides was adopted:

Hides of cattle, raw or unsured, whether dry, salted, or pickled, shall be admitted free of duty; provided, that on and after Oct. 1, 1909, grain, buff, or split leather shall pay a duty of 7½ per cent. ad valorem; that all boots and shoes made wholly or in chief value from cattle hides and cattle skins of whatever weight, of cattle of the bovine species, including calf skins, shall pay a duty of 10 per cent. ad valorem; that harness, saddles, and saddlery, in sets or in parts, finished or unfinished, composed wholly or in chief value of leather, shall pay a duty of 20 per cent. ad valorem.

Custom House Examination of Baggage.

THE following "Notice to Passengers" was issued by the Treasury Department February 4, 1910:

Paragraph 709, appearing in the free list of the present tariff act, governing passengers' baggage, is as follows:

709. "Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the use of, and as are necessary and appropriate for the wear and use of such persons, for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale: Provided, That in case of residents of the United States returning from abroad, all wearing apparel and other personal effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established, under appropriate rules and regulations to be prescribed by the Secretary of the Treasury, but no more than one hundred dollars in value of articles purchased abroad by such residents of the United States shall be admitted free of duty upon their return."

Foreigners are entitled to bring in free of duty such articles as are in the nature of wearing apparel, articles of personal adornment, toilet articles, and similar personal effects accompanying the passenger and necessary and appropriate for his or her wear and use for the purposes of the journey and present comfort and convenience, and are not intended for other persons nor for sale, without regard to the one hundred dollars limitation.

Citizens of the United States may have this privilege, provided it is shown to the satisfaction of the collector's representative on the pier, subject to the collector's approval, that they are bona fide residents of a foreign country.

BAGGAGE DECLARATION.

Passengers should observe that on the sheet there are two forms of declaration; the one printed in black is for returning residents of the United States; the one in red, for all persons other than residents of the United States.

The senior member of a family, if a passenger, may make declaration for the entire family.

Ladies travelling alone should state that fact in their declarations and entries in order that an expeditious examination of their baggage may be made.

The exact number of pieces of baggage, including all trunks, valises, boxes, packages, and hand bags of any description accompanying the passenger, must be stated in the declaration.

The forms above mentioned will be distributed to passengers during the early part of the voyage by an officer of the ship. When a passenger has prepared and signed the declaration, the coupon at the bottom of the form must be detached and the form given to the officer of the ship designated to receive the same. Declarations spoiled in the preparation must not be destroyed, but turned over to the purser, who will furnish a new blank to the passenger.

After all the baggage and effects of the passenger are landed upon the pier, the coupon which has been retained by the passenger must be presented at the inspector's desk, whereupon an inspector will be detailed to examine the baggage. Passengers must acknowledge in person, on the pier, their signatures to their declarations.

Passengers who, for any reason, desire the examination of their baggage postponed, may have all or any part there sent to the appraiser's store by making a request therefor to the officer taking their declaration.

RESIDENTS OF THE UNITED STATES.

Residents of the United States must declare all wearing apparel, jewelry, and other articles, whether used or unused, on their persons, in their clothing, or in their baggage, which have been obtained abroad by purchase or otherwise, with the foreign cost or value of the same. They shall state, as well, all wearing apparel, jewelry, or other articles taken out of the United States, which have been remodelled or improved while abroad so as to increase their value, the said statement to include the cost of such improvement. By stating the value of all declared articles in United States money, and packing the same so as to be easily produced for examination (and in one trunk if practicable), passengers will expedite the appraisement and passing of the same upon the pier. Whenever practicable, passengers should present the original receipted bills for foreign purchases.

Residents of the United States are allowed one hundred dollars' worth of articles in the nature of personal effects at their present foreign value, free of duty, provided they are not intended for other persons, or for sale, or to be used in business, and are properly declared.

Use does not exempt from duty wearing apparel or other articles obtained abroad, but such articles will be appraised at their present value.

Residents of the United States may also bring with them free of duty all wearing apparel and other personal effects taken by them out of the United States which have not been remodelled or improved abroad so as to increase their value.

Residents of the United States must not deduct the one hundred dollars exemption from the value of their wearing apparel or other articles obtained abroad by purchase or otherwise. Such deduction will be made by customs officers on the pier.

GOODS OTHER THAN PERSONAL EFFECTS.

Household effects of persons or families from foreign countries will be admitted free of duty if actually used abroad by them not less than one year, and not intended for any other person, nor for sale. Such effects should be declared whether the passenger be a foreigner or resident of the United States.

Articles intended for other persons, for use in business, theatrical apparel, properties, and sceneries, must also be declared by passengers, whether foreigners or residents.

CIGARS AND CIGARETTES.

All cigars and cigarettes must be declared, and are not included in the one hundred dollars exemption. Each passenger over eighteen years of age is entitled to bring in, free of duty and internal revenue tax, either 50 cigars or 300 cigarettes for his or her bona fide individual personal consumption.

DUTIES OF CUSTOMS OFFICERS.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a reexamination, but application therefor should be immediately made to the officers there in charge. If for any reason this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisement made to the collector of customs, in writing, within ten days after the original appraisement. No request for reappraisement can be entertained after the articles have been removed from customs custody.

Government officers are forbidden by law to accept anything but currency in payment of duties, but,

CUSTOM HOUSE EXAMINATION OF BAGGAGE—*Continued.*

If requested, will retain baggage on the piers for twenty-four hours to enable the owner to secure the currency.

Passengers are advised that to offer or give gratuities or bribes to customs officers is a violation of law, and customs officers who accept gratuities or bribes will be dismissed from the service, and all parties guilty of such offence are liable to criminal prosecution.

Any discourtesy or incivility on the part of customs officers should be reported to the Collector at the Custom House, to the Deputy Collector or the Deputy Surveyor at the pier, or to the Secretary of the Treasury.

BAGGAGE FOR TRANSPORTATION IN BOND.

Upon application to the customs officer in charge on the pier, baggage intended for delivery at ports in the United States other than the port of arrival, or in transit through the United States to a foreign country, may be forwarded thereto without the assessment of duty at the port of arrival, by the various railroads and express companies, whose representatives will be found on the pier. Passengers desiring to have their baggage forwarded in bond should indicate such intention and state the value thereof in their declarations, before any examination of the baggage has been made.

SEALSKIN GARMENTS.

An act of Congress of 1897 expressly forbids the importation into the United States of garments made in whole or in part of the skins of seals taken in the waters of the North Pacific Ocean, and unless the owner is able to establish by competent evidence and to the satisfaction of the collector that the garments are not prohibited they can not be admitted.

Under sections 2802 and 3082 of the Revised Statutes of the United States, articles obtained abroad not declared are subject to seizure, and the passenger liable to criminal prosecution.

Penalties for usury differ in the various States.

California, Colorado, Maine, Massachusetts (except on loans of less than $1,000), Montana, Nevada and Wyoming have no provisions on the subject.

Loss of *principal and interest* is the penalty in Arkansas and New York.

Loss of principal in Delaware and Oregon.

Loss of interest in Alabama, Alaska, District of Columbia, Florida, Idaho, Illinois, Iowa, Louisiana, Michigan, Minnesota, Mississippi, Nebraska, New Jersey, North Carolina (double amount if paid), North Dakota (double amount if paid), Oklahoma, South Carolina, South Dakota, Texas, Virginia, Washington (double amount if paid), Wisconsin, and Hawaii.

Loss of excess of interest in Connecticut, Georgia, Indiana, Kansas, Kentucky, Maryland, Missouri, New Hampshire (three times), New Mexico, Ohio, Pennsylvania, Tennessee, Vermont, and West Virginia. Loss of principal and interest in Rhode Island, also fine or imprisonment.

Postal Information.

(*Revised December*, 1910, *at the New York Post-Office, for* THE WORLD ALMANAC.)

DOMESTIC RATES OF POSTAGE.

ALL mailable matter for transmission by the United States mails within the United States is divided into four classes, under the following regulations. (Domestic rates apply to Canada, Mexico, Cuba, Tutuila, Porto Rico, Guam, Hawaii, the Philippines, the "Canal Zone," the Republic of Panama, and Shanghai, China).

First-Class Matter—This class includes letters, postal cards, "post cards," and anything sealed or otherwise closed against inspection, except sealed packages of proprietary articles described under "Fourth Class Matter," or anything containing writing not authorized on second, third or fourth class matter.

First class or letter rate of postage to any part of the United States, its possessions, or the above-named countries, *two cents per ounce or fraction thereof.*

Rates on local or drop letters at free delivery offices, two cents per ounce or fraction thereof. At offices where there is no free delivery by carriers, and the addressee cannot be served by rural free delivery carriers, one cent per ounce or fraction thereof.

Rates on **postal cards,** one cent (double or "reply" cards, two cents). Postal cards issued by the Post-Office Department may bear written, printed, or other additions as follows:

(*a*) The face of the card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for a message, etc., but the space to the right for the address only.

(*b*) Addresses upon postal cards may be either written, printed, or affixed thereto, at the option of the sender.

(*c*) Very thin sheets of paper may be attached to the card on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*d*) Advertisements, illustrations, or writing may appear on the back of the card and on the left third of the face.

2. The addition to a postal card of matter other than as above authorized will subject the card, when sent in the mails, to postage according to the character of the message—at the letter rate if wholly or partly in writing or the third-class rate if entirely in print. In either case the postage value of the stamp impressed upon the card will not be impaired.

3. Postal cards must be treated in all respects as sealed letters, except that when undeliverable to the addressee they may not be returned to the sender.

4. Postal cards bearing particles of glass, metal, mica, sand, tinsel or other similar substances, are unmailable, except when inclosed in tightly sealed envelopes with proper postage attached, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Cards that have been spoiled in printing or otherwise will be redeemed from *the original purchasers* at 75 per cent. of their face value if unmutilated.

POST CARDS—(Private Mailing Cards)—bearing written or printed messages are transmissible in the mails:

Private mailing cards ("post cards") in the domestic mails must conform to the following conditions:

(*a*) A "post card" must be an unfolded piece of cardboard not exceeding approximately 3 9-16 by 5 9-16 inches, nor less than approximately 2¾ by 4 inches.

(*b*) It must in form and in the quality and weight of paper be substantially like the Government postal card.

(*c*) It may be of any color not interfering with a legible address and postmark.

(*d*) It may or may not, at the option of the sender, bear near the top of the face the words "post card."

(*e*) The face of the card may be divided by a vertical line; the left half to be used for a message, etc., but that to the right for the address only.

(*f*) Very thin sheets of paper may be attached to the card, and then only on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*g*) Advertisements and illustrations may appear on the back of the card and on the left half of the face.

2. Cards, without cover, conforming to the foregoing conditions are transmissible in the domestic mails (including the possessions of the United States) and to Cuba, Canada, Mexico, the Republic of Panama, and Shanghai, China, at the postage rate of 1 cent each.

3. When post cards are prepared by printers and stationers for sale, it is desirable that they bear in the upper right hand corner of the face an oblong diagram containing the words "Place postage stamp here," and at the bottom of the space to the right of the verticle dividing line, the words "This space for the address."

4. Cards which do not conform to the conditions prescribed by these regulations are, when sent in the mails, chargeable with postage according to the character of the message—at the letter rate, if wholly or partly in writing, or at the third-class rate, if entirely in print.

5. Cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are *unmailable*, except when inclosed in tightly sealed envelopes, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Rate on special delivery letters, ten cents on each letter in *addition* to the regular postage. This entitles the letter to immediate delivery by special messenger. Special delivery stamps are sold at post-offices, and must be affixed to such letters. Ordinary stamps to the value of ten cents affixed to a letter or other piece of mail will entitle it to special delivery if it is marked "Special Delivery." The delivery, at carrier offices, extends to the limits of the carrier routes. At non-carrier offices it extends to one mile from the post-office. Postmasters are not obliged to deliver beyond these limits, and letters addressed to places beyond must await delivery in the usual way, notwithstanding the special delivery stamp.

Prepayment by stamps invariably required. Postage on all letters should be *fully* prepaid, but if prepaid one full rate and no more, they will be forwarded, and the amount of deficient postage collected on delivery; if wholly unpaid, or prepaid with less than one full rate and deposited at a post-office, the addressee will be notified to remit postage; and if he fails to do so, they will be sent to the Dead Letter Office; but they will be returned to the sender if he is located at the place of mailing, and if his address be printed or written upon them.

Letter rate is charged on typewriting and carbon or letter press copies thereof, and on all printed

POSTAL INFORMATION—*Continued.*

imitations or reproductions of typewriting or manuscript obtained by mechanical process unless such reproductions are presented at post-office windows in the minimum number of twenty identical unsealed copies separately addressed.

Letters and other matter prepaid at the letter rate—two cents an ounce or fraction thereof—(but no other class of mail matter) will be returned to the sender free, if a request to that effect is printed or written on the envelope or wrapper. The limit of weight is four pounds, except for a single book.

Prepaid letters will be forwarded from one post-office to another upon the written request of the person addressed, without additional charge for postage. The direction on forwarded letters may be changed as many times as may be necessary to reach the person addressed. Nothing may be added to such letters except the forwarding address without subjecting them to new postage.

Second-Class Matter—This class includes all printed newspapers and periodicals that have been "Entered as second-class matter," and are regularly issued at stated intervals as frequently as four times a year, from a known office of publication and mailed by the publishers or news agents to actual subscribers or as sample copies or to news agents for sale, and newspapers and publications of this class mailed by persons other than publishers. Also periodical publications of benevolent and fraternal societies, organized under the lodge system and having a membership of a thousand persons, and the publications of strictly professional, literary, historical, and scientific societies, and incorporated institutions of learning, trade unions, etc., provided only that these be published at stated intervals not less than four times a year, and that they be printed on and be bound in paper. Publishers who wish to avail themselves of the privileges of the act are required to make formal application to the department through the postmaster at the place of publication, producing satisfactory evidence that the organizations, societies, and institutions represented come within the purview of the law, and that the object of the publications is to further the objects and purposes of the organizations.

Rates of postage to publishers, *one cent a pound or fractional part thereof*, prepaid in currency. Publications designed primarily for advertising or free circulation, or circulation at a nominal rate, or not having a legitimate list of subscribers, are excluded from the pound rate, and pay the third-class rate.

Publications sent to actual subscribers in the county where printed are free, unless mailed for delivery at a letter-carrier office.

Rates of postage on second-class newspapers, magazines, or periodicals, mailed by others than the publishers or news agents, *one cent for each four ounces or fraction thereof*. It should be observed that the rate is one cent for each four ounces, not one cent for each paper contained in the same wrapper. This rate applies only when a complete copy is mailed. Parts of second-class publications or partial or incomplete copies are *third-class matter*. Second-class matter will be entitled to special delivery when special delivery stamps (or ten cents in ordinary stamps and the words "Special Delivery" placed on the wrapper) are affixed in addition to the regular postage.

Second-class matter must be so wrapped that it may be easily examined. The sender's name and address may be written in them or on the wrapper, also the words "sample copy" when sent as such, or "marked copy" when it contains a marked item or article. Typographical errors in the text may be corrected, but any other writing subjects the matter to letter postage.

Third-Class Matter—Mail matter of the third class includes printed books, pamphlets, engravings, circulars in print (or by the hectograph, electric-pen, or similar process when at least twenty identical copies, separately addressed, are mailed at post-office windows at one time), and other matter wholly in print, proof sheets, corrected proof sheets, and manuscript copy accompanying the same.

The rate on matter of this class is *one cent for each two ounces or fraction thereof*. Postage must be paid by stamps affixed, unless 2,000 or more identical pieces are mailed under special permit when the postage at that rate may be paid in money.

Manuscript unaccompanied by proof-sheets must pay letter rate.

Third-class matter must admit of easy inspection, otherwise it will be charged letter rate on delivery. It must be fully prepaid, or it will not be despatched. New postage must be prepaid for forwarding to a new address or returning to senders.

The limit of weight is four pounds, except single books in separate packages, on which the weight is not limited. It is entitled, like matter of the other classes, to special delivery when special delivery stamps are affixed in addition to the regular postage, or when ten cents in ordinary stamps are affixed in addition to the regular postage and the words "Special Delivery" are placed on the wrapper.

Upon matter of the third class, or upon the wrapper or envelope inclosing the same, or the tag or label attached thereto, the sender may write his own name, occupation, and residence or business address, preceded by the word "from," and may make marks other than by written words to call attention to any word or passage in the text, and may correct any typographical errors. There may be placed upon the blank leaves or cover of any book, or printed matter of the third-class, a simple manuscript dedication or inscription not of the nature of a personal correspondence. Upon the wrapper or envelope of third-class matter, or the tag or label attached thereto, may be printed any matter mailable as third-class. Written designation of the contents such as "book," "photo," "printed matter," is also permissible, but there must be left on the address side a space sufficient for a legible address, postmark and the necessary stamps.

Fourth-Class Matter—Fourth-class matter is all mailable matter not included in the three preceding classes which is so prepared for mailing as to be easily withdrawn from the wrapper and examined, except that sealed packages of proprietary articles of merchandise (not in themselves unmailable), such as pills, fancy soaps, tobacco, etc., put up in fixed quantities by the manufacturer for sale by himself or others, *or for samples*, in such manner as to properly protect the articles, so that each package in its simplest mercantile *or sample* form may be examined, are mailable as fourth-class matter. It embraces merchandise and samples of every description, and coin or specie.

Rate of postage, *one cent for each ounce or fraction thereof* (except seeds, roots, bulbs, cuttings, scions, and plants, the rate on which is *one cent for each two ounces or fraction thereof*). This matter must be fully prepaid, or it will not be despatched. Postage must be paid by stamps affixed, unless 2,000 or more identical pieces are mailed at one time when the postage at that rate may be paid in stamps or money. New postage must be prepaid for forwarding or returning. The affixing of special delivery ten-cent stamps in addition to the regular postage entitles fourth-class matter to special delivery. (See remarks under "first-class matter.")

Articles of this class that are liable to injure or deface the mails, such as glass, sugar, needles, nails, pens, etc., must be first wrapped in a bag, box, or open envelope and then secured in another outside tube or box, made of metal or hard wood, without sharp corners or edges, and having a sliding clasp or screw lid, thus securing the articles in a double package. The public should bear in mind that the first object of the department is to transport the mails safely, and every other interest is made subordinate,

POSTAL INFORMATION—*Continued.*

Such articles as poisons, explosives, or inflammable articles, live or dead animals, insects, fruits or vegetable matter liable to decomposition, or substances exhaling a bad odor will not be forwarded in any case.

Firearms may only be sent when it is apparent that they are harmless.

The regulations respecting the mailing of liquids are as follows: Liquids, not ardent, vinous, spirituous, or malt, cocaine or derivatives thereof, and not liable to explosion, spontaneous combustion, or ignition by shock or jar, and not inflammable (such as kerosene, naphtha, or turpentine), may be admitted to the mails for transportation within the United States. Samples of altar or communion wine are mailable. When in glass bottles, such bottles must be very strong and must be inclosed in a metal, wooden or papier-mache block or tube, and there must be provided between the bottle and the block or tube a cushion of cotton, felt or other absorbent. The block or tube must be of sufficient strength to resist rough handling and support the weight of the mails piled in bags. If of wood, it must be at least three-sixteenths of an inch thick in the thinnest part; if of papier-mache it must be at least five-thirty seconds of an inch thick for bottles holding from two to four ounces, and at least one-eighth of an inch thick for bottles holding two ounces or less. The block or tube must be rendered water-tight by an application of paraffin or other suitable substance, so that if the bottle be broken in transit the liquid will not escape or the tube become softened and allow the broken glass to be scattered in the mails. When inclosed in a tin cylinder, metal case, or tube, such cylinder, case, or tube should have a lid or cover so secured as to make the case or tube water tight, and should be securely fastened in a wooden or papier-mache block (open only at one end), and not less in thickness and strength than above described. Manufacturers or dealers intending to transmit articles or samples in considerable quantities should submit a sample package, showing their mode of packing, to the postmaster at the mailing office, who will see that the conditions of this section are carefully observed. The limit of admissible liquids and oils is not exceeding four ounces, liquid measure.

Limit of weight of fourth-class matter (excepting liquids and single books), four pounds.

The name and address of the sender, preceded by the word "from," also any marks, numbers, names, or letters for the purpose of description, such as prices, quantity, etc., may be written on the wrapper of fourth-class matter without additional postage charge. A request to the delivering postmaster may also be written asking him to notify the sender in case the package is not delivered.

Third or Fourth Class Matter Mailable Without Stamps—Under special permits postage may be paid in money for third or fourth class matter mailed in quantities of 2,000 or more *identical* pieces. For information concerning the regulations governing such mailings inquiry should be made of the postmaster.

Registration—All kinds of postal matter may be registered at the rate of *ten cents for each package* in addition to the regular rates of postage, to be fully prepaid by stamps. Each package must bear the name and address of the sender, and a receipt will be returned from the person to whom addressed, when indorsed "receipt desired," or words of similar import. Mail matter can be registered at all post-offices in the United States.

An indemnity—not to exceed $50 for any one registered piece, or the actual value of the piece, if it is less than $50—shall be paid for the loss of first-class registered matter mailed at and addressed to a United States post-office.

Domestic Money Orders—Domestic money orders are issued by money-order post-offices for any amount up to $100, at the following rates:

For sums not exceeding $2 50, 3 cents; over $2. 50 to $5, 5 cents; over $5 to $10, 8 cents; over $10 to $20, 10 cents; over $20 to $30, 12 cents; over $30 to $40, 15 cents; over $40 to $50, 18 cents; over $50 to $60, 20 cents; over $60 to $75, 25 cents; over $75 to $100, 30 cents.

Stamped Envelopes—Embossed stamped envelopes and newspaper wrappers of several denominations, sizes and colors are kept on sale at post-offices, singly or in quantities, at a small advance on the postage rate. Stamps cut from stamped envelopes are valueless; but postmasters are authorized to give good stamps for stamped envelopes or newspaper wrappers that may be spoiled in directing, if presented in a substantially whole condition.

Unmailable Matter—Unmailable domestic matter—that is, matter which is not admissible to the United States mails for delivery in the United States or in any of its possessions—includes:

1. All matter illegibly, incorrectly, or insufficiently addressed.
2. All transient second-class matter and all matter of the third or fourth class not wholly prepaid; and letters and other first-class matter not prepaid one full rate—2 cents.
3. All matter weighing over four pounds, except second-class matter, single books, and documents printed and circulated by authority of Congress.
4. All matter harmful in its nature, as poisons, explosive or inflammable articles, matches, live or dead (but not stuffed), animals, and reptiles, fruits or vegetables liable to decomposition, guano, or any article exhaling a bad odor, vinous, spirituous or malt liquors, and liquids liable to explosion, spontaneous combustion, or ignition by shock or jar, such as kerosene oil, naphtha, benzine, etc.
5. All obscene, lewd, or lascivious matter, and every article or thing intended, designed, or adapted for any indecent or immoral purpose, or for the prevention of conception or procuring abortion.
6. Postal, post, or other cards mailed without wrappers and all matter bearing upon the outside cover or wrapper any delineations, epithets, terms, or language of an indecent, lewd, lascivious, obscene, libelous, scurrilous, defamatory or threatening character, or calculated by the terms or manner or style of display, and obviously intended to reflect injuriously upon the character or conduct of another.
7. Post cards, bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are unmailable, except as provided under "First Class Matter."
8. All matter concerning any lottery, so-called gift concert, or other enterprise of chance, or concerning schemes devised for the purpose of obtaining money or property under false pretenses.

Applications for the establishment of post-offices should be addressed to the First Assistant Postmaster-General, accompanied by a statement of the necessity therefor. Instructions will then be given and blanks furnished to enable the petitioners to provide the department with the necessary information.

The franking privilege was abolished July 1, 1873, but the following mail matter may be sent free by legislative saving clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by Members of Congress, or the Secretary of the Senate, or Clerk of the House.
2. Seeds transmitted by the Secretary of Agriculture, or by any Member of Congress, procured from that Department.

POSTAL INFORMATION—*Continued.*

3. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

4. The Vice-President, Members and Members-elect and Delegates and Delegates-elect to Congress may frank any mail matter to any Government official or to any person correspondence, not over four ounces in weight, upon official or departmental business.

All communications to Government officers and to Members of Congress are required to be prepaid by stamps unless inclosed in "penalty" envelopes furnished for replies.

Suggestions to the Public (*from the United States Official Postal-Guide*).—Mail all letters, etc., as early as practicable, especially when sent in large numbers, as is frequently the case with newspapers and circulars.

All mail matter at large post-offices is necessarily handled in great haste and should therefore, in all cases be so PLAINLY addressed as to leave NO ROOM FOR DOUBT AND NO EXCUSE FOR ERROR on the part of postal employes. Names of States should be written in full (or their abbreviations very distinctly written) in order to prevent errors which arise from the similarity of such abbreviations as Cal., Col.; Pa., Va., Vt.; Me., Mo. Md.; Ioa., Ind.; N. H., N. M., N. Y., N. J., N. C., D. C.; Miss., Minn., Mass.; Nev., Neb.; Penn., Tenn., etc., when hastily or carelessly written. This is especially necessary in addressing mail matter to places of which the names are borne by several post-offices in different States.

Avoid as much as possible using envelopes made of flimsy paper, especially where more than one sheet of paper, or any other article than paper, is inclosed. Being often handled, and even in the mail-bags subject to pressure, such envelopes not infrequently split open, giving cause of complaint.

Never send money or any other article of value through the mail except either by means of a money order or in a registered letter. Any person who sends money or jewelry in an unregistered letter not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter-carrier to ruin.

See that every letter or package bears the full name and post-office address of the writer, in order to secure the return of the letter, if the person to whom it is directed cannot be found. A much larger portion of the undelivered letters could be returned if the names and addresses of the senders were always fully and plainly written or printed inside or on the envelopes. Persons who have large correspondence find it most convenient to use "special request envelopes;" but those who only mail an occasional letter can avoid much trouble by writing a request to "return if not delivered," etc., on the envelope.

When dropping a letter, newspaper, etc., into a street mailing-box, or into the receptacle at a post-office, always see that the packet falls into the box and does not stick in its passage; observe, also, particularly, whether the postage stamps remain securely in their places.

Postage stamps should be placed on the upper right-hand corner of the address side of all mail matter.

The street and number (or box number) should form a part of the address of all mail matter directed to cities. In most cities there are many persons, and even firms, bearing the same name. Before depositing any package or other article for mailing, the sender should assure himself that it is wrapped and packed in the manner prescribed by postal regulations; that it does not contain *unmailable* matter nor exceed the limit of weight as fixed by law; and that it is fully prepaid and properly addressed.

It is unlawful to send an ordinary letter by express or otherwise outside of the mails unless it be inclosed in a Government stamped envelope. It is also unlawful to inclose a letter in an express package unless it pertains wholly to the contents of the package.

It is forbidden by the regulations of the Post-Office Department for postmasters to give to any person information concerning the mail matter of another, or to disclose the name of a box-holder at a post-office.

Letters addressed to persons temporarily sojourning in a city where the Free Delivery System is in operation should be marked "Transient" or "General Delivery," if not addressed to a street and number or some other designated place of delivery.

Foreign books, etc., infringing United States copyright are *undeliverable* if received in foreign mails, or mailed here.

The foregoing rates, rules, and suggestions *apply to postal matters in the United States.*

Foreign Mails.

POSTAGE RATES AND CONDITIONS.

THE rates of postage to all foreign countries and colonies are as follows:

Letters.....first ounce or less, 5 cents; each additional ounce	3 cents.
Postal cards, each	2 cents.
Newspapers and other printed matter, per 2 ounces	1 cent.
Commercial papers (such as legal and insurance papers, deeds, bills of lading, invoices, manuscript for publication, etc.)..... { Packets not in excess of 10 ounces..... / Packets in excess of 10 ounces, for each 2 ounces or fraction thereof.....	5 cents. / 1 cent.
Samples of merchandise. { Packets not in excess of 4 ounces..... / Packets in excess of 4 ounces, for each 2 ounces or fraction thereof	2 cents. / 1 cent.
Registration fee on letters or other articles	10 cents.

On printed matter and commercial papers the limit of weight is 4 pounds 6 ounces, except that single volumes of books to Salvador, Canada, Mexico, Cuba, and Panama, are unrestricted as to weight. Size.—The limit of size is 18 inches in any one direction, except that printed matter or commercial papers in rolls may be 30 inches long by 4 inches in diameter.

Ordinary letters for countries of the Postal Union (except Canada and Mexico) will be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid at least partially. Domestic rates apply to Porto Rico, Guam, Philippine Islands, Cuba, "Canal Zone," Republic of Panama, Tutuila, Hawaii, Shanghai City and U. S. Naval Vessels.

EXCEPTIONS.

GREAT BRITAIN AND IRELAND AND NEWFOUNDLAND.

The rate on Letters for these countries is two cents for each ounce or fraction. The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples.

FOREIGN MAILS—*Continued.*

GERMANY.

The postage rate on Letters for Germany by direct ocean transportation is two cents an ounce. Letters paid at the two-cent rate are despatched only by steamers able to land the mails at a German port. Letters paid at the Postal Union rate are despatched by the quickest route.

A fast steamer sailing for Germany via Plymouth and Cherbourg carries letters for Germany prepaid at the Postal Union rate and at the two-cent rate—the letters paid at the five-cent (Postal Union) rate are landed at Plymouth (the quickest route), whereas the letters paid at the two-cent rate are carried through to Germany by the Transatlantic steamer.

The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples regardless of the route by which sent, also to Letters despatched via England and France.

CANADA.

Matter mailed in the United States addressed to Canada is subject to the same postage rates and conditions as it would be if it were addressed for delivery in the United States, except that plants, seeds, etc., are subject to the postage rate of one cent an ounce; that "commercial papers" and samples of merchandise are transmissible at the Postal Union postage rates and conditions. Goods and merchandise, not samples, may be sent in unsealed packages, not over 4 pounds in weight, for one cent per ounce. There is no limit of weight to single volumes of printed books or packages of second-class matter. Sealed articles, other than letters in their usual and ordinary form, are unmailable.

All articles, except the reply half of double postal cards, must be fully prepaid with postage stamps at the rate of postage applicable to similar articles in the domestic mails of this country, and are required to be delivered free of postage to addressees, except that letters upon which only one rate of postage has been prepaid are required to be forwarded, any deficiency being collected on delivery.

Any article of correspondence may be registered. Packages of merchandise are subject to the regulations of either country to prevent violations of the revenue laws; must not be closed against inspection, and must be so wrapped and inclosed as to be easily examined. Samples must not exceed 12 ounces in weight.

CUBA AND PANAMA.

Matter for Cuba and the Republic of Panama is mailable at the same rates of postage and under the same conditions as it would be if addressed for delivery in the United States, except that "samples" and "commercial papers" may be sent subject to the Postal Union postage rates and conditions; that articles, other than letters in their usual and ordinary form, must be so wrapped or inclosed that the contents may be readily and thoroughly examined; that packages—except single volumes of printed books—must not exceed 4 pounds 6 ounces in weight, and that (in addition to other prohibited articles) liquids (except samples thereof) fatty substances and those which easily liquefy are unmailable.

Letters and post cards must be despatched even if they do not bear any postage stamps. Other articles must be prepaid at least in part. Postage due on short-paid matter will be collected from the addressees on delivery.

MEXICO.

Matter mailed in the United States addressed to Mexico is subject to the same postage rates and conditions as it would be if it were addressed for delivery in the United States, except that articles of miscellaneous merchandise (fourth-class matter) other than liquids, not sent as bona-fide trade samples should be sent by "Parcels Post;" and that commercial papers and bona-fide trade samples are transmissible in the regular mails at the Postal Union postage rate and conditions. Limit of weight for commercial papers and printed matter, 4 pounds 6 ounces, except single volumes of printed books, to which no limit is fixed. Articles, other than letters in their usual and ordinary form, must be so wrapped that the contents can be easily examined.

Matter addressed to Mexico must, in all cases, bear as part of the address the name of the State in which the city or town is located. For example, Acapulco, Guerrero, Mexico; not Acapulco, Mexico.

U. S. NAVAL VESSELS.

Mail matter for officers or members of the crew of United States vessels of war stationed abroad is subject to domestic postage rates and conditions. Articles should be addressed "U. S. S. (name of vessel), care of Postmaster, New York, N. Y." and *be fully prepaid. Mail* so addressed will be forwarded to the vessels. ☞ *Express packages will not be received at the post-office unless they conform to the Postal Regulations and are placed in the mail with the postage properly prepaid.*

SHANGHAI, CHINA.

Domestic postage rates and conditions apply to articles addressed for delivery in the city of Shanghai, but for other places in China the Universal Postal Union (foreign) rates apply.

SAMPLES OF MERCHANDISE

must be bona fide trade samples without any salable value. **Wrapping**—Samples of merchandise must be wrapped so that the contents may be easily examined without injury to wrappers. **Permissible Writing**—They must bear no writing except the name or the social position of the sender, a manufacturer's or trade mark, numbers, prices and indications relating to the weight, size, dimensions and quantity to be disposed of, and words which are necessary to precisely indicate the origin and nature of the merchandise. **Weight**—Packages of samples must not exceed 12 ounces in weight. **Size**—The size must not exceed 12 inches in length, 8 inches in breadth, and 4 inches in depth, except when in the form of a roll, they may be 12 inches in length and 6 inches in diameter. **Postage**—The postage on samples is 2 cents for the first 4 ounces or less, and 1 cent for each additional 2 ounces or fraction of 2 ounces. Register all valuable articles. Registration fee 10 cents.

PARCELS POST.

Postage, 12 cents a pound or fraction thereof; greatest length (unless specially noted below), 3 feet 6 inches; greatest length and girth combined (unless specially noted below), 6 feet; limit of weight (unless specially noted below), 11 pounds; value (unless specially noted below), not limited; registration fee, 10 cents.

Unsealed packages of mailable merchandise may be sent by Parcels Post to Dutch Guiana (parcels cannot be registered. See item "Customs Declarations"), Uruguay (parcels cannot be registered. See item "Customs Declarations," Hungary (parcels must not exceed $80 in value), Bermuda,

FOREIGN MAILS—*Continued.*

Jamaica, including Cayman Islands, Turks Island, including Caicos Islands, Barbados (parcels cannot be registered), the Bahamas, British Honduras, Mexico (limit of size, 2 feet in length, 4 feet in girth; limit of weight for places named in "Postal Guide," 11 pounds; for other places, 4 pounds 6 ounces), Leeward Islands (Antigua, Anguilla, Barbuda, Dominica, Montserrat, Nevis, Redonda, St. Kitts and the Virgin Islands), Colombia (limit of size, 2 feet in length, 4 feet in girth), Costa Rica, Salvador, (see item "Customs Declarations,") British Guiana, Danish West Indies (St. Croix, St. John and St. Thomas), and the Windward Islands (Grenada, Grenadines, St. Lucia, and St. Vincent), Trinidad, including Tobago; Venezuela (see item "Customs Declarations,") Bolivia, Ecuador (parcels must not exceed $50 in value), Peru and Chile, Newfoundland, Honduras (Republic of), Germany; Italy, including: (1) Italian offices in Ottoman Empire: Bengazi (North Africa), Durazzo (Albania), Galata (Constantinople), Jerusalem (Palestine), Canea (Crete), Pera (Constantinople), Salonica (Roumelia), Scutari (Asia Minor), Smyrna (Asia Minor), Stamboul (Constantinople), Tripoli-in-Barbary, Valona (Albania). (2) The Italian Colony of Erythrea: Ady Caje, Adi Ugri, Agordat, Asmara, Assab, Keren, Nefasit, Massaua, Saganeiti. (3) Italian Protectorate of Benadir: Brava, Giumbo, Merka, Mogadiscio (parcels must not exceed $80 in value), Netherlands (parcels cannot be registered, and must not exceed $80 in value. See item "Customs Declarations"), New Zealand, including Cook and Fanning Islands; Nicaragua, Guatemala, Norway (parcels must not exceed $80 in value), Japan including Formosa, Karafuto (Japanese Saghalien), and Korea (parcels must not exceed $80 in value), Hong Kong, including Kowloon (parcels must not exceed $80 in value), Austria (parcels must not exceed $80 in value), Belgium (parcels must not exceed $80 in value), France (parcels cannot be registered and must not weigh over 4 pounds 6 ounces or exceed $50 in value (see item "Customs Declarations"), Great Britain and Ireland (parcels cannot be registered), Australia, including Tasmania (parcels must not exceed $30 in value), Denmark (parcels must not exceed $80 in value), Sweden (parcels must not exceed $80 in value), China, the following places only: Amoy, Canton, Changsha, Cheefoo, Chingkiang, Foochow, Hangchow, Hankow, Hoihao (Hoihow), Hong-Kong, Kingiang, Liu Kung Tau, Nanking, Newchwang, Ningpo, Shanghai, Shanghaikwan, Shasi, Soochow, Swatow, Peking, Tientsin, Tongku, Wei Hai Wei and Wuku (parcels must not exceed $80 in value); Manchuria, the following places only: Antoken (Antung), Choshun (Changchun), Dairen (Tairen, Talien, formerly Dalny) Daisekkio (Tashichiao), Daitoko (Tatungkou), Furanten (Pulantien), Gaihei (Kaiping), Giukaton (Newchatun), Gwaboten (Wafangtien), Hishiko (Pitzuwo), Honkeiko (Penhasikn), Hoten (Mukden), Howojio (Fenghuangcheng), Kaigen (Kalyuen), Kajiio (Haichaeng), Kinshu (Chinchow), Koshurei (Kungchuling), Riojun (Port Arthur), Rioyo (Liaoyang), Riujuton (Liushutun), Senkinsai (Chienchinsai), Shibeigai (Saupingchieh), Shinminfu (Shingmingfu), Shoto (Changtu), Sokako (Tsaohokow), Sokaton (Suchiatun), Taikozan (Taikushan), Tetsurei (Tiehling), Yendai (Yentai), Yugakujio (Hsiungyocheng) (parcels must not exceed $80 in value). Parcels must be wrapped so as to permit their contents to be easily examined by postmasters. The presence, in an unsealed parcel, of sealed receptacles containing mailable articles which cannot be safely transmitted in the unsealed receptacles, will not render the parcel unmailable, provided the contents of the sealed receptacles are plainly visible, or are unmistakably indicated by the method of packing or by a precise statement on the covers. But such sealed receptacles will not be admitted to the Parcels Post unless inclosed in an outside cover open to inspection. Any article absolutely prohibited admission to the regular mails for any country is also inadmissable to Parcels Post mails for that country; but no article is excluded from Parcels Post mails solely because it is dutiable in the country of destination. Liquids, poisonous, explosive, and inflammable substances are excluded.

CUSTOMS DECLARATIONS.

A "Customs Declaration" Form 4402 (which will be furnished on application at the post-office or a station) must be properly and fully filled out, stating the actual contents, value, etc., of the parcel. General terms, such as "merchandise" or "samples," will not answer; the contents must be accurately described. "Customs Declarations" must be firmly attached to the cover of the parcel, but not pasted or affixed so that they will seal the package and prevent examination of the contents without damaging the cover. In addition to being tied by means of a cord passing through the eyelet, the tag should be bound flat to the parcel (with the front or "declaration" side facing out), so that the tag cannot be used as a handle to lift the parcel while in transit.

Two (2) copies of the "declaration" (Form 4402) must be attached to each parcel for Dutch Guiana, Netherlands, Salvador and Urugnay, and three (3) copies to each parcel for Venezuela.

France—Two copies of the special declaration, "Form No. 2 Bis" (4402½), showing in addition to the usual entries the gross weight of the parcel and net weight of the contents, must be attached to parcels for France. One copy may be pasted to the package, but the other copy must be affixed in such a manner that it can be readily removed at the exchange office where the mail is prepared for despatch to France.

GENERAL REGULATIONS RESPECTING FOREIGN MAILS.

Rates and conditions to countries not in the Universal Postal Union are now the same as those to Universal Postal Union countries.

Postage can be prepaid upon articles only by means of the postage stamps of the country *in* which the articles are mailed. Hence articles mailed in one country addressed to another country which bear postage stamps of the country to which they are addressed are treated as if they had no postage stamps attached to them.

Unpaid letters received from the Postal Union and insufficiently prepaid correspondence of all kinds is chargeable with double the amount of the deficient postage.

Matter to be sent in the mails at less than letter rates must be so wrapped that it can be readily examined at the office of delivery, as well as the mailing office, without destroying the wrapper.

Newspapers and periodicals sent in the mails to foreign countries other than those of the Postal Union should be wrapped singly. Those sent by publishers to regular subscribers in Canada, Cuba, Mexico, Panama, and Shanghai (City), China, are transmissible as in domestic mails.

The United States two-cent postal card should be used for card correspondence with foreign countries (except Canada, Cuba, Mexico, Panama, and Shanghai City, to which countries the one-cent card is transmissible), but where these cards cannot be obtained, it is allowable to use for this purpose the United States one-cent postal card with a one-cent United States adhesive postage stamp attached thereto. Private cards can now be used if conforming in size, etc., to Government cards, such cards should bear the words "post card."

Mail matter *of all kinds* received from any country of the Postal Union is required to be refor-

FOREIGN MAILS—*Continued.*

warded at the request of the addressee from one post-office to another, and in the case of articles other than Parcels Post packages, to any foreign country embraced in the Postal Union, without additional charge for postage.

All articles prohibited from domestic mails are also excluded from circulation in the mails to and from foreign countries. Postal cards or letters addressed to go around the world will not be forwarded, being prohibited.

FOREIGN (INTERNATIONAL) MONEY ORDERS.

When payable to Switzerland, New Zealand, Belgium, Sweden, Norway, Japan, Denmark, Orange River Colony, Netherlands, Austria, Hungary, Luxemburg, Chile, Egypt, Bolivia, Liberia, Costa Rica, Peru, Transvaal, Germany, Hong Kong, Portugal, and Apia (Apia), the charge is as follows: For order not exceeding $10, 8 cents; over $10 and not exceeding $20, 10 cents; over $20 and not exceeding $30, 15 cents; over $30 and not exceeding $40, 20 cents; over $40 and not exceeding $50, 25 cents, over $50 and not exceeding $60, 30 cents; over $60 and not exceeding $70, 35 cents; over $70 and not exceeding $80, 40 cents; over $80 and not exceeding $90, 45 cents, over $90 and not exceeding $100, 50 cents.

When payable to any other foreign country, the charge is as follows: For order not exceeding $10, 10 cents; over $10 and not exceeding $20, 20 cents, over $20 and not exceeding $30, 30 cents; over $30 and not exceeding $40, 40 cents; over $40 and not exceeding $50, 50 cents; over $50 and not exceeding $60, 60 cents; over $60 and not exceeding $70, 70 cents; over $70 and not exceeding $80, 80 cents; over $80 and not exceeding $90, 90 cents, over $90 and not exceeding $100, $1.

The maximum amount for which a money order may be drawn payable in Cape Colony is $100. There is no limitation to the number of international orders that may be issued, in one day, to a remitter, in favor of the same payee.

Domestic rates and regulations apply to money orders for Canada, Cuba, Hawaii, Newfoundland, Porto Rico and the Philippine Islands also Windward Islands, Jamaica, and Leeward Islands, British Honduras, British Guiana, Canal Zone (Isthmus of Panama), Tutuila (Samoa), United States Postal Agency at Shanghai (China), Virgin Islands Guam, the Bahamas, Bermuda, and Mexico.

UNITED STATES BUREAU OF FISHERIES.

DEPARTMENT OF COMMERCE AND LABOR.

THE work of the Bureau of Fisheries comprises (1) the propagation of useful food fishes, including lobsters, oysters and other shellfish, and their distribution to suitable waters; (2) the inquiry into the causes of decrease of food fishes in the lakes, rivers and coast waters of the United States, the study of the waters of the coast and interior in the interest of fish-culture, and the investigation of the fishing grounds of the Atlantic Gulf and Pacific coasts, with the view of determining their food resources and the development of the commercial fisheries; (3) the collection and compilation of the statistics of the fisheries and the study of their methods and relations. The Bureau also has jurisdiction over the fur-seal herds and the salmon fisheries of Alaska. Office, Sixth and B Streets, Washington, D. C. The official force of the Bureau is as follows: *Commissioner*, George M. Bowers; *Deputy Commissioner*, Hugh M. Smith; *Chief Clerk*, J. H. Dunlap. *Assistants in Charge of Division: Inquiry Respecting Food Fishes*, B. W. Everman; *Fish Culture*, Robert S. Johnson; *Statistics and Methods*, A. B. Alexander, *Architect and Engineer*, Hector von Bayer.

The United States Revenue Cutter Service.

THE United States Revenue Cutter Service is a military arm of the Government attached to and under the direction of the Treasury Department. The Service was organized in 1790 and constituted the original naval force of the country. There being at that time no Navy Department, the Service was placed under the Treasury Department, where it has remained ever since. It is charged with the enforcement of the navigation and customs laws of the United States, the assistance of vessels in distress, the protection of the sealing industry in Alaska, the enforcement of the quarantine laws, the destruction of derelicts and other floating dangers to navigation, and numerous other duties appropriate to its class of vessels. Each Winter, by direction of the President, a number of the cutters patrol the coast for the special purpose of assisting vessels in distress. The Service co-operates with the Navy when directed by the President and has so co-operated in every war in which the United States has been engaged. The officers of the Service are commissioned by the President and hold rank by law with officers of the Army and Navy as follows:

Captain-Commandant with Colonel in the Army and Captain in the Navy; Senior Captains and Engineer-in-Chief with Lieutenant-Colonels in the Army and Commanders in the Navy; Captains with Majors in the Army and Lieutenant-Commanders in the Navy; First Lieutenants with Captains in the Army and Lieutenants in the Navy; Second Lieutenants with First Lieutenants in the Army and Lieutenants (Junior Grade) in the Navy; Third Lieutenants with Second Lieutenants in the Army and Ensigns in the Navy.

There are now in the Service 255 commissioned officers and cadets on the active list, and 1,500 petty officers and enlisted men. The officers are: 1 Captain-Commandant, 6 Senior Captains, 31 Captains, 37 First Lieutenants, 42 Second Lieutenants, 5 Third Lieutenants, 50 Cadets of the line, 1 Engineer-in-Chief, 6 Captains of Engineers, 28 First Lieutenants of Engineers, 22 Second Lieutenants of Engineers, 21 Third Lieutenants of Engineers, 3 Cadet Engineers and 2 Constructors.

Commissioned officers of the line are appointed from Cadet graduates of the School of Instruction at New London, Ct. The Cadet course covers three years and embraces professional and academic subjects. Cadets are appointed after competitive examinations, conducted by boards of commissioned officers of the Revenue Cutter Service. Candidates must be not less than eighteen nor more than twenty-four years of age.

Appointments to the Engineer Corps are made after competitive examination, and successful candidates are appointed Cadet Engineers for a period of six months prior to being commissioned Third Lieutenants of Engineers in the Service. Candidates for the Engineer Corps must be not less than twenty-one nor more than twenty-six years of age.

The present Commandant of the Service is Captain-Commandant Worth G. Ross, U. S. R. C. S., and Engineer-in-Chief Chas. A. McAllister, U. S. R. C. S., is head of the Engineer Corps.

The Life-Saving Service.

THE ocean and lake coasts of the United States are picketed with the stations of the Life-Saving Service attached to the United States Treasury Department. Sumner I. Kimball is general superintendent, with headquarters at Washington, and there is a corps of inspectors, superintendents, station keepers, and crews, extending over the entire coast line, together with a Board on Life-Saving Appliances, composed of experts selected from the Revenue Cutter Service, the Army, the Life-Saving Service, and civilians.

At the close of the last fiscal year the life-saving establishment embraced 281 stations, 201 being on the Atlantic coast, 60 on the lakes, 19 on the Pacific coast, and 1 at the falls of the Ohio, Louisville, Ky. In the following table are the statistics of the service:

	Year Ending June 30, 1910.	Since Introduction of Life-Saving System in 1871, to June 30, 1910.
Disasters	417	21,250
Value property involved	$10,989,095	$293,033,154
Value property saved	$9,286,260	$234,985,892
Value property lost	$1,702,835	$58,047,262
Persons involved	3,648	146,093
Persons lost	39	1,277
Shipwrecked persons succored at stations	327	22,973
Days' succor afforded	830	52,535
Vessels totally lost on U. S. coasts	48	...

In addition to the foregoing there were 1,046 casualties to smaller craft, such as sailboats, rowboats, etc., on which there were 3,013 persons, of whom 14 were lost. The cost of the maintenance of the service during the year was $2,249,375.68.

The United States Light-House Establishment.

BUREAU of Light-Houses. Commissioner, George R. Putnam; Deputy, A. V. Conover. The appointments of the Chief Constructing Engineer and the Superintendent of Naval Construction were not announced when ALMANAC was printed.

The Commissioner of Light-Houses, under the direction and control of the Secretary of Commerce and Labor, has charge and control of the construction, maintenance, repair, illumination, inspection, and superintendence of light-house depots, supply stations, light and signal stations, light-houses, light-vessels, light-house tenders, fog signals, submarine signals, beacons, buoys, day marks, post-lantern lights, and seamarks and their appendages, and generally of the Light-House Service; and the charge and custody of all the archives, books, documents, drawings, models, returns, apparatus, and other things appertaining to the Light-House Establishment.

The Light-House Service is divided into nineteen districts, each in charge of an inspector. All inspectors, except those having charge of the three river districts (comprising the waters of the Mississippi River and its tributaries) are naval officers. The river districts are in charge of army engineers.

The United States Government Printing Office.

THE Public Printer has charge of all business relating to the public printing and binding. He appoints the officers and employees of the Government Printing Office, and purchases all necessary machinery and material. The foreman of printing has charge of all matter which is to be printed. His department consists of the following divisions: The document, job, specification, press, folding, stereotype, and Congressional Record rooms, as well as the various branch offices. The Superintendent of Documents has general supervision of the distribution of all public documents, excepting those printed for the use of the two Houses of Congress and the Executive Departments. He is required to prepare a comprehensive index of public documents and consolidated index of Congressional documents, and is authorized to sell at cost any public document in his charge the distribution of which is not specifically directed. The following are the official heads of the several departments: Public Printer, Samuel B. Donnelly; Secretary to the Public Printer, William J. Dow; Attorney, Frank E. Elder; Deputy Public Printer, Henry T. Brian; Congressional Record Clerk, William A. Smith; Superintendent of Work, John R. Berg; Superintendent of Documents, August Donath.

United States Secret Service.

THE Secret Service Division of the Treasury Department is under the direction of John E. Wilkie, chief of the division. The service is principally engaged in detecting and prosecuting makers and dealers in counterfeit paper money and coin. Details are also furnished for the protection of the President of the United States, and in the frequent journeyings of the present President he is always accompanied by one or more secret service men.

The arrests of counterfeiters number about 400 annually; other arrests are for bribery, impersonating United States Government officers, perjury, and violating sections of the United States Revised Statutes relating to foreign and domestic obligations and coins.

United States Geographic Board.

Chairman, Henry Gannett, Geological Survey, Department of the Interior; *Secretary*, Charles S. Sloane, Bureau of the Census, Department of Commerce and Labor; Frank Bond, General Land Office, Department of the Interior; Andrew Braid, Coast and Geodetic Survey, Department of Commerce and Labor; Adolph von Haake, Post-Office Department; Arnold B. Johnson, Bureau of Light Houses, Department of Commerce and Labor; Wm. D. Beach, General Staff, Department of War; Dr. C. Hart Merriam, Bureau of Biological Survey, Department of Agriculture; John S. Mills, Department of the Treasury; William McNeir, Chief Clerk, Department of State; Frank A. Kidd, Government Printing Office; Fred G. Plummer, Forest Service, Department of Agriculture; Charles W. Stewart, Library and Naval War Record Office, Department of the Navy; John J. Knapp, Hydrographic Office, Department of the Navy; F. W. Hodge, Bureau of Ethnology, Smithsonian Institute.

By Executive Order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board, and its duties enlarged. The Board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determining, changing, and fixing place names within the United States and its insular possessions, and all names hereafter suggested by any officer of the Government shall be referred to the Board before publication. The decisions of the Board are to be accepted by all the departments of the Government as standard authority. Advisory powers were granted the Board concerning the preparation of maps compiled, or to be compiled, in the various offices and bureaus of the Government, with a special view to the avoidance of unnecessary duplication of work; and for the unification and improvement of the scales of maps, of the symbols and conventions used upon them, and of the methods of representing relief. Hereafter, all such projects as are of importance shall be submitted to this Board for advice before being undertaken.

American and Foreign Shipping.

UNITED STATES MERCHANT MARINE, 1910.

Class.	Employment.						Total.	
	Foreign.		Coastwise.		Fisheries.			
	Number	Tonnage	Number.	Tonnage.	Number.	Tonnage.	Number	Tonnage
Steam	488	553,468	1,388	4 330,893	576	16,000	12 452	4,900 361
Sail	345	153 078	7,910	1 461,793	692	40,602	8 947	1 655 473
Canal	..	..	674	74 068	.....	....	674	74 068

HIGH-TIDE TABLES—*Continued.*

TIME OF HIGH WATER AT POINTS ON THE ATLANTIC COAST.

The local time of high water at the following places may be found approximately for each day by adding to or subtracting from the time of high water at Governor's Island, N. Y., the hours and minutes annexed.

		H.	M.
Albany, N. Y.	add	9	31
Annapolis, Md.	add	8	57
Atlantic City, N. J.	sub.		20
Baltimore, Md.	add	10	52
Bar Harbor, Me.	add	2	46
Beaufort, S. C.	sub.		8
Block Island, R. I.	sub.		34
Boston, Mass.	add	3	22
Bridgeport, Ct.	add	3	2
Bristol, R. I.	sub.		14
Cape May, N. J.	add		10
Charleston, S. C.	sub.		42
Eastport, Me.	add	3	0
Fernandina, Fla.	sub.		18
Gloucester, Mass.	add	2	55
Hell Gate Ferry, East River, N. Y.	add	1	53
Isles of Shoals, N. H.	add	3	11
Jacksonville, Fla.	add		37
Key West, Fla.	add	1	24
League Island, Pa.	add	5	23
Marblehead, Mass.	add	3	2
Nahant, Mass.	add	3	2
Nantucket, Mass.	add	4	21
Newark, N. J.	add		54
New Bedford, Mass.	sub.		10
Newburyport, Mass.	add	3	16
New Haven, Ct.	add	3	1
New London, Ct.	add	1	22
Newport, R. I.	sub.		22
Norfolk, Va.	add		58
Norwich, Ct.	add	2	0
Old Point Comfort, Va.	add		39
Philadelphia, Pa.	add	5	41
Plymouth, Mass.	add	3	12
Point Lookout, Md.	add	4	49
Portland, Me.	add	3	10
Portsmouth, N. H.	add	3	16
Poughkeepsie, N. Y.	add	3	51
Providence, R. I.	add		7
Richmond, Va.	add	8	48
Rockaway Inlet, N. Y.	sub.		25
Rockland, Me.	add	3	1
Rockport, Mass.	add	2	50
Salem, Mass.	add	3	9
Sandy Hook, N. J.	sub.		32
Savannah, Ga.	add		7
Southport (Smithville), N. C.	sub.		43
Vineyard Haven, Mass.	add	3	36
Washington, D. C.	add	12	1
Watch Hill, R. I.	add		42
West Point, N. Y.	add	2	47
Wilmington, N. C.	add	1	0

EXAMPLE.—To find the approximate time of high tide at Atlantic City, N. J., on any day, find first the time of high water at New York under the desired date, and then subtract 20 minutes, as in the above table; the result is the time of high water required.

AVERAGE RISE AND FALL OF TIDE.

Places.	Feet.	Inches.	Places.	Feet.	Inches.	Places.	Feet.	Inches.
Baltimore, Md.	1	3	New London, Ct.	3	9	San Diego, Cal.	3	7
Boston, Mass.	9	8	New Orleans, La.	None	None	Sandy Hook, N. J.	4	7
Charleston, S. C.	5	1	Newport, R. I.	9	8	San Francisco, Cal.	4	9
Eastport, Me.	18	2	New York, N. Y.	4	4	Savannah, Ga.	6	5
Galveston, Tex.	1	1	Old Point Comf't, Va.	2	5	Seattle, Wash.	12	2
Key West, Fla.	1	2	Philadelphia, Pa.	6	0	Tampa, Fla.	2	2
Mobile, Ala.	1	2	Portland, Me.	9	1	Washington, D. C.	2	9

Highest tide at Eastport, Me., 18 inches. Lowest tide at Galveston, Tex., 13 inches.

United States Steamboat Inspection Service.

THE Steamboat Inspection Service, by act of Congress approved February 14, 1903, was transferred from the Treasury Department to the Department of Commerce and Labor. The transfer went into effect July 1, 1903. The Supervising Inspector-General of the Steamboat Inspection Service, George Uhler, reported to the Secretary of Commerce and Labor for the fiscal year ended June 30, 1910: Number of annual certificates of inspection issued to domestic steam, motor, sail vessels, and barges, 7,965; number of certificates issued to foreign steamers, 464; total number of annual certificates of inspection issued to domestic and foreign, 8,429. Increase in number of certificates to domestic vessels over previous year, 3; increase in number of certificates to foreign vessels from previous year, 45; increase in number of certificates of all kinds of vessels over previous year, 48. Gross tonnage of domestic vessels, all kinds, inspected, 5,344,834; gross tonnage of foreign steamers inspected, 3,129,872. Increase in gross tonnage of foreign steam vessels inspected over previous year, 238,969. Increase in tonnage of all kinds domestic vessels inspected over previous year, 507,115. Number of officers' licenses issued, 13,156. Number of new life-preservers inspected, 156,837, of which number 1,063 were rejected. Decrease in number of new life-preservers inspected from previous year, 4,369. Increase in number of life-preservers rejected over previous year, 293. Number of marine boiler plates inspected at the mills by assistant inspectors, 4,526, being an increase in number inspected over previous year of 1,467. Number of applicants examined for color-blindness, 1,018, of which number 18 were found color-blind and rejected, and 1,000 were passed. Decrease in number of applicants examined from previous year, 344. Decrease in number of applicants passed from previous year, 326.

Causes.	Accidents.	Lives Lost.	Causes.	Accidents.	Lives Lost.
Fire	6	21	Snags, wrecks, and sinking	19	119
Collision	23	61	Accidental drowning	..	119
Explosions or accidental escape of steam	5	12	Miscellaneous	..	41
Breaking of steam pipes, mud drums, etc.	2	6	Total	55	379

Decrease in number of accidents from previous year, 19. Increase in number of lives lost over previous year, 101. During the year 328,666,255 passengers were carried on vessels that are required by law to report the number of passengers carried. Taking the total loss of life as 379, it is seen that 867,193 passengers were carried for each life lost, whether of passengers or crew, and from all causes.

Labor Legislation.

BOYCOTTING, BLACKLISTING AND INTIMIDATION LAWS.

THE States having laws prohibiting *boycotting* in terms are Alabama, Colorado, Illinois, Indiana, and Texas.

The States having laws prohibiting *blacklisting* in terms are Alabama, Arkansas, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Minnesota, Mississippi (applies to telegraph operators only), Missouri, Montana, Nevada, North Carolina, North Dakota, Oklahoma, Oregon, Texas, Utah, Virginia, Washington, and Wisconsin.

A number of States have enacted laws concerning *intimidation*, conspiracy against workingmen, and interference with employment, viz.: Alabama, Connecticut, Delaware, Florida, Georgia, Idaho (applies to mine employés only), Illinois, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Oregon, Pennsylvania, Porto Rico, Rhode Island, South Dakota, Texas, Utah, Vermont, Washington, West Virginia and Wisconsin.

In the following States it is unlawful for an employer to exact any agreement, either written or verbal, from an employé not to join or become a member of a labor organization, as a condition of employment: California, Colorado, Connecticut, Idaho, Indiana, Kansas, Massachusetts, Minnesota, Mississippi (applies to telegraph operators only), Nevada, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, Porto Rico, South Carolina, and Wisconsin.

EIGHT-HOUR LAWS.

Arizona.—Eight hours constitute a day's labor in all underground mines and workings.

Arkansas.—Eight hours constitute a day's work on public highways and bridges and for railway telegraph operators.

California.—Unless otherwise expressly stipulated, eight hours constitute a day's work. The time of service of all laborers, workmen, and mechanics employed upon any public works of, or work done for, the State, or for any political sub-division thereof, whether the work is to be done by contract or otherwise, and of employés in mines and smelters, is limited and restricted to eight hours in any one calendar day.

Colorado.—A day's work for all workingmen employed by the State, or any county, township, school district, municipality, or incorporated town, and for all employés in underground mines or workings, and in smelting and refining works, is restricted to eight hours.

Connecticut.—Eight hours of labor constitute a lawful day's work unless otherwise agreed. Railroad telegraph operators controlling the movement of trains may work but eight hours, except at stations kept open only in the daytime.

Delaware.—Eight hours constitute a lawful day's work for all municipal employés of the city of Wilmington.

District of Alaska.—Eight hours are a day's labor on the public roads.

District of Columbia.—A day's work for all laborers and mechanics employed by the District of Columbia, or by any contractor or sub-contractor upon any public works of the District, is limited to eight hours.

Hawaii.—For all mechanics, clerks, laborers, and other employés on public works and in public offices eight hours of actual service constitute a day's work.

Idaho.—Eight hours' actual work constitute a lawful day's labor for manual laborers employed by the day on all State, county, and municipal works. Labor in mines and smelters is limited to eight hours per day.

Illinois.—Eight hours are a legal day's work in all mechanical employments, except on farms, and when otherwise agreed; the law does not apply to service by the year, month or week. Eight hours constitute a day's labor on the public highways.

Indiana.—Eight hours of labor constitute a legal day's work on the public roads, and for all classes of mechanics, workingmen, and laborers, excepting those engaged in agricultural and domestic labor. Overwork by agreement and for extra compensation is permitted.

Iowa.—Eight hours constitute a day's labor on the public roads.

Kansas.—Eight hours are a day's work for all laborers, mechanics, or other persons employed by or on behalf of the State or any county, city, township or other municipality.

Kentucky.—Eight hours constitute a day's work on the public roads.

Maryland.—No mechanic or laborer employed by the Mayor or City Council of Baltimore, or by any agent or contractor under them, shall be required to work more than eight hours as a day's labor.

Massachusetts.—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics employed by or on behalf of the Commonwealth or any county therein, or of any city or town in the Commonwealth upon acceptance of the statute by a majority of voters present and voting upon the same at any general election.

Minnesota.—Eight hours constitute a day's labor for all laborers, workmen, or mechanics employed by or on behalf of the State, whether the work is done by contract or otherwise.

Mississippi.—Eight hours are a day's labor on highways.

Missouri.—Eight hours constitute a legal day's work. The law does not prevent an agreement to work for a longer or a shorter time and does not apply to agricultural laborers. It is unlawful for employers to work their employés longer than eight hours per day in mines and smelters, or as train despatchers, etc., on railroads, unless the office is open only during the daytime. Eight hours are a day's labor on highways.

Montana.—Eight hours constitute a legal day's work for persons engaged to operate or handle hoisting engines at mines. The law applies only to such plants as are in operation sixteen or more hours per day, or at or in mines where the engine develops fifteen or more horse-power, or where fifteen or more men are employed underground in the twenty-four hours. A day's labor on public works and in smelters and underground mines is limited to eight hours per day.

Nebraska.—Eight hours constitute a day's work on public roads and on all public works in cities of the first class.

Nevada.—For labor on public highways, in all mines, in smelters, plaster and cement mills, as train despatchers, etc., on railroads, and on all works and undertakings carried on or aided by the State, county, or municipal governments, the hours of labor are fixed at eight per day.

New Mexico.—Eight hours constitute a day's labor on public roads and highways.

New York.—Eight hours constitute a day's work on highways, and on work done by or for the State, or a municipal corporation, whether directly by contractors or sub-contractors; also for all classes of employés, except in farm or domestic labor, though overwork for extra pay is permitted in private employments.

LABOR LEGISLATION—*Continued.*

North Carolina.—Train despatchers, etc., on railroads may work only eight hours, unless otherwise permitted by the corporation commission.

North Dakota.—Eight hours are a day's labor on public roads.

Ohio.—Eight hours shall constitute a day's work in all engagements to labor in any mechanical, manufacturing or mining business, unless otherwise expressly stipulated in the contract.

Oklahoma.—Eight hours constitute a day's labor on all public works, and in underground mines.

Oregon.—Eight hours constitute a day's labor on all public works, and in underground mines yielding metal.

Pennsylvania.—Eight hours of labor shall be deemed and held to be a legal day's work in all cases of labor and service by the day where there is no agreement or contract to the contrary. This does not apply to farm or agricultural labor or to service by the year, month or week. Eight hours constitute a day's labor for all mechanics, workmen, and laborers in the employ of the State, or of any municipal corporation therein, or otherwise engaged on public works. This act shall be deemed to apply to employés of contractors.

Philippine Islands.—Eight hours constitute a day's work on highways.

Porto Rico.—No laborer may be compelled to work more than eight hours per day on public works.

South Dakota.—For labor on public highways a day's work is fixed at eight hours.

Tennessee.—Eight hours shall be a day's work on the highways.

Texas.—Eight hours constitute a day's work on the highways, and by train despatchers, etc., except at stations where but one operator is employed.

Utah.—Eight hours constitute a day's labor on all works carried on or aided by the State, county or municipal governments, and in all underground mines or workings, and in smelters and all other establishments for the reduction of ores.

Washington.—Eight hours in any calendar day shall constitute a day's work on any work done for the State, or for any county or municipality, and in underground coal mines.

West Virginia.—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics who may be employed by or on behalf of the State, and for telegraph operators directing the movement of trains where three or more passenger or ten or more freight trains pass in twenty-four hours.

Wisconsin.—In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours, but the law does not apply to contracts for labor by the week, month, or year. Eight hours constitute a day's labor on the public highways. Employés on public works and train despatchers may be employed but eight hours per day.

Wyoming.—Eight hours' actual work constitute a legal day's labor in all underground mines, in smelters, and on all State and municipal works.

United States.—A day's work for all laborers, workmen and mechanics who may be employed by the United States, or by any contractor or sub-contractor upon any of the public works of the United States, is limited to eight hours.

THE WORLD ALMANAC is indebted to Commissioner Charles P. Neill of the U. S. Bureau of Labor for this Summary of Labor Legislation revised to date.

State Labor Bureaus.

General Labor Organizations.

AMERICAN FEDERATION OF LABOR.

PRESIDENT, Samuel Gompers, 801-809 G Street, N. W., Washington, D. C.; Secretary, Frank Morrison, same address; Treasurer, John B. Lennon, Bloomington, Ill.; First Vice-President, James Duncan, Haucock Building, Quincy, Mass.; Second Vice-President, John Mitchell, 10096 Metropolitan Building, New York City; Third Vice-President, James O'Connell, 402 McGill Building, Washington, D. C.; Fourth Vice-President, D. A. Hayes, 930 Witherspoon Building, Philadelphia, Pa.; Fifth Vice-President, Wm. D. Huber, Carpenters' Building, Indianapolis, Ind.; Sixth Vice-President, Jos. F. Valentine, Commercial Tribune Building, Cincinnati, Ohio; Seventh Vice-President, John R. Alpine, 401 Bush Temple of Music, Chicago, Ill.; Eighth Vice-President, H. B. Perham, Star Building, St. Louis, Mo.

The Federation is composed of 120 national and international unions, representing approximately 27,000 local unions, 4 departments, 39 State branches, 631 city central unions, and 656 local unions. The approximate paid membership is 2,000,000. The affiliated unions publish about 245 weekly or monthly papers, devoted to the cause of labor. The official organ is the *American Federationist*, edited by Samuel Gompers. There are 1,415 organizers of local unions acting under the orders of the American Federation of Labor. The objects and aims of the American Federation of Labor are officially stated to render employment and means of subsistence less precarious by securing to the workers an equitable share of the fruits of their labor.

INTERNATIONAL UNIONS COMPRISING THE AMERICAN FEDERATION OF LABOR.

Actors' International Union. Lew Morton, 8 Union Square, New York, N. Y.

Asbestos Workers of America, National Association of Heat, Frost, and General Insulators. Thomas G. McNamara, 1801 Elliot Avenue, St. Louis, Mo.

Bakery and Confectionery Workers' International Union of America. Otto E. Fischer, 212 Bush Temple of Music, 221 Chicago Avenue, Chicago, Ill.

Barbers' International Union, Journeymen. Jacob Fischer, Security Trust Building, Indianapolis, Ind.

Bill Posters and Billers of America, International Alliance of. William McCarthy, Room 317, Long Acre Building, New York City.

Blacksmiths, International Brotherhood of. Wm. F. Kramer, Suite 570-585 Monon Building, Chicago, Ill.

Boiler Makers and Iron Ship Builders of America, Brotherhood of. W. J. Gilthorpe, Suite 7-12, Law Building, Kansas City, Kan.

Bookbinders, International Brotherhood of. James W. Dougherty, 132 Nassau Street, New York City.

Boot and Shoe Workers' Union. C. L. Baine, 246 Summer Street, Boston, Mass.

Brewery Workmen. International Union of the United. Louis Kemper, Vine and Calhoun Streets, Cincinnati, Ohio.

Brick, Tile, and Terra Cotta Workers' Alliance, International. William Van Bodegraven, Room 409, 56 Fifth Avenue, Chicago, Ill.

Bridge and Structural Iron Workers, International Association of. J. J. McNamara, 422-424 American Central Life Building, Indianapolis, Ind.

Broom and Whisk Makers' Union, International. C. T. Dolan, 814-822 West Harrison Street, Chicago, Ill.

Brushmakers' International Union. George J. Vitzthun, 2052 Gates Avenue, Brooklyn, N. Y.

Carpenters and Joiners of America, United Brotherhood of. Frank Duffy, Carpenters' Building, Indianapolis, Ind.

Carpenters and Joiners, Amalgamated Society of. Thomas Atkinson, Room 76, Bible House, New York City.

Carriage and Wagon Workers, International. William P. Mavell, 403 South Division Street, Buffalo, N. Y.

Carvers' Association of North America, International Wood. Thomas J. Lodge, 10 Carlisle Street, Roxbury, Mass.

Car Workers, International Association of. G. W. Gibson, Room 1205 Star Building, 356 Dearborn Street, Chicago, Ill.

Cement Workers, American Brotherhood of. Henry Ullner, Room 214 Mechanics' Bank Building, Mason and Market Streets, San Francisco, Cal.

Chainmakers' National Union of the United States of America. C. R. Stanton, P. O. Box 13, Maxwell, Ind.

Cigar Makers' International Union of America. George W. Perkins, Room 820 Monon Block, 320 Dearborn Street, Chicago, Ill.

Clerks' International Protective Association, Retail. H. J. Conway, 315 Appel Building Denver, Col.

Cloth Hat and Cap Makers of North America, United. Max Zuckerman, 62 East Fourth St., New York City.

Commercial Telegraphers' Union of America, The. Wesley Russell, 922-930 Monon Building, Chicago, Ill.

Compressed Air and Foundation Workers Union of the United States and Canada. William McQuade, 414 East 121st Street, New York City.

Coopers' International Union of North America. William R. Deal, Suite A, Board of Trade Building, Kansas City, Kan.

Curtain Operatives of America, Amalgamated Lace. George J. Raiser, 3021 North Fifth Street, Philadelphia, Pa.

Cutting Die and Cutter Makers, International Union of. Harry Reiser, 616 Sixth Avenue, New York City.

Electrical Workers of America, International Brotherhood of. Peter W. Collins, Pierick Building, Springfield, Ill.

Elevator Constructors, International Union of. William Young, 1952 North 19th Street, Philadelphia, Pa.

Engineers, International Union of Steam. R. A. McKee, 606 Main Street, Peoria, Ill.

Engravers, International Association of Watch Case. Otto F. Altenburg, Box 263, Canton, Ohio.

Firemen, International Brotherhood of Stationary. C. L. Shamp, Rooms 2-4, 2502 North 18th Street, Omaha, Neb.

Fitters and Helpers of America, International Association of Steam and Hot Water. W. H. Davies, Room 205, Merrick Building, 351 West 63d Street, Chicago, Ill.

GENERAL LABOR ORGANIZATIONS—*Continued.*

Flour and Cereal Mill Employés, International Union of. A. E. Kellington, 316 Corn Exchange, Minneapolis, Minn.
Foundry Employés, International Brotherhood of. Geo. Bechtold, 200 South Broadway, St. Louis, Mo.
Freight Handlers' and Warehousemen's International Union of America, Interior. J. J. Flynn, Yondorf Building, 210 South Halstead Street, Chicago, Ill.
Fur Workers of the United States and Canada, International Association of. A. V. McCormack, 66 Sussex Avenue, Toronto, Ontario, Can.
Garment Workers of America, United. B. A. Larger, Rooms 116-117 Bible House, New York City.
Garment Workers' Union, International Ladies'. John Alex. Dyche, 11 Waverley Place, New York City.
Glass Bottle Blowers' Association of the United States and Canada. William Launer, Rooms 930-931 Witherspoon Building, Juniper and Walnut Streets, Philadelphia, Pa.
Glass Workers' International Association, Amalgamated. William Figolah, 55 North Clark Street, Chicago, Ill.
Glove Workers' Union of America, International. Agnes Nestor, Room 506, Bush Temple of Music, Chicago, Ill.
Granite Cutters' International Association of America, The. James Duncan, Hancock Building, Quincy, Mass.
Grinders' and Finishers' National Union, Pocket Knife Blade. F. A. Didsbury, 508 Brook Street, Bridgeport, Ct.

Passport Regulations.

RULES governing the granting and issuing of passports in the United States:

1. BY WHOM ISSUED AND REFUSAL TO ISSUE.—No one but the Secretary of State may grant and issue passports in the United States (Revised Statutes, sections 4075, 4078), and he is empowered to refuse them in his discretion.

Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State.

Applications for passports by persons in Porto Rico or the Philippines should be made to the Chief Executives of those Islands. The evidence required of such applicants is the same as that required of applicants in the United States.

2. FEE.—By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency or postal money order should accompany each application made by a citizen of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted.

3. APPLICATIONS.—A person who is entitled to receive a passport, if within the United States, must make a written application, in the form of an affidavit, to the Secretary of State. The application must be made by the person to whom the passport is to be issued and signed by him, as it is not competent for one person to apply for another.

The affidavit must be attested by an officer authorized to administer oaths, and if he has an official seal it must be affixed. If he has no seal, his official character must be authenticated by certificate of the proper legal officer.

If the applicant signs by mark, two attesting witnesses to his signature are required. The applicant is required to state the date and place of his birth, his occupation, the place of his permanent residence and within what length of time he will return to the United States with the purpose of residing and performing the duties of citizenship.

The applicant must take the oath of allegiance to the Government of the United States.

The application must be accompanied by a description of the person applying, and should state the following particulars, viz.: Age, —— years; stature, —— feet —— inches (English measure); forehead, ——; eyes, ——; nose, ——; mouth, ——; chin ——; hair, ——; complexion, ——; face, ——.

The application must be accompanied by a certificate from at least one credible witness that the applicant is the person he represents himself to be, and that the facts stated in the affidavit are true to the best of the witness's knowledge and belief.

4. NATIVE CITIZENS.—An application containing the information indicated by rule 3 will be sufficient evidence in the case of native citizens. A person of the Chinese race, alleging birth in the United States, must accompany his application with a certified copy of a Chinese return certificate issued by the immigration official in charge at the port of proposed departure, or, in lieu thereof, the duplicate application for such certificate, signed by the immigration official located nearest to his place of residence, who made the preinvestigation of his claim.

5. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES.—In addition to the statements required by rule 3, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. The Department may require that this affidavit be supported by that of one other citizen acquainted with the facts.

6. NATURALIZED CITIZENS.—In addition to the statements required by rule 3, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what port he emigrated to this country, what ship he sailed in, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

7. WOMAN'S APPLICATION.—If she is unmarried, in addition to the statements required by rule 3, she should state that she has never been married. If she is the wife or widow of a native citizen of the United States the fact should be made to appear in her application which should be made according to the form prescribed for a native citizen whether she was born in this country or abroad. If she is the wife or widow of a naturalized citizen, in addition to the statements required by rule 3, she must transmit for inspection her husband's certificate of naturalization, must state that she is the wife (or widow) of the person described therein, and must set forth the facts of his emigration, naturalization, and residence, as required in the rule governing the application of a naturalized citizen. A married woman citizenship follows that of her husband so far as her international status is concerned. It is essential, therefore, that a woman's marital relations be indicated in her application for a passport, and that in the case of a married woman her husband's citizenship be established.

8. THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE PARENT.—In addition to the statements required by rule 3, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence, as required in the rule governing the application of a naturalized citizen.

9. A RESIDENT OF AN INSULAR POSSESSION OF THE UNITED STATES WHO OWES ALLEGIANCE TO THE UNITED STATES.—In addition to the statements required by rule 3, he must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other government; and must submit affidavits from at least two credible witnesses having good means of knowledge in substantiation of his statements of birth, residence, and loyalty.

10. EXPIRATION OF PASSPORT.—A passport expires two years from the date of its issuance. A new one will be issued upon a new application, and if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a certificate of naturalization, if the application upon which it was issued is found to contain sufficient information as to the naturalization of the applicant.

11. WIFE, MINOR CHILDREN, AND SERVANTS.—When the applicant is accompanied by his wife, minor children, or servant who would be entitled to receive a passport, it will be sufficient to state the fact, giving the respective ages of the children and the allegiance of the servant, when one passport will suffice for all. For any other person in the party a separate passport will be required. A woman's passport may include her minor children and servant under the above-named conditions. The term servant does not include a governess, tutor, pupil, companion, or person holding like relations to the applicant for a passport.

12. TITLES.—Professional and other titles will not be inserted in passports.

13. BLANK FORMS OF APPLICATION.—They will be furnished by the Department to persons who desire to apply for passports, but are not furnished, except as samples, to those who make a business of procuring passports.

14. ADDRESS.—Communications should be addressed to the Department of State, Bureau of Citizenship, and each communication should give the post-office address of the person to whom the answer is to be directed.

Section 4075 of the Revised Statutes of the United States, as amended by the act of Congress, approved June 14, 1902, providing that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officer of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States," the foregoing rules are hereby prescribed for the granting and issuing of passports in the United States.

The Secretary of State is authorized to make regulations on the subject of issuing and granting passports additional to these rules and not inconsistent with them.

THE WHITE HOUSE, May 28, 1909. WM. H. TAFT.

Naturalization Laws of the United States.

THE conditions under and the manner in which an alien may be admitted to become a citizen of the United States are prescribed by Sections 2, 165-74 of the Revised Statutes of the United States, as amended by Chapter 3593 of the Acts of the First Session of the 59th Congress and Chapter 2534 of the Acts of the Second Session of the 59th Congress.

DECLARATION OF INTENTIONS.

The alien must declare upon oath before a circuit or district court of the United States or a district or supreme court of the Territories, or a court of record of any of the States having common law jurisdiction and a seal and clerk, of which he is a resident, two years at least prior to his admission, that it is, *bona fide*, his intention to become a citizen of the United States, and to renounce forever all allegiance and fidelity to any foreign prince or State, and particularly to the one of which he may be at the time a citizen or subject.

PETITION ON APPLICATION FOR ADMISSION.

At the time of his application for admission, which must be not less than two years nor more than seven years after such declaration of intention, he shall make and file a petition in writing, signed by himself (and duly verified by the affidavits of two credible witnesses who are citizens of the United States, and who shall state that they have personally known him to be a resident of the United States at least five years continuously, and of the State or district at least one year previously), in one of the courts above specified, that it is his intention to become a citizen and reside permanently in the United States, that he is not a disbeliever in organized government or a believer in polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may at any time of filing his petition be a citizen or subject.

CONDITIONS FOR CITIZENSHIP.

He shall, before his final admission to citizenship, declare on oath in open court that he will support the Constitution of the United States, and that he absolutely and entirely renounces all foreign allegiance. If it shall appear to the satisfaction of the court that immediately preceding the date of his application he has resided continuously within the United States five years at least, and within the State or Territory where such court is held one year at least, and that during that time he has behaved as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same, he may be admitted to citizenship. If the applicant has borne any hereditary title or order of nobility he must make an express renunciation of the same. No person who believes in or is affiliated with any organization teaching opposition to organized government or who advocates or teaches the duty of unlawfully assaulting or killing any officer of any organized government because of his official character, shall be naturalized. No alien shall be naturalized who cannot speak the English language. An alien soldier of the United States army of good character may be admitted to citizenship on one year's previous residence. Any alien in the United States navy or marine corps, who has served five consecutive years in the United States navy or one enlistment in the United States marine corps and honorably discharged, shall be admitted to citizenship upon his petition, without any previous declaration of his intention to become a citizen. Any American woman that marries a foreigner shall take the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States, or by returning to reside in the United States, or, if residing in the United States at the termination of the marital relation, by continuing to reside therein.

MINORS.

An alien minor may take out his first papers on attaining the age of eighteen years, but he can only become a citizen after having his first papers at least two years, and having resided within the United States five years and after having attained the age of twenty-one years.

The children of persons who have been duly naturalized, being under age of twenty-one years at the time of the naturalization of their parents, shall, if dwelling in the United States, be considered as citizens thereof.

The children of persons who now are or have been citizens of the United States are, though born out of the limits and jurisdiction of the United States, considered as citizens thereof. Provided, That such naturalization or resumption takes place during the minority of such child: And provided further, That the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the United States. All children born outside the limits of the United States who are citizens thereof and who continue to reside outside the United States shall, in order to receive the protection of this Government, be required upon reaching the age of eighteen years to record at an American consulate their intention to become residents and remain citizens of the United States, and shall be further required to take the oath of allegiance to the United States upon attaining their majority.

CHINESE.

The naturalization of Chinamen is expressly prohibited by Sec. 14, Chap. 126, Laws of 1882.

PROTECTION ABROAD TO NATURALIZED CITIZENS.

Section 2000 of the Revised Statutes of the United States declares that "all naturalized citizens of the United States while in foreign countries are entitled to and shall receive from this Government the same protection of persons and property which is accorded to native-born citizens. But when a naturalized citizen shall have resided for two years in the foreign State from which he came, it shall be presumed that he has ceased to be an American citizen, and his place of general abode shall be deemed his place of residence during the said years." It is provided that such a presumption may be overcome on the presentation of satisfactory evidence before a diplomatic or consular officer of the United States. No American citizen shall be allowed to expatriate himself while this country is at war. Any American citizen shall be deemed to have expatriated himself when he has been naturalized in any foreign State in conformity with its laws, or when he has taken an oath of allegiance to any foreign State.

THE RIGHT OF SUFFRAGE.

The right to vote comes from the State, and is a State gift. Naturalization is a Federal right and is a gift of the Union, not of any one State. In nearly one-half of the Union aliens (who have declared intentions) vote and have the right to vote equally with naturalized or native-born citizens. In the other half only actual citizens may vote. (See Table of Qualifications for Voting in each State, on another page.) The Federal naturalization laws apply to the whole Union alike, and provide that no alien may be naturalized until after five years' residence. Even after five years' residence and due naturalization he is not entitled to vote unless the laws of the State confer the privilege upon him, and he may vote in several States six months after landing, if he has declared his intention, under United States law, to become a citizen.

INHABITANTS OF THE NEW INSULAR POSSESSIONS.

The inhabitants of Hawaii were declared to be citizens of the United States under the act of 1900 creating Hawaii a Territory. Under the United States Supreme Court decision in the insular cases in May, 1901, the inhabitants of the Philippines and Porto Rico are entitled to full protection under the Constitution, but not to the privileges of United States citizenship until Congress so decrees, by admitting the countries as States or organizing them as Territories.

Interstate Commerce Law.

THE following is a synopsis of the provisions of the Interstate Commerce law and acts amendatory thereof, prepared for the Official Congressional Directory:

Under "An Act to Regulate Commerce," approved February 4, 1887; as amended March 2, 1889; February 10, 1891; February 8, 1895; the "Elkins act" of February 19, 1903, and the amending act approved June 29, 1906, the Interstate Commerce Commission is composed of seven members, each receiving a salary of $10,000 per annum. The regulating statutes apply to all common carriers engaged in the transportation of oil or other commodity, except water and except natural or artificial gas, by means of pipe lines, or partly by pipe line and partly by rail, or partly by pipe line and partly by water, and to common carriers engaged in the transportation of passengers or property wholly by railroad (or partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment). The statutes apply generally to interstate traffic, including import and domestic traffic, and also that which is carried wholly within any territory of the United States. Only traffic transported wholly within a single State is excepted.

The Commission has jurisdiction on complaint, and, after full hearing, to determine and prescribe reasonable rates, regulations, and practices, and order reparation to injured shippers; to require any carriers to cease and desist from unjust discrimination, or undue or unreasonable preference, and to institute and carry on proceedings for enforcement of the law. The Commission may also inquire into the management of the business of all common carriers subject to the provisions of the regulating statutes, and it may prescribe the accounts, records, and memoranda which shall be kept by the carriers, and from time to time inspect the same. The carriers must file annual reports with the Commission, and such other reports as may from time to time be required. Various other powers are conferred upon the Commission. Carriers failing to file and publish all rates and charges, as required by law are prohibited from engaging in interstate transportation, and penalties are provided in the statute for failure on the part of carriers or of shippers to observe the rates specified in the published tariffs.

The Commission also appoints a Secretary and clerks, whose duties are not specifically defined by the act.

By amendment of June 18, 1910 ("Mann-Elkins law"), a Court of Commerce was created with jurisdiction to restrain or enforce orders of the Commission. This court is composed of five judges selected from the Circuit Court judges of the United States, and the amendment contains specific provisions as to jurisdiction and procedure. Telegraph, telephone and cable companies are made subject to the Commission. The jurisdiction of the Commission is increased as to through routes and joint rates, freight classification, switch connections, long and short hauls, filing or rejection of rate schedules, investigations on own motion, making reasonable rates, suspension of proposed rates, and other matters. An important section authorizes the President to appoint a special commission to investigate issuance of railroad stocks and bonds.

The act of February 11, 1903, provides that suits in equity brought under the act to regulate commerce, wherein the United States is complainant, may be expedited and given precedence over other suits, and that appeals from the Circuit Court lie only to the Supreme Court. The act of February 19, 1903, commonly called the Elkins law, penalizes the offering, soliciting, or receiving of rebates, allows proceedings in the courts by injunction to restrain departures from published rates, and makes the Expediting act of February 11, 1903, include cases prosecuted under the direction of the Attorney-General in the name of the Commission.

Under the act of August 7, 1888, all railroad and telegraph companies to which the United States have granted any subsidy in lands or bonds or loan of credit for the construction of either railroad or telegraph lines are required to file annual reports with the Commission and such other reports as the Commission may call for. The act also directs every such company to file with the Commission copies of all contracts and agreements of every description existing between it and every other person or corporation whatsoever in reference to the ownership, possession, or operation of any telegraph lines over or upon the right of way, and to decide questions relating to the interchange of business between such government-aided telegraph company and any connecting telegraph company. The act provides penalties for failure to perform and carry out within a reasonable time the order or orders of the Commission.

The act of March 2, 1893, known as the "Safety Appliance act," provides that within specified periods railroad cars used in interstate commerce must be equipped with automatic couplers and standard height of drawbars for freight cars, and have grab irons or hand holds in the ends and sides of each car. A further provision is that locomotive engines used in moving interstate traffic shall be fitted with a power driving-wheel brake and appliances for operating the train-brake system, and a sufficient number of cars in the train shall be equipped with power or train brakes. The act directs the Commission to lodge with the proper District-Attorneys information of such violations as may come to its knowledge. The Commission is authorized to, from time to time, upon full hearing and for good cause, extend the period within which any common carrier shall comply with the provisions of the statute. The act of March 2, 1903, amended this act so as to make its provisions apply to Territories and the District of Columbia to all cases when couplers of whatever design are brought together, and to all locomotives, cars, and other equipment of any railroad engaged in interstate traffic, except logging cars and cars used upon street railways, and also to power or train brakes used in railway operation.

By act of April 14, 1910, the safety appliance acts were supplemented so as to require railroads to equip their cars with sill steps, hand brakes, ladders, running boards and grab irons, and the Commission was authorized to designate the number, dimensions, location and manner of application of appliances.

The act of June 1, 1898, concerning carriers engaged in interstate commerce and their employés, known as the "Arbitration act," directs the Chairman of the Interstate Commerce Commission and the Commissioner of Labor to use their best efforts, by mediation and conciliation, to settle controversies between railway companies and their employés. Every agreement of arbitration made under the act must be forwarded to the Chairman of the Interstate Commerce Commission, who shall file the same in the office of that Commission. When the agreement of arbitration is signed by employés individually instead of a labor organization, the act provides, if various specified conditions have been complied with, that the Chairman of the Commission shall, by notice in writing, fix a time and place for the meeting of the Board of Arbitrators. If the two arbitrators chosen by the parties fail to select

INTERSTATE COMMERCE LAW—*Continued.*

a third within five days after the first meeting, the third arbitrator shall be named by the Chairman of the Interstate Commerce Commission and the Commissioner of Labor.

The act of March 3, 1901, "requiring common carriers engaged in interstate commerce to make reports of all accidents to the Interstate Commerce Commission," makes it the duty of such carrier to monthly report, under oath, all collisions and derailments of its trains and accidents to its passengers, and to its employés while on duty in its service, and to state the nature and causes thereof. The act prescribes that a fine shall be imposed against any such carrier failing to make the report so required.

By act of May, 6, 1910, the prior Accident Reports law was repealed and a new statute passed giving more power to the Commission as to investigating accidents, and is more comprehensive than the former law.

The act of March 4, 1907, makes it the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is made unlawful to require or permit employés engaged in, or connected with, the movement of trains to be on duty more than a specified number of hours in any twenty-four.

The act of May 23, 1908, by section 16 thereof, gives the Interstate Commerce Commission limited control over the street railroads in the District of Columbia.

The act of May 30, 1908, directs the Interstate Commerce Commission to make regulations for the safe transportation of explosives by common carriers engaged in interstate commerce. A penalty is provided for violations of such regulations.

The act of May 30, 1908, makes it the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is provided that after a certain date no locomotive shall be used in moving interstate or foreign traffic, etc., not equipped with an ash pan which can be emptied without requiring a man to go under such locomotive. A penalty is provided for violation of this act.

Public resolution No. 46, approved June 30, 1906, and the sundry civil appropriation act of May 27, 1908, direct the Commission to investigate and report on the use and need of appliances intended to promote the safety of railway operation.

The act of March 3, 1909, authorizes the Commission to prescribe the form of bookkeeping for the gas and electric companies of the District of Columbia.

Registration of Trade-Marks
IN THE UNITED STATES.

THE following are extracts from the new "Act to authorize the registration of trade-marks used in commerce with foreign nations, or among the several States or Indian tribes, and to protect the same," passed by the Fifty-eighth Congress, and approved by the President, February 20, 1905, and amended by act passed by the Fifty-ninth Congress, approved March 2, 1907, and by act of the Sixtieth Congress, approved February 18, 1909.

"The owner of a trade-mark used in commerce with foreign nations, or among the several States, or with Indian tribes, provided such owner shall be domiciled within the territory of the United States, or resides in or is located in any foreign country, which, by treaty, convention, or law, affords similar privileges to the citizens of the United States, may obtain registration for such trade-mark by complying with the following requirements: First, by filing in the Patent Office an application therefor, in writing, addressed to the Commissioner of Patents, signed by the applicant, specifying his name, domicile, location, and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used; a description of the trade-mark itself shall be included, if desired by the applicant or required by the Commissioner, provided such description is of a character to meet the approval of the Commissioner. With this statement shall be filed a drawing of the trade-mark, signed by the applicant, or his attorney, and such number of specimens of the trade-mark, as actually used, as may be required by the Commissioner of Patents. Second, by paying into the Treasury of the United States the sum of ten dollars, and otherwise complying with the requirements of this act and such regulations as may be prescribed by the Commissioner of Patents.

"A certificate of registration shall remain in force for twenty years, except that in the case of trade-marks previously registered in a foreign country such certificates shall cease to be in force on the day on which the trade-mark ceases to be protected in such foreign country, and shall in no case remain in force more than twenty years, unless renewed. Certificates of registration may be, from time to time, renewed for like periods on payments of the renewal fees required by this act, upon request by the registrant, his legal representatives, or transferees of record in the Patent Office, and such request may be made at any time not more than six months prior to the expiration of the period for which the certificates of registration were issued or renewed. Certificates of registration in force at the date at which this act takes effect shall remain in force for the period for which they were issued, but shall be renewable on the same conditions and for the same periods as certificates issued under the provisions of this act, and when so renewed shall have the same force and effect as certificates issued under this act.

"The registration of a trade-mark under the provisions of this act shall be prima facie evidence of ownership. Any person who shall, without the consent of the owner thereof, reproduce, counterfeit, copy, or colorably imitate any such trade-mark and affix the the same to merchandise of substantially the same descriptive properties as those set forth in the registration, or to labels, signs, prints, packages, wrappers, or receptacles intended to be used upon or in connection with the sale of merchandise of substantially the same descriptive properties as those set forth in such registration, and shall use, or shall have used, such reproduction, counterfeit, copy, or colorable imitation in commerce among the several States, or with a foreign nation, or with the Indian tribes, shall be liable to an action for damages therefor at the suit of the owner thereof; and whenever in any such action a verdict is rendered for the plaintiff, the court may enter judgment therein for any sum above the amount found by the

REGISTRATION OF TRADE-MARKS—*Continued.*

verdict as the actual damages, according to the circumstances of the case, not exceeding three times the amount of such verdict, together with the costs."

No trade-mark will be registered which consists of or comprises immoral or scandalous matter, or which consists of or comprises the flag or coat of arms or other insignia of the United States, or any simulation thereof, or of any State or municipality, or of any foreign nation, or which consists of or comprises any design or picture that has been adopted by any fraternal society as its emblem, unless it shall be shown to the satisfaction of the Commissioner of Patents that the mark was adopted and used as a trade-mark by the applicant or applicant's predecessors, from whom title is derived, at a date prior to the date of its adoption by such fraternal society as its emblem, or which trade-mark is identical with a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties, or which so nearly resembles a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the mind of the public, or to deceive purchasers; or which consists merely in the name of an individual, firm, corporation, or association, not written, printed, impressed, or woven in some particular or distinctive manner or in association with a portrait of the individual, or merely in words or devices which are descriptive of the goods with which they are used, or of the character or quality of such goods, or merely a geographical name or term; no portrait of a living individual will be registered as a trade-mark, except by the consent of such individual evidenced by an instrument in writing; and no trade-mark will be registered which is used in unlawful business, or upon any article injurious in itself, or which has been used with the design of deceiving the public in the purchase of merchandise, or which has been abandoned.

Any mark, used in commerce with foreign nations or among the several States or with Indian tribes, may be registered if it has been in actual and exclusive use as a trade-mark of the applicant, or his predecessors from whom he derived title, for ten years next preceding the passage of the act of February 20, 1905.

By act of Congress approved February 18, 1909, the second section of the trades-mark act was amended so as to read as follows:

"The application prescribed in the foregoing section, in order to create any right whatever in favor of the party filing it, must be accompanied by a written declaration verified by the applicant, or by a member of the firm or an officer of the corporation or association applying, to the effect that the applicant believes himself or the firm, corporation, or association in whose behalf he makes the application to be the owner of the trade-mark sought to be registered, and that no other person, firm, corporation, or association, to the best of the applicant's knowledge and belief, has the right to use such trade-mark in the United States, either in the identical form or in such near resemblance thereto as might be calculated to deceive; that such trade-mark is used in commerce among the several States, or with foreign nations, or with Indian tribes, and that the description and drawing presented truly represent the trade-mark sought to be registered. If the applicant resides or is located in a foreign country, the statement required shall, in addition to the foregoing, set forth that the trade-mark has been registered by the applicant, or that an application for the registration thereof has been filed by him in the foreign country in which he resides or is located, and shall give the date of such registration, or the application therefor, as the case may be, except that in the application in such cases it shall not be necessary to state that the mark has been used in commerce with the United States or among the States thereof. The verification required by this section may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, charge d'affaires, consul, or commercial agent holding commission under the Government of the United States, or before any notary public, judge, or magistrate having an official seal and authorized to administer oaths in the foreign country in which the applicant may be whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States."

TRADE-MARK TREATIES WITH FOREIGN NATIONS.

The following is a list of the Governments with which conventions for the reciprocal registration and protection of trade-marks have been entered into by the United States—Austria-Hungary, Belgium, Denmark, France, Germany, Great Britain (including colonies), Italy, Japan (including China and Korea), Luxemburg, Mexico, Russia, Roumania, Servia, Spain. The laws of Switzerland and the Netherlands being so framed as to afford reciprocal privileges to the citizens or subjects of any Government which affords similar privileges to the people of those countries, the mere exchange of diplomatic notes, giving notice of the fact, accomplishes all the purposes of a formal convention.

Central Electric Light and Power Stations.

The Bureau of the Census in June, 1910, issued a bulletin giving the result of an inquiry into the work of the commercial and municipal central electric light and power stations in the United States, the data being of 1907. The report stated that the number of stations was 4,714. It gave $1,096,913,622 as the cost of construction and equipment. They earned $175,642,368, of which $169,614,691 was for electric service, including $125,755,114 for lighting; expended $106,205,149; employed 12,990 salaried officials and clerks, who were paid $11,733,787, and also 34,642 wage earners, who received $23,686,537; operated 10,150 primary-power machines, with 4,032,365 horse-power capacity; had 12,173 dynamos, with a kilowatt capacity of 2,709,225; and their output, in kilowatt hours, was 5,862,276,737. Of the total number of lamps wired for service, there were: Arcs, 555,713; incandescent, 41,445,997; and other varieties, 162,338.

Of the 1,252 municipal central stations in 1907 there were 521 "purely electric" and 731 "composite." Nearly two-thirds of the 3,462 commercial stations were reported as "purely electric" and the remainder as composite. Most of the municipal stations are in places of small population, nearly seven-eighths of the total number being located in places of less than 5,000 population and less than 3 per cent. in places having a population of 25,000 and over.

(Revised for this issue of THE WORLD ALMANAC by the Secretary of the Civil Service Commission.)

THE purpose of the Civil Service act, as declared in its title, is "to regulate and improve the Civil Service of the United States." It provides for the appointment of three Commissioners, a chief Examiner, a Secretary, and other employés, and makes it the duty of the Commissioners to aid the President as he may request in preparing suitable rules for carrying the act into effect; to make regulations to govern all examinations held under the provisions of the act, and to make investigations and report upon all matters touching the enforcement and effect of the rules and regulations. The address of the Commission is Washington, D. C.

PROVISIONS OF THE RULES.

The act requires the rules to provide, as nearly as the conditions of good administration will warrant, for open competitive practical examinations for testing the fitness of applicants for the classified service; for the filling of all vacancies by selections from among those graded highest; for the apportionment of appointments at Washington among the States upon the basis of population; for a period of probation before absolute appointment; that no person in the public service shall be obliged to contribute service or money for political purposes; that persons in the competitive service, while retaining the right to vote as they please or to express privately their political opinions, shall take no active part in political campaigns; and that no person in said service has any right to use his official authority or influence to coerce the political action of any person or body.

EXTENT OF THE SERVICE.

There are about 368,000 positions in the Executive Civil Service, over half of which, or about 235,000, are subject to competitive examination. The expenditure for salaries in the Executive Civil Service is over $200,000,000 a year. The Civil Service act does not require the classification of persons appointed by the President and confirmed by the Senate or of persons employed merely as laborers or workmen. Many positions are excepted in part from the provisions of the rules for various reasons, the largest single class being those of fourth-class postmasters, of which there were 54,312 on July 1, 1908. By an Executive order of November 30, 1908, about 15,000 of these positions were brought into the competitive service and made subject to examination.

APPLICATIONS.

Persons seeking to be examined must file an application blank. The blank for the Departmental Service at Washington, Railway Mail Service, the Indian School Service, and the Government Printing Service should be requested directly of the Civil Service Commission at Washington. The blank for the Customs, Postal, or Internal Revenue Service should be requested of the Civil Service Board of Examiners at the office where service is sought.

Applicants for examination must be citizens of the United States, and of the proper age. No person using intoxicating liquors to excess may be appointed. No discrimination is made on account of sex, color, or political or religious opinions. The limitations of age vary with the different services, but do not apply to any person honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty.

EXAMINATIONS.

The examinations are open to all persons qualified in respect to age, citizenship, legal residence, character, and health. During the fiscal year ended June 30, 1909, 39,905 persons were appointed. Of those appointed, 4,295 were rural letter-carriers, 15,086 were mechanics and workmen at navy yards appointed on registration tests of fitness given by a board of labor employment at each yard. Several hundred different kinds of examinations were held, each one of which involved different tests. Three hundred and five of these examinations contained educational tests, the others being for mechanical trades or skilled occupations and consisting of certificates of employers or fellow-workmen. Examinations are held twice a year in each State and Territory, the places and dates being publicly announced.

By an act of July 2, 1909, relating to the Thirteenth and subsequent decennial censuses, provision was made for competitive examinations to secure eligibles for the temporary clerical force at Washington authorized under that act. The supervisors and enumerators of the census are employed without examination.

APPOINTMENTS.

In case of a vacancy not filled by promotion, reduction, transfer, or reinstatement, the highest three of the sex called for on the appropriate register are certified for appointment, the apportionment being considered in appointments at Washington. In the absence of eligibles, or when the work is of short duration, temporary appointments, without examination, are permitted. The number of women applying for ordinary clerical places is greatly in excess of the calls of appointing officers. The chances of appointment are good for teachers, matrons, seamstresses, and physicians in the Indian Service, for male stenographers and typewriters, draughtsmen, patent examiners, civil, mechanical, and electrical engineers, and for technical and scientific experts.

PREFERENCE CLAIMANTS.

Persons who served in the military or naval service of the United States, and were discharged by reason of disabilities resulting from wounds or sickness incurred in the line of duty, are, under the Civil Service rules, given certain preferences. They are released from all maximum age limitations, are eligible for appointment at a grade of 65, while all others are obliged to obtain a grade of 70, and are certified to appointing officers before all others. Subject to the other conditions of the rules, a veteran of the rebellion or of the war with Spain, or the widow of any such person, or any army nurse of either war, may be reinstated without regard to the length of time he or she has been separated from the service.

INSULAR POSSESSIONS.

Examinations are also held for positions in the Philippines, Porto Rico, and Hawaii, and also for the Isthmian Canal service.

THE UNCLASSIFIED SERVICE.

Under an executive order unclassified laborers are appointed after open, competitive examination upon their physical condition. This action is outside the Civil Service act.

PUBLICATIONS OF THE COMMISSION.

Among the publications of the Commission for free distribution are the following:

Manual of Examinations, giving places and dates of examinations, rules by which papers are rated, descriptions of examinations, specimen questions, and general information.

The Civil Service act and rules.

The Annual Reports of the Commission, showing its work. These annual reports, of which twenty-five have been issued, may be consulted at public libraries.

Civil Service Rules in the City of New York.

SYNOPSIS of regulations governing the admission of persons into the civil service of the City of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, 299 Broadway, New York City.

Under the White Civil Service law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the city of New York except officers elected by the people, all legislative officers and employés, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the civil service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

APPLICATIONS.

Applications of competitors for positions must be addressed to the "Secretary of the Municipal Civil Service Commission, New York City," and must set forth:

Applications are only received when an examination is ordered for a position.

First—The affidavit of the applicant showing his age, whether a citizen of the United States, giving his place of residence, with the street and number thereof, if any; the place, nature, and extent of his education, and of his business training and experience, and stating whether he has ever been in the civil service of the city of New York, or in the military or naval service of the United States, and if so, when and where.

Second—A statement whether such application is limited to any particular office in the service.

Third—The certificate of four reputable persons of the city of New York, that they have been personally acquainted with the applicant for at least one year, and believe him to be of good moral character, of temperate and industrious habits, and in all respects fit for the service he wishes to enter, and that each of them is willing that such certificate should be published for public information, and will upon request give such further information concerning the applicant as he may possess.

Applicants for the following positions must, before being admitted to examination, present satisfactory evidence as to the following facts:

First—If the position to be filled be that of physician, surgeon, medical officer, medical superintendent, or medical inspector, that the applicant is duly authorized by the laws of the State of New York to practise medicine and surgery.

In positions where the duties are professional, technical, or expert, the candidates will be required to present evidences of the preliminary training or technical education they have undergone to qualify them for such situations before they can be admitted to examination.

In all examinations for professional positions, or positions requiring technical knowledge, no person shall be placed on the eligible list who obtains a rating in technical knowledge of less than 75.

CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers, each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission; and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

Each examiner shall exercise all due diligence to secure fairness and prevent all collusion and fraud in the examinations.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

Accounts, Com. of.
Armory, Board of.
Assessors, Board of.
Bellevue and Allied Hospitals.
Board of Water Supply.
Bridges, Dept. of.
Brooklyn Disciplinary Training School for Boys.
Buildings, Dept. of.
Charities, Dept. of Public.
CityRecord, Supervisor of the.
Civil Service Commission.
College of the City of NewYork
Correction, Dept. of.
Coroners.
Court, City.
Court, City Magistrate.
Court, Municipal.
Court of Special Sessions.
Docks and Ferries, Dept. of.
Education, Dept. of.
Elections, Board of.
Estimate and Apportionment, Board of.
Examiners, Board of.
Finance Dept.
Fire Dept.
Health Dept.
Law Dept.
Mayor's Office.
Normal College.
Parks, Dept. of.
Police Dept.
Presidents of Boroughs.
Public Works Bureau.
Sinking Fund Commission.
Street Cleaning, Dept. of.
Taxes and Assessm'ts, Dept. of.
Tenement House Dept.
Water Supply, Gas, and Electricity, Dept. of.

The inspectors of elections and poll clerks are exempt from examination. Special patrolmen, appointed pursuant to section 269 of the New York City Consolidation act, are also exempt.

Patent Office Procedure.

THE following statement has been revised by the Patent Office for THE WORLD ALMANAC for 1911:

Patents are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, or any new original and ornamental design for an article of manufacture, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof or more than two years prior to his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned; upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, except in the case of design patents, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees.

No person otherwise entitled thereto will be debarred from receiving a patent for his invention or discovery, by reason of its having been first patented or caused to be patented by the inventor or his legal representatives or assigns in a foreign country, unless the application for said foreign patent was filed more than twelve months prior to the filing of the application in this country, and four months in cases of designs, in which case no patent shall be granted in this country.

APPLICATIONS.

Applications for a patent must be made in writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the invention or discovery, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor and attested by two witnesses.

When the nature of the case admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact, and attested by two witnesses. In all cases which admit of representation by model, the applicant, if required by the Patent Office, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen and where he resides, and whether he is the sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than twelve months prior to his application in this country, or four months in cases of designs. If any application for patent has been filed in any foreign country by the applicant in this country or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned; that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States nor described in any printed publication or patent in this or any foreign country for more than two years prior to his application in this country. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, chargé d'affaires, consul, or commercial agent holding commission under the Government of the United States, or before any notary public, judge or magistrate having an official seal and authorized to administer oaths in that country whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States, except that no acknowledgment may be taken by any attorney appearing in the case.

On the filing of such application and the payment of the fees required by law, if, on examination, it appears that the applicant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

REISSUES.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without

PATENT OFFICE PROCEDURE—*Continued.*

any fraudulent or deceptive intention. Reissue applications must be made and the specifications sworn to by the inventors, if they be living.

FEES.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, $15. On issuing each original patent, $20. In design cases: For three years and six months, $10; for seven years, $15; for fourteen years, $30. On every application for the reissue of a patent, $30. On filing each disclaimer, $10. For certified copies of patents and other papers in manuscript, ten cents per hundred words and twenty-five cents for the certificate; for certified copies of printed patents, eighty cents. For uncertified printed copies of specifications and drawings of patents, five cents each. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, $1; of over three hundred and under one thousand words, $2; for each additional thousand words, or fraction thereof, $1. For copies of drawings, the reasonable cost of making them. The Patent Office is prepared to furnish positive photographic copies of any drawing, foreign or domestic, in the possession of the office, in sizes and at rates as follows: Large size, 10x15 inches, twenty-five cents; medium size, 8x12½ inches, fifteen cents. Fee for examining and registering trade-mark, $10, which includes certificate. Stamps cannot be accepted by the Patent Office in payment of fees. Stamps and stamped envelopes should not be sent to the office for replies to letters, as stamps are not required on mail matter emanating from the Patent Office.

PATENT OFFICE STATISTICS.

The receipts of the Patent Office during the year ending December 31, 1909, were $2,042,828.14, and expenditures, $1,955,151.14. Receipts over expenditures, $87,677.00.

The following is a statement of the business of the office for the year ending December 31, 1909:

Number of applications for patents	64,408	Number of patents granted, including designs	37,261
Number of applications for design patents	1,234	Patents reissued	160
Number of applications for reissue patents	197	Total	37,421
Total	65,839		
Number of caveats filed	1,948	Number of trade-marks registered	4,184
Number of applications for registration of trade-marks	7,247	Number of labels registered	492
Number of applications for registration of labels	554	Number of prints registered	148
Number of applications for prints	190	Total	4,824
Number of disclaimers filed	8	Number of patents expired	22,661
Number of appeals on the merits	1,450	Number of patents forfeited for non-payment of final fees	7,699
Total	11,397	Number of applications allowed awaiting final fees	12,748
Number of applications, etc., requiring investigation and action, Dec. 31 1909	19,679	Number of trade-mark applications passed for publication	4,517

The total number of applications filed at the Patent Office in seventy-two years, 1837-1909, was 1,652,062; number of caveats filed, 129,201; number of original patents, including designs and reissues issued, 998,497; net surplus in the U. S. Treasury on account of the patent fund, $6,978,402.89.

The following is a statement of patents and designs issued in 1909 according to residence of patentees:

Alabama, 184; Alaska, 12; Arizona, 45; Arkansas, 142; California, 1,358; Colorado, 471; Connecticut, 1,031; Delaware, 47; District of Columbia, 267; Florida, 96; Georgia, 265; Hawaii, 11; Idaho, 76; Illinois, 3,503; Indiana, 931; Iowa, 717; Kansas, 462; Kentucky, 299; Louisiana, 171; Maine, 148; Maryland, 299; Massachusetts, 2,152; Michigan, 1,086; Minnesota, 639; Mississippi, 115; Missouri, 1,159; Montana, 96; Nebraska, 341; Nevada, 38; New Hampshire, 108; New Jersey, 1,562; New Mexico, 40; New York, 5,232; North Carolina, 205; North Dakota, 153; Ohio, 2,538; Oklahoma, 250; Oregon, 239; Panama, 6; Pennsylvania, 3,641; Philippine Islands, 4; Porto Rico, 3; Rhode Island, 294; South Carolina, 69; South Dakota, 105; Tennessee, 252; Texas, 544; Utah, 142; Vermont, 66; Virginia, 269; Washington, 472; West Virginia, 198; Wisconsin, 796; Wyoming, 43; U. S. Army, 16; U. S. Navy, 16. Total, 33,424.

Foreign countries: Austria-Hungary, 128; Belgium, 56; Canada, 490; Cuba, 14; Denmark, 39; England, 879; France, 343; Germany, 1,189; Italy, 60; Japan, 16; Mexico, 35; Russia, 33; Scotland, 64; Sweden, 92; Switzerland, 108; other countries, 266. Total foreign, 3,812.

GENERAL PATENT STATISTICS.

The following table is compiled from the report of the Commissioner of Patents for 1910. It exhibits the number of patents issued by foreign countries and the United States from the earliest records to December 31, 1909:

Countries.	To 1870 Inclusive.	1871 to 1909.	Total.	Countries.	To 1870 Inclusive.	1871 to 1909.	Total.
Austria	....	59,132	59,132	Russia	1,464	21,479	22,943
Austria-Hungary	15,350	67,583	82,933	Spain	....	42,622	42,622
Belgium	35,044	192,204	227,248	Sweden	1,629	29,927	31,556
Canada	4,081	121,819	125,900	Switzerland	....	46,445	46,445

Acts of the Sixty-first Congress.

SECOND SESSION.

THE principal bills of a public nature which became laws during the second session of the Sixty-first Congress, beginning December 6, 1909, and ending June 25, 1910, were:

Chapter 128. An act to amend the act to regulate the immigration of aliens into the United States, passed in 1907, extending and defining the limitation of aliens admitted to the United States [March 26, 1910.]

Chapter 143. An act to amend the act of 1908 concerning the liability of common carriers by railroads to their employés in certain cases. [April 5, 1910.]

Chapter 160. An act to supplement the act to promote the safety of employés and travellers upon railroads by compelling common carriers engaged in interstate commerce to equip their cars with automatic couplers and continuous brakes and their locomotives with driving wheel brakes. [April 14, 1910.]

Chapter 191. An act for preventing the manufacture, sale and transportation of adulterated or misbranded paris green, lead arsenates and other insecticides and also fungicides and for regulating traffic therein and for other purposes. [April 26, 1910.]

Chapter 208. An act requiring common carriers engaged in interstate and foreign commerce to make full reports of all accidents to the Interstate Commerce Commission and authorizing investigation thereof by said commission. [May 6, 1910.]

Chapter 226. An act to establish "The Glacier National Park" in the Rocky Mountains south of the international boundary line in the State of Montana. [May 11, 1910.]

Chapter 232. An act for the relief of earthquake sufferers in Costa Rica. [May 13, 1910.]

Chapter 240. An act to establish in the Department of the Interior a bureau of mines. [May 16, 1910.]

Chapter 243. An act establishing a Commission of Fine Arts. [May 17, 1910.]

Chapter 291. An act providing for the quadrennial election of members of the Philippine Legislature and Resident Commissioners to the United States and for other purposes. [June 14, 1910.]

Chapter 309. An act to create a commerce court. [June 18, 1910.]

Chapter 310. An act to enable the people of New Mexico to form a constitution and State government and to be admitted into the Union on an equal footing with the original States, and to enable the people of Arizona to form a constitution and State government and to be admitted into the Union on an equal footing with the original States. [June 20, 1910.]

Chapter 318. An act to provide for agricultural entries on coal lands. [June 22, 1910.]

Chapter 374. An act for the erection of a replica of the statue of Gen. Van Steuben. [June 23, 1910.]

Chapter 379. An act to require apparatus and operators for radio-communication on certain ocean steamers—provides for wireless telegraphy on steamships. [June 24, 1910.]

Chapter 386. An act to establish postal savings depositories for depositing savings at interest with the security of the Government for repayment thereof—the Postal Savings Bank act. [June 25, 1910.]

Chapter 392. An act providing for publicity of contributions made for the purpose of influencing elections at which Representatives in Congress are elected. [June 25, 1910.]

Chapter 393. An act for the relief of soldiers and sailors who enlisted or served under assumed names while minors or otherwise in the army or navy during the war of the rebellion, the war with Spain or the Philippine insurrection. [June 25, 1910.]

Chapter 395. An act to further regulate interstate and foreign commerce by prohibiting the transportation therein for immoral purposes of women and girls. [June 25, 1910.]

Chapter 410. An act to provide for an additional judge of the district court for the eastern district of New York. [June 25, 1910.]

Chapter 412. An act to amend the bankruptcy law. [June 25, 1910.]

Chapter 421. An act to authorize the President of the United States to make withdrawals of public lands in certain cases. [June 25, 1910.]

Joint Resolution No. 13. To continue in full force and effect an act entitled "An act to provide for the appropriate marking of the graves of the soldiers and sailors of the Confederate army and navy who died in Northern prisons and were buried near the prisons where they died." [February 25, 1910.]

Joint Resolution No. 35. Creating a commission to represent the United States at the celebration of the first centennial of the Republic of Mexico. [June 24, 1910.]

Joint Resolution No. 41. For the appointment of a commission to investigate the matter of employers' liability and workmen's compensation. [June 25, 1910.]

Joint Resolution No. 43. For the appointment of a commission in relation to universal peace. [June 25, 1910.]

Joint Resolution No. 47. Authorizing the President of the United States to invite the International Congress of Refrigeration to hold its third meeting in the United States of America.

Appropriations were made for two new battleships of 27,000 tons each, armed with 14-inch guns; six torpedo boat destroyers, two colliers; and four submarines; for raising and removing the wreck of the battleship Maine in the harbor of Havana; for enforcing the Sherman anti-trust law; for extending the activities of the Tariff Board and for the preservation of the water supply.

During the session over 27,000 bills were introduced in the House of Representatives and over 9,000 bills in the Senate. Among the measures which did not reach a passage were those for ship subsidies, anti-injunction, new forms of government in Alaska and the Panama Canal Zone, a national bureau of health, a model insurance law for the District of Columbia, increased rates of postage for second class matter, for an Appalachian forest reserve and for an increase of the engineer corps of the army.

The Postal Savings Bank Act,

PASSED BY THE SIXTY-FIRST CONGRESS.

THE following is the text of the Postal Savings Bank law, being Chapter 386 of the acts of the second session of the Sixty-first Congress of the United States, approved June 25, 1910, and entitled "An act to establish postal savings depositories for depositing savings at interest with the security of the Government for repayment thereof and for other purposes."

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that there be, and is hereby, created a board of trustees for the control, supervision, and administration of the postal savings depository offices designated and established under the provisions of this act, and of the funds received as deposits at such postal savings depository offices by virtue thereof. Said board shall consist of the Postmaster-General, the Secretary of the Treasury, and the Attorney-General, severally, acting ex officio and shall have power to make all necessary and proper regulations for the receipt, transmittal, custody, deposit, investment, and repayment of the funds deposited at postal savings depository offices.

The board of trustees shall submit a report to Congress at the beginning of each regular session showing by States and Territories (for the preceding fiscal year) the number and names of post-offices receiving deposits, the aggregate amount of deposits made therein, the aggregate amount of withdrawals therefrom, the number of depositors in each, the total amount standing to the credit of all depositors at the conclusion of the year, the amount of such deposits at interest, the amount of interest received thereon, the amount of interest paid thereon, the amount of deposits surrendered by depositors for bonds issued by authority of this act, and the number and amount of unclaimed deposits. Also the amount invested in Government securities by the trustees, the amount of extra expense of the Post-Office Department and the postal service incident to the operation of the postal savings depository system, the amount of work done for the savings depository system by the Post-Office Department and postal service in the transportation of free mail, and all other facts which it may deem pertinent and proper to present.

SEC. 2. That the Postmaster-General is hereby directed to prepare and issue special stamps of the necessary denominations for use, in lieu of penalty or franked envelopes, in the transmittal of free mail resulting from the administration of this act.

SEC. 3. That said board of trustees is hereby authorized and empowered to designate such post-offices as it may select to be postal savings depository offices, and each and every post-office so designated by order of said board is hereby declared to be a postal savings depository office within the meaning of this act and to be authorized and required to receive deposits of funds from the public and to account for and dispose of the same, according to the provisions of this act and the regulations made in pursuance thereof. Each postal savings depository office shall be kept open for the transaction of business during such hours as the Postmaster-General, with the approval of the board of trustees, shall direct.

OPENING OF ACCOUNTS.

SEC. 4. That accounts may be opened and deposits made in any postal savings depository established under this act by any person of the age of ten years or over, in his or her own name, and by a married woman in her own name and free from any control or interference by her husband; but no person shall at the same time have more than one postal savings account in his or her own right.

SEC. 5. That the postmaster at a postal savings depository office shall, upon the making of an application to open an account under this act and the submission of an initial deposit, deliver to the depositor a pass book free of cost, upon which shall be written the name and signature or mark of the depositor and such other memoranda as may be necessary for purposes of identification, in which pass book entries of all deposits and withdrawals shall be made in both figures and writing: Provided, That the Postmaster-General may, with the approval of the board of trustees, adopt some other device or devices in lieu of a pass book as a means of making and preserving evidence of deposits and withdrawals.

RESTRICTION OF DEPOSITS.

SEC. 6. That at least one dollar, or a larger amount in multiples thereof, must be deposited before an account is opened with the person depositing the same, and one dollar, or multiples thereof, may be deposited after such account has been opened, but no one shall be permitted to deposit more than one hundred dollars in any one calendar month: Provided, That in order that smaller amounts may be accumulated for deposit any person may purchase for ten cents from any depository office a postal savings card to which may be attached specially prepared adhesive stamps, to be known as "postal savings stamps," and when the stamps so attached amount to one dollar, or a larger sum in multiples thereof, including the ten-cent postal savings card, the same may be presented as a deposit for opening an account, and additions may be made to any account by means of such card and stamps in amounts of one dollar, or multiples thereof, and when a card and stamps thereto attached are accepted as a deposit the postmaster shall immediately cancel the same. It is hereby made the duty of the Postmaster-General to prepare such postal savings cards and postal savings stamps of denominations of ten cents, and to keep them on sale at every postal savings depository office, and to prescribe all necessary rules and regulations for the issue, sale, and cancellation thereof.

INTEREST ON DEPOSITS.

SEC. 7. That interest at the rate of two per centum per annum shall be allowed and entered to the credit of each depositor once in each year, the same to be computed on such basis and under such rules and regulations as the board of trustees may prescribe; but interest shall not be computed or allowed on fractions of a dollar: Provided, That the balance to the credit of any one person shall never be allowed to exceed five hundred dollars, exclusive of accumulated interest.

WITHDRAWAL OF FUNDS.

SEC. 8. That any depositor may withdraw the whole or any part of the funds deposited to his or her credit, with the accrued interest, upon demand and under such regulations as the board of trustees may prescribe. Withdrawals shall be paid from the deposits in the State or Territory, so far as the postal funds on deposit in such State or Territory may be sufficient for the purpose, and, so far as practicable, from the deposits in the community in which the deposit was made. No bank in which postal savings funds shall be deposited shall receive any exchange or other fees or compensation on account of the cashing or collection of any checks or the performance of any other service in connection with the postal savings depository system.

THE POSTAL SAVINGS BANK ACT—*Continued.*

FUNDS TO BE DEPOSITED IN SOLVENT BANKS.

SEC. 9. That postal savings funds received under the provisions of this act shall be deposited in solvent banks, whether organized under national or State laws, being subject to national or State supervision and examination, and the sums deposited shall bear interest at the rate of not less than two and one-fourth per centum per annum, which rate shall be uniform throughout the United States and Territories thereof; but five per centum of such funds shall be withdrawn by the board of trustees and kept with the Treasurer of the United States, who shall be treasurer of the board of trustees, in lawful money as a reserve. The board of trustees shall take from such banks such security in public bonds or other securities, supported by the taxing power, as the board may prescribe, approve, and deem sufficient and necessary to insure the safety and prompt payment of such deposits on demand. The funds received at the postal savings depository offices in each city, town, village and other locality shall be deposited in banks located therein (substantially in proportion to the capital and surplus of each such bank) willing to receive such deposits under the terms of this act and the regulations made by authority thereof, but the amount deposited in any one bank shall at no time exceed the amount of the paid-in capital and one-half the surplus of such bank. If no such bank exist in any city, town, village, or locality, or if none where such deposits are made will receive such deposits on the terms prescribed, then such funds shall be deposited under the terms of this act in the bank most convenient to such locality. If no such bank in any State or Territory is willing to receive such deposits on the terms prescribed, then the same shall be deposited with the treasurer of the board of trustees, and shall be counted in making up the reserve of five per centum. Such funds may be withdrawn from the treasurer of said board of trustees and all other postal savings funds, or any part of such funds, may be at any time withdrawn from banks and savings depository offices for the repayment of postal savings depositors when required for that purpose.

INVESTMENTS IN GOVERNMENT BONDS.

Not exceeding thirty per centum of the amount of such funds may at any time be withdrawn by the trustees for investment in bonds or other securities of the United States, it being the intent of this act that the residue of such funds, amounting to sixty-five per centum thereof, shall remain on deposit in the banks in each State and Territory willing to receive the same under the terms of this act, and shall be a working balance and also a fund which may be withdrawn for investment in bonds or other securities of the United States, but only by direction of the President, and only when, in his judgment, the general welfare and the interests of the United States so require. Interest and profit accruing from the deposits or investment of postal savings funds shall be applied to the payment of interest due to postal savings depositors as hereinbefore provided, and the excess thereof, if any, shall be covered into the Treasury of the United States as a part of the postal revenue.

Provided, That postal savings funds in the treasury of said board shall be subject to disposition as provided in this act, and not otherwise: And provided further, That the board of trustees may at any time dispose of bonds held as postal savings investments and use the proceeds to meet withdrawals of deposits by depositors. For the purposes of this act the word "Territory," as used herein, shall be held to include the District of Columbia, the District of Alaska, and Porto Rico, and the word "bank" shall be held to include savings banks and trust companies doing a banking business.

ISSUE OF BONDS TO DEPOSITORS.

SEC. 10. That any depositor in a postal savings depository may surrender his deposit, or any part thereof, in sums of twenty dollars, forty dollars, sixty dollars, eighty dollars, one hundred dollars, and multiples of one hundred dollars and five hundred dollars, and receive in lieu of such surrendered deposits, under such regulations as may be established by the board of trustees, the amount of the surrendered deposits in United States coupon or registered bonds of the denominations of twenty dollars, forty dollars, sixty dollars, eighty dollars, one hundred dollars, and five hundred dollars, which bonds shall bear interest at the rate of two and one-half per centum per annum, payable semiannually, and be redeemable at the pleasure of the United States after one year from the date of their issue and payable twenty years from such date, and both principal and interest shall be payable in United States gold coin of the present standard of value.

Provided, That the bonds herein authorized shall be issued only (first) when there are outstanding bonds of the United States subject to call, in which case the proceeds of the bonds shall be applied to the redemption at par of outstanding bonds of the United States subject to call, and (second) at times when under authority of law other than that contained in this act the Government desires to issue bonds for the purpose of replenishing the Treasury, in which case the issue of bonds under authority of this act shall be in lieu of the issue of a like amount of bonds issuable under authority of law other than that contained in this act:

Provided further, That the bonds authorized by this act shall be issued by the Secretary of the Treasury under such regulations as he may prescribe: And provided further, That the authority contained in section nine of this act for the investment of postal savings funds in United States bonds shall include the authority to invest in the bonds herein authorized whenever such bonds may be lawfully issued: And provided further, That the bonds herein authorized shall be exempt from all taxes or duties of the United States as well as from taxation in any form by or under State, municipal, or local authority: And provided further, That no bonds authorized by this act shall be receivable by the Treasurer of the United States as security for the issue of circulating notes by national banking associations.

SEC. 11. That whenever the trustees of the postal savings fund have in their possession funds available for investment in United States bonds they may notify the Secretary of the Treasury of the amount of such funds in their hands which they desire to invest in bonds of the United States subject to call, whereupon, if there are United States bonds subject to call, the Secretary of the Treasury shall call for redemption an amount of such bonds equal to the amount of the funds in the hands of the trustees which the trustees desire to thus invest, and the bonds so called shall be redeemed at par with accrued interest at the Treasury of the United States on and after three months from the date of such call, and interest on the said bonds shall thereupon cease.

Provided, That the said bonds when redeemed shall be reissued at par to the trustees without change in their terms as to rate of interest and date of maturity: And provided further, That the bonds so reissued may, in the discretion of the Secretary of the Treasury, be called for redemption from the trustees in like manner as they were originally called for redemption from their former owners whenever there are funds in the Treasury of the United States available for such redemption.

THE POSTAL SAVINGS BANK ACT—*Continued.*

SEPARATION OF ACCOUNTS.

SEC. 12. That postal savings depository funds shall be kept separate from other funds by postmasters and other officers and employés of the postal service, who shall be held to the same accountability under their bonds for such funds as for public moneys; and no person connected with the Post-Office Department shall disclose to any person other than the depositor the amount of any deposits, unless directed so to do by the Postmaster-General. All statutes relating to the safe-keeping of and proper accounting for postal receipts are made applicable to postal savings funds, and the Postmaster-General may require postmasters, assistant postmasters, and clerks at postal saving depositories to give any additional bond he may deem necessary.

COMPENSATION TO POSTMASTERS.

SEC. 13. That additional compensation shall be allowed postmasters at post-offices of the fourth class for the transaction of postal savings depository business. Such compensation shall not exceed one-fourth of one per centum on the average sum upon which interest is paid each calendar year on receipts at such post-office, and shall be paid from the postal revenues; but postmasters, assistant postmasters, clerks, or other employés at post-offices of the presidential grade shall not receive any additional compensation for such service.

SEC. 14 That the sum of one hundred thousand dollars is hereby appropriated, out of any money in the Treasury not otherwise appropriated, or so much thereof as may be necessary, to enable the Postmaster-General and the board of trustees to establish postal savings depositories in accordance with the provisions of this act, including the reimbursement of the Secretary of the Treasury for expenses incident to the preparation, issue, and registration of the bonds authorized in this act; and the Postmaster-General is authorized to require postmasters and other postal officers and employés to transact, in connection with their other duties, such postal savings depository business as may be necessary; and he is also authorized to make and with the approval of the board of trustees to promulgate, and from time to time to modify or revoke subject to the approval of said board, such rules and regulations not in conflict with law as he may deem necessary to carry the provisions of this act into effect.

SEC. 15. That all the safeguards provided by law for the protection of public moneys, and all statutes relating to the embezzlement, conversion, improper handling, retention, use, or disposal of postal and money-order funds and the punishments provided for such offenses are hereby extended and made applicable to postal savings depository funds, and all statutes relating to false returns of postal and money-order business, the forgery, counterfeiting, alteration, improper use or handling of postal and money-order blanks, forms, vouchers, accounts, and records, and the dies, plates, and engravings therefor, with the penalties provided in such statutes, are hereby extended and made applicable to postal savings depository business, and the forgery, counterfeiting, alteration, improper use or handling of postal savings depository blanks, forms, vouchers, accounts, and records, and the dies, plates, and engravings therefor.

FAITH OF UNITED STATES PLEDGED TO PAYMENT.

SEC. 16. That the faith of the United States is solemnly pledged to the payment of the deposits made in postal savings depository offices, with accrued interest thereon as herein provided.

SEC. 17. That the final judgment, order, or decree of any court of competent jurisdiction adjudicating any right or interest in the credit of any sums deposited by any person with a postal savings depository if the same shal not have been appealed from and the time for appeal has expired shall, upon submission to the Postmaster-General of a copy of the same, duly authenticated in the manner provided by the laws of the United States for the authentication of the records and judicial proceedings of the courts of any State or Territory or of any possession subject to the jurisdiction of the United States, when the same are proved or admitted within any other court within the United States, be accepted and pursued by the board of trustees as conclusive of the title, right, interest, or possession so adjudicated, and any payment of said sum in accordance with such order, judgment, or decree shall operate as a full and complete discharge of the United States from the claim or demand of any person or persons to the same.

Withdrawal of Public Lands for Settlement.

ACT OF THE SIXTY-FIRST CONGRESS.

CHAPTER 421 of the acts of the second session of the Sixty-first Congress approved June 25, 1910, and authorizing the President to make withdrawals of public lands from settlement, location, sale or entry in certain cases, is as follows:

SECTION 1. The President may, at any time in his discretion, temporarily withdraw from settlement, location, sale or entry any of the public lands of the United States, including the District of Alaska and reserve the same for water-power sites, irrigation, classification of lands, or other public purposes to be specified in the orders of withdrawals, and such withdrawals or reservations shall remain in force until revoked by him or by an act of Congress.

SEC. 2. All lands withdrawn under the provisions of this act shall at all times be open to exploration discovery, occupation and purchase, under the mining laws of the United States so far as the same apply to minerals other than coal, oil, gas and phosphates: Provided, That the rights of any person who, at the date of any order of withdrawal heretofore or hereafter made, is a bona fide occupant or claimant of oil or gas bearing lands, and who, at such date, is in diligent prosecution of work leading to discovery of oil or gas, shall not be affected or impaired by such order, so long as such occupant or claimant shall continue in diligent prosecution of said work: And provided further, That this act shall not be construed as a recognition, abridgment or enlargement of any asserted rights or claims initiated upon any oil or gas bearing lands after any withdrawal of such lands made prior to the passage of this act: And provided further, That there shall be excepted from the force and effect of any withdrawal made under the provisions of this act all lands which are, on the date of such withdrawal, embraced in any lawful homestead or desert-land entry theretofore made, or upon which any valid settlement has been made and is at said date being maintained and perfected pursuant to law: but the terms of this proviso shall not continue to apply to any particular tract of land unless the entryman or settler shall continue to comply with the law under which the entry or settlement was made. And provided further, That hereafter no forest reserve shall be created, nor shall any additions be made to one heretofore created within the limits of the States of Oregon, Washington, Idaho, Montana, Colorado or Wyoming except by act of Congress.

SEC. 3. The Secretary of the Interior shall report all such withdrawals to Congress at the beginning of its next regular session after the date of the withdrawals.

Permanent Court of Arbitration of The Hague,

PROVIDED FOR BY THE CONVENTION SIGNED AT THE HAGUE JULY 29, 1899.

PRESENT MEMBERS.

Argentine Republic—Mr. Estanislas S. Zeballos, LL. D., Minister for Foreign Affairs and Religion.

Mr. Roque Saenz Pena, LL. D., Envoy Extraordinary and Minister Plenipotentiary at Rome and at Berne.

Japan—Mr. Itchiro Motono, LL. D., Envoy Extraordinary and Minister Plenipotentiary at St. Petersburg.
Mr. Henry Willard Denison, Law Officer of the Ministry for Foreign Affairs at Tokio.

Luxemburg—Mr. Henri Vannerus, President of the Council of State, formerly President of the Superior Court of Justice.

Mexico—Mr. Jose Ives Limantour, LL. D., Minister of Finance and Public Credit.
Mr. Pablo Macedo, LL. D., President of the Monetary Commission.
Mr. Joaquin Obregon Gonzalez, LL. D., Governor of Guanajuato.
Mr. Joaquin D. Casasus, LL. D., formerly Ambassador at Washington.

Montenegro—(No appointments have been made.)

Netherlands—His Excellency T. M. C. Asser, LL. D., Minister of State, Member of the Council of State.
Mr. F. B. Coninck Liefsting, LL. D., President of the Court of Cassation.
Mr. Jonkheer A. F. de Savornin Lohman, LL. D., formerly Minister of the Interior.
Mr. Jonkheer G. L. M. H. Ruys de Beerenbrouck, LL. D., formerly Minister of Justice.

Nicaragua—Mr. Crisanto Medina, Envoy Extraordinary and Minister Plenipotentiary at Paris.
Mr. Desire Pector, Consul-General at Paris.

Norway—Mr. G. Gram, formerly Minister of State of Norway, Provincial Governor.
Mr. George Francis Hagerup, LL. D., formerly Minister of State and President of the Council.
Mr. Sigurd Ibsen, LL. D., formerly Minister of State.
Mr. H. J. Horst, Deputy, formerly President of the Lagthing.

Persia—His Excellency Mirza Samad-Khan Momtazos-Saltaneh, Envoy Extraordinary and Minister Plenipotentiary at Paris.
His Excellency Mirza Hassan-Khan Muchir ul Devlet, formerly Envoy Extraordinary and Minister Plenipotentiary at St. Petersburg.

Peru—Mr. Carlos G. Candamo, Envoy Extraordinary and Minister Plenipotentiary at Paris.

Portugal—His Excellency Count de Macedo, formerly Minister of Marine and Colonies, formerly Envoy Extraordinary and Minister Plenipotentiary at Madrid.
His Excellency Antonio Emilio Correa de Sa Brandao, President of the High Court of Justice, formerly Minister of Justice.
His Excellency Fernando Mattoso Santos, formerly Minister of Finances and of Foreign Affairs.
Mr. Francisco Antonio da Veiga Beirao, Counselor of State, Peer of the Realm, formerly Minister for Foreign Affairs and of Justice.

Roumania—Mr. Theodore G. Rosetti, formerly President of the Council of Ministers, formerly President of the High Court of Cassation and Justice.
Mr. Jean Kalinderu, LL. D., formerly President of the High Court of Cassation and Justice.
Mr. Jean N. Lahovary, Deputy, formerly Envoy Extraordinary and Minister Plenipotentiary, formerly Minister for Foreign Affairs, Minister of Agriculture, of Industry, of Commerce and of Domain.

PERMANENT COURT OF ARBITRATION OF THE HAGUE—*Continued.*

Mr. Constantin G. Dissescu, Minister of Worship and Public Instruction. Senator.

Russia—Mr. A. Sabouroff, Secretary of State, Member and President of the First Department of the Council of the Empire, Senator, Privy Councilor.

Mr. Tagantzeff, Member of the Council of the Empire, Senator, Privy Councilor.

Baron Taube, Permanent Member of the Council of the Ministry for Foreign Affairs, Professor of International Law at the Imperial University of St. Petersburg, Councilor of State.

Count L. Kamarovsky, Professor of International Law at the Imperial University of Moscow, Councilor of State.

Salvador—Mr. Manuel Delgado, LL. D., formerly Minister for Foreign Affairs, formerly Envoy Extraordinary and Minister Plenipotentiary, formerly Rector at the National University.

Mr. Salavador Gallegos, LL. D., formerly Minister for Foreign Affairs, formerly Envoy Extraordinary and Minister Plenipotentiary.

Mr. Salvador Rodriguez Gonzalez, LL. D., Secretary of State of the Department for Foreign Affairs, of Justice and Public Charities.

Mr. Santiago Perez Triana.

Servia—Mr. George Pavlovitch, formerly Minister of Justice, President of the Court of Cassation.

Dr. Milovan Milovanovitch, LL. D., Minister for Foreign Affairs, formerly Envoy Extraordinary and Minister Plenipotentiary at Rome.

Dr. Milenko R. Vesnitch, LL. D., formerly Minister of Justice, Envoy Extraordinary and Minister Plenipotentiary at Paris.

Siam—Mr. Frederick W. Verney, Member of Parliament, formerly Counselor of Legation at London.

Mr. Corragioni d'Orelli, Counselor of Legation at Paris.

Spain—Mr. Rafael de Urena y Smenjaud, LL. D., Professor in the Faculte of Madrid.

His Excellency S. Moret, Deputy, formerly President of the Council of Ministers.

His Excellency E. Dato, Deputy, formerly Minister of Justice.

His Excellency R. M. de Labra, Senator, Barrister at the Court of Cassation.

Sweden—Mr. Knut Hjalmar Leonard de Hammarskjold, LL. D., formerly Minister of Justice, formerly Minister of Worship and of Public Instruction, formerly Envoy Extraordinary and Minister Plenipotentiary at Copenhagen.

Mr. Johan Frederik Ivar Afzelius, LL. D., President of the Commission for the Revision of Laws.

Mr. Johannes Hellner, D. L., formerly Minister, Member of the Supreme Court.

Baron Carl Nils Daniel Bildt, LL. D., Envoy Extraordinary and Minister Plenipotentiary to Italy.

Switzerland—Mr. Charles Lardy, LL. D., Swiss Minister at Paris.

Mr. Eugene Huber, LL. D., Member of the National Council.

Mr. Leo Weber, LL. D., formerly Federal Judge, Colonel of the Military Justice, Auditor-in-Chief of the Swiss Army.

Turkey—His Excellency Gabriel Effendi, Minister of Commerce and Public Works.

His Excellency Hakky Bey, Ambassador at Rome.

His Excellency Yorghiadis Effendi, Senator.

His Excellency Said Bey, Vice-President of the Legislative Section of the Council of State.

United States—Mr. John W. Griggs, formerly Attorney-General of the United States.

Mr. George Gray, United States Circuit Judge, formerly United States Senator.

Mr. Oscar S. Straus, formerly Secretary of Commerce and Labor, Ambassador Extraordinary and Plenipotentiary at Constantinople.

Uruguay—Mr. Jose Battle y Ordonez, formerly President of Uruguay.

Mr. Gonzalo Ramirez, LL. D., formerly Envoy Extraordinary and Minister Plenipotentiary.

Mr. Juan Pedro Castro, LL. D., formerly Envoy Extraordinary and Minister Plenipotentiary at Paris and Brussels.

Venezuela—Dr. Carlos Leon, LL. D., formerly Minister of Public Instruction, formerly Member of the Court of Cassation.

Dr. Nicomedes Zuloaga, LL. D., formerly Member of the Court of Cassation.

Dr. Francisco Arroyo Parejo, LL. D., formerly Procuror-General.

Gen. Manuel Antonio Matos, formerly Senator, formerly Minister of Finance.

Secretary-General—Baron Michiels van Verduynen.

First Secretary of the Court—Jonkheer W. Roell.

The Administrative Council—The Administrative Council consists of the Minister for Foreign Affairs of the Netherlands and the diplomatic representatives at The Hague of the ratifying powers.

DECISIONS RENDERED BY THE PERMANENT COURT OF ARBITRATION AT THE HAGUE.

October 14, 1902—In the matter of the case of the Pius Fund of the Californias between the United States and Mexico.

February 22, 1904—Respecting the preferential claims of the creditor nations of Venezuela under the protocols of May 7, 1903.

May 22, 1905—In the difference between France, Germany and Great Britain on the one hand, and Japan on the other, respecting leases held in perpetuity.

May 22, 1909—In the matter of the Casablanca dispute between France and Germany.

August 8, 1909—In the matter of the dispute between Great Britain and France, respecting the right of certain Muscat Dhows to fly the French flag.

October 23, 1909—Respecting the maritime boundary between Norway and Sweden.

September 7, 1910—In the North Atlantic Fisheries case between the United States and Great Britain.

There was pending when ALMANAC went to press before the same tribunal the arbitration of the difference between the United States on behalf of the Orinoco Steamship Company and Venezuela under the protocol of February 13, 1909.

Causes of High Living Expenses.

SENATE REPORT ON THE INCREASE IN COST OF FOOD AND OTHER PRODUCTS.

THE United States Senate on February 9, 1910, adopted a resolution for the appointment of a select Committee on Wages and Prices of Commodities, with instructions to make "an exhaustive investigation into the cost of living and any increase in the same since 1900; to ascertain whether the price of the necessaries of life which enter into the general use and consumption of the people have, since the year 1900, been increased, and if so, to ascertain the cause or causes which have influenced said increase." The Committee was authorized to employ experts, administer oaths, take testimony, etc.

The Committee appointed under the resolution were Senators Lodge of Massachusetts, Chairman; Gallinger of New Hampshire, McCumber of North Dakota, Smoot of Utah, Crawford of South Dakota, Clarke of Kansas, Johnston of Alabama and Smith of South Carolina. The committee appointed Edward D. Smith Secretary and Fred. C. Croxton Statistician.

The Committee made majority and minority reports June 23, 1910.

THE MAJORITY REPORT.

The following are *extracts* from the majority report, which was quite voluminous and containing many statistical tables:

WHOLESALE PRICES.

The advance in prices has been world wide, although the products of the farm and food products have advanced much more rapidly than have manufactured articles. This is probably due to two causes; first, the prices of farm products and of food are more sensitive than manufactured commodities, and would therefore respond more quickly to causes producing higher prices; and, second, a study of the course of prices of such farm products and food as are produced in the United States indicates that the demand has outgrown the production of such commodities, and that the production of manufactured articles and of articles usually imported into the United States have outgrown our production of farm products and domestic food supplies. This condition has no doubt been brought about to a considerable extent by the withdrawal from the farms of large numbers of persons who have entered industrial pursuits and become food consumers rather than food producers, and to the rapidly increased cost of production of farm products. Data have been compiled showing prices in the United States, Canada, the United Kingdom, France, Germany, Austria, Russia, Italy and Bulgaria. Prices appear to have advanced somewhat more rapidly in the United States than in any of the above countries, excepting possibly Canada and Russia. * * *

Among the many causes contributing to the advance in prices may be enumerated:

Increased cost of production of farm products by reason of higher land values and higher wages.

Increased demand for farm products and food.

Shifting of population from food-producing to food-consuming occupations and localities.

Immigration to food-consuming localities.

Reduced fertility of land resulting in lower average production or in increased expenditures for fertilization.

Increased banking facilities in agricultural localities which enable farmers to hold their crops and market to the best advantage. This results in steadying prices, but also tends to advance prices.

Reduced supply convenient to transportation facilities of such commodities as timber.

Cold storage plants which result in preventing extreme fluctuations of prices of certain commodities with the seasons, but by enabling the wholesalers to buy and sell at the best possible advantage tend to advance prices.

Increased cost of distribution.
Industrial combinations.
Organizations of producers or of dealers.
Advertising.
Increased money supply.
Overcapitalization.
Higher standard of living.

RETAIL PRICES.

Retail prices in the United States in the Spring of 1910 were for many articles at the highest point reached for many years. As compared with the Spring of 1900 prices for bacon were more than 70 per cent. higher, ham was 33 per cent. higher, flour was about 50 per cent. higher, butter about 45 per cent. higher, sugar 12 per cent. higher, and eggs 100 per cent. higher. Some few articles, such as coffee and tea, were about the same price as in 1900, but practically no articles of food were lower than in 1900. Furniture was about the same price as in 1900. Earthenware was slightly lower. Shoes and clothing were considerably higher. Owing to the demand for high grade articles some retailers have taken advantage of the opportunity to unreasonably advance prices for articles of better grades. A large wholesale dealer in New York testified relative to egg prices: "I saw a bill here some time ago where we were charging 35 cents a dozen for eggs, and their bill to a party uptown was 75 cents a dozen." * * *

WAGES AND HOURS OF LABOR.

Wages have not advanced as rapidly as have prices and practically all labor difficulties which have been the subject of mediation in the United States during the past two or three years have had as their basis the advanced cost of living. In the United States wages have advanced much more rapidly than they have in European countries, in fact in some European countries practically no advance has been made during the ten years under consideration.

Wages in the United States advanced in about the same degree as did prices until 1907. Owing to the industrial depression of 1908, following the financial panic of the Fall of 1907, wages dropped considerably and in 1909 hardly more than regained the high point reached in 1907.

Wages at the present time are not on as high a level as are food prices. Salaries have advanced but very little during the past ten years.

INCREASED COST OF PRODUCTION OF FARM PRODUCTS.

As has already been stated, the testimony of practically all witnesses who have been familiar with farm conditions is to the effect that the cost of production of farm products has risen very rapidly during the past ten years. Wages of regular farm hands have increased from 45 per cent. to 75 per cent. during the period from 1900 to 1910. Wages of harvest hands have increased in about the same proportion. * * *

Two or three decades ago the richest of land could be procured from the Federal Government at a merely nominal cost, but the supply of Government land suitable for general farming is largely exhausted, excepting such as requires irrigation or drainage, and a much larger initial outlay is necessary in order to secure desirable farming land. The richness of the virgin soil is disappearing, and in many localities the crop average can be maintained only by the use of expensive commercial fertilizers. The cost of producing live stock has increased with the rapid disappearance of the range. Live stock is now largely produced on expensive land instead of upon the range at a merely nominal rent. The expense of

CAUSES OF HIGH LIVING EXPENSES—*Continued.*

fattening cattle has also materially increased, by reason of the advance in labor cost and the advance in feed. Another cause of the increased cost of production is the great increase in the value of farm land.

THE DEMAND FOR FARM PRODUCTS AND THE SUPPLY.

The present advance in prices, as has been stated, is primarily an advance in farm products and food of domestic production. The increased cost of production and other farm causes have already been discussed, even after all of those causes are taken into consideration, however, the advance would not have been possible unless there had been a sufficient demand for the farm products. The demand for farm products has increased more rapidly than the supply and the demand arises in our own country. The economic progress of the large mass of our people has resulted in a much greater consumption of foodstuffs. * * *

THE TARIFF.

The tariff seems to have been no material factor in causing the advance in prices during the past decade. The greatest advances have been made in commodities upon which the tariff has little or no effect, and the absolute removal of the tariff on many of these commodities could not have afforded relief at the present time, for the reason that prices of these commodities, with a few exceptions, were as high or higher in other countries than in the United States.

The advance in prices during the past ten years appears to have no relation to tariff legislation. Beginning with January, 1900, wholesale prices in general declined slightly, and the decline continued through July, 1901. Beginning with August, 1901, prices advanced very slowly through March, 1903, and then remained steady through May, 1905. Beginning with June, 1905, there was a marked increase through October, 1907. Beginning with November, 1907, prices began to decline and the decline continued through August, 1908. Beginning with September, 1908, prices steadily advanced until the highest point during the ten years was reached in March, 1910.

The advance in 1909 as compared with 1900, by groups of articles, was as follows:

	Per Cent.		Per Cent.
Products of the forest advanced	40.3	Products of mines and wells advanced	13.5
Products of the farm, crude, advanced	36.1	Products of manufactures advanced	5.7
Products of the farm, manufactured, advanced	24.2	Products of the fisheries advanced	5.1
		Imported products declined	1.7

The groups of articles which have shown the greatest advance—the products of the forests and the products of the farm—are those for which there has been practically no change in tariff during the past ten years. Neither have there been any changes during the past twenty years which could in any way account for the increase in price. The tariff acts of 1894, 1897 and 1909 have made no changes which to any appreciable degree measure the changes in prices which have taken place

The tariff act of 1909 made no marked changes in "farm products and foodstuffs," the articles grouped by the tariff acts under Schedule G, "agricultural products and provisions," and Schedule E, "sugar, molasses and manufactures of."

Where alterations were made in rates they were chiefly in the direction of reductions. Yet such changes as have been made in the tariff in these schedules have apparently had no effect on prices, as almost without a single exception the prices have advanced materially since the passage of the act without any distinction as to whether the tariff was increased or decreased. * * *

COMBINATIONS AND ASSOCIATIONS.

Many industrial combinations are not trusts in the sense of being organized for the purpose of controlling prices in restraint of trade, but by reason of manufacturing or controlling a large percentage of the output they are able to exercise some control over prices.

The prices of many of the trust produced commodities have not advanced as rapidly as have other commodities. In some cases where trust-produced commodities have advanced greatly the advance appears to be due largely to other causes, such as short supplies. Prices have advanced in other countries where trusts could not have exercised the same control over production and marketing. * * *

THE GOLD SUPPLY.

The proposition that the increase in the gold supply has affected prices rests of course on the sound economic theory that a marked increase in the monetary standard of value cheapens the standard and by cheapening it increases the amount which must be paid for a commodity. It is because the general trend of world prices has seemingly responded to the contraction or expansion of the world's supply of currency that the conclusion is reached that the present abnormal production of gold is a positive factor in forcing up the level of the world's prices and in preventing their decline. It is not contended that this increase is the dominant or even a principal cause of the rise of prices, but it undoubtedly has exerted a positive effect by cheapening the standard of price and at the same time enormously increasing the amount of credit based upon gold.

While the actual increase in the world's gold supply has been very great, the increase in the credit based upon gold has far exceeded it. Some of our best economists estimate that there is an increase in credit of from $3 to $4 to $1 in gold. In seems certain, therefore, that this enormous increase in the standard by which all other commodities are measured has surpassed the normal increase required for the growing volume of the world's business, and if this be true, the result must be a cheapening of the standard with a consequent advance in price. In other words, the recent increase in production of the standard of value bringing with it a still greater increase in credit, has of necessity decreased the value of the standard and thereby increased the price of the commodities which it measures. To what extent this increase of gold production has influenced prices can not, of course, be determined, but that it has been an element in bringing about an increase in the world's prices can not, we think, be denied.

THE LABOR UNIONS.

Labor unions have not been apparently a serious factor in contributing toward advancing prices. Since the financial panic of the Fall of 1907 wages have not advanced as rapidly as prices.

COST OF DISTRIBUTION.

The expenses of distributing food products by wholesalers and retailers have increased by reason of the increase in rents, taxes, wages and cost of horses and horse feed.

The method usually followed by the housewife in buying in very small quantities adds materially to the cost, but no particular change has taken place in this respect during the past ten years. In the cities, orders for delivery often consist of a single article such as "half a dozen eggs"; "a quarter peck of potatoes"; "two pounds of sugar," etc. The cost of delivering a small order is practically the same as the cost of delivering a much larger one, in fact in some cases the cost is larger by reason of the fact that many of the small orders are "rush" orders and delivery is made by a boy or man who takes with him only

CAUSES OF HIGH LIVING EXPENSES—*Continued.*

the single order. Under present housing conditions a return to old methods of purchase are impossible for the reason that apartments and many modern houses do not provide facilities for storing any considerable quantity of foodstuffs and supplies. Where the housewife can purchase in larger quantities and directly from the producer, a great saving is accomplished.

Advertising has grown unreasonably during the past few years, especially is this true of package goods. The cost of advertising has likewise advanced. Many articles are sold largely in packages or glass jars more or less expensive. The cost of advertising and also the cost of packages must ultimately be paid by the consumer. The package articles are often much more attractive than other articles, but in many cases the goods are of no higher quality, the expense per pound or per dozen is much greater than for goods from bulk, and the package for which the customer has paid full value is thrown away as soon as the goods are used. * * *

COLD STORAGE.

Cold storage plants have tended to level prices although they have enabled the dealers to take the best possible advantage of conditions, both in purchasing when prices are low and in selling when prices are high. The Committee recommended to Congress a bill limiting the time food products may be kept in cold storage.

OVERCAPITALIZATION.

Overcapitalization of transportation and industrial companies has the effect of advancing prices. The effect of overcapitalization may not be to immediately increase the amount of dividends paid, but an increase of capital usually results in a greater amount of dividends. Increased dividends must mean increased earnings and the increased earnings come from the consumer.

IMMIGRATION.

The number of immigrants arriving in the United States during the period from 1900 to the present time was 8,202,288. Of the total number 5,110,052 were males, and 2,492,336 were females. More than 80 per cent. of the total number, or 6,803,05, were at the most productive period of life; that is, between 14 and 44 years of age. Of this enormous number of people only a very small per cent. have entered agricultural pursuits, but practically all of them have entered industrial pursuits and instead of being producers of food they have become consumers and by reason of becoming consumers instead of producers they have contributed in no small way toward advancing prices of food products. This abundance of labor has also tended to prevent more than a slight rise of wages in many industries which the immigrants have entered in great numbers.

The majority report was signed by Senators Lodge, Gallinger, McCumber, Smoot and Crawford.

THE MINORITY REPORT.

The conclusions of the minority of the committee were as follows:

We find the three substantial causes for the advance in prices are—

(1) The tariff. (2) Trusts, combines and monopolies. (3) Increased money supply.

We are without sufficient data to apportion the degree of responsibility among these three causes, but that the first two are the chief malefactors we have no doubt, and they are of our own creation.

Extracts from the report follow:

Regarding the finding of the majority of the committee that the increased cost of production of farm products by reason of higher land values and higher wages was a cause of the advance of prices the minority quoted Professor Carter of Harvard University, as saying:

"This is a perfectly clear case of putting the cart before the horse. Every student of economics knows that the high price of land is not a cause, but the effect of the high price of farm products. Let the price of farm products fall to the unremunerative level and land values will disappear for the simple reason that farm land then becomes undesirable property. Let the price of farm products rise still higher, and farm land becomes more desirable and its price will rise higher. There is no reason why land should command a high price for farming purposes, except a rise in the price of farm products or a fall in the cost of cultivating the land. To say that farm products are high because land values are high is quite as foolish as saying a tree is tall because its shadow is long."

The minority admitted that increased demand for farm products—the supply not responding—will increase prices, but quoted statistics of production in recent years of wheat, corn and potatoes to show that there had been a very large increase; that of wheat from 1900 to 1909 being over 40 per cent.; of corn over 30 per cent. and potatoes over 80 per cent.

Other statements of causes of increased cost of living by the majority were briefly criticised by the minority report:

THE TARIFF.

A large part of the space of the report devoted to the tariff was a discussion of the theory of Protection and of its relation to the present advance in prices. Of the opinion of the majority that the prevailing tariff was not a factor in this advance the report said:

The majority acquit the tariff of being an accessory, either before or after the fact, to the increased cost of living. They say, "The tariff has been no material factor in causing the advance in prices during the past decade." The majority are careful not to go behind the period of the enactment of the Dingley bill (1897), but, if they mean that there have been no increases in the tariff on any of the necessaries of life, we shall presently show that the facts are otherwise. Even if no change had been made, the tariff was already adding largely to the cost of living, and we shall insist that, whilst the tariff was being "revised" on the heels of a disastrous panic, resulting in a large reduction of wages to laborers and hardships to the people generally, and with the advancing tide of higher wages sweeping over the country, the failure to meet these conditions and reduce these exactions can not exculpate the majority from responsibility for the distress that has come upon the country.

"When the Payne-Aldrich bill was under consideration last year the majority of the committee stood unflinchingly with its framers, and against every effort even to adjust it to "the difference between the cost of production abroad and at home, plus a reasonable profit to the manufacturers." They stood for an unreasonable profit and secured it. It is difficult to understand how any one can favor high rates of duty if he does not honestly believe that it will increase the prices to be realized by the manufacturers producing the article affected, by diminishing or destroying competition, and thus necessarily increasing the cost to the consumer. * * *

We believe that the amount of the tariff is added to the price and taxed to the consumer; that but for the tariff the commodities we buy upon which that tax is laid would be cheaper, approximately to the extent of the tariff; and that when we do not buy the imported article the protected manufacturer puts approximately the amount of it on the goods produced by him.

CAUSES OF HIGH LIVING EXPENSES—*Continued.*

TRUSTS.

Mr. Moody, in his book on trusts, states that they began in 1898. The soil was made so fertile by the Dingley tariff that they took root and grew so rapidly that Congressman Littlefield, early in 1903, gave a list of 800, with a capitalization of $14,000,000,000. Most of them sprang into existence after the passage of the Dingley bill. Census Bulletin No. 122, 1900, gave a list of 183, of which only 63 antedated the Dingley law; 7 were formed in 1897; 20 in 1898; 79 in 1899—a gain in a little over two years of nearly 100 per cent. over all the period prior to the passage of that bill. It was during this period that the greatest advances in the cost of living occurred—the advance from July, 1897, to January, 1900, was 31 per cent., about 12 per cent. per annum—so this accounts for the fact that manufactured products have not since 1900 kept pace in advance with other commodities, having an advantage of 30 per cent. to start on.

There are few trusts that could survive a revenue tariff. They flourish only under the shadow of high protective walls. Standing behind these walls that shut off foreign competition and destroying domestic competition by consolidations and absorptions, they are limited only to selling at a fraction less than the foreign price plus the protective duty. That they reduce cost of production seems certain, but it is in rare cases that the public or the laborers employed by them participate in the enlarged profit. So enormous have been their profits that we find organizations springing up all over the country, like the Elgin Board of Trade, the wholesale grocers, lumber dealers—associations that have contributed largely to the advance in prices and the frauds perpetrated by manufacturers of certain goods in reducing the weight or contents of packages from 20 to 50 per cent. and maintaining the same price. Convictions have been effected in some cases in Iowa, Nebraska and Illinois for selling canned corn of less weight than that marked on the package. Other cases just as grave shown before the committee escape indictment by not stating in the package the weight of its contents. * * *

INCREASED MONEY SUPPLY.

We agree with the majority that the increase in gold supply has affected the prices of commodities, and also in their statement that it is "not the dominant, or even a principal cause of the rise of prices." We are glad to be able to concur with the majority in a matter of such vital interest.

We accept as true the statement of John Stuart Mill that: "The value of money is inversely as general prices—falling as they rise and rising as they fall." When one speaks of the price of a commodity rising, it means just the same as if one should say that the price of money with respect to that commodity has declined. That there has been a rise in the prices throughout the world seems to be true, but the extent of the rise has not been the same everywhere.

The minority report was signed by Senators Johnston, Clarke, and Smith of South Carolina.

Publicity of Political Contributions.

THE Federal act of June 25, 1910, providing for publicity of contributions made for the purpose of influencing elections at which Representatives in Congress are elected, is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the term "political committee" under the provisions of this act shall include the national committees of all political parties and the national congressional campaign committees of all political parties and all committees, associations or organizations which shall in two or more States influence the result or attempt to influence the result of an election at which Representatives in Congress are to be elected.

SEC. 2. That every political committee as defined in this act shall have a chairman and treasurer. It shall be the duty of the treasurer to keep a detailed and exact account of all money or its equivalent received by or promised to such committee or any member thereof, or by or to any person acting under its authority or in its behalf, and the name of every person, firm, association or committee from whom received, and of all expenditures, disbursements and promises of payment or disbursement made by the committee or any member thereof, or by any person acting under its authority or in its behalf, and to whom paid, distributed, or disbursed. No officer or member of such committee, or other person acting under its authority or in its behalf, shall receive any money or its equivalent, or expend or promise to expend any money on behalf of such committee, until after a chairman and treasurer of such committee shall have been chosen.

SEC. 3. That every payment or disbursement made by a political committee exceeding ten dollars in amount be evidenced by a receipted bill stating the particulars of expense, and every such record, voucher, receipt, or account shall be preserved for fifteen months after the election to which it relates.

SEC. 4. That whoever, acting under the authority or in behalf of such political committee, whether as a member thereof or otherwise, receives any contribution, payment, loan, gift, advance, deposit, or promise of money or its equivalent shall, on demand, and in any event within five days after the receipt of such contribution, payment, loan, gift, advance, deposit, or promise, render to the treasurer of such political committee a detailed account of the same, together with the name and address from whom received, and said treasurer shall forthwith enter the same in a ledger or record to be kept by him for that purpose.

SEC. 5. That the treasurer of every such political committee shall, within thirty days after the election at which Representatives in Congress were chosen in two or more States, file with the Clerk of the House of Representatives at Washington, District of Columbia, an itemized, detailed statement, sworn to by said treasurer and conforming to the requirements of the following section of this act. The statement so filed with the Clerk of the House of Representatives shall be preserved by him for fifteen months, and shall be a part of the public records of his office, and shall be open to public inspection.

SEC. 6. That the statements required by the preceding section of this act shall state:

First. The name and address of each person, firm, association, or committee who or which has contributed, promised, loaned, or advanced to such political committee, or any officer, member, or agent thereof, either in one or more items, money or its equivalent of the aggregate amount or value of one hundred dollars or more.

Second. The total sum contributed, promised, loaned, or advanced to such political committee, or to any officer, member, or agent thereof, in amounts less than one hundred dollars.

Third. The total sum of all contributions, promises, loans, and advances received by such political committee or any officer, member, or agent thereof.

Fourth. The name and address of each person, firm, association, or committee to whom such political committee, or any officer, member, or agent thereof, has disbursed, distributed, contributed, loaned, advanced, or promised any sum of money or its equivalent of the amount or value of ten dollars or more, and the purpose thereof.

Fifth. The total sum disbursed, distributed, contributed, loaned, advanced, or promised by such political committee, or any officer, member, or agent thereof, where the amount or value of such disburse-

PUBLICITY OF POLITICAL CONTRIBUTIONS—*Continued.*

ment, distribution, loan, advance, or promise to any one person, firm, association, or committee in one or more items is less than ten dollars.

Sixth. The total sum disbursed, distributed, contributed, loaned, advanced, or promised by such political committee or any officer, member, or agent thereof.

SEC. 7. That every person, firm, association or committee, except political committees as hereinbefore defined, that shall expend or promise any sum of money or other thing of value amounting to fifty dollars or more for the purpose of influencing or controlling, in two or more States, the result of an election at which Representatives to the Congress of the United States are elected, unless he or it shall contribute the same to a political committee as hereinbefore defined, shall file the statements of the same under oath, as required by section six of this act, in the office of the Clerk of the House of Representatives, at Washington, District of Columbia, which statements shall be held by said Clerk in all respects as required by section five of this act.

SEC. 8. That any person may in connection with such election incur and pay from his own private funds for the purpose of influencing or controlling, in two or more States, the result of an election at which Representatives to the Congress of the United States are elected all personal expenses for his travelling and for purposes incidental to travelling, for stationery and postage, and for telegraph and telephone service without being subject to the provisions of this act.

SEC. 9. That nothing contained in this act shall limit or affect the right of any person to spend money for proper legal expenses in maintaining or contesting the results of any election.

SEC. 10. That every person willfully violating any of the foregoing provisions of this act shall, upon conviction, be fined not more than one thousand dollars or imprisoned not more than one year, or both.

Creation of a Commerce Court.

THE Congress of the United States, June 18, 1910 passed "An act to create a Commerce Court and to amend 'An act to regulate commerce, approved February 4, 1887, as heretofore amended, and for other purposes." The provisions for the creation of the Commerce Court were as follows:

A court of the United States is hereby created which shall be known as the Commerce Court and shall have the jurisdiction now possessed by Circuit Courts of the United States and the judges thereof over all cases of the following kinds:

First. All cases for the enforcement, otherwise than by adjudication and collection of a forfeiture or penalty or by infliction of criminal punishment, of any order of the Interstate Commerce Commission other than for the payment of money.

Second. Cases brought to enjoin, set aside, annul, or suspend in whole or in part any order of the Interstate Commerce Commission.

Third. Such cases as by section three of the act entitled "An act to further regulate commerce with foreign nations and among the States," approved February 19, 1903, are authorized to be maintained in a Circuit Court of the United States.

Fourth. All such mandamus proceedings as under the provisions of section twenty or section twenty-three of the act entitled "An act to regulate commerce," approved February 4, 1887, as amended, are authorized to be maintained in a Circuit Court of the United States.

Nothing contained in this act shall be construed as enlarging the jurisdiction now possessed by the Circuit Courts of the United States or the judges thereof, that is hereby transferred to and vested in the Commerce Court.

The jurisdiction of the Commerce Court over cases of the foregoing classes shall be exclusive, but this act shall not affect the jurisdiction now possessed by any Circuit Court or District Court of the United States over cases or proceedings of a kind not within the above-enumerated classes.

The Commerce Court shall be a court of record, and shall have a seal of such form and style as the court may prescribe. The said court shall be composed of five judges, to be from time to time designated and assigned thereto by the Chief Justice of the United States, from among the circuit judges of the United States, for the period of five years, except that in the first instance the court shall be composed of the five additional circuit judges to be appointed as hereinafter provided, who shall be designated by the President to serve for one, two, three, four and five years, respectively, in order that the period of designation of one of the said judges shall expire in each year thereafter. In case of the death, resignation or termination of assignment of any judge so designated, the Chief Justice shall designate a circuit judge to fill the vacancy so caused and to serve during the unexpired period for which the original designation was made. After the year 1914 no circuit judge shall be redesignated to serve in the Commerce Court until the expiration of at least one year after the expiration of the period of his last previous designation. The judge first designated for the five-year period shall be the presiding judge of said court, and thereafter the judge senior in designation shall be the presiding judge.

Each of the judges during the period of his service in the Commerce Court shall, on account of the regular sessions of the court being held in the city of Washington, receive in addition to his salary as circuit judge an expense allowance at the rate of one thousand five hundred dollars per annum.

The President shall, by and with the advice and consent of the Senate, appoint five additional circuit judges, no two of whom shall be from the same judicial circuit, who shall hold office during good behavior and who shall be from time to time designated and assigned by the Chief Justice of the United States for service in the Circuit Court for any district, or the Circuit Court of Appeals for any circuit, or in the Commerce Court.

The associate judges shall have precedence and shall succeed to the place and powers of the presiding judge whenever he may be absent or incapable of acting in the order of the date of their designations. Four of said judges shall constitute a quorum, and at least a majority of the court shall concur in all decisions.

The act further provides for the appointment of a clerk and marshal. The court shall be permanently open. Its regular sessions shall be held in Washington, but it may hold sessions in different parts of the United States as may be found desirable. In all cases within its jurisdiction it may exercise any and all the powers of a Circuit Court of the United States. Its jurisdiction may be invoked by the filing of written petitions setting forth the petitioner's cause of action and specifying the relief sought. Appeals may be taken to the Supreme Court of the United States.

State Legislation in 1910.

THE following summary of legislation by States in 1910 is compiled by permission from a statement prepared for President Charles F. Libby, of the American Bar Association, by Clement F. Robinson, which was attached to the address by the President delivered at the annual meeting of the association in August, 1910. Only the more prominent features of the legislation are covered in this summary, the statement by Mr. Robinson being quite elaborate and exhaustive.

During the twelve months prior to August 1, 1910, regular legislative sessions were held in Georgia, Kentucky, Louisiana, Maryland, Massachusetts, Mississippi, New Jersey, New York, Ohio, Rhode Island, South Carolina and Virginia. There were special sessions for specific objects in Illinois, Montana, New York, Oklahoma, Texas and Washington.

Agriculture—Kentucky and Virginia, where hog cholera has brought heavy financial loss in recent years, provided for the distribution of preventive serum. Other acts in these States along the lines of legislation now common in this country, required the inspection and testing of cattle suspected to be suffering from cattle diseases, and especially tuberculosis, and arrange for the destruction of the animals if the suspicions are verified. In both States the examination can be made only at the owner's request, but in Kentucky the owner who does not report his suspicions is heavily penalized. In Maryland the sale of tuberculin and mallein for testing diseased cattle, and of vaccine for glanders, was regulated and penalties were imposed for selling tuberculous cattle. New York had a new act in regard to the care and keeping of cows. Virginia authorized the creation of drainage districts for the improving of the swamp lands of the State, and Ohio permitted county commissioners to cause marsh lands to be drained and reclaimed for agricultural purposes. In both States the expenses are to be assessed as betterments on the lands benefited. Virginia established instruction in agricultural high schools, and Mississippi created county agricultural high schools by a law passed in substitution for an earlier act which had been held unconstitutional because it was applicable only to the whites. In Kentucky, where commercial trusts and combinations in restraint of trade are illegal, it is now lawful, if the legislation in 1910 is constitutional, for farmers to agree to abstain from growing any kind of crop for any given period or season and to combine or pool crops of certain mentioned commodities in order to obtain a higher price therefor. Such agreements may be recorded and have the same effect as chattel mortgages, and the buyer or solicitor of pooled property is liable to fine and imprisonment. It was declared by the Legislature that an emergency existed, requiring the act permitting pooling to take immediate effect.

Automobiles—Kentucky licensed automobiles and New Jersey licensed motor-boats. The Kentucky act prescribed the following registration fees: $5 for a car of less than 25 horse-power, $10 for a car of from 25 to 50 horse-power and $20 for a car of over 50 horse-power. The general speed limit is whatever is "reasonable and proper" under the circumstances of the time and place, but a rate in excess of eight miles an hour on corners and at curves or crossings, ten miles an hour in business sections, fifteen miles in residential districts and twenty miles an hour elsewhere was made prima facie unreasonable. Non-residents complying with their home regulations in regard to registration need not register in Kentucky.

The Virginia act had the following fees: $5 for cars of 20 horse-power or less, $10 for cars of from 20 to 45 horse-power, $20 for a larger car, $2 for motorcycles and $50 for dealers. The speed limit clause set a flat limit of twenty miles in rural regions, except on curves, hills and cross-roads (where it is eight miles); it left the fixing of lower rates of speed in incorporated places to local ordinance, the limit to be twelve miles in the absence of ordinances.

Maryland added twenty-one new sections in revising its automobile law. The registration fees were fixed at $6 for cars of 20 horse-power or less, $12 for cars of from 20 to 40 horse-power, $18 for the larger cars, $3 for motorcycles, $12 for motorcycle dealers, $24 for other dealers. The speed limits were fixed at twelve miles in business sections, eighteen miles in the suburbs and twenty-five miles in the country. Localities which adopt special regulations must conspicuously post them. Brakes, bells, lights and careful operation of the car were covered by special paragraphs, and there was a penalty for tampering with the cars of others, for using them without the owner's consent, or for strewing on the highway broken glass or other articles likely to injure automobiles.

In revising its automobile act New York exempted from taxation as property all automobiles except commercial cars. The State fees range from $5 for cars of 25 horse-power or less to five times that amount for cars of 50 horse-power. After four years' fees have been paid the rate to be paid by any car is halved thereafter. Manufacturers and dealers must pay $15 and $1 additional for each number plate, and owners of commercial cars pay $5 for each car. There is a reciprocal clause applicable to all non-residents. Chauffeurs must pass an examination before obtaining a license.

Banks and Banking—New York passed a new act for licensing and regulating private banking. Both a deposit of $10,000 with the State Comptroller and a bond with sufficient sureties are required under heavy penalties; reports and inspections are required, and the public must have access to quarterly reports of assets and liabilities. Moneys received for transmission to a foreign country must be forwarded within five days. Hotel-keepers, telegraph companies, express companies and private bankers who do business of less than $500 in amount annually, or file bonds for $100,000 in New York City and $50,000 elsewhere, were exempted from the act.

An act passed by Massachusetts permits the Bank Commissioner to take possession of a savings bank or trust company whose capital has been impaired or charter violated, or when its business has been conducted in an unsafe or unauthorized manner. Another Massachusetts act gave the same commissioner authority to order an appraisal of real estate on which an excessive loan seems to have been made, and to give such directions as the appraisal shows to be proper. The same act permits the Supreme Court to authorize a scaling down of all depositors' accounts when a savings bank has made unfortunate investments. A third Massachusetts act prohibited extraordinary alterations in savings bank buildings in excess of a cost of $10,000 without the approval of the Bank Commissioner.

In Ohio the publication, either orally or in writing, of statements derogatory to a bank was made a criminal offence.

In New Jersey minors may become bank depositors and thereby become vested with all the rights of adult depositors and subject to all their liabilities.

Boards of Examination—Virginia created a board for the examination and registration of

STATE LEGISLATION IN 1910—*Continued.*

dentists, and another for public or chartered accountants. Georgia provided such a board for osteopaths, Massachusetts for nurses and Maryland and New Jersey for midwives.

Child Labor—In New York the child labor laws were amended by two acts, so that now no minor under sixteen years of age is permitted to work in any mercantile establishment, office, hotel or as a messenger more than fifty-four hours a week, nine hours a day, or between 7 at night and 8 in the morning. No female between sixteen and twenty-one years of age is permitted to work more than sixty hours a week, ten hours a day, in any mercantile establishment, except during the week before Christmas. At least forty-five minutes must be allowed for the noon meal, and at least twenty minutes for supper if the work lasts until 7 at night. No minors under sixteen years of age may be employed to run elevators of a speed greater than 200 feet a minute, or to work in connection with certain specified machines, or with acids, paints, matches or powder; or in breweries or distilleries; and no girl under sixteen years of age is permitted to work in any place where she must stand constantly; no male under sixteen or female under twenty-one years of age may clean machinery while in motion. No male under eighteen and no female whatever may work at a polishing wheel.

In New Jersey it was provided that no minor under sixteen years of age is to work more than fifty-five hours a week, or more than ten hours a day; no minor under fifteen years of age is now permitted to work between 6 at night and 6 in the morning, and after July 4, 1911, no minor under sixteen years of age will be permitted to work during those hours.

In Kentucky the Child Labor act was extended in application. It had applied merely to factories, mines and mercantile establishments; hereafter it is to include business offices, telegraph offices, hotels, restaurants, apartments and boarding houses. In none of these occupations are children between fourteen and sixteen years of age to be employed without an age and schooling certificate.

In Rhode Island, by an amendment to the Child Labor act, no child under fourteen years of age may be employed in any factory or business establishment; none under sixteen years of age between the hours of 8 at night and 6 in the morning, nor unless the child has a school certificate.

Maryland forbade the employment of children under fourteen years of age as carriers of telegrams or messages, and of children under sixteen years of age between the hours of 8 at night and 8 in the morning for any purpose. This State also forbade the employment of any minors to call at houses of ill-repute or even of questionable character.

Virginia made it a misdemeanor for parents or guardians to refuse to support children under fourteen years of age. Kentucky went further, and punishes any person who directly promotes or contributes to conditions which render any child dependent, neglected or delinquent, and ordered that the act shall be liberally construed in favor of the State, to protect children from neglect of parental duty, even though the person at fault be no relative of the child.

Conservation of Natural Resources—For several years the conservation of natural resources has occupied legislative attention. Many States have appointed State conservation commissions, as a result of the conference of Governors which was called by President Roosevelt in 1907. The only State added to that list during 1910 was Maryland. The commission is made up of three unpaid members, who are to study the problem of conservation, co-operate with conservation boards of other States and with the Federal Government, and to prepare publications on the subject.

The only other legislation during the year of like character was in New York, where the Forest, Fish and Game Commission was given an appropriation of $10,000 to purchase and propagate trees to reforest lands in the forest reserves.

Constitutional Amendments—Besides the action of several States on the income tax amendment to the Federal Constitution there was only one other State this year which sought another amendment to the Federal Constitution—Maryland, which requested Congress to submit to the States the amendment authorizing the election of United States Senators directly by the people.

Fewer amendments than usual to State Constitutions were proposed by the Legislatures of 1910. In Massachusetts the Legislature defeated a proposition submitted to it with the approval of the previous year's Legislature for a taxation amendment which would permit a classification of property at different rates of taxation. The previous Legislature was led to submit the amendment by an adverse Supreme Court decision upon the constitutionality of a scheme for a uniform low tax rate on certain forms of investment which had been proposed in a report of the Tax Commission as a solution of part of the perennial difficulty with the general property tax. The Legislature of 1910 was led to its adverse action by a special report of a committee of three, which took the ground that the proposed amendment would open the way of discrimination, injustice and oppression.

Both the Massachusetts and New York Legislatures submitted to the Legislatures of 1911 amendments permitting the Legislature by special act to authorize the taking of sufficient extra land on both sides of a proposed or improved highway so that the sale of the surplus after the improvements should be completed would help defray the cost of the changes.

The Maryland Legislature voted to submit to the people an amendment to the Constitution requiring the use at elections of the Australian ballot and defining persons entitled to registration. The same Legislature voted to submit another amendment providing for the apportionment of legislative districts and for the government of Baltimore. Virginia, which about ten years ago adopted a new Constitution, proposed a number of small amendments to it. The most significant extended the legislative session from sixty to ninety days. Mississippi offered three small amendments to its Constitution. Ohio offered an amendment to its Constitution dealing with the method of submitting to the voters the question of a constitutional convention, which, by the terms of the Constitution, required that it be submitted to the people in 1910.

Courts—The only important change of the year in the composition of the judiciary was in Mississippi, where two Supreme Court commissioners, seven Circuit judges, three chancellors and a prosecuting attorney for each county were added.

Crimes, Penalties and Corrections—Ohio passed an act "to punish the making or use of false statements to obtain property or credit" which greatly enlarged the scope of the class of offences. The same State revised the law for the punishment of dishonest peddlers. Unlawful use of trade names or imitations thereof and of stencils for boxes containing garden produce were made criminal in Maryland. Obscene shows and entertainments "tending to corrupt the morals of youth" were made criminally punished in Massachusetts. Georgia protected the good name of its women by a statute making it a misdemeanor to defame a virtuous female. Kentucky defined the crime of abortion and increased its punishment. Kentucky punished by fine persons guilty of cruelty to animals, and authorized the destruction of diseased and neglected animals by the proper officials.

STATE LEGISLATION IN 1910—*Continued.*

Disorder or drunkenness on cars of common carriers or in stations was made punishable in Kentucky and Mississippi.

The stealing, destruction, mutilation or concealment of a will was made punishable by fine or imprisonment or both in New York. The burial of human remains on State canal lands was made a misdemeanor in the same State.

It was made a misdemeanor in Virginia to swear over the telephone or to abuse a person or his female relatives in such a manner as to lead to a breach of the peace, and it was made larceny to refuse within twenty-four hours to pay for or redeliver goods received C. O. D., or to obtain money or property on bad checks or drafts. Insufficiency of deposit was made prima facie evidence of criminal intent.

Apparently the agitation of a few years ago for the abolition of the death penalty has spent itself, for no State in 1910 took such a step. Kentucky, however, substituted the electric chair for the rope.

Virginia passed an act permitting minors under seventeen years of age, depraved or vicious, or convicted as first offenders of crimes other than rape, to be placed in homes or institutions instead of jails. The same State permitted the release of prisoners on probation under the care of a police probation officer appointed by the judge under the supervision of the State Charity Commission.

Kentucky provided for indeterminate sentences, the limits of which are to be fixed by the judge in felonies, by the jury in misdemeanors. One of the two State penitentiaries was set apart as a reformatory for prisoners under thirty years old who are not yet hardened criminals. There the prisoners are to be educated, credited with a part of their earnings, and in the discretion of the board of managers eventually paroled and discharged. There was also established an employment agency for paroled prisoners.

New Jersey's prison legislation concerned itself with female prisoners. Sheriffs were authorized to appoint jail matrons, and a State reformatory for women over seventeen years of age was established.

Massachusetts enacted that prison-made goods shall be sold to public institutions instead of in open market—a law for which union labor has been stoutly contending. In Oklahoma prison-made goods sold in the State are to be labelled so as to identify the source of manufacture.

Ohio, following the lead of Illinois in the effort to reach in some way offenders who have assisted "Judge Lynch," authorized the Governor to remove any sheriff who shall permit a mob to take a prisoner from his custody.

Education—New York established a retirement fund for teachers who have reached the age of seventy years and who have been connected with the State educational institutions at least ten years and have taught thirty years in all. In case of disability retirement is authorized at the age of sixty-five. Each pensioner receives half his salary at the date of retirement, and in any event at least $300 as a minimum. Maryland added Esperanto to the subjects that may be taught in the schools.

Employers' Liability and Workmen's Compensation—No State in 1910 adopted a complete employers' liability law, but extensive legislation was forecasted by the creation of commissions in Illinois, Ohio, Massachusetts and New Jersey to investigate these subjects. New Jersey appointed a second commission to report on the allied subject of old-age pensions.

By an amendment to its employers' liability law Ohio provided that contributory negligence of the employee is no bar to recovery when it is "slight" and the employer's negligence is "gross" in comparison, but the employer's violation of a safety statute, as in Georgia, makes the contributory negligence of the employee immaterial. The doctrine of "assumption of risk" in the occupations covered by the acts was abrogated in both States, and in both States attempts to contract away the benefit of the statute were made void. Ohio declared that minor employees, working contrary to the child-labor laws, are not deemed guilty of contributory negligence, nor to have assumed any risk, but the employer may show the fraud or misrepresentation of such minor employee in mitigation of damages. Ohio also gave the right to an employee to begin a new action within one year from final judgment against him otherwise than on the merits, although the statutory time limit has meantime expired.

New York took a step toward State insurance of workmen against accidents by permitting the risk of accident to be voluntarily assumed by the industry. Both employer and employed may consent in writing to a compensation plan. Thereafter workmen are barred from all other rights of action for any injury not caused by the employer's disobedience to orders of the Superintendent of Labor, or by his own "wilful or serious misconduct." Except for accidents caused by the employee's wilful misconduct, the employer is to pay in compensation for any injury leading to the workman's death a sum equivalent to 1,200 times his daily wage if he leaves a dependent widow or child, or a proportion thereof in certain cases. The maximum payment is $3,000. If he leaves no dependent widow or child the employer is to defray the employee's funeral expenses up to $100. When the injury does not lead to death, but the employee is totally or partially incapacitated for work, the employer is to make weekly payments not more than 50 per cent. in amount of the employee's full time weekly wage. Disputes are to be settled by agreement or arbitration, or a law suit may be brought as on a written contract, and a lump sum given the plaintiff as a judgment. The employee's claim is not assignable or attachable, is on the preferred basis of a claim for daily wages, and no attorney can claim a lien thereon unless with the approval of the court. The contract between employer and employee may be cancelled by either party on sixty days' notice to the other. The act is not applicable to railroads.

Family Relations—There was no divorce legislation in 1910 prior to August 1.

Food and Drug Regulations—Maryland and Mississippi comprehensively forbade misbranding and adulteration. Several States provided for special cases. Massachusetts set forth the proper label for wood alcohol; New Jersey and Ohio defined adulteration of spirits of turpentine. Virginia prohibited the use of opium in cigarettes or their wrappers. Massachusetts permitted local boards of health to enter and inspect food warehouses.

The cocaine evil was met by stringent legislation in Massachusetts, Ohio, Oklahoma and New York. The sale of this drug, already restricted, was surrounded with additional safeguards. Massachusetts went so far as to authorize search warrants for the discovery of concealed supplies and the confiscation of the drug when found. The same State regulates the sale of morphine and other narcotic drugs, whether singly or in composition, requiring a bona fide physician's prescription ex-

STATE LEGISLATION IN 1910—*Continued.*

cept in the case of cough mixtures and similar medicines containing a small proportion of the noxious ingredient.

Health and Sanitation—New Jersey passed a law declaring tuberculosis an infectious disease, requiring physicians' reports, examination of sputum, disinfection of premises, care of the diseased and distribution of circulars of information. Violation of the law was made a misdemeanor. Accompanying it were three other measures. The first appropriated $10,000 for the study, prevention and treatment of tuberculosis, under the direction of the State Board of Health, by publication, State exhibits and special inspectors. The other acts, on the one hand, authorized counties to establish tuberculosis hospitals, subject to inspection by the State Board of Charities and the State Board of Health, but, on the other hand, required that the location of such hospitals must be approved by the State Board of Health only after due notice to the public and a hearing of remonstrants.

Mississippi adopted a requirement that practicing physicians, under penalty of a fine of $10 to $50, shall report all cases of the disease to the State Board of Health in order that it may send the patient proper instructions for regaining his health and prevent contagion. Virginia passed a law of similar import, extending to all diseases which may be listed by the State Board of Health as contagious or communicable. Ohio permitted city boards of education to establish special elementary schools for tuberculosis children. Massachusetts provided for tuberculosis exhibits in the public schools, and Mississippi required placards on the school room walls with information regarding tuberculosis and the abuse of alcohol.

Massachusetts provided for the sanitary inspection of jails and police stations, and the approval by the State Board of Health of the plans of construction of the new buildings. The commissioners of shell fisheries in Rhode Island were made sanitary inspectors of all shell fish grounds, and New Jersey provided for like supervision of its oyster and clam beds by the State Board of Health.

Labor and Factories—An act passed by Maryland requires the Public Printer to affix the union label to all State printing. Massachusetts requires those who advertise for new workmen during strikes and lockouts to specify the condition that exists. Kentucky established the eight-hour day for all laborers and mechanics employed on public works either by the State or a contractor.

Liquors—The most important measure of the year was the so-called "bar and bottle" act in Massachusetts. This forbade the use on the same premises of a license for selling in containers and a license for an open bar. Ohio forbade the giving away at bars of food other than pretzels, crackers and cheese. New York revised the list of persons to whom the sale of liquors is forbidden and in the prohibition included minors under eighteen, habitual drunkards, Indians, intoxicated persons, inmates of State institutions and persons to whom a dealer has been requested in writing not to sell by some member of the person's family. Virginia loosened restriction by permitting licensed incorporated country clubs, organized as social clubs, to dispense ardent spirits to members or to bona fide guests.

Public Utilities—In New Jersey it was provided that the Board of Railroad Commissioners is henceforth to be called the Public Utility Commissioners. They are to receive salaries of $6,000 each and have a secretary with a maximum salary of $4,000, but the total expenses of the board are limited to $40,000. Subject to their jurisdiction are railroads, street railroads, canals, subways, pipe lines, traction, gas, electric, water, express, sewer, telephone and telegraph companies, and other companies "operating for public use within the State a franchise obtained from the State or municipality." The Commission is to supervise all these utilities. Appeal from the decisions of the board lies to the courts, and appeals to the board lie from municipal ordinances and regulations. Incidentally the act forbids free transportation and other favors to municipal officers except when in uniform and on duty.

A public utilities act passed by Maryland provided for the appointment of a board of members for terms of six years. The jurisdiction of the board embraces railroads, street railroads and other "common carriers," gas, water, electric, telephone, telegraph and all companies engaged in the "transportation of property or freight." The chief powers of the commission are: to require safe, adequate, just and reasonable service, in accordance with the careful definitions of the act; to order railroads to furnish side track and switch connections, and additional cars or trains when needed; to prescribe systems of accounting; on complaint or on its own motion and after a hearing, to disallow railroad rates and fix a maximum, and to this end no changes in transportation rates are to be made effective in less than thirty days unless the commission by special order allows a shorter period; after hearing, on complaint or on its own motion to order substitution of proper transportation service or regulations for unreasonable or inadequate conditions; to approve local public utility rates as a condition of their validity; to prohibit unjust discriminations, permitting, however, mileage, excursion and commutation tickets and passes to a long list of specified persons; to prohibit false billing and discrimination between carriers.

Railroads—Regarding free passes, Georgia passed a law permitting free street-car passes for policemen, firemen, sanitary employees and similar officials, when all the individuals of a given class are entitled to a pass, and another permitting passes for pensioned employees and their families. New Jersey passed a law requiring railroads to furnish free transportation within the State to specified officials, including Congressmen and members of the Legislature.

To prevent breaches of the peace Virginia passed a law requiring passengers to take seats pointed out to them by conductors. Kentucky and Mississippi passed laws to punish drunkenness and disorder on trains.

A New Jersey law provided for a complete physical valuation of all the railways of the State and separately a valuation of their franchises.

Reform in Judicial Procedure—Massachusetts made several essays at reform in judicial procedure. The most important change was the provision that when in an action of contract a defendant has appeared the plaintiff may file an affidavit of no defence, the clerk may issue an order on the defendant to show cause, and unless after seven days' notice the defendant consents to default and judgment, or sets out the specific facts relied on, the court shall advance the action for speedy trial. The same statute provided for a speedy trial of appeals in suits for wages for personal labor. Another Massachusetts act freed municipal courts from clogging their files with complaints, warrants and other papers in criminal cases completed over twenty years in the past, and authorized the storage of papers in civil cases of the same period in fireproof vaults. A third Massachusetts act protected the pr-

STATE LEGISLATION IN 1910—*Continued.*

vailing party in certain equity suits by giving to the final decrees for the conveyance or release of real estate all the effect of a conveyance if the party ordered to act does not do so within the specified time. The power of the court to compel obedience to its decrees is unaffected by the act.

The common law rule was changed in Mississippi by an act which declares that contributory negligence shall in no case bar recovery for injuries or death, but that such negligence may be submitted to the jury in mitigation of damages. An Ohio act admits dying declarations of victims of operations for abortion when they state the cause and circumstances of the crime. Kentucky enacted that in civil actions for libel it shall be relevant and competent for either party to prove that the plaintiff did or did not request a retraction. The defendant also may show in bar of punitive damages his lack of malice, and that he published a correction and retraction as conspicuously as the original libel at least twice, accompanied by an editorial.

Oklahoma amended its statutes regulating probate procedure and in matters relating to the "initiative and referendum." Costs at law, procedure in summary ejectment and methods of enforcing mechanics' liens were the subjects of three New Jersey statutes. By other acts executions and orders for the sale of land are henceforth to contain the names of all persons owning any interest therein, whether living or deceased, and the conveyance is to be indorsed with a court certificate of compliance with this provision. No execution is to issue against the body of a debtor under sixteen years of age, and none against the body of a debtor between sixteen and twenty-one, except in the discretion of the judge.

Safety and Quiet—In New Jersey local authorities were authorized to adopt regulations upon the sale of fireworks and explosives, even extending to a complete prohibition. Massachusetts absolutely prohibited fire balloons, on penalty of fine and imprisonment, and took a radical step by forbidding the manufacture or sale of picric acid fireworks, of firecrackers over two inches by three-eighths of an inch in size, or of more explosive force than if made with black powder. The sale of blank cartridges and of pistols for discharging the same was also prohibited. The act excepts from its operation illuminating fireworks, the manufacture or sale of explosives for use out of the State, official salutes, theatrical use of firearms and firearms used for military purposes.

Mississippi forbade sound mufflers on firearms, as Maine and other States have done.

State Governments and Elections—Woman suffrage met with no encouragement from the legislatures of 1910. The demand for primary elections by direct vote of the people was more successful. Maryland adopted a primary law which contained these features: In some of the smaller counties the primary election chooses representatives to a county convention, and throughout the State it chooses delegates to a State convention for the nomination of Governor and other central State officers. Otherwise the voters at the primary select directly the candidates of their choice. In selecting delegates to the State convention the voters are to express their first, second and subsequent choice for the State officials to be selected at the convention, and the function of the delegates seems to be to act as mouthpieces for recording the sentiments of their constituents. Local political committees are elected by the voters at the primaries, the State committee is elected by the State convention.

The New York Legislature, at its regular session, adopted a primary election law which was vetoed by the Governor chiefly because it retained the convention system. The Legislature at a subsequent special session refused to pass a substitute recommended by the Governor.

An amendment to the Ohio statute requires the selection of candidates for Congress and delegates and alternates to national conventions at primary elections by direct popular vote.

Taxation—New York passed a new inheritance tax law and a law permitting the owner of a single bond secured by a mortgage of land in the State, which was recorded prior to the Mortgage Recording act, to secure exemption from personal property taxation by paying the mortgage recording fee of five mills on each dollar of the bond.

Ohio created a State Tax Commission of three members. It is vested with the power of valuing railroads and other public utility companies and apportioning the value for local taxation, while it estimates also the State's gross receipts taxes on these corporations, which in Ohio practically support the State Government. The supervisory powers over local taxation are broad and minute. The Board may permit local boards to correct errors, may remit illegal local taxes, may increase or decrease valuations in any locality by a percentage, may order reassessments by its own agents of all the property in a given locality, and may lower or increase the valuation of any realty or personalty.

Virginia appointed a Tax Commission composed of the Governor, President of the Senate, Speaker of the House, Chairmen of the Finance Committees of both houses, Chairman of the State Finance Commission and a salaried expert to examine and report on the existing Tax Commission.

Towns and Cities—The Illinois Assembly passed an act authorizing any city or village, except Chicago, to establish the commission form of government. A petition of 10 per cent. of the voters secures the submission of the question to any city. Rejection of the proposition settles the matter for two years. Under the plan the city government is headed by a mayor and four commissioners, elected on a general ticket, without party designations, for a term of four years, subsequent to a primary election, at which ten candidates for the five places are selected. Vacancies on the board are filled by the survivors for the unexpired term. Each member of the council heads a department, and the council selects and removes the minor officials not covered by civil service acts. The statute requires the five officials in cities over 20,000 population to devote at least six hours a day to their office. The board meets weekly. All appropriations and grants of street franchises are to remain on file a week before adoption, and the latter must be approved by a vote of the citizens. Nominally the act has a recall provision, but it is wholly ineffective. for it requires as a preliminary a petition signed by 75 per cent. of the total mayoralty vote in the last election. On petition of a certain percentage of the voters ordinances may be submitted to the council or (within thirty days after their passage by the council) be referred to the people. On petition of 25 per cent. of the voters the question of abandoning the commission government must be submitted to the people.

Virginia submitted a constitutional amendment permitting the Legislature to change the form of municipal governments, subject to the approval of the municipality affected. Massachusetts permitted the voters of the city of Lynn to select from alternate forms of a new city charter, one of which provides merely for a mayor and eleven councilmen, four of them chosen at large, and all without party designations—the other of which authorized a commission form of government along substantially the lines of the Illinois act.

The largest body of the year's legislation on municipalities was in New Jersey. Several acts

STATE LEGISLATION IN 1910—*Continued.*

concern the waterways: a department of wharves, docks and ferries was created in cities of the first class, towns (and counties also) may open inlets and may keep open public waterways within their limits. Others related to highways, borough councils may provide for street sprinkling with oil or other liquids than water. One law authorized the condemnation of property for public markets, another for shore parks, and still another for public buildings. Two or more municipalities may join in sewer districts, and any city may contract with street-car companies for the removal of ashes and garbage. The most novel of the New Jersey acts permits towns to create a town plan and art commission of seven members, to whom all questions of public improvements shall be submitted and whose decision shall be final, unless changed by a two-thirds vote of the town council. It may also improve the street plan, assessing the benefits as betterments regardless of remonstrances of property owners, when the public interest requires the change and the same is approved by a majority of the council. The commission may submit comprehensive plans of town improvements to voters, and may exclude works of art which are offered as gifts to the town.

Uniform Acts—Only Maryland and Massachusetts adopted in 1910 any of the laws reported by the Commissioners of Uniform State Laws. Maryland passed those relating to sales, bills of lading, warehouse receipts and certificates of stock in corporations. Massachusetts gave its assent to the bills of lading and certificates of stock in corporations acts.

Valuation of Property—Ohio, with the view of an increase in the valuations of property for taxation, passed a law limiting the tax rates, which follows the model of the West Virginia act of four years ago. In any one district the rate is not to exceed ten mills on a dollar for all purposes, unless that amount does not yield a revenue equal to the aggregate raised in 1909, plus a 6 per cent. increase for 1910, 9 per cent. for 1912 and 12 per cent. for any year thereafter. The debt limit is set at 2½ per cent.

Oklahoma passed three noteworthy tax acts. One of these classifies railroads in accordance with the percentage of operating expenses to gross receipts, and requires a State tax varying from .02125 to .016875 on valuations, and a county tax of from .004625 to .00375, according as this percentage ranges from less than 60 per cent. up to 90 per cent. Side tracks, depots and similar property are locally taxed like private real estate. The same State changed in some particulars the State gross receipts taxes on public service, mining and oil producing companies. The third measure imposed a license tax on all private business corporations, except insurance and banking companies, 50 cents per $1,000 of capital for domestic and $1 per $1,000 for that proportion of the capital of foreign corporations employed in Oklahoma except in a business paying income or gross receipts taxes on its own account.

Maryland ordered the periodic revaluation of the taxable property of the State. Massachusetts provided that its Tax Commissioner shall recommend a revision of the taxed valuation of undervalued property, to become operative if accepted by the local officials, but subject to court revision. The same State permitted the State to reimburse municipalities for the loss of taxes on land of public institutions—like all rebates, a step whose wisdom is doubtful. Virginia required separate valuations of timber owned otherwise than by the land owner. New Jersey taxed land used for the protection of a water supply at its value regardless of building and improvements. Mississippi exempted permanent factories for five years from their construction.

Vital Statistics—Kentucky adopted a registration law. The State Board of Health takes charge of a State system for the registration of births, deaths and marriages, acting through a State Bureau of Vital Statistics and a local registrar in each registration district.

Massachusetts changed the form of the record and return of deaths to conform to the international classification of diseases.

White Slaves—Maryland, Massachusetts, New York, New Jersey, Ohio, Oklahoma, Rhode Island and Virginia passed laws punishing in more or less detail the following acts: enticing females to a life of prostitution, taking or detaining them against their will, compelling them to acts of prostitution, receiving a portion of their earnings from that source directly or indirectly, or transporting them from place to place by means of common carriers. Some of the statutes specially punish the man who abets his wife in prostitution. Rhode Island expressly declared that it is no defence that part of the acts are done outside the State. New York made living habitually with a prostitute prima facie evidence of sharing her earnings. Massachusetts made prosecutions easier by changing the application of its previous law from married woman of chaste life to any woman or girl, and allowed search warrants upon suspicion of white slavery in a building.

Miscellaneous—Rhode Island passed a law requiring persons doing business under names other than their own to file a certificate of their full names with the town clerk where the business is located. The law is, of course, inapplicable to corporations duly organized, and partnerships are not to be prevented from using names which include the real surname of at least one partner. New Jersey made it a misdemeanor to negotiate a warehouse receipt for goods not actually deposited. Duplicate receipts must be so marked. Georgia created a lien in favor of laundrymen and dyehouses. Massachusetts permitted executors or administrators, when licensed by the Probate Court, to continue the business of their decedent for a year or less. Rhode Island attacked the billboard nuisance by permitting local councils by ordinance to require owners of billboards to obtain official approval thereof, under penalty of a fine and the removal of the unapproved board by the police. Georgia forbade the issue of trading stamps, and treated the violation of the act as a crime. Maryland revised its law for the regulation of their use, adding a new section which requires a redeemable value of at least one cent a stamp, and which obliges the trading stamp company to furnish to all receivers of stamps a full statement of the cash redeemable values and premium rights attaching to such stamps.

Mississippi created and equipped a State charity hospital; Maryland obliged shirt factory proprietors to sprinkle the floors daily with water; Massachusetts permitted the State Board of Health to prohibit common drinking cups in designated places; Ohio imposed upon the owners of workmen's camps liability for the expense caused to any community by infectious diseases originating in such camps; Kentucky had an elaborate tenement house act for Louisville, and appropriated $30,000 for a survey by the State bacteriologist of the water supplies of the entire State, with a view to preventing disease by condemning unsafe water. Massachusetts abated the smoke nuisance in Boston and vicinity by carefully specifying the number of minutes an hour during which stacks of different sizes and character shall be permitted to pollute the atmosphere.

National Civic Federation.

OFFICE, 1 MADISON AVENUE, NEW YORK.

AN organization of prominent representatives of capital, labor, and the general public formed as the direct outgrowth of conventions held in Chicago and New York in 1900–1901. Its purpose is to organize the best brains of the nation in an educational movement toward the solution of some of the great problems related to social and industrial progress; to provide for study and discussion of questions of national import; to aid thus in the crystallization of the most enlightened public opinion; and when desirable, to promote legislation in accordance therewith. At the present time the work of the Federation is carried on through the following agencies:

(1) The Trade Agreement Department which encourages the making of trade agreements between organized bodies of workmen and their employers, relative to hours, wages and conditions of employment.

(2) The Industrial Conciliation Department dealing entirely with strikes and lockouts, and including in its membership representatives of the general public and the leading organizations of employers and wage-earners. The services of this department have been enlisted in more than five hundred cases involving every phase of industrial controversy.

(3) The Industrial Economics Department organized to promote discussion and to aid in the solution of practical economic and social problems such as "Wages, and the Cost of Living," "The Injunction," "Opened and Closed Shop," "Restriction of Output," "Compulsory Arbitration," "Initiative and Referendum," "The Income Tax," "The Trusts," "Socialism," etc.

(4) Welfare Department composed of employers of labor in stores, factories, mines and on railroads, and officials who have to do with the working conditions of public employés, chairmen of boards of health, heads of departments of public safety, leading physicians connected with public hospitals, heads of charity boards and others. It is devoted to securing improvements in the working and living conditions of the employé by the employer.

(5) The Woman's Department composed largely of women who are themselves stockholders or who through family relationships are financially interested in industrial organizations. The object of this department is to use its influence in securing needed improvements in the working and living conditions of women and men wage-earners in the various industries and governmental institutions, and to co-operate, when practicable, in the general work of the Federation.

(6) The Compensation Department, composed of employers, representative labor men, attorneys, insurance experts, economists, State officials, members of State compensation commissions, and others concerned. Its object is: To inquire into the need for amending State laws on employers' liability with a view to securing uniform provisions looking toward compensation for industrial accidents; and to look into means of preventing accidents in commercial and manufacturing enterprises.

(7) Industrial Insurance Commission: To promote employers' voluntary relief associations, and to investigate the need for uniform legislation covering such employers' voluntary sick, accident, pension and death benefit associations.

(8) Public Ownership Commission composed of one hundred prominent men representing every shade of public opinion on this subject. The investigation by this commission into the facts of public ownership and operation here and abroad is the most thorough yet undertaken. An inquiry is to be undertaken into the question: "How far can regulation go without interfering with management?"

(9) Department on Uniform State Legislation, to promote uniform State legislation in those matters that are intrastate; to work for the co-ordination of State with Federal legislation where there now is conflict; and to secure Federal legislation in matters that are purely interstate. Local councils are being organized in every State in the Union to promote this movement.

OFFICERS AND EXECUTIVE COUNCIL.

President, Seth Low; Vice-Presidents, Samuel Gompers, Nahum J. Bachelder, Ellison A. Smyth, Benjamin I. Wheeler; Treasurer, Isaac N. Seligman; Chairman Executive Council, Ralph M. Easley; Chairman Welfare Department, William R. Willcox; Chairman Committee on Organization, John Hays Hammond; Chairman Trade Agreement Department, John Mitchell; Chairman Committee on Uniform Legislation, Alton B. Parker; Chairman Industrial Economics Department, Nicholas Murray Butler; Chairman Department Compensation Industrial Accidents, August Belmont; Chairman Wage Earners' Insurance Commission, George W. Perkins; Chairman Women's Department, Mrs. Horace Brock; Chairman Public Ownership Commission, Melville E. Ingalls; Chairman Taxation Department, E. R. A. Seligman; Secretary, D. L. Cease.

EXECUTIVE COMMITTEE.

ON THE PART OF THE PUBLIC:

William H. Taft (President of the United States), Washington, D. C.; Franklin MacVeagh (Secretary of the Treasury), Washington, D. C.; Elihu Root (United States Senator), New York City; Andrew Carnegie (Capitalist), New York City; Seth Low (Publicist), New York City; Nahum J. Bachelder (Master of the National Grange), Concord, N. H.; John Hays Hammond (Mining Engineer), Gloucester, Mass.; Benjamin I. Wheeler (President University of California), Berkeley, Cal.; Walter George Smith (President Conference of Commissioners on Uniform State Laws), Philadelphia, Penn.; James Speyer (Speyer & Co.), New York City; Nicholas Murray Butler (President Columbia University), New York City; Isaac N. Seligman (of J. & W. Seligman & Co.), New York City; Cornelius N. Bliss (former Secretary of the Interior), New York City; Archbishop John Ireland (of the Roman Catholic Church), St. Paul, Minn.; David R. Francis (former Secretary of the Interior), St. Louis, Mo.; V. Everit Macy (Capitalist) New York City; John M. Stahl, President Farmers' National Congress.

ON THE PART OF EMPLOYERS:

August Belmont (August Belmont & Co.), New York City; W. C. Brown (President New York Central lines), New York City; George B. Cortelyou (President Consolidated Gas Co.), New York City; Frank A. Vanderlip (President National City Bank), New York City; George W. Perkins (J. P. Morgan & Co.), New York City; Benjamin F. Yoakum (Chairman Executive Committee, Chicago, Rock Island & Pacific R. R. Co.), New York City; Clarence H. Mackay (President Postal Telegraph-Cable Co.), New York City; Marvin Hughitt (President Chicago & Northwestern Ry. Co.), Chicago, Ill.; Samuel Mather (Pickands, Mather & Co.), Cleveland, Ohio; Melville E. Ingalls (Big Four Railroad), Cincinnati, Ohio; Charles A. Moore (President Manning, Maxwell & Moore), New York City; Ellison A. Smyth (President South Carolina Cotton Manufacturers' Association), Pelzer, S. C.; Marcus M. Marks (President National

NATIONAL CIVIC FEDERATION—*Continued.*

Association of Clothiers), New York City; Otto M. Eidlitz (former Chairman Board of Governors, Building Trades Employers' Association), New York City.

ON THE PART OF WAGE EARNERS:

Samuel Gompers (President American Federation of Labor), Washington, D. C.; John Mitchell (former President United Mine Workers of America), New York City; A. B. Garretson (President Order of Railway Conductors), Cedar Rapids, Iowa; James Duncan (General Secretary Granite Cutters' International Association of America), Quincy, Mass.; W. G. Lee (Grand Master Brotherhood Railroad Trainmen), Cleveland, Ohio; Warren S. Stone (Grand Chief International Brotherhood of Locomotive Engineers), Cleveland, Ohio; William D. Mahon (President Amalgamated Association of Street Railway Employés of America), Detroit, Mich.; Timothy Healy (President International Brotherhood of Stationary Firemen), New York City; William J. Bowen (President Bricklayers' and Masons' International Union), Indianapolis, Ind.; W. S. Carter (President Brotherhood Locomotive Firemen and Enginemen), Peoria, Ill.; James O'Connell (President International Association of Machinists), Washington, D. C.; John F. Tobin (General President Boot and Shoe Workers' Union), Boston, Mass.; Joseph F. Valentine (President Iron Moulders Union of North America), Cincinnati, Ohio; James M. Lynch (President International Typographical Union), Indianapolis, Ind.; Denis A. Hayes (President Glass Bottle Blowers' Association of United States and Canada), Philadelphia, Penn.; William D. Huber (President United Brotherhood of Carpenters and Joiners of America), Indianapolis, Ind., and members of executive council.

DEPARTMENT ON COMPENSATION FOR INDUSTRIAL ACCIDENTS AND THEIR PREVENTION.

Chairman, August Belmont; Chairman Legal Committee on Compensation, P. Tecumseh Sherman; Chairman Committee on Statistics and Costs, Sylvester C. Dunham; Chairman Committee on Improvement of State Factory Inspection with Special Reference to Safeguarding Machinery, Louis B. Schram; Secretary, Launcelot Packer; Secretary Executive Committee, Miss Gertrude Beeks.

OFFICERS AND EXECUTIVE COUNCIL, WELFARE DEPARTMENT.

Chairman, William R. Willcox; Vice-Chairmen, Cyrus H. McCormick, Emerson McMillin, Ellison A. Smyth, Nathan Straus; Treasurer, Isaac N. Seligman; Secretary, Miss Gertrude Beeks; Chairman Industrial Employés Welfare Committee, C. A. Moore; Chairman Ways and Means Committee, B. J. Greenhut; Chairman Committee Pensions Public Employés, W. R. Willcox; Chairman Committee on Wage Earners' Insurance, George W. Perkins; Chairman Committee on Prevention of Mining Accidents, John Hays Hammond; Chairman New York Welfare Committee, W. L. Saunders; Chairman New England Welfare Committee, A. P. Loring; Medical Director, Alexander Lambert; Commissary Expert, Christoph D. Roehr; Consulting Architect, Robert D. Kohn.

EXECUTIVE COUNCIL, WOMAN'S DEPARTMENT.

The Honorary Chairman, Mrs. William Howard Taft; Chairman, Mrs. Horace Brock, Philadelphia, Penn.; First Vice-Chairman and Chairman of Committee on Welfare Work for Industrial Employés, Mrs. J. Borden Harriman, New York City; Second Vice-Chairman, Mrs. Richard Wainwright, Washington, D. C.; Third Vice-Chairman, Mrs. John K. Ottley, Atlanta, Ga.; Fourth Vice-Chairman, Mrs. William H. Crocker, Burlingame, Cal.; Fifth Vice-Chairman, Mrs. B. Frank Mebane, Spray, N. C.; Sixth Vice-Chairman, Mrs. Eva McDonald Valesh, St. Paul, Minn.; Secretary, Mrs. Bayard Henry, Germantown, Penn.; Treasurer, Mrs. Mary Hatch Willard, New York City; Chairman of Finance Committee, Mrs. Augustus P. Gardner, Hamilton, Mass.

Statehood of New Mexico and Arizona.

PROVISIONS for the admission of New Mexico and Arizona into the Union were made by Chapter 310 of the Acts of the Second Session of the 61st Congress, approved June 20, 1910.

The act authorized the qualified electors of the Territory of New Mexico to choose delegates to a constitutional convention to be held for the purpose of framing a State Constitution. The election was to be called by proclamation by the Governor thirty days after the approval of this act, to take place not earlier than sixty nor later than ninety days after said approval.

The delegates thus elected were authorized to meet at the Territorial capital on the fourth Monday after their election and form a State Constitution and provide for a State Government. Said Constitution was to be submitted to the people for ratification not earlier than sixty nor later than ninety days after the adjournment of the convention.

Should a canvass of the votes cast on the question of ratification show that said Constitution was rejected then the Governor must issue a proclamation calling the convention together again for the purpose of forming another Constitution.

Should the Constitution be ratified it shall be submitted to the President and Congress for approval. Should both approve, or should the President approve and Congress fail to approve during its next regular session the President shall certify the facts to the Governor, who within thirty days shall issue his proclamation for the election of State and county officers, members of the State Legislature and Representatives in Congress, which election shall take place not earlier than sixty days nor later than ninety days thereafter.

The result of the election shall be certified by the Governor to the President, who thereupon shall immediately issue his proclamation announcing said result, whereupon "the proposed State of New Mexico shall be deemed admitted by Congress by virtue of this act on an equal footing with the other States."

The terms of admission of Arizona as to the election of delegates to a constitutional convention, the formation of a Constitution by said convention, its submission to the people, the calling of another convention in case of rejection, its submission to the President and Congress in case of ratification, the election of State officers and Representatives in Congress and proclamation by the President, of the result with admission to the Union thereafter, were the same as those prescribed for New Mexico.

The act provided conditions applicable to the new State Constitutions such as the requirement of religious toleration, prohibition of polygamy, equality of taxation, provision for public schools, no restriction of suffrage on account of race or color, assumption of territorial debts, etc

National Parks in United States.

THE national parks and reservations mentioned below are under the supervision of the Secretary of the Interior. General information, the annual administrative reports, copies of the rules and regulations, and compilations of the laws relating to the parks may be obtained from the Secretary of the Interior or from the superintendents of the parks.

YELLOWSTONE NATIONAL PARK is in Wyoming, Montana, and Idaho, and has an area of 2,142,720 acres. The superintendent's address is, Yellowstone Park, Wyoming. The park can be reached by the following railroads: Northern Pacific Railroad to Gardiner, the northern entrance, via Livingston, Mont.; Oregon Short Line Railroad to Yellowstone, Mont., the western entrance; Chicago, Burlington and Quincy Railroad to Cody, Wyo., from which the eastern entrance to the park is accessible. Stage and private transportation connections for the reservation are made at all these points. The tourist season extends from June 1 to September 15, but accommodations are furnished at Mammoth Hot Springs the entire year.

YOSEMITE NATIONAL PARK, CALIFORNIA, including the Yosemite Valley and Mariposa Big Tree Grove, embraces an area of 719.622 acres. The superintendent's address is Yosemite, Cal. The park can be reached from Merced on the Atchison, Topeka and Santa Fé and the Southern Pacific railroads, by way of Yosemite Valley Railroad, which runs to the western boundary; and by connections of the same roads to Raymond, on the southwest; stage lines run from the terminus of the Yosemite Valley Railroad and from Raymond to Yosemite Valley within the park. The tourist season extends from May 1 to November 1, but the park is accessible and hotel accommodations are furnished the entire year.

GLACIER NATIONAL PARK, MONTANA, has an area of approximately 915,000 acres, of which 15,000 acres have been surveyed. Within the limits stated there are 250 lakes, ranging from 10 miles to a few hundred feet in extent. There are more than 60 glaciers between 5 square miles and a few acres in area. There are wild animals, plants, and rocks in numbers and quantity to satisfy the most ardent student, and views of great variety, beauty and grandeur to gratify the artist and the lover of nature.

Major William R. Logan is the acting superintendent in charge of road and trail construction, his address being Belton, Mont. The park can be reached via the Great Northern Railway. The tourist season extends from May 1 to about September 15.

MOUNT RAINER NATIONAL PARK, WASHINGTON, has an area of 207,360 acres. The superintendent's address is, Ashford, Wash. The park is reached by stage or private transportation from Ashford, Wash., on the Tacoma Eastern Railroad, and by trail from Fairfax, on the Northern Pacific Railroad. The tourist season extends from June 15 to September 15.

SEQUOIA NATIONAL PARK, CALIFORNIA, has an area of 161,597 acres, The address of the superintendent is Ranger, Cal., during the tourist months (June 1 to September 15) and Three Rivers, Cal., the balance of the year. This park may be reached from Visalia, on the Southern Pacific and the Atchison, Topeka and Santa Fé railroads by way of the Visalia Electric Railroad Company to Lemon Cove, thence by stage or private conveyance to the Giant Forest within the park, or by private conveyance from Visalia via Lemon Cove.

GENERAL GRANT NATIONAL PARK, CALIFORNIA, has an area of 2,536 acres. This reservation is administered jointly with Sequoia National Park, and the tourist season extends from June 1 to September 15. The address of the superintendent is given above. The park may be reached by stage and private conveyance from Sanger, on the Southern Pacific Railroad, or by trail from Sequoia National Park.

CRATER LAKE NATIONAL PARK, OREGON, has an area of 159,360 acres. The address of the superintendent during the tourist months (June 15 to September 30) is Crater Lake, Ore., and during the balance of the year Klamath Falls, Ore. This park may be reached by steamer line and stage from Klamath Falls, Ore., or by private conveyance from Medford, on the Southern Pacific Railroad. Klamath Falls may be reached by the Southern Pacific Railroad and connecting stage and steamer line.

WIND CAVE NATIONAL PARK, SOUTH DAKOTA, contains 10,522 acres. The superintendent's address is Wind Cave, S. Dak. This park may be reached by private conveyances from Hot Springs, on the Chicago, Burlington and Quincy and the Chicago and Northwestern railroads, or by similar conveyance from Custer, on the Chicago, Burlington and Quincy Railroad. The reservation is open to tourists the entire year.

SULLYS HILL PARK, NORTH DAKOTA, on the shore of Devils Lake, has an area of 780 acres. The address of the superintendent is Fort Totten, N. Dak. Devils Lake, Narrows, and Tokio, on the Great Northern Railroad, are close to the park, and from these points the reservation can be approached by wagon, or by boat (private conveyance).

PLATT NATIONAL PARK, AT SULPHUR, OKLAHOMA, has an area of 848.22 acres. Sulphur is the post-office address of the superintendent. The town is accessible by the Atchison, Topeka and Santa Fé and the St. Louis and San Francisco railroads. The park, which is open to tourists the entire year, is within walking or riding distance of the railroads.

MESA VERDE NATIONAL PARK, COLORADO, has an area of 42,376 acres; and the 5-mile strip under the park jurisdiction for the protection of ruins, which abuts the park, contains 175,360 acres. The address of the superintendent is Mancos, Col., the nearest railroad station, on the Rio Grande Southern Railroad. This station is about 25 miles from the ruins, which may be reached only by horseback or on foot. The tourist season extends from May 1 to September 30.

CASA GRANDE RUIN, ARIZONA, a reservation, has an area of 480 acres. The nearest railroad station is Casa Grande, on the Southern Pacific Railroad. It may also be reached by private conveyance from Florence, Ariz., on the Phoenix and Eastern Railroad. The address of the custodian is Florence.

The Mesa Verde National Park and the Casa Grande Reservation were set aside to protect the instructive prehistoric ruins and other objects of antiquity which they contain. These ruins are being excavated and repaired and are open for the inspection of visitors. Reports on the repair of such ruins have been issued by the Department of the Interior, and more detailed accounts are distributed by the Bureau of American Ethnology, Smithsonian Institution.

HOT SPRINGS RESERVATION, ARKANSAS (the permanent reservation), has an area of 911.63 acres. Eleven bathhouses on the reservation and thirteen in the city of Hot Springs, as well as several hotels operated in connection with bathhouses, receive hot water from the springs, under lease with the Secretary of the Interior. The address of the superintendent is Hot Springs, Ark.

PRESERVATION OF AMERICAN ANTIQUITIES.—Under the act of Congress approved June 8, 1906, interdepartmental regulations governing the excavation, appropriation, etc., of prehistoric ruins or objects of antiquity have been promulgated by the Secretaries of the Interior, Agriculture, and War. Applications for permits to make excavations on the public lands, Indian reservations, or the national monuments named below should be addressed to the Secretary of the Interior. The following have been reserved from entry and set aside as national monuments:

Devils Tower, Wyoming.
Montezuma Castle, Arizona.
Petrified Forest, Arizona.
El Morro, New Mexico.
Chaco Canyon, New Mexico.
Muir Woods, California.
Natural Bridges, Utah.
Lewis and Clark Cavern, Montana.
Tumacacori, Arizona.
Navajo, Arizona.
Mukuntuweap, Utah.
Shoshone Cavern, Wyoming.
Gran Quivira, New Mexico.
Oregon Caves, Oregon.
Sitka National Monument, Alaska.
Rainbow Bridge, Utah.

Nine other national monuments within national forests have also been set aside under this act and placed under the jurisdiction of the Secretary of Agriculture, to whom inquiries in regard thereto should be addressed.

Conservation of Natural Resources.

THE National Conservation Association, with headquarters in the Colorado Building, Washington, D. C., is now the organized head of the conservation movement in the United States. The association came into existence because of an urgent need for an organization open to every man and woman who stood for conservation which would give them immediate opportunity for united and effective work.

On July 29, 1909, the first step was taken. A group of the men who had led in the fight for conservation met and organized the National Conservation Association. Dr. Charles W. Eliot, President Emeritus of Harvard University, was made president of the association. Soon after Mr. Gifford Pinchot was removed from the Government service by President Taft, Dr. Eliot presented his resignation and nominated Mr. Pinchot as his successor. Mr. Pinchot's election as President of the National Conservation Association followed, the honorary presidency being accepted by Dr. Eliot.

In a booklet explaining the objects of the association is the following:

"The National Conservation Association is fighting for the prompt and orderly development of our natural resources, for the welfare of ourselves and our children, and for the rights of the plain people. The association is bound neither by political considerations nor official connections. It is free to speak the whole truth.

"That conservation means the use of our natural resources for the benefit of us all and not merely for the profit of a few is already household knowledge. The task which the National Conservation Association has set itself is to get this principle put into practical effect."

During the 61st Congress, second session, the principles for which the association stood were enacted into law in a considerable number of cases, and are represented in many bills awaiting action when ALMANAC was printed.

Early in the recent session Senator Nelson introduced nine conservation bills drafted in the Interior Department. For five of these bills substitutes, embodying conservation principles, were prepared by the association, covering all important phases of the conservation program of the Administration. These were introduced by Representative Gronna, of North Dakota, and are before Congress for consideration at its next session. The substitute for the withdrawal bill suggested by the association was enacted into law with amendments. The three remaining conservation bills proposed by the Administration, which were of relatively small importance, were passed in a form different from that in which they were introduced, and one of them in greatly improved form. The act for issuing $20,000,000 of bonds to hasten the completion of reclamation projects was advocated by the Administration.

The association is maintained by dues from membership, which are divided into the following classes:

Members, $2.00 a year — Active Members, $5.00 a year — Contributing Members, $25.00 a year
Patrons, $100.00 a year — Life Membership, $1,000.00 a year

The organization of the National Conservation Association is as follows:
Gifford Pinchot, President, Washington, D. C. Charles W. Eliot, Honorary President, Cambridge, Mass.
Walter L. Fisher, Vice-President, Chicago, Ill. Thomas R. Shipp, Secretary, Washington, D. C.
Overton W. Price, Treasurer, Washington, D. C. Philip P. Wells, Counsel, Washington, D. C.

The National Conservation Commission came into existence at the direct suggestion of the Governors of the States and Territories assembled in Washington, upon invitation of President Roosevelt, at the conference on natural resources in the White House in May, 1908. It was one part of a scheme of co-operation between the States and the Nation, the other part of which had been provided by the Governors in the appointment of State Conservation Commissions. (See "Joint Committee on Conservation," below).

The Commission was created by President Roosevelt, June 8, 1908. Under its direction the first inventory of the natural resources of the United States ever made has been accomplished. On this inventory, which was completed December 1, 1908, the Commission made a report to the President, who transmitted it to Congress January 22, 1909.

The inventory of natural resources made by the National Conservation Commission was presented at the meeting of the Commission held in Washington, December 1-7, 1908. This inventory, the compilation of which was made possible only through the vigorous co-operation of State Conservation Commissions, bureaus of the Federal Government and Conservation Committees representing national industries, comprised practically all information now available regarding the condition and extent of the natural resources of the United States.

JOINT CONSERVATION CONFERENCE.

The report of the Commission was presented to and approved by the Joint Conservation Conference in Washington, December 8-11, 1908, at which were present Governors of twenty States and Territories, representatives of twenty-two State Conservation Commissions, and the Presidents, Conservation Committees, or other representatives of sixty of the National organizations represented at the White House conference, and others which are co-operating with the National Commission.

JOINT COMMITTEE ON CONSERVATION.

An amendment to the Sundry Civil bill, proposed by Representative James A. Tawney, of Minnesota, prohibited the National Conservation Commission from going on with its work under the Government, although the Commission itself, at the wish of President Taft, continued in existence. Accordingly, the Joint Committee on Conservation took up the work of co-operation among the State Conservation Commissions and the Conservation Committees of large National organizations. In February, 1910, this committee was consolidated with the National Conservation Association.

NORTH AMERICAN CONSERVATION CONFERENCE.

As an outgrowth of the Joint Conservation Conference in December, 1908, a letter of invitation to Canada and Mexico to join with the United States in a North American Conservation Conference was on December 24, 1908, written by President Roosevelt. It was conveyed in person to Lord Grey and Sir Wilfrid Laurier, Governor-General and Premier of the Canadian Government, respectively, and to President Diaz, of Mexico, by Gifford Pinchot, Chairman of the National Conservation Commission, whom the President selected for this duty. An invitation was likewise extended to the Colony of Newfoundland.

After a session continuing through five days the Conference united in a declaration of principles for the conservation of natural resources of North America, and also in a suggestion to President Roosevelt that a World Conservation Congress be held. This suggestion was as follows:

The conference of delegates, representatives of the United States, Mexico, Canada, and Newfoundland, having exchanged views and considered the information supplied from the

CONSERVATION OF NATURAL RESOURCES—*Continued.*

respective countries, is convinced of the importance of the movement for the conservation of natural resources on the continent of North America, and believes that it is of such a nature and of such general importance that it should become worldwide in its scope, and therefore suggests to the President of the United States of America that all nations should be invited to join together in conference on the subject of world resources and their inventory, conservation and wise utilization.

Commissioners Representing the United States—Gifford Pinchot, Robert Bacon, James Rudolph Garfield.

Commissioners Representing the Dominion of Canada—Sydney Fisher, Clifford Sifton, Henri S. Beland.

Commissioners Representing the Republic of Mexico—Romulo Escobar, Miguel A. De Quevedo, Carlos Sellerier.

Commissioner Representing the Colony of Newfoundland—E. H. Outerbridge.

Attest: Robert E. Young, Thomas R. Shipp, Secretaries of the Conference.

Washington, D. C., February 23, 1909

NATIONAL CONSERVATION CONGRESS.

The first National Conservation Congress was held at Seattle, Washington, August 26 to 28, 1909, inclusive, under the auspices of the Washington Conservation Association.

The objects of the Congress are:

1. To provide for discussion of the resources of the United States as the foundation for the prosperity of the people.

2. To furnish definite information concerning the resources and their development, use and preservation.

3. To afford an agency through which the people of the country may frame policies and principles affecting the conservation and utilization of their resources to be put into effect by their respective representatives in State and Federal Governments.

There is no official connection between the National Conservation Congress and the National Conservation Association, although the two organizations are working harmoniously along the same lines. The Congress confines its work to an annual gathering of citizens appointed by State and Municipal officials as delegates. The Association maintains a permanent working organization throughout the year.

The second National Conservation Congress was held at St. Paul, Minnesota, September 5 to 8 inclusive, 1910. It was one of the largest meetings of citizens ever held, it being estimated that 12,000 people were in attendance on the mornings when President Taft and ex-President Roosevelt addressed the Congress. The officers of the Congress elected at St. Paul are:

President, Henry Wallace, Des Moines, Iowa.
Executive Secretary, Thomas R. Shipp, Washington, D. C.
Recording Secretary, James C. Gipe, Indianapolis, Indiana.
Treasurer, D. Austin Latchaw, Kansas City, Missouri.

Building Operations in the United States.

A REPORT on building operations in the leading cities of the United States in 1909 was published by the Department of the Interior July 24, 1910. The following is an abstract:

One hundred and thirty-seven cities reported for 1909 building operations costing $930,520,713 under 273,883 permits. Of these cities, 128 reported 264,536 permits, work under which cost $903,385,954. Of these totals, the new buildings constituted 90.3 per cent. of the cost and the additions, alterations and repairs 9.7 per cent. Taken by classes, the new wooden buildings constituted 24.16 per cent. of the cost, and the additions, alterations and repairs to wooden buildings 3.34 per cent.; new brick buildings 55.82 per cent., additions, etc., 5.67 per cent.; new stone buildings 3.1 per cent., additions 0.25 per cent.; new concrete buildings 3.39 per cent., additions 0.13 per cent.; all other fire-resisting buildings 3.83 per cent., additions 0.31 per cent. Of the cost of new buildings 73.24 per cent. was for fire-resisting buildings and 26.76 per cent. for wooden buildings. Of the cost of all new fire-resisting buildings 84.39 per cent. was for brick buildings, 4.69 per cent. for stone buildings, 5.15 per cent. for concrete buildings and 5.8 per cent. for miscellaneous fire-resisting buildings. Of the cost of additions, alterations and repairs 34.45 per cent. was for wooden buildings and 65.55 per cent. for fire-resisting buildings. Of the last item 89.27 per cent. was for brick buildings, 3.34 per cent. for stone buildings, 1.96 per cent. for concrete buildings and 4.93 per cent. for all other additions and repairs.

Operations on brick buildings (new buildings, additions, alterations and repairs) constituted 61.49 per cent. of the entire cost of all operations in these 128 cities, all other fire-resisting buildings amounting to but 11.01 per cent. This shows conclusively the great popularity of brick as a building material.

The average cost in 1909 for new wooden buildings was $2,220, for new brick buildings $5,922, for stone buildings $11,679, for concrete buildings $17,099, and for miscellaneous fire-resisting buildings $63,890.

Seattle had the largest number of new wooden buildings, 7,755, with an average cost of $1,338 each. Los Angeles was second in number of wooden buildings, 5,284, with an average cost of $1,553 each. New York reported 823 permits for buildings of wood costing $3,697,555, an average cost of $4,492; these were almost entirely in the Borough of the Bronx. In Philadelphia but 24 new wooden buildings were erected at a total cost of $38,000, or an average cost of $1,583.

New York reported the construction of fire-resisting buildings at a cost of $181,918,337, or 27.78 per cent. of the total for this class of buildings; Chicago was second, with a cost of $79,105,500, or 12.08 per cent. of the total; Brooklyn was third, reporting fire-resisting buildings costing $54,658,721, or 8.35 per cent. of the total; Philadelphia was fourth, with $42,570,770, or 6.5 per cent. of the total.

The leading city in the number and cost of concrete buildings was Chicago, which reported 519 buildings, costing $9,894,800, or 32.31 per cent. of the cost of all concrete buildings. The city ranking second in cost of concrete buildings was Seattle, which reported $2,872,400, or 9.38 per cent. of the total, followed closely by Philadelphia, with $2,014,300, or 6.58 per cent. of the total. Out of the 128 cities reporting, 79 erected new concrete buildings, 1,791 in number, which shows the widespread use of this material as a building agent.

Miscellaneous fire-resisting buildings, which include steel skeleton buildings, were reported from 39 cities. New York was the leading city in this class of buildings, reporting them to the cost of $12,863,100 with Newark second, with a cost of $3,323,000.

Forests and Forestry.

Our forests now cover 550,000,000 acres, or about one-fourth of the United States. Forests publicly owned contain one-fifth of all timber standing. Forests privately owned contain at least four-fifths of the standing timber. The timber privately owned is not only four times that publicly owned, but it is generally more valuable.

Forestry is now practised on 70 per cent. of the forests publicly owned and on less than 1 per cent. of the forests privately owned, or on only 18 per cent. of the total area of forests.

The original forests of the United States contained timber in quantity and variety far beyond that upon any other area of similar size in the world. They covered 850,000,000 acres, with a stand of not less than 5,200,000,000,000 board feet of merchantable timber, according to present standards of use. There were five great forest regions—the northern, the southern, the central, the Rocky Mountain and the Pacific.

The present rate of cutting is three times the annual growth of the forests of the United States. The great pineries of the lake States are nearing exhaustion and great inroads have been made upon the supply of valuable timber throughout all parts of the country.

The heavy demands for timber have been rapidly pushing the great centres of lumber industry toward the South and West. In consequence, the State of Washington has led for several years in lumber production, now followed in order by Louisiana, Mississippi, North Carolina, Arkansas, Virginia and Texas. In 1909 the production of yellow pine lumber amounted to sixteen and one-quarter billion feet; the Douglas fir of the Northwest held second place, with over four and three-quarters billion feet; while white pine came third, with three and one-third billion feet.

We take from our forests yearly, including waste in logging and in manufacture, 20,000,000,000 cubic feet of wood.

We use in a single year 90,000,000 cords of firewood, 44,000,000,000 board feet of lumber, 123,000,000 hewed ties, 1,500,000,000 staves, over 133,000,000 sets of heading, nearly 500,000,000 barrel hoops, 3,200,000 cords of native pulp wood, 165,000,000 cubic feet of round mine timbers and 1,250,000 cords of wood for distillation.

In 1909 4,002,000 cords of wood were used in the manufacture of paper, of which 794,000 cords were imported from Canada. The demand for pulp wood is making a severe drain on the spruce forests, which furnish the principal supply, though a number of other woods, such as poplar, hemlock, pine, and balsam, are now being used in considerable quantities. The Forest Service of the United States Department of Agriculture is conducting investigations to determine what other woods, such as scrub pine, white fir, tupelo and the like, can be successfully used.

A larger drain upon our forest resources is made by the demand for railroad ties, of which 123,754,000, equivalent to three and three-quarters billions board feet, were used in 1909. White oak, hitherto the chief source of supply, is not plentiful enough to meet this demand indefinitely, and in many parts of the country the supply of chestnut, cedar and cypress is dwindling; however, seasoning and treating methods are being found, largely through the work of the Forest Service, by which cheaper and more plentiful woods, such as lodgepole pine in the Northwest and loblolly pine in the South, are made fit for use as ties. Timber to the amount of two and one-half billions feet was used in 1907 for mine timbers. A great saving has been effected in the naval stores industry, also largely through the work of the Forest Service, by the introduction of the so-called "cup" systems of turpentining in place of the old destructive system of "boxing." The new systems insure a larger product of better quality and prolong the life of the longleaf pine forests upon which the industry depends.

UNITED STATES FOREST SERVICE.

The Forest Service is one of the bureaus of the Department of Agriculture. It has charge of the administration and protection of the national forests and also promotes the practice of forestry generally through investigations and the diffusion of information.

The work of the Government in forestry was initiated by the appointment of Dr. Franklin B. Hough in 1876 as special agent in the Department of Agriculture. In 1881 a division of forestry was created in that department. In 1901 this division became the Bureau of Forestry, and in 1905, when the care of the national forests was given to this bureau, its name became the Forest Service.

Previously the care of the national forests had been in the hands of the Department of the Interior.

A law authorizing the President to set apart forest reserves was passed in 1891, but no provision for their administration and use was made until 1897. Previous to 1905 the Bureau of Forestry merely gave expert advice, on request, to the Department of the Interior concerning the application of forestry to the forest reserves. The change of name from "forest reserves" to "national forests" was made in 1906 to correct the impression that the forests were, as "reserves," withdrawn from use. Since the Forest Service took charge of them the fundamental aim has been to open them to the widest use consistent with their proper protection.

The reserves were set aside as follows: By President Harrison, 13,416,710 acres; by President Cleveland, 25,686,320 acres; by President McKinley, 7,050,089 acres; by President Roosevelt, 148,346,924 acres.

During the fiscal year ending June 30, 1910, President Taft added to the national forest 453,517 acres and eliminated from them 2,077,635 acres, making their area at the close of the year 192,931,197 acres. The eliminations threw out land which was found to be better suited for agricultural and other purposes than for forestry. An act of Congress, passed in 1907, prohibits any additions by the President to the national forest area in Washington, Oregon, Idaho, Montana, Wyoming and Colorado.

Figures of cost and use for the fiscal year ending June 30, 1910, were not available when ALMANAC was printed. The following tables show the national forest expenditures and receipts for the fiscal year 1910 compared with those for the fiscal year 1909:

EXPENDITURES FOR ADMINISTRATION AND PROTECTION AND PERMANENT IMPROVEMENTS DURING FISCAL YEAR 1910, COMPARED WITH 1909.

Fiscal Year.	Administration and Protection.		Permanent Improvements.	
	Total.	Per Acre.	Total.	Per Acre.
1910	$3,752,316.91	$0.01945	$598,835.64	$0.00310
1909	2,948,153.08	0.01510	599,471.02	0.00309

COMPARISON OF RECEIPTS FROM THE SEVERAL SOURCES FOR THE FISCAL YEARS 1910 AND 1909.

Fiscal Year.	Grazing.		Timber.		Special Uses.		All Sources.	
	Total.	Per Acre.	Total.	Per Acre.	Total.	Per Acre.	Total.	Per Acre.
1910	$986,909.38	$0.00512	$1,043,428.20	$0.00541	$59,810.50	$0.00031	$2,090,148.08	$0.01084
1909	1,032,185.70	0.00573	736,102.08	0.00505	38,982.88	0.00018	1,807,270.66	0.01096

FORESTS AND FORESTRY—*Continued.*

Under the law 25 per cent. of the gross receipts are paid to the States in which the national forests are located, to be expended for roads and schools. The amount to be paid to the States in this way from the receipts in 1910 is $506,194.84.

The grazing receipts for 1910 were paid by the holders of 20,692 permits to graze 1,497,570 cattle, horses and hogs, and of 4,995 permits to graze 7,648,952 sheep and goats. The receipts from timber sales were paid by approximately 5,000 purchasers, who cut the equivalent of 379,616,000 board feet of timber. The receipts from special uses were paid by the holders of 4,538 permits. In other words, these receipts represent profitable use of the forests by some 30,000 individuals or concerns. To the use for which payment was made must be added the heavy free use of the forests by the public. Figures for free use of timber are as follows:

FREE USE OF TIMBER ON NATIONAL FORESTS.

Fiscal Year.	Number of Permittees.	Cut.	Value.
		Board feet.	
1910	35,364	104,796,000	$176,166.51
1909	33,431	105,205,359	169,081.12

In issuing permits for reservoirs, conduits, power-houses and transmission lines for commercial power development the Forest Service has steadfastly insisted on conditions designed to prevent speculative or perpetual holdings and to secure the full development of available power and the payment of reasonable charges for the use of land.

The total stand of timber on the national forests, exclusive of Alaska, is estimated at over five hundred billions board feet.

The following table shows the total cut of timber from the national forests in the fiscal year 1910:

TIMBER CUT FROM NATIONAL FORESTS.

State or Territory.	Cut Under Sale.	Cut Under Free Use.	Total Cut.	State or Territory.	Cut Under Sale.	Cut Under Free Use.	Total Cut.
	Feet.	*Feet.*	*Feet.*		*Feet.*	*Feet.*	*Feet.*
Montana	72,885,000	14,713,000	87,598,000	Alaska	11,012,000	184,000	11,196,000
California	54,616,000	7,647,000	62,263,000	Utah	9,270,000	8,260,000	17,530,000
Idaho	52,520,000	19,937,000	72,457,000	Nevada	3,048,000	1,710,000	4,758,000
Colorado	42,897,000	12,550,000	55,447,000	Arkansas	2,048,000	513,000	2,561,000
Arizona	34,975,000	5,254,000	40,230,000	Minnesota	1,103,000	381,000	1,484,000
Washington	27,658,000	2,444,070	30,102,000	Oklahoma	33,000	123,000	156,000
Oregon	21,211,000	10,068,000	31,279,000	Florida		95,000	95,000
Wyoming	16,937,000	7,416,000	24,353,000	North Dakota		21,000	21,000
New Mexico	15,902,000	10,004,000	25,906,000				
South Dakota	13,500,000	3,476,000	16,976,000	Total	379,616,000	104,796,000	484,412,000

The average price on the stump for the timber sold in 1910 was $2.44 per thousand board feet.

The value of the public property administered by the Forest Service is estimated at over two billion dollars.

The great areas contained in the national forests have now been brought to a condition where they are beginning to serve the purposes of the West. The conservation of timber and forage through wise use, and the protection of stream flow, are the means of sustaining many industries which have contributed materially to the prosperity of the country.

OFFICE OF THE FORESTER.

At the head of the Forest Service are the Forester, Henry S. Graves, and the Associate Forester, A. F. Potter. The work is organized under the following branches: Operation, and also Lands, James B. Adams in charge; Silviculture, W. T. Cox in charge; Grazing, A. F. Potter in charge, and Products, William L. Hall in charge.

The 149 national forests are distributed in six districts, with a District Forester in charge of each, and headquarters as follows: District 1 (Montana, northeastern Washington, northern Idaho, northwestern South Dakota, northern Michigan, northern Minnesota and southwestern North Dakota), Missoula, Mont., W. B. Greeley, District Forester; District 2 (Colorado, Wyoming, the remainder of South Dakota, Nebraska and western Kansas), Denver, Col., Smith Riley, District Forester; District 3 (most of Arizona, Arkansas, Florida, New Mexico and Oklahoma), Albuquerque, N. Mex., A. C. Ringland, District Forester; District 4 (Utah, southern Idaho, western Wyoming, eastern and central Nevada and a small portion of northwestern Arizona), Ogden, Utah, E. A. Sherman, District Forester; District 5 (California and southwestern Nevada), San Francisco, Cal., F. E. Olmsted, District Forester; and District 6 (Washington, Oregon and Alaska), Portland, Ore., C. S. Chapman, District Forester.

On July 1, 1910, the force employed by the Forest Service numbered 3,093. Of these 2,491 were employed upon the national forests and 602 were engaged in administrative, scientific and clerical work at the Washington and district headquarters. Of the employés on the national forests the force engaged principally in protective work numbered 1,859 men, as follows: Forest Rangers, 243; Assistant Forest Rangers, 1,050; Forest Guards, 553; Game Wardens, 2; Hunters and Trappers, 6. The protective force was therefore about one man for every 104,000 acres, or 163 square miles. (Prussia has one man for every 1,700 acres, and Baden one for every 750.)

BRANCH OF SILVICULTURE.

The branch of silviculture directs the management of the national forests as regards both the systems of cutting mature timber and the work of forest planting; supervises their protection; co-operates with States in developing forest policies adapted to their requirements; co-operates with private forest

FORESTS AND FORESTRY—*Continued.*

owners who desire to practise forestry on their lands: and carries on silvicultural investigations of the important species of the United States. Its most important work is in connection with the management of the national forests where the chief problem, after fire protection, is to replace the mature timber as it is sold and cut by young growth of valuable species.

In planting within the national forests the primary object is to produce commercial timber, although in a number of cases planting has been done chiefly with the view of reforesting denuded watersheds in order to control and regulate the flow of streams directly supplying cities and towns. During the year ending June 30, 1910, 7,400 acres in national forests were sown or planted to trees, chiefly Douglas fir, Western yellow pine, Austrian pine and Engelmann spruce. There are 45 Government nurseries which supply the national forests. These have a present stock of about 20,000,000 plants and are capable of supplying 18,000,000 a year. In the East forest planting has been done mainly in co-operation with States and private owners.

At the request of the States the Forest Service makes examinations of their forest conditions makes silvicultural studies of practical importance, suggests remedial legislation for giving the States a wise forest policy, etc. The cost of such work is shared by the States and the service. The service co-operates with private owners by sending its experts to examine timber tracts and report on the proper methods for managing and protecting them. The cost of such examination is borne by the owner. During 1910 examinations were made of timber tracts aggregating 323,000 acres.

BRANCH OF GRAZING.

The branch of grazing supervises the grazing of live stock upon the national forests, the principal lines of work being the allotment of grazing privileges; the issuance of grazing permits; the division of the ranges between different classes of stock or their owners, and the regulation of the stock grazed under permit upon the ranges; and the development of the forage producing capacity of the national forests by the restoration of depleted areas through systematic control of the stock grazed upon them or by artificial means, through the eradication of noxious range-destroying rodents and through the institution of new methods of range control. By co-operation with Federal and State authorities in the enforcement of quarantine regulations the national forests have been practically freed from infectious or contagious diseases fatal to live stock, and by an active campaign against predaceous animals destructive to live stock. The annual loss from this source within the national forests has been reduced by several hundred thousand dollars.

The number of stock grazed during the past season (1910), under permit and by settlers without permit, was approximately 1,500,000 head of cattle, horses and swine, and 7,500,000 head of sheep and goats The annual productive value of this number of stock is more than $20,000,000. The number of persons holding permits to graze live stock during the past year was in excess of 25,000.

BRANCH OF PRODUCTS

The branch of products carries on studies, tests and demonstrations to further the more complete utilization of the products of the forest. A forest products laboratory is operated at the University of Wisconsin, where experiments are made to determine the properties of American woods, to ascertain cheap and effective treatments to prevent decay, to test the adaptability of untried woods for specific uses; such as paper pulp, to develop uses for the material wasted in sawmill operations, and to discover processes of obtaining valuable chemical by-products for the waste which can not otherwise be utilized. An office of wood utilization is maintained at Chicago to promote the economic use of wood among the timber-consuming industries. Studies are made to find the kind, quantity and cost of timber consumed in different States and regions and also where the material comes from and what amount is lost through waste. The wood-consuming industries are aided in finding the most suitable raw material and in developing methods of utilizing their waste product. In the Western States all products work centres in the district offices at Denver, San Francisco and Portland.

FOREST POLICY OF THE STATES.

New York has purchased and set aside 1,600,000 acres in the Adirondack and Catskill Mountains as forest preserves, under the control of the Forest, Fish and Game Commission of the State. These lands and private lands in the preserve counties are protected from fire by an adequate system of wardens. Unfortunately the Constitution of the State prohibits the cutting of timber from State lands. In 1909 the Commission distributed at cost to private owners 1,005,325 forest tree seedlings; and the waste and open land on the preserve is being gradually planted to trees under the supervision of trained foresters.

Pennsylvania has purchased more than 920,000 acres of land for State forest preserves, and the Forestry Commission has the right to purchase additional forest lands at a price not to exceed $5 an acre. The preserves are situated chiefly on the mountains of the central part of the State and located with special reference to protecting the water supply of cities and towns. The State forest reserves are not only protected from fire, but are managed according to forestry principles, the mature timber being cut and sold. A school for training forest rangers for the reserves is maintained at Mont Alto. There is a well organized forest fire protective system in the State. The State distributes forest trees for planting and gives advice in the management of forest lands to private owners.

Minnesota, Wisconsin and Michigan have well organized State forest departments. They have large State forest reserves, exceeding 200,000 acres for each State, which are protected from fire and on which the open land is being planted and the mature timber cut and sold. Each of these States protects the forest land of private owners as well as that of the State forest reserves from fire, and distributes tree seedlings for planting to land owners at cost. Ohio, New Hampshire and Vermont also distribute planting material to private owners and give them advice in regard to methods of forest management. The following States have forestry departments which seek to protect from fire by means of an organized warden system all of the greater portion of the forest lands in the State: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, New Jersey, Maryland, Oregon, and California; while Washington and Idaho provide for such protection through legal associations of land owners. Maine supports a very efficient forest fire service covering the unorganized townships in the northern part of the State: in the remaining townships, the selectmen are ex-officio wardens. Most of these States also have small State forests, that of New Jersey being 14 000 acres. Other States which have forest officers charged with forest interests are Rhode Island Indiana, Kansas, Montana, North Carolina, and West Virginia. South Carolina, Alabama and Louisiana have recently passed, or have under consideration, advanced forestry legislation. The recently adopted law of Louisiana is especially noteworthy in that it provides for a forest fire protective organization by means of a tax of ¾ of a cent on every 1.000 board feet of lumber sawn in the State.

(The legality of the Louisiana timber revenue provision depends upon the adoption of an amendment to the State Constitution, upon which a vote was taken November 8, 1910.)

The Public Lands of the United States.

(Prepared for THE WORLD ALMANAC by the General Land Office.)

TABULAR statement showing area of public lands vacant and subject to entry and settlement in the public land States and Territories, July 1, 1910:

STATE OR TERRITORY.	AREA UNAPPROPRIATED AND UNRESERVED.

EMIGRATION FROM UNITED STATES.

For fiscal years ended June 30, 1908, emigrant aliens, 395,073; non emigrant aliens, 319,755; total, 714,828. In 1909, emigrant aliens, 225,802; non emigrant aliens, 174,590; total, 400,392. In 1910, emigrant aliens, 202,436; non emigrant aliens, 177,982; total 380,418.

The New York Public Service Act.

PUBLIC SERVICE COMMISSIONERS.

FIRST DISTRICT.

William R. Willcox, Chairman, Manhattan, New York; holds office until February 1, 1913.
William McCarroll, Brooklyn; holds office until February 1, 1912.
Edward M. Bassett, Brooklyn; holds office until February 1, 1911.
Milo Roy Maltbie, Manhattan, New York; holds office until February 1, 1915
John E. Eustis, Manhattan, New York; holds office until February 1, 1914.

SECOND DISTRICT.

Frank W. Stevens, Chairman, Jamestown; holds office until February 1, 1913.
John B. Olmsted, Buffalo; holds office until February 1, 1912.
John N. Carlisle, Watertown; holds office until February 1, 1911.
Martin S. Decker, New Paltz; holds office until February 1, 1915.
James E. Sague, New Hamburg; holds office until February 1, 1914.

Chapter 429 of the Laws of 1907, "An Act to establish the Public Service Commissions and prescribing their powers and duties, and to provide for the regulation and control of certain public service corporations and making an appropriation therefor," became a law on June 6, 1907. Two Public Service Commissions of five members each were created by the Act, one with authority in the First District, which included the counties of New York, Kings, Queens and Richmond, and the other in the Second District, which included all the other counties of the State.

The Act abolished the existing State Board of Railroad Commissioners, the State Commission of Gas and Electricity, the State Inspector of Gas Meters, and the Board of Rapid Transit Commissioners of New York City. All the powers of the Railroad Commissioners, of the Commission of Gas and Electricity, and of the Inspector of Gas Meters were conferred upon the Public Service Commissions. All the powers and duties of the Board of Rapid Transit Railroad Commissioners of New York City were conferred upon the Public Service Commission of the First District. Each of the successors of the first Commissioners appointed are to hold office for a period of five years. The Governor is authorized to remove any Commissioner for inefficiency, neglect of duty or misconduct in office, giving to him a copy of the charges against him, and an opportunity of being publicly heard in person or by counsel in his own defence.

The jurisdiction of the Public Service Commission of the First District extends to railroads and street railroads lying exclusively within that district, to any common carrier operating exclusively within that district, and to the manufacture, sale or distribution of gas and electricity for light, heat and power in that district. In addition the Commission of the First District is to exercise the powers heretofore conferred upon the Board of Rapid Transit Railroad Commissions. All jurisdiction not specifically granted to the Public Service Commission of the First District is granted to the Public Service Commission of the Second District. The annual salary of each Public Service Commissioner is $15,000; of their secretary, $6,000, and of their counsel, $10,000.

The Act provides that every railway corporation shall furnish with respect thereto such service or facilities as shall be safe and adequate, and in all respects just and reasonable; and, secondly, that all charges made or demanded by any such corporation, person or common carrier for the transportation of passengers, freight or property, for any service rendered, or to be rendered, in connection therewith, shall be just and reasonable, and not more than allowed by law or by order of the Public Service Commission having jurisdiction, and made as authorized by the Act. Every unjust or unreasonable charge made or demanded for any such service or transportation of passengers, freight or property, or in connection therewith, or in excess of that allowed by law or by order of the Commission, is prohibited. A railroad corporation, upon the application of any shipper tendering traffic for transportation, must construct upon reasonable terms a switch connection. Every common carrier is to file with the Public Service Commission having jurisdiction, and print and keep open to public inspection, schedules showing the rates, fares and charges for the transportation of passengers and property within the State between each point upon its route and all other points thereon. The schedules are to plainly state the places between which property and passengers are to be carried, the classification of passengers, freight and property in force, all terminal charges, storage charges, icing charges, and all other charges which the Commission may require to be stated, all privileges or facilities granted or allowed, and any rules or regulations which may in any wise change, affect, or determine any part, or the aggregate of the rates, fares or charges, or the value of the service rendered to the passenger, shipper or consignee. Such schedules are to be plainly printed in large type; copies for the use of the public are to be kept posted in two public and conspicuous places in every depot, station and office of every common carrier where passengers or property are received for transportation in such manner as to be readily accessible to and conveniently inspected by the public. No common carrier, the Act says, "shall directly or indirectly by any special rate, rebate, drawback, or other device or method, charge, demand, collect or receive from any person or corporation a greater or less compensation for any service rendered or to be rendered in the transportation of passengers, freight or property, except as authorized in this Act, than it charges, demands, collects, or receives from any other person or corporation for doing a like and contemporaneous service in the transportation of a like kind of traffic under the same or substantially similar circumstances and conditions." The giving of free tickets, free passes, or free transportation for passengers or property, except to its employees and certain other specified classes, or in certain specified cases, is prohibited. No common carrier is to charge or receive any greater compensation in the aggregate for the transportation of passengers, or of a like kind or property, under substantially similar circumstances and conditions for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance. Upon the application, however, of a common carrier the Public Service Commission may, by order, authorize it to charge less for a longer than for shorter distances for the transportation of passengers or property in special cases after investigation by the Commission. Every rail-

THE NEW YORK PUBLIC SERVICE ACT—*Continued.*

road corporation and street railway corporation is to have sufficient cars and motive power to meet all requirements for the transportation of passengers and property which may reasonably be anticipated. Every railroad corporation must furnish to all persons and corporations who apply therefor and offer freight for transportation sufficient and suitable cars for the transportation of such freight in car-load lots.

POWERS OF THE COMMISSIONS.

Each one of the Public Service Commissions is to have general supervision of all common carriers, railroads and street railroads, and is directed to keep informed as to their general condition, their capitalization, their franchises, and the manner in which their lines owned, leased, controlled or operated, are managed, conducted and operated, not only with respect to the adequacy, security and accommodation afforded by their service, but also with respect to their compliance with all provisions of law, orders of the Commission and Charter requirements. Each Commission is given power to examine all books, contracts, documents and papers of any person or corporation subject to its supervision, and by subpoena to compel production thereof. Each Commission is to prescribe the form of the annual reports required under the Act to be made by common carriers, railroad and street railroad corporations. Each Commission is to investigate the cause of all accidents on any railroad or street railroad within its district which result in loss of life or injury to persons or property, and which, in their judgment, require investigation. Whenever either Commission shall be of the opinion that the rates, fares or charges demanded by any common carrier, railroad corporation or street railroad corporation subject to its jurisdiction are unjust, unreasonable, unjustly discriminatory, or unduly preferential, or in anywise in violation of any provision of law, it shall determine the just and reasonable rates, fares and charges to be thereafter observed and in force as the maximum to be charged for the service to be performed. And whenever a Public Service Commission is of the opinion, after a hearing, that the equipment, appliances or service of any common carrier, railroad corporation or street railroad corporation is unsafe, its members are required to determine the safe equipment thereafter to be in force, and prescribe the same by an order to be served upon the common carrier, railroad corporation or street railway corporation concerned. The Commissions are granted power to require two or more common carriers owning a continuous line of transportation to establish joint rates, fares and charges. The Commissions may order repairs and improvements to be made to tracks, switches, terminals, and motive powers in order to promote the security or convenience of the public. If, in the judgment of the Commission having jurisdiction, any railroad corporation or street railroad corporation does not run trains enough or cars enough, or possess or operate motive power enough reasonably to accommodate the traffic, passengers and freight transported by it, or it does not run its trains or cars with sufficient frequency, such a Commission may make an order directing any such corporation to increase the number of its trains, or of its cars, or its motive power. A uniform system of accounts for railroad and street railway corporations is authorized. Without first having obtained the permission and approval of the proper Public Service Commission, no railroad corporation may begin the construction of a railroad or street railroad. The Commission within whose district such construction is to be made is authorized to grant its approval when, in its judgment, the exercise of the franchise or privilege is necessary or convenient for the public service. No franchise to own or operate a railroad or street railroad may be assigned, transferred or leased unless the assignment, transfer or lease is first approved by the proper Commission. No railroad corporation or street railroad corporation is to acquire the capital stock of any railroad corporation or street railroad corporation unless authorized to do so by one of the Commissions created by the Act. Every contract for a transfer of stock by or through any person or corporation to any corporation in violation of the Act, it is declared, shall be void. Common carriers, railroads, and street railroad corporations are authorized to issue stocks, bonds, notes and other evidences of indebtedness when necessary for the acquisition of property, provided, that they shall have secured from the proper Commission an order authorizing such an issue. For the purpose of enabling it to determine whether it should issue such an order, the Commission concerned is to make an inquiry, and examine such books or contracts as it may deem of importance in enabling it to reach a determination. The Act says that "any common carrier, railroad corporation or street railroad corporation which shall violate any provision of this Act, or which fails, omits, or neglects to obey, observe, or comply with any order, or any direction, or requirement of the Commission, shall forfeit to the people of the State of New York not to exceed the sum of $5,000 for each and every offence; every violation of any such order, or direction, or requirement, or of this Act, shall be a separate and distinct offence; and in case of a continuing violation, every day's continuance thereof shall be, and be deemed to be, a separate and distinct offence." It is also made a misdemeanor for the officer of a corporation to violate the Act, or to procure any violation by any such corporation. Summary proceedings in the courts are authorized in the case of offending corporations.

By amendment to the Transportation Company law (consolidated laws of 1909), stage coach companies in cities of over a million inhabitants were designated as common carriers and so brought under the jurisdiction of the Commission.

The Commission for the First District, as the successor of the old Rapid Transit Commission, supervises the construction of new rapid transit routes within its jurisdiction (c 4 L 1891 and amendments) and therein determines the necessity and convenience of new routes, makes plans, obtains consents and makes all preparation for the construction and operation of routes when approved by the Board of Estimate and Apportionment. Prior to 1909 the law required such routes to be built with city money, and placed absolute time limits upon operating leases. The law known as the Robinson law passed at the last session of the Legislature, provides that construction may be, where approved by the Commission and the Board of Estimate and Apportionment, done by private parties with private funds; that the grant shall contain a reservation to the city to buy the franchise at any time after ten years on notice and on terms (this is the "Indeterminate Franchise"), and that the net income after all proper charges are met shall be divided equally between the grantee and the city. This law also provides for levying the whole or a part of the cost

THE NEW YORK PUBLIC SERVICE ACT—*Continued.*

of construction, property and operation upon such portion of the city as will be benefited, assessment bonds (which do not enter into the debt limit) being sold therefor. Under the provisions of this new law over $250,000,000 of capital has been offered by private parties to construct subways. Contracts have been let and work is in progress on a portion of the Fourth Avenue route in Brooklyn, and advertisements had on approved forms of contract for additional extensive work on the tri-borough route. In addition the Interborough-Metropolitan interests are projecting great additions to their existing routes.

TELEGRAPH AND TELEPHONES.

By chapter 673, laws of 1910, which became a law June 25, 1910, and became effective September 1, 1910, telephone and telegraph companies were brought under the jurisdiction of the Public Service Commission for the Second District, as to their operation within the State, very much as the gas and electrical companies.

INTERSTATE TRAFFIC.

Either of the Commissions may investigate freight rates on interstate traffic on railroads within the State, and when such rates are, in the opinion of either Commissions, excessive or discriminatory, or are levied or laid in violation of the Interstate Commerce law, or in conflict with the rulings, orders or regulations of the Interstate Commerce Commission, the Commission concerned may apply by petition to the Interstate Commerce Commission for relief.

SUPERVISION OF GAS AND ELECTRICAL CORPORATIONS.

Each Commission within its jurisdiction is given general supervision of all persons and corporations having authority to maintain wires and pipes along or under the streets of a municipality for the purpose of furnishing or distributing gas, or of furnishing or transmitting electricity for light, heat or power. The Commissions may ascertain the quality of the gas supplied, examine the methods employed in manufacturing and supplying gas or electricity for light, heat or power, and order such improvements as will best promote the public interest, preserve the public health, and protect those using such gas or electricity. The Commissions also may fix the standard of illuminating power and purity of gas, not less than that prescribed by law, to be manufactured or sold by persons, corporations or municipalities for lighting, heating or power purposes; prescribe methods of regulation of the electric supply system as to the use for incandescent lighting; fix the initial efficiency of incandescent lamps furnished by the persons, corporations or municipalities generating and selling electric current for lighting, and by order require the gas so manufactured or sold to equal the standard so fixed by it, and, finally, establish the regulations as to pressure at which gas shall be delivered. The Commissions are authorized to determine by investigation whether or not the gas sold is of the purity and quality required. The Commissions may require the corporations manufacturing gas and electricity to keep uniform accounts. The Commission is to require every person and corporation under its supervision to submit to it an annual report showing in detail (1) the amount of its authorized capital stock and the amount thereof issued and outstanding; (2) The amount of its authorized bonded indebtedness, and the amount of its bonds, and other forms of evidence of indebtedness issued and outstanding; (3) its receipts and expenditures during the preceding year; (4) the amount paid as dividends upon its stock and as interest upon its bonds; (5) the name of, and the amount paid as salary, to each officer, and the amount paid as wages to its employees; (6) the location of its plant, or plants, and system, with a full description of its property and franchises, stating in detail how each franchise stated to be owned was acquired; and (7) such other facts pertaining to the operation and maintenance of the plant and system, and the affairs of such person or corporation as may be required by the Commission. Any corporation which shall neglect to make such a report is made liable to a penalty of $100, and an additional penalty of $100 for each day after the prescribed time for which it shall neglect to file the same. Every municipality engaged in operating any works or systems for the manufacture and supplying of gas or electricity is to be required to make an annual report to the Commission showing in detail (1) the amount of its authorized bonded indebtedness, and the amount of its bonds and other forms of evidence of indebtedness issued and outstanding for lighting purposes; (2) its receipts and expenditures during the preceding year; (3) the amount paid as interest upon its bonds and upon other forms of evidence of indebtedness; (4) the name of and the amount paid to each person receiving a yearly or monthly salary, and the amount paid as wages to employees; (5) the location of its plant and system, with a full description of the property; and (6) such other facts pertaining to the operation and maintenance of the plant and system as may be required by the Commission.

INSPECTION OF GAS AND ELECTRIC METERS.

Each Commission is to appoint inspectors of gas and electric meters, who are to inspect, examine, prove and ascertain the accuracy of any and all gas meters used or intended to be used for measuring, or ascertaining the quantity of illuminating or fuel gas or natural gas furnished by any gas corporation to or for the use of any person, and any and all electric meters used or intended to be used for measuring and ascertaining the quantity of electric current furnished for light, heat and power by any electrical corporation to or for the use of any person or persons. The law says that "No corporation or person shall furnish or put in use any gas meter which shall not have been inspected, proved and sealed, or any electric meter which shall not have been inspected, approved, stamped or marked by an inspector of the Commission." The law also says that "No gas corporation or electrical corporation incorporated under the laws of this or any other State shall begin construction, or exercise any right or privilege under any franchise hereafter granted, or under any franchise heretofore granted, but not heretofore actually exercised, without first having obtained the permission and approval of the proper Commission." The law further says: "No municipality shall build, maintain and operate for other than municipal purposes any works or system for the manufacture and supplying of gas or electricity for lighting purposes without a certificate of authority granted by the Commission."

The Initiative and Referendum.

THE political institutions known as Initiative and Referendum are those by which the body of the electorate may initiate measures to be enacted by their own vote into laws, and by which laws enacted by the Legislatures are referred to and approved or rejected by the people. The first appearance of these propositions was in Switzerland about the sixteenth century, but made great strides there in recent years, being in effect in every canton except Freiburg. The Referendum may be divided into Referendums of (a) entire constitutions, (b) amendments to constitutions, (c) of laws affecting the whole State, and (d) of laws affecting parts of States or localities only.

REFERENDUMS OF WHOLE CONSTITUTIONS.

Massachusetts in 1778 was the first State to refer its whole constitution to popular approval, followed closely by New Hampshire (1783), Connecticut (1818), and Maine (1819), Rhode Island (1824, rejected), New York (the first State out of New England, in 1821), Virginia (1829), Georgia (1833), Tennessee (1834), North Carolina and Michigan, in 1835. Since 1835 all new Constitutions except those of Delaware (1895), Mississippi (1890), and South Carolina (1895) have been submitted to popular vote after leaving the hands of the Convention or Legislature.

AMENDMENTS TO CONSTITUTIONS.

Amendments to Constitutions are made by Conventions called on a Referendum in thirty States—Alabama, California, Colorado, Delaware, Florida, Idaho, Illinois, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Hampshire, New York, North Carolina, Ohio, South Carolina, South Dakota, Tennessee, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming—and in fifteen—Arkansas, Connecticut, Georgia, Indiana, Louisiana, Maine, Massachusetts, Mississippi, New Jersey, North Dakota, Oregon, Pennsylvania, Rhode Island, Texas, and Vermont—by the Legislature, and are referable to the people in forty-three States, the exceptions being Delaware and South Carolina.

LAWS AFFECTING THE WHOLE STATE.

1. When the vote of the people is authorized by the Constitution. This is the Referendum in its narrower sense, and in this aspect is now a matter of political interest. The Constitution of South Dakota (1898) provides: "The legislative power of the State shall be vested in a Legislature, which shall consist of a Senate and House of Representatives, except that the people expressly reserve to themselves the right to propose measures (initiative), which measures the Legislature shall enact and submit to a vote of the electors of the State, and also the right to require that any laws which the Legislature may have enacted shall be submitted to a vote of the electors of the State before going into effect." The Constitution of Oregon (1902) contains a similar provision. So far, however, no other State has incorporated this initiative and referendum clause in general terms in its Constitution. Special provisions, nevertheless, are the subject of referendum, as the location of the capital of the State and of State institutions, the limitation of expenditure or of the debt, and in Colorado, Montana, Idaho, and Utah the maximum tax rate, the franchise and many like questions.

2. When no authorization for such vote is contained in the Constitution. The reference of general laws to the people in the absence of express constitutional authority was early attempted, but has generally been held unconstitutional. Barto vs. Himrod, 4 Seld (N. Y.) 483, is the leading case. But the reference of a time when a law shall take effect has been held constitutional—upon this many of the State prohibitory Liquor Laws are based, as in Michigan (1852), Vermont (1852), Maine (1858), North Carolina (1881). Other matters of a general nature have been so referred—e. g., the seat of Government (California, 1850), free schools (New York, 1849), minority representation on corporations (New Hampshire, 1880), contract labor in prisons (New York, 1883), Chinese immigration (Nevada, 1880), woman suffrage (Massachusetts, 1895).

LAWS AFFECTING PARTS OF STATES OR LOCALITIES ONLY.

The reference of such laws to the vote of the people of the locality affected is held to be not unconstitutional in legislation determining the area, boundaries, etc., of local political districts; the selection of county seats and sites, the selection of a corporate name, and the choice of a city charter or local government, in which the referendum is made obligatory in some States. So, also, propositions to remove the fire and police departments of Jersey City were referred to the inhabitants in 1885; to reform the Civil Service in any city of Illinois (1895); to increase the number of supervisors in Iowa (1897), Nebraska (1897), North Dakota (1895), and Ohio (1896). Every phase of legislation in which there is danger to the legislator is apt at some time to be so referred, including loan bills and financial proposals of all kinds.

THE INITIATIVE.

The initiative is either a right reserved by the people of a State in their Constitution to originate propositions to be enacted into law by the Legislature and ratified by the vote of the people, or that giving a number of voters in a community the right to cause an election to be held upon a permitted question (as whether liquor shall be sold in the town), and if the vote be in favor of a change then the new condition to obtain under a previously passed statute of the State Legislature. The initiative in its larger aspect has authority only in South Dakota and Oregon, and there its operation excludes only matters of emergency, as the preservation of the public peace, health, or safety. In its local aspect it has been called in to inaugurate a vast variety of matters of local interest.—prohibition, county seats, live stock, fencing and high-school laws—finding its greatest development in Oregon, South Dakota, Nebraska, Colorado, California, and Iowa.

The Initiative and Referendum constitute a political force or medium opposed in action to the Legislature as the delegated authority of the people, and the various labor and people's parties have turned to them as a means of holding in their own hands a larger measure of the sovereign power which, under the older theories of government, was entirely delegated to their representatives.

THE INITIATIVE AND REFERENDUM—*Continued.*

THE DIRECT PRIMARY AND THE RECALL.

Closely allied to the Initiative and the Referendum as panaceas for official incompetence or malfeasance and the domination of the machine are the Direct Primary and the Recall. The former of these seeks to place men in nomination without the intervention of the caucus. The movement has sufficient force to have impressed itself upon both the great political parties in New York State. The Recall, as its name implies, is a process by which elective officers may be ousted and "recalled" by a popular vote. The Mayor of Los Angeles was "recalled" during the year.

The Single Tax.

The following statement of the single tax principle was written by Henry George, Sr.:

We assert as our fundamental principle the self-evident truth enunciated in the Declaration of American Independence, that all men are created equal and are endowed by their Creator with certain inalienable rights. We hold that all men are equally entitled to the use and enjoyment of what God has created and of what is gained by the general growth and improvement of the community of which they are a part. Therefore, no one should be permitted to hold natural opportunities without a fair return to all for any special privilege thus accorded to him, and that that value which the growth and improvement of the community attaches to land should be taken for the use of the community; that each is entitled to all that his labor produces; therefore, no tax should be levied on the products of labor.

To carry out these principles, we are in favor of raising all public revenues for national, State, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and all the obligations of all forms of direct and indirect taxation.

Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local governments, State government, and the general government, as the revenue from direct tax is now divided between the local and State governments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner. The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor.

It is a tax not on land, but on the value of land. Then it would not fall on all land, but only on valuable land, and on that not in proportion to the use made of it, but in proportion to its value—the premium which the user of land must pay to the owner, either in purchase money or rent, for permission to use valuable land. It would thus be a tax not on the use and improvement of land, but on the ownership of land, taking what would otherwise go to the owner as owner, and not as user.

In assessments under the single tax all values created by individual use or improvement would be excluded, and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus the farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, and the man who, on a city lot, erected a valuable building would be taxed no more than the man who held a similar lot vacant. The single tax, in short, would call upon men to contribute to the public revenues not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land idle as for putting it to its fullest use. The single tax, therefore, would—

1st. Take the weight of taxation off the agricultural districts, where land has little or no value irrespective of improvements, and put it on towns and cities, where bare land rises to a value of millions of dollars per acre.

2d. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government, and greatly reduce its cost.

3d. Do away with the fraud, corruption, and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid or carried off, and its value can be ascertained with greater ease and certainty than any other.

4th. Give us with all the world as perfect freedom of trade as now exists between the States of the Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the tariff. It would do away with the fines and penalties now levied on any one who improves a farm, erects a house, builds a machine, or in any way adds to the general stock of wealth. It would leave every one free to apply labor or expend capital in production or exchange without fine or restriction, and would leave to each the full product of his exertion.

5th. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make overproduction impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure, and participation in the advantages of an advancing civilization, in securing to each individual equal right to the use of the earth. It is also a proper function of society to maintain and control all public ways for the transportation of persons and property, and the transmission of intelligence; and also to maintain and control all public ways in cities for furnishing water, gas, and all other things that necessarily require the use of such common ways.

United States Bureau of Mines.

CHAPTER 240 of the acts of the second session of the 61st Congress to establish in the Department of the Interior a Bureau of Mines was approved May 16, 1910. The act provided for the establishment of said bureau and a director "who shall be thoroughly equipped for the duties of said office by technical education and experience," with an annual salary of $6,000. Transfer to the bureau was provided for the investigations of structural materials and the analyzing and testing of coals, lignites and other mineral fuel substances, and the investigation as to the cause of mine explosions, from the United States Geological Survey. The duties of the bureau were prescribed by section 2 of the act, as follows:

"It shall be the province and duty of said bureau and its director, under the direction of the Secretary of the Interior, to make diligent investigation of the methods of mining, especially in relation to the safety of miners, and the appliances best adapted to prevent accidents, the possible improvement of conditions under which mining operations are carried on, the treatment of ores and other mineral substances, the use of explosives and electricity, the prevention of accidents, and other inquiries and technologic investigations pertinent to said industries, and from time to time make such public reports of the work, investigations, and information obtained as the Secretary of said department may direct, with the recommendations of such bureau."

The American Forestry Association.

THE American Forestry Association whose headquarters are at 1410 H Street, N. W., Washington, D. C., was organized in 1882, and incorporated in January, 1897, with the following objects:

1. The promotion of a businesslike and conservative use and treatment of the forest resources of this country.

2. The advancement of legislation tending to this end both by the States and the Congress of the United States, the inauguration of forest administration by the Federal Government and by the States, and the extension of sound forestry by all proper methods.

3. The diffusion of knowledge regarding the conservation, management, and renewal of forests, the proper utilization of their products, methods of reforestation of waste lands, and the planting of trees.

The Association desires and needs as members all who are interested in promoting the objects for which it is organized—all who realize the importance of using the natural resources of the country in such a manner as not to exhaust them, or to work ruin to other interests. In particular it appeals to owners of woodlands, to lumbermen and foresters, as well as to engineers, professional and business men who have to do with wood and its manifold uses, and to persons concerned in the conservation of water supplies for irrigation and other purposes.

The Association has over 6,500 members at the present time, residents of every State in the Union, Canada, and foreign countries. The annual dues are one dollar. A magazine, *American Forestry*, is published, for which an extra charge is made. The officers of the Association are:

President—Curtis, Guild Jr., of Mass.; *Treasurer*—Otto Luekert, Washington, D. C.; *Executive Secretary*—Edwin A. Start, Washington, D. C.

The Fisheries Award.

THE International Court of Arbitration on September 7, 1910, gave its decision in the Newfoundland Fisheries case submitted by the United States and Great Britain, but involving the Governments of Canada and Newfoundland also. Seven questions were presented to the tribunal, which decided two in favor of Great Britain and the remainder in favor of the United States.

In the first question decided for Great Britain the court held that its right to make fishing regulations without the consent of the United States was inherent in the former's sovereignty, but in the exercise of the right to make limited regulations it must not violate the treaty of 1818 or so frame them as to give the local fishermen an advantage over the American fishermen. The provisions of the award applied not only to future legislation by the Imperial Government and the colonies, but required that the existing statutes and regulations to which the United States objected be submitted to a commission which shall judge of their reasonableness and necessity in the light of the principles laid down. It was provided that this commission should consist of three specialists, one each to be named by the United States and Great Britain, to whom should be added Dr. Hock, official scientific adviser to the Newfoundland Government regulating the fisheries. The commission must submit its report to the Hague tribunal which, if the decision is unanimous, will incorporate it in its present award. In case of a disagreement by the commission the Hague tribunal will adjudicate the matter finally.

The other contention of Great Britain decided in its favor closed to American fishermen on no-treaty coasts all bays ten miles or less between headlands, but opened to them all bays whose mouths are more than ten miles between headlands.

The questions which were absolutely decided in favor of the States were as follows:

"Have the inhabitants of the United States a right to employ as members of the fishing crews of their vessels persons not inhabitants of the United States?"

"Can the exercise by the inhabitants of the United States of the liberties referred to in the said article be subjected, without the consent of the United States, to the requirements of entry or report at custom houses or the payment of light or harbor or other dues, or to any other similar requirement?"

"Under the provision of the said article that the American fishermen shall be admitted to enter certain bays or harbors for shelter, repairs, wood or water, and for no other purpose whatever, but that they shall be under such restrictions as may be necessary to prevent their taking, drying or curing fish therein, or in any other manner whatever abusing the privileges thereby reserved to them, is it permissible to impose restrictions making the exercise of such privileges conditional upon the payment of light or harbor or other dues, or entering or reporting at custom houses or any similar conditions?"

"Have the inhabitants of the United States liberty to take fish in the bays, harbors and creeks on that part of the southern coast of Newfoundland which extends from Cape Ray to Rameau Islands, or on the western and northern coasts of Newfoundland from Cape Ray to Quirpon Islands, or on the Magdalen Islands?"

"Are the inhabitants of the United States whose vessels resort to the treaty coasts entitled to have for their vessels, when duly authorized by the United States in that behalf, the commercial privileges on the treaty coasts accorded by agreement or otherwise to United States trading vessels generally?"

The umpire of the court which made these awards was Dr. Heinrich Lammasch of Austria. The counsel for the United States were Senator Elihu Root, George Turner and Samuel J. Elder, and associated with them were James Brown Scott, Solicitor of the Department of the State, Charles B. Warner and Robert Lansing. The American agent was Chandler P. Anderson and the agent of Great Britain, A. B. Aylesworth, Minister of Justice of Canada.

Prosecution of Trusts by the United States.

THE following is the status of the cases brought by the United States under the terms of the Sherman Anti-Trust act, on November 12, 1910:

United States vs. Allen & Robinson et al. District of Hawaii.—Petition to dissolve illegal combination. October 19, 1905. Pending.

United States vs. Metropolitan Meat Company et al. District of Hawaii.—Indictment returned October 21, 1905, charging combination of meat dealers. Pending.

United States vs. Terminal Railroad Association of St. Louis. Eastern District of Missouri.—Petition filed November 25, 1905, to dissolve monopoly of terminal facilities at city of St. Louis. Upon disagreement of Circuit judges case came to Supreme Court and was remanded for further proceedings. Government then attempted to secure rehearing in Circuit Court and failed, and has again appealed to the Supreme Court and case is now pending therein.

United States vs. Virginia-Carolina Chemical Company et al.—Fertilizer Trust case.—Indictment returned Middle District of Tennessee May 25, 1906. Same quashed by Judge McCall July 3, 1908.

United States vs. American Ice Company et al. District of Columbia.—Indictment returned July 12, 1906, charging unlawful agreement to control prices and restrict competition. Pending; United States District-Attorney says is having good effect as it is.

United States vs. Chandlee Ice and Cold Storage Plant et al. Western Oklahoma.—Indictment returned September 19, 1906. Pending.

United States vs. Standard Oil Company of New Jersey. Eastern Missouri.—Equity suit to dissolve illegal combination instituted November 16, 1906. Decree favor Government filed November 20, 1909. Case argued on appeal and submitted to Supreme Court, to be reargued because of death of Justice Brewer. Set for October term 1910; hearing postponed to January 3, 1911, account of vacancies on Supreme Bench.

United States vs. American Seating Company. Northern Illinois.—Indictment returned March 12, 1907. Pleas of guilty entered May 20, 1907, and fines aggregating $43,000 imposed.

United States vs. Santa Rita Mining Company and Santa Rita Store Company. New Mexico.—Indictment returned April 4, 1907. Conviction secured April 14, 1907, and each defendant fined $1,000. Case appealed.

United States vs. Reading Company et al. Eastern Pennsylvania.—Petition in equity to dissolve anthracite coal combination filed June 12, 1907. Case has been argued and submitted to the Circuit Court.

United States vs. American Tobacco Company et al. Southern District of New York.—Petition to dissolve illegal combination filed July 10, 1907. November 7, 1908, decision was rendered in favor of Government except as to certain foreign corporations; appeal by both sides. Argued and submitted to Supreme Court last session; to be reargued because of death of Justice Brewer. Set for October term; hearing postponed to January 3, 1911, on account of vacancies on Supreme Bench.

United States vs. Du Pont de Nemours Company.—Delaware (Powder Trust case). Petition for dissolution filed July 30, 1907. Taking of testimony will be completed within thirty days and case set for argument.

United States vs. H. D. Corbett Stationery Company et al. Arizona.—Indictment found November 1, 1907. Jury verdict, not guilty, November 8, 1908.

United States vs. National Umbrella Frame Company et al. Southern District of New York.—Indictment returned July 1, 1907. Pending.

United States vs. Union Pacific Coal Company et al. Utah.—November 20, 1907, indictment for conspiracy under Sherman act. Conviction secured in lower court, but judgment reversed by Circuit Court of Appeals.

United States vs. 175 Cases of Cigarettes. Eastern Virginia.—Information filed October 28, 1907, for violation, Section 6, of the Sherman act. Pending.

United States vs. Simmons et al. Southern Alabama.—Indictment returned January 20, 1908, charging combination of master plumbers. Pleas of guilty entered.

United States vs. Union Pacific Railroad Company et al. Utah.—Equity suit to dissolve merger. Petition filed February 1, 1908. Taking of testimony completed and case set for argument next October.

United States vs. Stiefvater et al. Eastern Louisiana.—Indictment returned February 15, 1908, charging plumbers' trust. Recently ordered dismissed on account of insufficiency of evidence.

United States vs. American Naval Stores Company et al. Southern Georgia.—April 11, 1908, indictment returned. May 10, 1909, verdict guilty entered as to five individual defendants. Fines imposed aggregating $17,500 and two defendants sentenced to three months in jail. Appealed to Circuit Court of Appeals, where it is now pending.

United States vs. John Parks et al. Southern New York.—Indictment returned June 16, 1908. June 19, 1908, all defendants pleaded guilty and were sentenced to pay a fine of $2,000 each. Total of $50,000 paid.

United States vs Albia Box and Paper Company et al.—Indictment returned December 7, 1909, charging restraint of trade. Pleas of guilty entered February 7, 1910, and fines aggregating $57,000 were assessed.

United States vs. American Sugar Refining Company et al.—Indictment under anti-trust act July 1, 1909. Now pending. Southern New York.

United States vs. John S. Steers et al. Eastern Kentucky. (So-called night rider case.) Indictment returned February 17 1910. April 16, 1910, verdict of guilty returned as to eight defendants and fines aggregating $3,500 imposed.

United States vs. National Packing Company et al. Northern Illinois.—Indictment returned March 2, 1910. Pending.

United States vs. National Packing Company et al. Northern Illinois.—Bill in equity for dissolution filed March 21, 1910. Pending.

United States vs. Imperial Window Glass Company et al. Western Pennsylvania.—Indictment found April 7, 1910. Set for hearing on demurrer.

United States vs. American Paper Board Company et al. Southern New York.—Petition filed April, 1910, praying for dissolution paper board combination.

United States vs. Armour Packing Company et al. Savannah, Ga.—Indictment charging combination to control prices and restrict competition returned April 30, 1910. Pending.

United States vs. Missouri Pacific Railroad Company and 24 other railroads.—Petition to restrain violation of Sherman law filed May 31, 1910, and temporary restraining order issued. Pending.

United States vs. Southern Wholesale Grocers' Association. Northern Alabama.—Bill in equity praying for dissolution filed June 9, 1910. Pending.

United States vs. Chicago Butter and Egg Board. Northern Illinois.—Petition filed June 13, 1910.

United States vs. Frank Hayne. James A. Patten, et al.—Indictment returned Southern New York on June 17, 1910. Alleged cotton pool.

United States vs. Great Lakes Towing Company et al. Northern Ohio.—Petition filed June 18, 1910. Suit in equity to dissolve combination of tug owners on the Great Lakes.

United States vs. New York, New Haven & Hartford Railroad Company, et al. Massachusetts.—Petition filed May 22, 1908, to dissolve alleged merger. Discontinued by the United States June 26, 1909.

DAUGHTER OF REVOLUTIONARY SOLDIER ON PENSION ROLLS JUNE 30. 1910

Name	Age	Name of Soldier.	Service of Soldier.	Residence.
Wooley, Phoebe M now Palmeter	89	Wooley, Jonathan	N. Hampshire.	Brookfield, N. Y.

Daniel F. Bakeman the last survivor of the war of the Revolution, died in Freedom, Cattaraugus County, N Y., April 5. 1869. aged 109 years. Esther S. Damon, the last surviving widow of a Revolutionary soldier, who died at Plymouth Union, Vt., November 11, 1906 aged 92 years, was the wife of Noah Damon who served at various periods as a private in Massachusetts troops from April 19 1775. to May 11. 1780

The last survivor of the war of 1812 who was on the pension rolls was Hiram Cronk of Ava, N Y, who died May 13 1905, aged 105 years. He served in the defence of Sacket Harbor in 1814.

The number of enrolled pension attorneys in 1910 was 25,687

The following are the ratings per month for disabilities incurred in the service:

Army.—Lieutenant-colonel and all officers of higher rank, $30; major, surgeon, and paymaster, $25; captain and chaplain $20; first lieutenant and assistant surgeon $17; second lieutenant and enrolling officer $15, enlisted men $8.

Navy.—Captain and all officers of higher rank commander, surgeon paymaster, and chief engineer $30, lieutenant, passed assistant surgeon, surgeon paymaster and chief engineer, $25, master professor of mathematics, and assistant surgeon, $20; first assistant engineer, ensign, and pilot, $15; cadet midshipman, passed midshipman, midshipman, warrant officers, $10; enlisted men, $8.

Of the whole number of post-offices at the close of the fiscal year, June 30, 1910 7 592 were Presidential offices and 51,988 were fourth class offices.

The number of pieces of postal matter of all kinds which passed through the mails of the United States in the fiscal year (1909) was 14,004,577,271. The annual aggregate number of letters transmitted through the post-offices of the world may be estimated at 30,000,000,000, and of newspapers, 15,000,000,000.

The number of domestic money-orders issued in the fiscal year 1910 was 76,918,036; number of international money-orders, 4,499,603; amounting to $99,742,686.24.

National Association of Postmasters

OF FIRST CLASS OFFICES.

THE National Association of Postmasters of First Class Offices was organized at Detroit, Mich., October 8, 1898.

The Association consists of postmasters and assistant postmasters of the first class post-offices in the United States, and presidents and first vice-presidents of State associations of postmasters. Heads of the Post-Office Department and Chiefs of Bureaus at Washington are honorary members.

Article 3 of the Constitution declares that: "The object of this Association is to aid in the improvement of the Postal Service of the United States through the mutual interchange of ideas of members of the Association and officials of the Post-Office Department."

The annual meetings are attended by the heads of Departments and Chiefs of Bureaus of the Post-Office Department who address the conventions and answer questions pertaining to the practical work of the post-office.

The following are the officers for 1910-11: *President*—F. G. Withoft, Dayton, Ohio. *First Vice-President*—E. R. Sizer, Lincoln, Neb. *Second Vice-President*—Isador Sobel, Erie, Pa. *Third Vice-President*—Robert E. Woods, Louisville, Ky. *Fourth Vice-President*—George W. Bean, Tampa, Fla. *Fifth Vice-President*—E. C. Mansfield, Boston, Mass. *Treasurer*—D. C. Owen, Milwaukee, Wis. *Secretary*—Howard P. Marshall, Dayton, Ohio.

The United States Census.

THE Constitution requires that a census of the United States shall be taken decennially. The First Census was taken in 1790 under the supervision of the President; subsequent censuses, to and including that of 1840, were taken under the supervision of the Secretary of State. In 1849 the supervision of the census was transferred to the newly organized Department of the Interior, and continued under the control of that department until the passage of the act of 1903, creating the Department of Commerce and Labor; by this act the Census Bureau was transferred to the new department. Congress, by act approved March 6, 1902, made the Census Bureau a permanent bureau of the Government.

The work of the Census Bureau is divided into two main branches, namely, the decennial census and special statistical inquiries, the latter mostly made in the intervals between the decennial censuses. The Thirteenth Decennial Census was taken as of date April 15, 1910. It covered the three main subjects—population, agriculture and manufactures, mines and quarries. Only a small part of the results of this census had been compiled and published when the ALMANAC went to press, but details regarding the characteristics of the population, as well as statistics of agriculture and manufactures, will appear from time to time thereafter; necessarily, some of the tables in the present ALMANAC are based upon the census of 1900.

The permanent work of the Census Bureau is provided for by the act of Congress approved March 6, 1902, and amendments thereto. These acts authorize and direct the Bureau to make statistical inquiries regarding the insane, feeble-minded, deaf and dumb, and blind; crime, pauperism and benevolence; deaths and births in the areas maintaining registration system; social and financial statistics of cities; wealth, debt and taxation; religious bodies; electric light and power, telephones and telegraphs, and street railways; transportation by water; cotton production and distribution; and production of forest products. The statistics of deaths (which now cover a little over half of the country), of cities, and of production of cotton and forest products, are secured annually; the other statistics mentioned are taken usually at intervals of five or ten years, not, however, at the same time as the regular decennial censuses. The act of 1902 also provides for a census of manufactures in the fifth year intervening between the decennial censuses, and the new Thirteenth Census act further provides for a census of agriculture in 1915, as well as in 1910.

The Director of the Census is appointed by the President of the United States and receives a salary of $7,000 *per annum*. The present Director is E. Dana Durand, of California. The office organization consists of an assistant director, William F. Willoughby; a chief clerk, Voler V. Viles; an appointment clerk, Clifford Hastings; a disbursing clerk, George Johannes; five chief statisticians: For Population, William C. Hunt; for Manufactures, William M. Steuart; for Agriculture, Le Grand Powers; for Vital Statistics, Cressy L. Wilbur, and for Revision and Results, Joseph A. Hill; a geographer, Charles S. Sloane; and twelve chiefs of division. The entire number of employés in the Bureau at Washington on July 1, 1909, prior to the beginning of the extra work of the decennial census, was 621; in addition there are about 700 special agents employed intermittently in the Southern States for the collection of cotton statistics. The number of employés in Washington is greatly increased during the decennial census; on November 1, 1910, it was 3,565, in addition to field employés.

THE CENSUS OF 1910.

THE CENSUS ACT.

The Thirteenth Census, taken in April, 1910, was conducted under the terms of the act of Congress approved July 2, 1909. The scope and method of the census differed in a few respects from that of the Twelfth Census:

1. The inquiry of the Twelfth Census, relative to deaths, was dropped, more accurate, though less comprehensive, statistics being now secured by compiling the results of the current registration of deaths.

2. The enumeration of population and agriculture was as of date April 15, instead of June 1.

3. A complete system of civil service examinations was provided for the appointment of the temporary clerical help.

4. The Census act made a few minor changes in the scope of the inquiries concerning population, agriculture and manufactures. The most significant change, made by an amendment passed in March, 1910, was the addition of an inquiry regarding the mother tongue of persons born abroad, or of the foreign-born parents of persons born in this country. Another important departure in the schedule, although not required by law, is the addition of an inquiry concerning the industry in which the person is engaged, as well as the specific occupation pursued.

The exact scope of the census inquiries, as specified in the Census act, is shown by the following extracts:

POPULATION.

"The schedules relating to *population* shall include for each inhabitant the name, relationship to head of family, color, sex, age, conjugal condition, place of birth, place of birth of parents, number of years in the United States, citizenship, occupation, whether or not employer or employé, and if employé, whether or not employed at the date of enumeration and true number of months unemployed during the preceding calendar year; whether or not engaged in agriculture, school attendance, literacy, and tenure of home, and whether or not a survivor of the Union or Confederate Army or Navy; and the name and address of each blind or deaf and dumb person; and for the enumeration of institutions, shall include paupers, prisoners, juvenile delinquents, insane, feeble-minded, blind, deaf and dumb, and inmates of benevolent institutions."

Public Resolution No. 23, approved March 24, 1910, provides that:

"The schedules relating to population for the Thirteenth Decennial Census * * * shall provide inquiries respecting the nationality or mother tongue of all persons born in foreign countries, and of the nationality or mother tongue of parents of foreign birth of persons enumerated."

AGRICULTURE.

"The schedules relating to *agriculture* shall include name, color and country of birth of occupant of each farm, tenure, acreage of farm, acreage of woodland and character of timber thereon, value of farm and improvements, value of farm implements, number and value of live stock on farms and ranges, number and value of domestic animals not on farms and ranges, and the acreage of crops planted and to be planted during the year of enumeration, and the acreage of crops and the quantity and value of crops and other farm products for the year ending December 31 next preceding the enumeration."

MANUFACTURES AND MINES AND QUARRIES.

"The schedules of inquiries relating to *manufactures and to mines and quarries* shall include the name and location of each establishment; character of organization, whether individual, co-operative, or other form, character of business or kind of goods manufactured; amount of capital actually invested; number of proprietors, firm members, copartners, stockholders and officers, and the amount of their salaries; number of employés and the amount of their wages; quantity and cost of materials used in manufactures; amount of miscellaneous expenses; quality and value of products; time in operation during the census year; character and quantity of power used, and the character and number of machines employed."

Up to the present time Congress has appropriated $12,000,000 for the expense of the Thirteenth Census and that of the current work of the Bureau during the census period of three years from July 1, 1909, to June 30, 1912. It is estimated, however, that a further appropriation of $3,000,000 will be required to complete the work.

HOW THE CENSUS WAS TAKEN.

The census of population and agriculture was taken by a force of 70,000 enumerators, under the direction of 330 supervisors. The supervisors were appointed by the President, with the advice and consent

of the Senate, and the enumerators were selected, with the approval of the Director, by the supervisors. The enumerators were required to pass a practical examination. They were allowed fifteen days for their work in cities and thirty days in smaller towns and country districts. They were for the most part paid on the basis of the amount of work done, at rates ranging from two to four cents per name enumerated and from twenty to thirty cents per farm. Some enumerators were paid *per diem* rates, ranging from four to six dollars. The supervisors, particularly in the large cities, were assisted by special agents for instructing the enumerators and inspecting their work.

Except in a few districts where the number of establishments was very small and the work consequently left to the enumerators, the statistics of manufactures and of mines and quarries were collected through special agents appointed directly by the Director of the Census on the basis of a competitive examination or of prior experience. These special agents were not under the control of the supervisors. The work of gathering reports covered several months, but had substantially all been completed by November 1, 1910.

TABULATION OF POPULATION RETURNS.

The full compilation of the results of the census in the office at Washington requires a very elaborate process. The general methods pursued with respect to the population returns are as follows:

When the schedules are first received in Washington they are subjected to a careful scrutiny to ascertain whether they are satisfactory and complete, and to a special scrutiny to ascertain whether there are any evidences of "padding" or the fraudulent counting of names. If found satisfactory the names are rapidly counted without any use of machinery. This can be done readily because there are 100 names to a full sheet, so that in most cases only sheets have to be counted. As the result of this so-called hand count, the population of the various cities, counties and States is announced from time to time. On December 10, 1910, the total population was announced by the Director as follows: Continental United States, 91,972,266; inclusive of Alaska, Hawaii and Porto Rico, 93,402,151.

The schedules are next edited for the purpose of preparing them for the clerks who are to punch the cards. A card must be punched for each person in the United States, showing all the characteristics of that person appearing on the schedule, such as relationship to the head of the family, sex, color or race, age, marital condition, State or country of birth, country of birth of parents, occupation, and the like. The card contain 240 spaces—a space for each possible fact. Thus, as to marital condition there are six spaces, for Single, Married once, Married more than once, Widowed, Divorced, and Unknown, and the proper space is selected for punching in each case. About twenty holes must be punched for each person, the larger part of the cards being punched by a new machine devised for the present census by expert mechanicians of the Census Bureau. In these machines the cards are fed into position for punching automatically. There are 240 keys, similar to typewriter keys, corresponding to the spaces on the cards. The operator depresses the proper keys for the person and then pushes a lever, like the space key on a typewriter, which by electric power thrusts the card upward against the punches which have been depressed. The card is then slipped out automatically, and by an ingenious device, the cards for males and females are automatically separated. The average clerk punches about 1,600 cards per day (seven hours) on these electrical machines.

After the cards have been punched, a reasonable proportion of them are compared back to the schedules, to see that the clerks have done their work properly. The cards are then run through electrical tabulating machines. The principle of these machines is the making of electrical contacts through the punched holes. There is a pin or brush, charged with electricity, corresponding to each space on the card, but only those pins can register which are able to pass through the card by means of the holes.

In the first "run" of the cards through these machines no results are recorded, but this "verification run" is solely for the purpose of discovering inconsistencies between different facts indicated by the punched holes, or the omission of holes where some entry is required. The electrical connections on the machines are so arranged, for example, that if a person ten years of age is reported as married, the card will be rejected, or if a card contains no entry of age it will also be rejected. Cards are rejected for no less than twenty-three possible classes of inconsistencies, in addition to cases of omission. When cards are rejected, they are compared back to the schedules and the correct facts ascertained and entered on the card.

Before the cards are put through the subsequent runs on the tabulating machines, economy necessitates that they be sorted into groups. For this purpose electrical sorting machines are used. The compartment of the machine into which the card will fall is determined by the holes themselves. By repeated runs through the sorting machines the cards are separated according to color; in the case of whites, according to native or foreign birth; and, in the case of native whites, according to native or foreign birth of the parents. This separation of the cards greatly reduces the number of counters needed on the tabulating machines to count the different combinations of facts desired.

After this first general sorting of the cards according to main classes, they are run through the tabulating machines to take off detailed facts regarding age, marital condition, State of birth, country of birth, and the like. As many as 60 counters may be used on a single machine at one time. In order to obtain the more elaborate details, it is necessary, before some of the later runs, still further to sort the cards according to five-year age groups, in the case of the foreign-born according to country of birth, and in the case of persons engaged in occupations according to the occupation. By means of these successive sortings and tabulations a very large number of combinations of facts, running into the thousands, is secured. The machines automatically print the results for each unit of area—county, city or State.

The sorting machines above referred to are automatic and are capable of sorting over 300 cards per minute. In part of the tabulating machines used the cards are fed in by hand, but a remarkable new automatic machine, devised and built in the Census Bureau itself, has been put into service. With the hand machine a skilled operator can tabulate approximately 3,000 cards per hour, or 50 per minute, whereas the automatic machine will tabulate 400 per minute. Inasmuch as it is necessary for the cards, on the average, to pass through the tabulating machines six times, making the equivalent of about 540,000,000 cards, the large amount of saving which can be effected by the new automatic device is apparent. Nevertheless, for the sake of expediting the publication of the results, the hand machines will be used side by side with the automatic machines.

At the present Census for the first time will be given full and carefully-analyzed statistics regarding the fecundity of marriage. They will include, among other facts, the number of children born and the number of children living, in comparison with the duration of marriage, for each woman, distinguishing race and native from foreign born. The so-called "race-suicide" question will thus receive much new light.

Much greater use will be made at the present Census than hitherto of percentages, showing the relationships of the facts to one another, and also of comparisons between the present and preceding Censuses.

AGRICULTURE AND MANUFACTURES.

The Agricultural Census is tabulated by quite different methods from the population Census. The original schedules for each county are themselves classified according to the groups which need to be recognized, namely, those based upon the color of the farmer, the tenure by which he holds his farm, and the size of the farm. The schedules, after being thus classified, are tabulated by adding machines of the ordinary type, although on a somewhat larger scale than those usually used in commercial business. In presenting the results of the agricultural Census, as of the population Census, emphasis will be laid upon the convenient presentation of the statistics regarding each State or county.

The Census of Manufactures for 1910 differs in very few respects from that taken in 1905 and not very greatly from that taken in 1900. The principal difference in the method of presenting the statistics will be the addition of a column in every table, showing the "value added by manufacture," namely, the difference between the cost of the raw material and the finished product, which is regarded as being the truest index of the relative importance of the industry from the manufacturing standpoint.

Record of Events in 1910.

May 6. King Edward VII. died.
May 18. The earth passed through the tail of Halley's comet.
May 30. The Colonial Federation of United South Africa came into existence.

Zabriskie, Jeremiah Lott (76), microscopist, scientist, Brooklyn, N. Y., April 3.

The Annexation of Korea by Japan.

TEXT OF THE TREATY OF ANNEXATION.

THE treaty between Japan and Korea by which the latter was annexed as a sovereign part of Japan was made public at Washington August 28, 1910.

The Japanese Government made the following declaration respecting the annexation:

Notwithstanding the earnest and laborious work of reform in the administration of Korea, in which the Governments of Japan and Korea have been engaged for more than four years, since the conclusion of the agreement of 1905, the existing system of government in that country has not proved entirely equal to the duty of preserving public order and tranquillity, and, in addition, the spirit of suspicion and misgiving dominates the whole peninsula.

In order to maintain peace and stability in Korea, to promote the prosperity and welfare of the Koreans, and at the same time to insure the safety and repose of the foreign residents, it has been made abundantly clear that fundamental changes in the actual regime of government are absolutely essential. The Governments of Japan and Korea, being convinced of the urgent necessity of introducing reforms responsive to the requirements of the situation and of furnishing sufficient guarantee for the future, have, with the approval of his majesty the Emperor of Japan and his majesty the Emperor of Korea, concluded through their respective plenipotentiaries a treaty providing for the complete annexation of Korea to the Empire of Japan.

By virtue of that important act, which shall take effect on its promulgation, on the 29th of August, 1910, the Imperial Government of Japan undertakes the entire government and administration of Korea, and it hereby declares that matters relating to foreigners and foreign trade in Korea shall be conducted in accordance with the following rules:

First—Treaties hitherto concluded by Korea with foreign powers ceasing to be operative, Japan's existing treaties will, so far as practicable, be applied to Korea. Foreigners resident in Korea will, so far as conditions permit, enjoy the same rights and immunities as in Japan proper, and the protection of their legally acquired rights, subject in all cases to the jurisdiction of Japan. The Imperial Government of Japan is ready to consent that the jurisdiction in respect of cases actually pending in any foreign consular courts in Korea at the time the treaty of annexation takes effect shall remain in such courts until final decision.

Second—Independently of any conventional engagements formerly existing on the subject, the Imperial Government of Japan will for a period of ten years levy upon goods imported into Korea from foreign countries or exported from Korea to foreign countries and upon foreign vessels entering any of the open ports of Korea the same import or export duties and the same tonnage dues as under the existing schedules. The same import or export duties and tonnage dues as those to be levied upon the aforesaid goods and vessels will also for a period of ten years be applied in respect of goods imported into Korea from Japan or exported from Korea to Japan and Japanese vessels entering any of the open ports of Korea.

Third—The Imperial Government of Japan will also permit for a period of ten years vessels under the flag of powers having treaties with Japan to engage in the coasting trade between the open ports of Korea and between those ports and any open ports of Japan.

Fourth—The existing open ports of Korea, with the exemption of Masampo, will be continued as open ports, and, in addition, Shinwiju will be newly opened, so that vessels, foreign as well as Japanese, will there be admitted, and goods may be imported into and exported from those ports.

The text of the treaty of annexation is as follows:

Treaty between Japan and Korea, signed on the 22d of August, 1910.

His Majesty the Emperor of Japan and His Majesty the Emperor of Korea, having in view the special and close relations between their respective countries, desiring to promote the common weal of the two nations and to assure the permanent peace in the extreme East, and being convinced that these objects can be best attained by the annexation of Korea to the Empire of Japan, have resolved to conclude a treaty of such annexation, and have for that purpose appointed as their plenipotentiaries, that is to say:

His Majesty the Emperor of Japan, Viscount Masakata Terauchi, his resident general, and His Majesty the Emperor of Korea, Ye-Wan-Yong, his minister President of State, who, upon mutual conference and deliberation, have agreed to the following articles:

Article 1.—His Majesty the Emperor of Korea makes the complete and permanent cession to his Majesty the Emperor of Japan of all rights of sovereignty over the whole of Korea.

Article 2.—His Majesty the Emperor of Japan accepts the cession mentioned in the preceding article and consents to the complete annexation of Korea to the Empire of Japan.

Article 3.—His Majesty the Emperor of Japan will accord to their majesties the Emperor and ex-Emperor and his Imperial Highness the Crown Prince of Korea and their consorts and heirs such titles, dignity and honor as are appropriate to their respective ranks, and sufficient annual grants will be made for the maintenance of such titles, dignity and honor.

Article 4.—His Majesty the Emperor of Japan will also accord appropriate honor and treatment to the members of the Imperial House of Korea and their heirs other than those mentioned in the preceding article, and the funds necessary for the maintenance of such honor and treatment will be granted.

Article 5.—His Majesty the Emperor of Japan will confer peerage and monetary grants upon those Koreans who on account of meritorious services are regarded as deserving such special recognitions.

Article 6.—In consequence of the aforesaid annexation the Government of Japan assume the entire government and administration of Korea and undertake to afford full protection for the persons and property of Koreans obeying the laws there in force and to promote the welfare of all such Koreans.

Article 7.—The Government of Japan will, so far as circumstances permit, employ in the public service of Japan in Korea those Koreans who accept the new regime loyally and in good faith, and who are duly qualified for such service.

Article 8.—This treaty, having been approved by His Majesty the Emperor of Japan and His Majesty the Emperor of Korea, shall take effect from the date of its promulgation.

In faith whereof, etc., etc.

The Japanese Government makes this statement also respecting the effect of annexation upon certain rights enjoyed by foreigners in Korea:

The Imperial Government, in addition to the announcement which they have made respecting the annexation of Korea and the treatment, which, in view of the new conditions of things, is hereafter to be accorded in Korea to the subjects and citizens of foreign powers and to their commerce and navigation, have the honor to acquaint the United States Government that in consequence of such annexation, the laws of Japan concerning inventions, designs, trade-marks and copyrights are extended to Korea in place of the laws hitherto in force in Korea on the same subjects, and that the special office established in Korea to deal with such industrial and literary properties is abolished, and the duties heretofore performed by it are in the future to be undertaken by the appropriate governmental bureau in Tokio.

As a result of these measures, a single registration in Tokio and the payment of a single fee will hereafter be sufficient to secure due protection in Korea as well as in Japan proper. It is only necessary to add that rights now existing in Korea in virtue of registration already effected or applications already deposited in pursuance of the convention between Japan and the United States, dated May 19, 1908, will continue to be duly respected in Korea.

The Famous Old People of 1911.

Age. (Age at the last birthday is given. The list was made up for January 1, 1911.)

93. Sir Joseph Hooker, botanist; John Bigelow, journalist and diplomatist.

60. Champ Clark, Duke of Connaught, Senators Lodge, Rayner and Taylor; Rose Coghlan, Pierre Loti, Seth Low, Bishop Cheshire of North Carolina.

At what age does one become "old"? Five centuries ago a man was old at fifty. But the hale and hearty gentleman of to-day who has just turned sixty would probably protest against being classed among old people, even if famous. That his susceptibilities may not be wounded, therefore, a separating dash has been discreetly introduced after age sixty-five.

The American Multi-Millionaires.

THE VANDERBILTS.

DESCENDANTS OF COMMODORE CORNELIUS VANDERBILT.

Born on Staten Island, N. Y., 1794; married, 1st, Sophia Johnson, 1813; 2d, Frances Crawford, 1869; died 1877.

	4. Anne Tracy Morgan, b. 1873		

* Previous ancestors.—John Rockefeller born in Germany in 1634 Johann Peter, his son, born in Germany in 1682 This man emigrated to America with his cousin Diell, and from these two all the Rockefellers in the country are descended Peter Rockefeller, his son, born in Segendorf, Germany, in 1711. He married Mary Bellis William their son, born in Amwell, N. J., in 1750 He married Christina Rockefeller, who was a daughter of Simona, who was a grand-daughter of Diell, the other emigrant This marriage makes all the descendants of both Diell and Johann Peter related to the present John D Godfrey, their son, born in Germantown, N. Y., Sept. 24, 1783. He married Lucy Avery.

THE CARNEGIES.

DESCENDANT OF ANDREW CARNEGIE.

Born at Dumfermline, Scotland, Nov. 25, 1835; married, 1887, Louise Whitfield.

Children.	Grandchildren.	Great-Grandchildren.	Great-Great-Grandchildren.
Margaret Carnegie, b. 1897.			

There are relatives of Mr. Carnegie residing in the United States, including the family of his late brother Thomas at Pittsburgh, Pa., but Andrew Carnegie is alone the founder of the American multi-millionaire family.

The American Bonapartes.

Prince Jerome Bonaparte (King of Westphalia), born Ajaccio, Corsica, November 15, 1784; died at Ville Genis, near Paris, June 24, 1860. Married, first, at Baltimore, Md., December 24, 1803, Elizabeth, daughter of William Patterson, Esq. She was born at Baltimore February 6, 1785, and died in that city April 4, 1879. The issue of the marriage was:

Jerome Napoleon Bonaparte, born at Camberwell, England, July 7, 1805; died at Baltimore, Md., June 17, 1870. Married, November 3, 1829, Susan May, daughter of Benjamin Williams, of Roxbury, Mass. She was born April 2, 1812, and died September 15, 1881. The issue of the marriage was:

(1) Jerome Napoleon Bonaparte, born at Baltimore, Md., November 5, 1830; died at Beverly, Mass., September 3, 1893. He was educated at and graduated from West Point Military Academy, and served as a colonel in the French army in the Franco-Prussian war. He was married September 7, 1871, to Catherine Le Roy, daughter of Samuel Appleton and widow of Newbold Edgar. The issue of the marriage was:

(1) Louise Eugenie Bonaparte, born February 7, 1873. Married December 29, 1896, Comte Adam de Moltke-Huitfeldt, of Denmark, and has issue: (1) Marie Louise Caroline, born November 7, 1897; (2) Leon Charles Joseph, born November 14, 1898; (3) Jerome Eugene Otto, born January 14, 1902; (4) Adam Nicolas, born May 17, 1908.

(2) Jerome Napoleon Bonaparte, born Paris, France, February 26, 1878, Harvard B. A. and Georgetown University. A banker in Washington, D. C. Unmarried.

(2) Charles Joseph Bonaparte, born at Baltimore, Md., June 9, 1851. Married September 1, 1875, Ellen Channing, daughter of Thomas Mills Day, of Newport, R. I., No issue. Mr. Bonaparte is a Harvard B. A., 1871; LL. B., 1878; a lawyer; was Secretary of the Navy 1905-07, and Attorney-General of the United States, 1907-09.

The Panama Canal.

PROGRESS OF THE WORK IN 1910.

THE present composition of the Isthmian Canal Commission is as follows: Chairman and Chief Engineer, Col. George W. Goethals; Assistant Chief Engineer, Lieut.-Col. H. F. Hodges; Civil Engineer, U. S. N., assistant to the Chief Engineer; H. H. Rousseau, Division Engineer, Central Division; Lieut.-Col. D. D. Gaillard, Division Engineer, Atlantic Division; Lieut.-Col. William L. Sibert, Chief Quartermaster; Lieut.-Col. C. A. Devol; Chief Sanitary Officer, Col. W. C. Gorgas; Hon. Maurice H. Thatcher, in charge of the Department of Civil Administration. The members of the Commission receive salaries of $14 000 per annum, except the Chairman, who receives $15 000.

TYPE OF CANAL.

The Canal will have a summit elevation of 85 feet above the sea, to be reached by a flight of three locks located at Gatun, on the Atlantic side, and by one lock at Pedro Miguel, and a flight of two at Miraflores on the Pacific side, all these locks to be in duplicate—that is, to have two chambers, side by side. Each lock will have a usable length of 1,000 feet and a width of 110 feet. The summit level extending from Gatun to Pedro Miguel, a distance of about 31.5 miles, is to be regulated between 82 and 87 feet above sea level by means of the spillway in the dam at Gatun. The Gatun Lake which will have an area of 164.23 square miles, will be maintained by earth dams at Gatun and Pedro Miguel. The Chagres River and other streams will empty into this lake. A small lake, about two square miles in area, with a surface elevation of 55 feet, will be formed between Pedro Miguel and Miraflores, the valley of the Rio Grande being closed by an earth dam on the west side and a concrete dam with spillway on the east side at Miraflores.

The approaches from deep water to the Gatun locks on the Atlantic side, and from deep water to the locks at Miraflores on the Pacific side, will be sea level channels about seven and eight miles in length, respectively, and each 500 feet wide.

LENGTH, WIDTH AND DEPTH OF CANAL.

The Canal is to be about 50 miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4½ miles, and from the Pacific shore line to deep water is about 5 miles; hence the length of the Canal from shore to shore will be approximately 40½ miles.

The channel from mile 0 in the Caribbean to mile 6.70 will be 500 feet wide; from the south end of Gatun locks to mile 23.50, not less than 1,000 feet wide; from mile 23.50 to mile 26.50, 800 feet wide; from mile 26.50 to mile 27.00, 700 feet wide; from mile 27.00 to mile 31.25, 500 feet wide; from mile 31.25 to Pedro Miguel lock, (mile 39.36), 300 feet wide, and from Pedro Miguel lock to Miraflores locks and from Miraflores locks to deep water in Panama Bay, 500 feet wide.

The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet.

The Canal will have a minimum depth of 41 feet.

GATUN DAM.

The Gatun dam along the crest will be 9.040 feet long, including the spillway, or about 1.8 miles, and 1,900 feet wide at its greatest width.

The crest of the dam will be at an elevation of 115 feet above sea level, or 30 feet above the level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i. e.*, 85 feet above sea level, will be 375 feet.

The central part of the dam will be filled by hydraulic process protected by rock toes on both sides of the dam. The upper slope on the lake side of the dam will be further protected by 10 feet thickness of rock. The other parts of the dam will be filled with available material from Canal excavation.

LINE OF CANAL.

In entering the Canal from the Atlantic side a ship will proceed from deep water in Limon Bay to Gatun locks, a distance of about seven miles, through a channel 500 feet wide; passing into the locks, 6-10 of a mile in length, the ship will be carried up to an elevation of 85 feet above sea level in three lifts to the level of the water in Gatun Lake; thence for a distance of nearly 16 miles the channel will be 1,000 feet or more in width to San Pablo; from San Pablo to Juan Grande, 3.8 miles, the channel will be 800 feet wide; from Juan Grande to Obispo, 3.7 miles, the channel will be 500 feet wide; from Obispo to Pedro Miguel locks, through the Culebra cut, a distance of about 8.2 miles, the channel will be 300 feet wide. Going through the Pedro Miguel lock and approaches, nearly 3-10 of a mile in total length, the vessel will be lowered to the level of Miraflores Lake, 55 feet above mean tide, through which there will be a channel 500 feet wide and 1.4 miles long to the Miraflores locks; thence through the two Miraflores locks, of a total length, including approach walls, of over 9-10 of a mile, the vessel will be lowered to tide level and proceed through a channel 500 feet wide and 8 miles long to deep water in the Pacific. It is estimated that the time required for the passage of a ship of medium size through the entire length of the Canal would be from 9½ to 10 hours, and for larger vessels from 10½ to 11 hours.

EXCAVATION BY THE FRENCH.

The amount of material taken out by the Old and New Panama Canal Companies was 78,146,960 cubic yards, of which it is estimated 29,908,000 cubic yards will be utilized in the adopted plan of canal.

TOTAL AMOUNT EXCAVATION.

The following is the estimated excavation required, May 4, 1904, based on the present plans for the lock canal:

	Prism.	Diversions, etc.	Locks.	Dams.	Total.
Atlantic Division	36,485,159	1,732,882	5,139,304	....	43,357,345
Central Division	95,875,018	1,250,000	....	....	97,125,018
Pacific Division	36 795,211	....	5 015.459	244,733	42 055,403
	169,155,388	2,982,882	10 154.763	244.733	182,537,766

COMPARISON BETWEEN LOCK AND SEA LEVEL PROJECTS.

For the purpose of comparison, it may be stated that an estimate has been made from the latest available data which shows that the excavation required in the Canal prism for a sea level canal as of May 4, 1904, would be 319,146,000 cubic yards.

This estimate is for a sea level canal from the —41-foot contour in Limon Bay to the —45-foot contour in the Bay of Panama; the channel in Colon Harbor from the seaward end to Boca Mindi to be 500 feet wide on the bottom, and 41 feet deep; from Boca Mindi to near the Sosa tide lock, 150 feet wide on the

THE PANAMA CANAL—*Continued*

bottom and 40 feet deep in earth and 200 feet wide on the bottom and 40 feet deep in rock; approach to the tide lock to be 300 feet wide and the channel from the tide lock to the —45-foot contour in Panama Bay, 300 feet wide. This plan includes a concrete dam at Gamboa and a twin tide lock at Sosa, with chambers 110 feet by 1,000 feet. The average width of channel in this project would be 218 feet and the minimum width 150 feet.

ESTIMATED COST OF LOCK CANAL UNDER CONSTRUCTION.

The cost estimated by the present Commission for completing the Canal is $325,201,000, which includes $20,053,000 for sanitation and $7,382,000 for civil administration.

These figures do not include the $50,000,000 paid to the New French Canal Company and to the Republic of Panama for property and franchises. Hence, it is estimated that the total cost of the Canal to the United States will approximate $375,000,000.

TIME OF COMPLETION.

It is announced that the construction of the Canal will be completed by December 1, 1913.

MATERIAL EXCAVATED BY THE UNITED STATES.

The amount of material excavated since the Americans took control on May 4, 1904, is as follows:

	Cubic Yards.	Monthly Average
May 4 to December 31, 1904	243,472	30,434
January 1 to December 31, 1905	1,799,227	149,936
January 1 to December 31, 1906	4,948,497	412,375
January 1 to December 31, 1907	15,765,290	1,313,774
January 1 to December 31, 1908	37,116,735	3,093,061

PROGRESS OF WORK ON LOCKS AND DAMS.

It is estimated that about 2,300,000 cubic yards of concrete will be placed in Gatun locks and spillway. The Pedro Miguel locks and dams and the Miraflores locks, dam and spillway will require in all about the same amount.

*138,587 cubic yards of wet fill were placed in Miraflores dam up to October 1, 1910.

The construction of Gatun dam is being carried on by first building two lines of rock, composed of

THE PANAMA CANAL—*Continued*

spoil from the Canal and lock excavation, about 1,200 feet apart and parallel to the centre line of the dam The south or upstream pile or "toe" as it is called has a height of about 60 feet and the downstream toe about 30 feet These rock toes confine the body of the dam between them which is to be mainly of impervious material pumped in by pipe-line dredges. At the bottom this impermeable core will have a width of about 860 feet, outside of which the body of the dam will consist of spoil, which can be placed with the least expense. Outside of the toes are the waste piles for the spoil of neighboring excavation. These piles will slope down gradually and extend indefinitely, so far as material is available.

UNIT COSTS OF CANAL WORK.

(Including Plant Arbitrary Charges.)

The average cost of dry excavation in the Central Division (including the Culebra Cut) for the six months ending June 30, 1910, was 63.73 cents for direct charges and 4.61 cents for general administration expenses of the Isthmian Canal Commission, making the total average cost 68.34 cents per cubic yard.

The average cost of dredging in the Atlantic end of the Canal for the six months ending June 30, 1910, was 24 96 cents for direct charges, and 3 35 cents for general administration expenses of the Isthmian Canal Commission, making the total average cost 28.31 cents per cubic yard.

The average cost of dredging in the Pacific end of the Canal for the six months ending June 30, 1910, was 29.29 cents for direct charges and 2 45 cents for general administration expenses of the Isthmian Canal Commission, making the total average cost 31.74 cents per cubic yard.

STEAM SHOVEL AND DREDGE EQUIPMENT

There are now on the Isthmus 100 steam shovels of different capacities, and 18 dredges, the latter being classified as 7 ladder, 3 dipper, 6 pipe line suction, and 2 sea-going suction dredges.

FORCE EMPLOYED.

In the month of July, 1910, there were approximately 45,000 employés on the Isthmus on the rolls of the Commission and of the Panama Railroad, about 5,000 of whom were Americans There were actually at work on August 31, 1910, 35,867 men, 29,950 for the Commission and 5 917 for the Panama Railroad Company. Of the 29,950 men working for the Commission, 4 445 were on the gold roll which comprises those paid in United States currency, and 25,505 men on the silver roll, which comprises those paid on the basis of Panaman currency or its equivalent. Those on the gold roll include mechanics skilled artisans of all classes, clerks, and higher officials, most of whom are Americans; those on the silver roll include principally the common laborers, who are practically all foreigners. Of the 5,917 Panama Railroad employés, 857 were on the gold roll.

FINANCES OF THE CANAL.

Appropriations and expenditures to June 30, 1910:

RECEIPTS.

Appropriations by Congress:		
Purchase of Canal rights, June 28, 1902		$40,000,000 00

Chaplains have the rank and pay of major, captain and first lieutenant, respectively.

(*a*) Service increase of pay of officers below rank of brigadier-general cannot exceed 40 p. c. in all.

(*b*) The maximum pay of a colonel is $5,000, of a lieutenant-colonel $4,500, and of a major $4,000.

The pay of non commissioned officers is from $21 to $99 per month, and of privates from $15 to $25 per month.

Service outside the United States, except in Porto Rico and Hawaii, 10 per cent. additional for officers and 20 per cent. for enlisted men.

The total amount appropriated by Congress for the United States Military establishment not including construction of fortifications and including the Military Academy, for the current fiscal year is $100 330,181, and for the Naval establishment, not including construction at Navy Yards and stations and including the Naval Academy $125,159 716.

Insular Possessions of the United States.

THE PHILIPPINES.

THE Philippine group, lying off the southern coast of Asia, between longitude 120 and 130 and latitude 5 and 20 approximately, number about 2,000 islands, great and small, in a land and sea area of 1,200 miles of latitude and 2,400 miles of longitude. The actual land area is about 140,000 miles. The six New England States, New York, and New Jersey have about an equivalent area. The island of Luzon, on which the capital city (Manila) is situated, is the largest member of the group, being about the size of the State of New York. Mindanao is nearly as large, but its population is very much smaller. The latest estimates of areas of the largest islands are: Luzon, 44,400; Mindanao, 34,000, Samar, 4,800; Panay, 4,700; Mindoro, 4,000; Leyte, 3,800; Negros, 3,300; Cebu, 2,400.

A census of the Philippines was taken by the United States Government in 1903 under the auspices of the Census Office. The population returned was 7,635,426. Of this number almost seven million are more or less civilized. The wild tribes form about 9 per cent. of the entire population. Racially the inhabitants are principally Malays. The civilized tribes are practically all adherents of the Catholic Church, the religion being that introduced into the country by the Spaniards when they took possession of the islands in 1565. The Church has since then been a strong ruling power and the priesthood is numerous. The Moros are Mohammedans and the other wild peoples have no recognized religious beliefs. The total number of non-Christian peoples is 647,740.

The density of population in the Philippines is 67 per square mile. In Continental United States it is 26 per square mile. Foreigners number about 50,000, of whom nearly three-fourths are Chinese. Exclusive of the Army there are 8,135 Americans in the islands, nearly one-half being located in the municipalities. There are thirty different races in the islands, all speaking distinct dialects, the largest tribe being the Visayans, who form nearly one-fourth of the entire civilized population. The Tagalogs, occupying the provinces in the vicinity of Manila, rank second in numbers, and the Ilocanos the third. Education has been practically reorganized by the Americans. The number of persons attending school is 811,715. Six thousand teachers are employed, four-fifths of whom are Filipinos. English is very generally taught, and the next generation of Filipinos will probably speak that tongue. Pauperism is almost unknown in the islands. In 1902 there were only 1,668 paupers maintained at public charge. The average normal death rate in the Philippines is 32 per thousand. The birth rate is 48 per thousand. There were in 1902 41 newspapers published, 12 being in English, 24 in Spanish, 4 in native dialects, and 1 in Chinese. The estimated real estate property value is 469,527,058 pesos, and the personal property 152,718,661 pesos. The reported value of church buildings, mostly Catholic, is 41,698,710 pesos. While there are four towns with more than 10,000 population Manila is the only incorporated city. Its inhabitants numbered 219,928 in 1902. There were 723 miles of railway in January, 1909.

The climate is one of the best in the tropics. The islands extend from 5° to 21° north latitude, and Manila is in 14° 35′. The thermometer during July and August rarely goes below 79° or above 85°. The extreme ranges in a year are said to be 61° and 97°, and the annual mean 81°.

AGRICULTURE.

Although agriculture is the chief occupation of the Filipinos, yet only one-ninth of the surface is under cultivation. The soil is very fertile, and even after deducting the mountainous areas it is probable that the area of cultivation can be very largely extended and that the islands can support population equal to that of Japan (42,000,000).

The chief products are hemp, rice, corn, sugar, tobacco, cocoanuts, and cacao, hemp being the most important commercial product and constituting two-thirds of the value of all exports. Coffee and cotton were formerly produced in large quantities—the former for export and the latter for home consumption; but the coffee plant has been almost exterminated by insects and the home-made cotton cloths have been driven out by the competition of those imported from England. The rice and corn are principally produced in Luzon and Mindoro and are consumed in the islands. The cacao is raised in the southern islands, the best quality of it at Mindanao. The sugar cane is raised in the Visayas. The hemp is produced in Southern Luzon, Mindoro, the Visayas, and Mindanao. It is nearly all exported in bales. Tobacco is raised in all the islands.

IMPORTS AND EXPORTS.

In the year ending June 30, 1910, the exports of merchandise from the United States to the Philippines were $16,768,909, and the total imports from the Philippines for the same period were $17,317,897.

The imports of merchandise from foreign countries, year ending June 30, 1909, were $23,100,627, and the exports were $20,778,232. The principal foreign countries trading with the Philippines are Great Britain, French East Indies, China, and Spain.

CIVIL GOVERNMENT FOR THE PHILIPPINES.

On July 1, 1902, Congress passed (chapter 1369) "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands and for other purposes." Under this act complete civil government was established in the Archipelago and the office of Military Governor was terminated. Wm. H. Taft was appointed Governor by the President. Governor Taft was succeeded by Luke E. Wright in Dec., 1903, by Henry Clay Ide in 1905, James F. Smith in 1906, and W. Cameron Forbes, the present Governor, in 1909. The government was composed of a civil Governor and seven commissioners, of whom four were Americans and three Filipinos. By act of Congress approved May 11, 1908, the Commission was increased by one member, to be appointed by the President, making the Commission nine members in all, including the Governor. There were four executive departments -Interior Finance, and Justice, Commerce and Police, and Public Instruction. There are thirty-nine provinces, each with a Governor, a Supreme Court with seven judges, and fourteen judicial districts. In March, 1907, the President, in accordance with the act of Congress, directed the Commission to call a general election of delegates to a Philippine Assembly. The new Assembly was chosen July 20, and was opened October 16 by Secretary of War Taft. It was politically divided as follows: Nacionalists, 31; Progresistas, 16; Independents, 19; Immediatistas, 7; Independistas, 4; Nacional Independiente, 1; Catolico, 1. The total vote recorded at the election for delegates was 947,803, which is only 1.4 per cent. of the population. At the first session of the Sixty-first Congress an act was passed and approved August 5, 1909, readjusting the customs duties on imports from all countries, including the United States, on the basis generally of reductions.

PORTO RICO.

The island of Porto Rico, over which the flag of the United States was raised in token of formal possession on October 18, 1898, is the most eastern of the Greater Antilles in the West Indies and is separated on the east from the Danish island of St. Thomas by a distance of about fifty miles, and from Haiti on the west by the Mona passage, seventy miles wide. Distances from San Juan, the capital, to important points are as follows: New York, 1,411 miles; Charleston, S. C., 1,200 miles; Key West, Fla., 1,050 miles; Havana, 1,000 miles.

INSULAR POSSESSIONS OF THE UNITED STATES—*Continued.*

The island is a parallelogram in general outline, 108 miles from the east to the west and from 37 to 43 miles across, the area being about 3,600 square miles, or somewhat less than half that of the State of New Jersey (Delaware has 2,050 square miles and Connecticut 4,990 square miles). The population according to an enumeration made by the United States Government in 1900 showed a population of 953,243, of whom 589,426 are white and 363,817 are colored. The density was 26.4 to the square mile; 83.2 per cent. of the population cannot read. The population in 1910 is reported as 1,118,012.

Porto Rico is unusually fertile, and its dominant industries are agriculture and lumbering. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, and maize, but oranges, bananas, rice, pineapples and many other fruits are important products. The largest article of export from Porto Rico is sugar. The next largest is tobacco. The other exports in order of amount are coffee, fruits, molasses, cattle, timber, and hides.

The principal minerals found in Porto Rico are gold, carbonates, and sulphides of copper and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca and also yellow amber. A large variety of marbles, limestones, and other building stones are deposited on the island but these resources are very undeveloped. There are salt works at Guanica and Salina on the south coast, and at Cape Rojo on the west, and these constitute the principal mineral industry in Porto Rico.

The principal cities are Mayaguez, with 15,187, Ponce, 27,952 inhabitants; and San Juan, the capital, with 32,048. The shipments of domestic merchandise from the United States to Porto Rico, year ending June 30, 1910, were $26,478,106. The exports of domestic merchandise to the United States were $32,095,788. The foreign trade, year ending June 30, 1910, was: Imports, $3,537,201; exports, $5,864,017.

An act providing for a civil government for Porto Rico was passed by the Fifty sixth Congress and received the assent of the President April 12, 1900. A statement of its provisions was printed in THE WORLD ALMANAC for 1901, pages 92 and 93. President Roosevelt in his message to Congress in December, 1906, recommended the granting of United States citizenship to the Porto Ricans.

Under this act a civil government was established, which went into effect May 1, 1900. There are two legislative chambers, the Executive Council, or "Upper House," composed of the Government Secretary, Attorney-General, Treasurer, Auditor, Commissioner of the Interior, and Commissioner of Education, and five citizens appointed by the President, and the House of Delegates or "Lower House," consisting of 35 members, elected by the people. The island is represented near the Congress of the United States by a Resident Commissioner.

GUAM.

The island of Guam, the largest of the Marianne or Ladrone Archipelago, was ceded by Spain to the United States by Article 2 of the Treaty of Peace, concluded at Paris December 10, 1898. It lies in a direct line from San Francisco to the southern part of the Philippines, and is 5,200 miles from San Francisco and 900 miles from Manila. It is about 32 miles long and 100 miles in circumference, and has a population of about 8,661, of whom 5,249 are in Agana, the capital. The inhabitants are mostly immigrants or descendants of immigrants from the Philippines, the original race of the Ladrone Islands being extinct. The prevailing language is Spanish. Nine-tenths of the islanders can read and write. The island is thickly wooded, well watered, and fertile, and possesses an excellent harbor. The productions are tropical fruits, cacao, rice, corn, tobacco, and sugar cane.

Commander Taussig, of the United States gunboat Bennington, took possession of the island and raised the United States flag over Fort Santa Cruz on February 1, 1899.

TUTUILA.

Tutuila, the Samoan island which, with its attendant islets of Tau, Olesinga, and Ofu, became a possession of the United States by virtue of the tri-partite treaty with Great Britain and Germany in 1899, covers, according to the Bureau of Statistics of the Treasury Department, fifty four square miles, and has 5,800 inhabitants. It possesses the most valuable island harbor, Pago-Pago, in the South Pacific, and perhaps in the entire Pacific Ocean. Commercially the island is unimportant at present, but is extremely valuable in its relations to the commerce of any nation desiring to cultivate transpacific commerce.

Ex-Chief Justice Chambers, of Samoa, says of Pago-Pago that "The harbor could hold the entire naval force of the United States, and is so perfectly arranged that only two vessels can enter at the same time. The coaling station, being surrounded by high bluffs, cannot be reached by shells from outside." The Government is increasing the capacity to 10,000 tons.

The Samoan Islands, in the South Pacific, are fourteen in number, and lie in a direct line drawn from San Francisco to Auckland, New Zealand. They are 4,000 miles from San Francisco, 2,200 miles from Hawaii, 1,900 miles from Auckland, 2,000 miles from Sydney, and 4,200 miles from Manila. Germany governs all the group except the part owned by the United States. The inhabitants are native Polynesians and Christians of different denominations.

WAKE AND OTHER ISLANDS.

The United States flag was hoisted over Wake Island in January, 1899, by Commander Taussig, of the Bennington, while proceeding to Guam. It is a small island in the direct route from Hawaii to Hong Kong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific Ocean, some hardly more than rocks or coral reefs, over which the flag has been hoisted from time to time. They are of little present value and mostly uninhabited. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phœnix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus islands. The Midway Islands are occupied by a colony of telegraphers in charge of the relay in the cable line connecting the Philippines with the United States and a camp of United States marines, in all about forty persons.

The Santa Barbara group is a part of California and the Aleutian chain, extending from the peninsular of Kamchatka in Asiatic Russia to the promontory in North America which separates Behring Sea from the North Pacific, a part of Alaska.

HAWAII.

Hawaii was annexed to the United States by joint resolution of Congress July 7, 1898. A bill to create Hawaii a Territory of the United States was passed by Congress and approved April 30, 1900.

The area of the several islands of the Hawaiian group is as follows: Hawaii, 4,210 square miles; Maui, 760; Oahu, 600; Kauai, 590; Molokai, 270; Lanai, 150; Niihau, 97; Kahoolawe, 63. Total, 6,740 square miles.

At the time of the discovery of the islands by Captain Cook in 1778 the native population was about 200,000. This has steadily decreased, so that at the last census the natives numbered but 31,019,

INSULAR POSSESSIONS OF THE UNITED STATES—*Continued.*

which was less than that of the Japanese and Chinese immigrants settled in the islands. A census taken early in 1897 revealed a total population of 109,020, distributed according to race as follows:

	Males.	Females.	Total.
Hawaiians	16,399	14,620	31,019
Part Hawaiians	4,249	4,236	8,485
Japanese	19,212	5,195	24,407
Chinese	19,167	2,449	21,616
Portuguese	8,202	6,898	15,100
Americans	1,975	1,111	3,086
British	1,406	844	2,250

The remainder were Germans, French, Norwegians, South Sea Islanders, and representatives of other nationalities. The American population was 2.73 per cent. of the whole. The American population has increased since annexation.

The first United States census of the islands was taken in 1900 with the following result: Hawaii Island, 46,843; Kauai Island, 20,562; Niihau Island, 172; Maui Island, 25,416; Molokai Island and Lanai Island, 2,504; Oahu Island, 58,504. Total of the Territory, 154,001. The population of the City of Honolulu was 39,306. An estimate of the population of Hawaii for June 1, 1909, made by the United States Census Bureau was 211,010.

The exports from Hawaii to the United States in the twelve months ending June 30, 1910, were valued at $46,161,288. The imports into Hawaii from the United States for the same period were valued at $17,338,417. The imports from foreign countries for the same period were $4,606,334, exports $306,763.

The new Territorial Government was inaugurated at Honolulu June 14, 1900, and the first Territorial Legislature began its sessions at Honolulu February 20, 1901. The Legislature is composed of two houses—the Senate of fifteen members, holding office four years, and the House of Representatives of thirty members, holding office two years. The Legislature meets biennially, and sessions are limited to sixty days.

The Executive power is lodged in a Governor, a Secretary, both appointed by the President, and hold office four years, and the following officials appointed by the Governor, by and with the consent of the Senate of Hawaii. An Attorney-General, Treasurer, Commissioner of Public Lands, Commissioner of Agriculture and Forestry, Superintendent of Public Works, Superintendent of Public Instruction, Auditor and Deputy, Surveyor, High Sheriff, and members of the Boards of Health, Public Instruction, Prison Inspectors, etc. They hold office for four years, and must be citizens of Hawaii.

The Judiciary of the Territory is composed of the Supreme Court, with three Judges, the Circuit Court, and such inferior courts as the Legislature may establish. The Judges are appointed by the President. The Territory is a Federal Judicial District, with a District Judge, District-Attorney, and Marshal, all appointed by the President. The District Judge has all the powers of a Circuit Judge.

The Territory is represented in Congress by a delegate, who is elected biennially by the people.

Provision is made in the act creating the Territory for the residence of Chinese in the Territory, and prohibition as laborers to enter the United States.

Territorial Expansion of the United States.

THERE have been thirteen additions to the original territory of the Union, including Alaska, the Hawaiian, Philippine, and Samoan Islands and Guam, in the Pacific, and Porto Rico and Pine Islands, in the West Indies, and the Panama Canal zone; and the total area of the United States, including the noncontiguous territory, is now fully five times that of the original thirteen colonies.

The additions to the territory of the United States subsequent to the peace treaty with Great Britain of 1783 are shown by the following table, prepared by the United States General Land Office:

ADDITIONS TO THE TERRITORY OF THE UNITED STATES FROM 1800 TO 1900.

Territorial Division.	Year.	Area Added.	Purchase Price.	Territorial Division.	Year.	Area Added.	Purchase Price.
		S. Miles.	Dollars.			S. Miles.	Dollars.
Louisiana purchase	1803	875,025	15,000,000	Porto Rico	1898	3,600	.....
Florida	1819	70,107	5,499,768	Pine Islands (W. Indies)	1898	882	.....
Texas	1845	389,795	.....	Guam	1898	175	.....
Oregon Territory	1846	288,689	.....	Philippine Islands	1899	143,000	20,000,000
Mexican cession	1848	523,802	*18,250,000	Samoan Islands	1899	73	.....
Purchase from Texas	1850	†	10,000,000	Additional Philippines	1901	68	100,000
Gadsden purchase	1853	36,211	10,000,000				
Alaska	1867	599,446	7,200,000	Total	..	2,937,613	87,039,768
Hawaiian Islands	1897	6,740	.....				

* Of which $3,250,000 was in payment of claims of American citizens against Mexico. † Area purchased from Texas amounting to 123,784 square miles is not included in the column of area added, because it became a part of the area of the United States with the admission of Texas.

ACQUISITION OF THE PANAMA CANAL ZONE IN 1904.

Article 2 of the treaty between the United States and the Republic of Panama, ratified by the United States Senate February 23, 1904, treaty in effect February 26, 1904, provided for the cession, in perpetuity, by Panama, of a strip of territory adjacent to the canal, as follows:

"The Republic of Panama grants to the United States in perpetuity the use, occupation, and control of the zone of land and land under water for the construction, maintenance, operation, sanitation, and protection of said canal of the width of ten miles, extending to the distance of five miles on each side of the centre line of the route of the canal to be constructed; the said zone beginning in the Caribbean Sea, three marine miles from mean low-water mark, and extending to and across the Isthmus of Panama into the Pacific Ocean to a distance of three marine miles from mean low-water mark, with the proviso that the cities of Panama and Colon and the harbors adjacent to said cities, which are included within the boundaries of the zone above described, shall not be included within this grant. The Republic of Panama further grants to the United States in perpetuity the use, occupation, and control of any other lands and waters outside of the zone above described which may be necessary and convenient for the construction, maintenance, operation, sanitation, and protection of the said canal or of any auxiliary canals or other work necessary and convenient for the construction, maintenance, operation, sanitation, and protection of the said enterprise. The Republic of Panama further grants to the United States in perpetuity the use, occupation, and control of all islands within the limits of the zone above described, and in addition thereto the group of small islands in the Bay of Panama named Perico, Nacs, Culebra, and Flamingo."

Cuba.

THE Island of Cuba is 730 miles long, and its width varies from about 25 miles to 100 miles. Its area comprises 44 164 square miles or about that of Pennsylvania. It has numerous safe and commodious harbors, that of Havana being one of the largest and finest in the world Measuring from points of nearest approach to its neighbors, Cuba is about 100 miles from Key West, Fla., North; 54 miles from Hayti, East; 130 miles from Yucatan, West, and 85 miles from Jamaica, South.

The two principal agricultural staples of the island are sugar and tobacco. It also produces in considerable quantities fruits, vegetables, timber and metals, mainly iron, manganese and copper ore. The soil is adapted to coffee and cotton Prof Robert T. Hill, of the United States Geological Survey, says: "Cuba is the fairest and most fertile of the tropical lands. So far as wealth and lay of soil are concerned Cuba is superior to the rest of the tropical lands with the possible exception of Porto Rico. The whole island is mantled with rich soils, fertile calcareous loams, which, under constant humidity, yield in abundance every form of useful vegetation of the tropical and temperate climes."

The Government is Republican in form. The President, who is chosen by popular suffrage, serves four years and appoints his own Cabinet The Congress consists of a Senate and House of Representatives, one representative being chosen for every 25,000 inhabitants, as nearly as possible. The provinces, of which there are six, corresponding to the American States, elect their own Governors and control their own internal affairs.

POPULATION OF CUBA.

The following table shows the population according to each of the censuses and the average rate of increase per decade, and the number and percentages of the white and colored population, acording to each census:

YEARS	Population.	Rate of Increase per Decade. Per Cent.	[WHITES.		COLORED.	
			Number.	Percentage	Number.	Percentage.
1774	172,620	...	96.440	56.2	75.180	43.8
1792	272,301	31	153.559	56.4	118,741	43.6
1817	553 628	34	257.380	45.0	314.983	55.0
1827	704.487	27	311,051	44.2	393.435	55.8
1841	1,007,624	29	418.291	41.5	589.333	58.5
1861	1.396 530	18	793,484	56.8	603,046	43.2
1877	1.509.291	5	1.023 394	67.8	485.897	32.2
1887	1.621.687	8	1.102,889	67.6	528.798	32.4
1899	1.572 797	(a) 3	1.067,354	67.9	505,443	32.1
1907	2,048,980	30.3	1,369,476	69.7	620,804	30.3

(a) Decrease.

A census of Cuba was taken by the United States Provisional Government in 1907, under the direction of Victor H. Olmstead, of the Department of Agriculture at Washington. The results, of which the following is an abstract, were published in Spanish and English in 1909.

In 1907 Cuba had a population of 2.048.980, an increase from 1899 of 476,183, or 30.3 per cent. The population of the provinces of Cuba was as follows:

Habana	538.010	Pinar del Rio	240,372
Santa Clara	457 431	Matanzas	239,812
Oriente	455.086	Camaguey	118,269

Over half of the population lived in the rural districts, the 134 towns and cities containing 899,667 inhabitants, or 43.9 per cent. of the total. The population of the six large cities was as follows:

Habana	297,159	Cienfuegos	30,100
Santiago de Cuba	45.470	Camaguey	29,616
Matanzas	36.009	Cardenas	24,280

The density of population in 1907 was 46.4 per square mile.

Males were more numerous than females, the numbers being 1,074,882 and 974,098, respectively.

Of the total population, 1,369 476, or 66 8 per cent., were single or divorced; 423,537, or 20.7 per cent., were married; 176,509, or 8.6 per cent., were consensually married; and 79,458, or 3.9 per cent., were widowed. The average number of persons to a family was 4.8.

In 1907 over two-thirds 1,428,176, or 69.7 per cent., of the inhabitants were white. The colored population was composed of 274,272 negroes, 334,695 mixed, and 11,837 Chinese. Of the whites, 1,224,539 were native and 203,637 foreign born. Of the latter class, Spain contributed 185,393 and the United States 6.713

Of the total population, 1,780,628, or 86.9 per cent., were of Cuban and 228,138, or 11.1 per cent., of Spanish citizenship. Of the 551,639 males of voting age, 430.514 were Cuban citizens, and of these, 212,930, or less than one-half, were literate, while 217,584 were illiterate; among those of other citizenship the proportion of literates was much greater, 89.217 being literate and 31,908 illiterate. Among the white males of voting age the literates were in the majority, the numbers being 161.742 literates and 130,944 illiterates for Cuban citizens, and 84,937 literates and 23.056 illiterates for all the others.

Almost one-third, 171,017, or 31.6 per cent., of the children attended school; the corresponding percentage for 1899 was only 15 7. In the six large cities 55.336, or 49.9 per cent. of those of school age, attended school.

Of the population at least ten years of age, 837,958, or 56 6 per cent., could read. For the large cities the percentage was 82.6; for the rest of Cuba it was 47 9

In 1907, 772,502 persons were engaged in gainful occupations The 698,982 male breadwinners formed 65 per cent of all the males while the 73.520 females gainfully employed formed 7.5 per cent. of all the females. Of the wage-earners, 374,969, or 48 5 per cent., were engaged in agriculture, fishing, and mining; 136,419, or 17 6 per cent., in trade and transportation; 126,021, or 16 3 per cent., in manufacturing and mechanical pursuits; 122.288, or 16 per cent., in domestic and personal service; and 12.805, or 1.6 per cent., in professional service

The principal trade is with the United States, which takes practically all the exports of sugar, fruit, and minerals, and more than nine-tenths of the raw tobacco Trade with Spain has fallen off greatly.

In the calendar year 1909 the imports into Cuba from foreign countries were, including gold and silver, $95 307,495, of which $46 339.198 were received from the United States. The exports in the same period were $124,745 304, of which those to the United States were $109,441,848. The imports from Spain were $8,194.679, and the exports to Spain $865 519.

Progress of the United States

IN AREA, POPULATION AND MATERIAL INDUSTRIES.

(Compiled from a statement prepared by O P. Austin, Chief of the Bureau of Statistics, Department of Commerce and Labor.)

The Capitol at Washington.

THE Capitol is situated in latitude 38° 53′ 20″.4 north and longitude 77° 00′ 35″.7 west from Greenwich. It fronts east, and stands on a plateau eighty-eight feet above the level of the Potomac.

The entire length of the building from north to south is seven hundred and fifty-one feet four inches, and its greatest dimension from east to west three hundred and fifty feet. The area covered by the building is 153,112 square feet.

The dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865. The entire weight of iron used is 8,900,200 pounds.

The dome is crowned by a bronze statue of Freedom, which is nineteen feet, six inches high and weighs 14,985 pounds. It was modelled by Crawford. The height of the dome above the base line of the east front is two hundred and eighty-seven feet five inches. The height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches. The greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-seven feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and thirteen feet three inches in length, by eighty feet three inches in width, and thirty six feet in height. The galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty-nine feet in length, by ninety-three feet in width, and thirty-six feet in height.

The southeast corner-stone of the original building was laid September 18, 1793, by President Washington with Masonic ceremonies. The corner-stone of the extensions was laid July 4 1851, by President Fillmore.

The room now occupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the room immediately beneath, now used as a law library

The American Peace and Arbitration League.

THE corporate purposes of the organization favor universal peace by conciliation and arbitration through a permanent international court, arbitration treaties between all nations, and adequate armament for national security. *Honorary Presidents*—William H Taft. Theodore Roosevelt and George Dewey. *President*—James B. McCreary, Kentucky. *Vice-Presidents*—William A. Clark, Richmond P. Hobson and Gen James Grant Wilson. *Treasurer*—Henry Clews. *General Secretary*—Andrew B. Humphrey. Headquarters, 31 Nassau Street, New York City.

State Party Platforms of 1910 on National Issues.

THE following references to national questions appeared in the platforms of State conventions in 1910. In all the conventions purely State or local matters were also considered, and in many occupied more space than that devoted to national issues.

PRESIDENT TAFT'S ADMINISTRATION.

REPUBLICAN CONVENTIONS.

Arkansas—We express our high admiration for the ability and patriotism of our illustrious President William H Taft His broad statesmanship, his patient labors in the face of trying difficulties, and his studious fidelity to the pledges in the platform on which he was elected, commend him to the warm admiration of the Republicans of Arkansas, who pledge him their continued and united support. The beginning of the second year of his administration sees the nearing fruition of many party measures of vast importance to the country, and his achievements already accomplished toward expanding the national commerce, extending American influence abroad, and placing business at home on a settled basis point to a brilliant administration that will take its place in history as one of notable achievements.

California—The California Republican State Convention hereby declares the continued allegiance of the Republicans of California to the Republican party, and to the progressive Republican policies enunciated by President Roosevelt, and reaffirmed and already in part enacted into law, under the administration of President Taft. We commend President Taft in his efforts and announced intention further to carry out these policies, and look to our Senators and Representatives in Congress to co-operate with him to that end.

Colorado—We emphatically approve and commend the able, efficient and progressive administration of President William Howard Taft. He brought to his office the highest training and equipment for its duties He has been a faithful custodian of the Constitution. He has given the country a law-abiding, law-enforcing administration. The appointive power has been to him a sacred trust. Thanks chiefly to his tactful but resolute insistence the vital part of the reforms advocated by former President Roosevelt is now statute law. At once constructive and progressive, patient under misapprehension and detraction, William Howard Taft has set an example of official fidelity and pure patriotism to all his successors in the Presidency.

Connecticut—In William Howard Taft the American people have a good and great President—one of the greatest the White House has known. We take pride in the remembrance that Connecticut gave him all her votes in the nominating convention, and a plurality of 44,660 on election day. He brought to the Chief Magistracy a wonderful training and equipment for its duties. He had been a faithful custodian of the Constitution. He has given the country a law abiding, law-enforcing administration. The appointing power has been to him a sacred trust. Our exporters are indebted to him for the preservation of tariff peace with the whole trading world * * * At once conservative and progressive, patient under misrepresentation and detraction, William Howard Taft has set an example of official fidelity and pure patriotism to all his successors in the Presidency.

Delaware—We, the duly elected representatives of the Republicans of Delaware, in State Convention assembled emphatically indorse the wise and statesmanlike administration of William H. Taft, and greet him with as much heartiness as we did when he visited our State two years ago. * * * We congratulate the country upon having a Chief Magistrate who has the courage, the experience and the judicial temperament so important for the performance of the duties of his high office.

Idaho—We congratulate our party and the country upon the record made by our President, William H. Taft. Without ostentation or display, but with calm, dispassionate, and judicial action, he has proceeded to carry forward to fruition the mighty work started by his illustrious predecessor Theodore Roosevelt. He has succeeded in having enacted into law practically every great reform pledged by his party and approved by the people at the polls.

Illinois—We commend President Taft for his impartial and fearless administration of the Federal laws. He has brought to the bar of justice those implicated in sugar frauds against the Government, recovering millions of revenue due; successfully intervened to prevent arbitrary increases in freight rates; impartially enforced the Anti-Trust law; and enforced a policy of economy in governmental expenditures without crippling the public service.

Indiana—We recognize that no President in our history ever began his administration with such universal favor and good will as did William Howard Taft; few men have entered the Presidency with such extraordinary training As Collector of Internal Revenue, Prosecuting Attorney, Judge of a State Court, Solicitor General, Federal Judge, Governor of the Philippines, Secretary of War, builder of the Panama Canal, Regenerator of Cuba—each period of official activity immediately following another for his entire adult life—he brought to the discharge of the great duties of the Presidency broad executive experience and grasp of governmental affairs We indorse his administration and pledge to him our support in any efforts to secure the enactment of genuine progressive legislation.

Kansas—We the Republicans of Kansas, in party council, desiring to express our pride in the traditions of our party feel that respect and veneration for those traditions and for the history we have made may be most adequately and fittingly expressed by turning our faces forward rather than backward. Therefore, we bind ourselves to specific future performances rather than to ask for votes by reason of our past achievements, however great they are Our platform shall be a guarantee of performance, rather than a confession of faith. Yet we must congratulate President Taft as Republicans on the successful outcome of the progressive party measures in Congress, the Postal Savings Bank law, the Railroad law and the law providing for the publicity of campaign expenses.

Kentucky—We are justly proud of the splendid record made by President William H. Taft in the face of unparalleled difficulties He has advocated with loyalty and ability the great principles of the Republican party His courage and fidelity to the people in restraining the great corporations, the enforcement of the Sherman Anti-Trust law, the successful prosecution of the sugar frauds, the preservation of millions of acres of the public lands, the saving of nearly $1,000 000 per month in the expenses of the Post-Office Department and the masterly manner in which he has influenced important legislation, which has been and will be productive of untold value to the country, all of which is in line with pledges made by the Republican party, entitle him to the highest meed of praise.

Maine—The Republicans of Maine indorse the administration of President Taft as wise, progressive and safe, and commend it for continuing energetically and effectively the wise and necessary policies of President Roosevelt's administration.

Massachusetts—We cannot too warmly commend the administration of President Taft, and are glad to here express our appreciation of the commanding part he took in securing the enactment of so much wise legislation in the last session of Congress.

Michigan—We renew our faith in, and express our admiration for, the President of the United States.

whose leadership and personality strengthen the confidence of the American people in their institutions. William Howard Taft, jurist, diplomat, governor-general and cabinet officer in the administrations of William McKinley and Theodore Roosevelt, has, as President, increased our prestige with foreign nations and vigorously dealt with international problems of vital interest to the country. His presidential career has been conspicuous and consistent in its labors for the people.

Minnesota—We commend the wise, conciliatory administration of President Taft and his persistent efforts to secure the passage of measures carrying out the pledges of the party and for the welfare of the people.

Missouri—We heartily indorse the wise and businesslike administration of President Taft and commend him for his success in securing, with the aid of a Republican Congress, the enactment of so many beneficial, constructive and remedial measures in accordance with the party pledges of the platform of 1908.

Nebraska—No political organization in any country can point to such a record of achievements during the last fifty years as the Republican party of America. From Lincoln to Garfield, and Garfield to McKinley, Roosevelt and Taft, we can stand upon our record and challenge all comers to the lists. Yet it remains true that William H. Taft as President, during the last Congress, has brought forth more legislation for the benefit of the people than did any other President during the same period of time, during the last quarter of a century. By his impartial enforcement of the law; by the continued prosecution of illegal trusts and monopolies; and by his more effective service in the regulation of the rates and service of transportation companies he has made good all that his predecessor had begun and proved himself true to the interests and welfare of the people.

New Hampshire—In national affairs, we commend the Republican achievements of the last Congress under the leadership of President Taft in carrying out in such a large measure the policies inaugurated by Theodore Roosevelt, and in enacting into law important legislative acts.

New Jersey—The Republican party heartily approves the administration of President William H. Taft, and we affirm our loyalty to the President, who has brought to the discharge of the duties of his great office the highest ability and loftiest patriotism.

New York—We enthusiastically indorse the progressive and statesmanlike leadership of William Howard Taft, and declare our pride in the achievements of his first eighteen months as President of the United States. Each succeeding month since his inauguration has confirmed the nation in its high esteem of his greatness of character, intellectual ability, sturdy common sense, extraordinary patience and perseverance, broad and statesmanlike comprehension of public questions and unfaltering and unswerving adherence to duty. He has strengthened our prestige with foreign nations and treated with vigor and wisdom important international problems, notably our tariff relations with Germany, France and Canada. Under his administration the prosecution of those implicated in the sugar and other customs frauds have been continued and convictions obtained; there have been impartial and energetic enforcement of the Sherman Anti-Trust act; a substantial reduction of governmental expenses; the establishment of better business methods, which will result in greater efficiency and real economy; remarkable progress in the construction of the Panama Canal, and the withdrawal from private entry of over 71,000,000 acres of the public domain, to preserve for public benefit valuable coal and other mineral deposits, timber land and water power sites. On his recommendation Congress has provided for a commission to investigate and report on the regulation of the issuance of stocks and bonds by public service corporations engaged in interstate commerce. He has advocated a new system of appropriations for river and harbor improvements, under which each item, after investigation by experts, shall be approved and carried to completion as a separate measure. This recommendation we heartily indorse.

North Carolina—We pledge our continued loyalty to William Howard Taft, President of the United States, and leader of our party. We heartily congratulate both him and the Republican majorities in the 61st Congress on the extraordinary number of wise measures which, in accordance with the promises of our national convention, have already been enacted into law. Our history hardly affords another instance in which the party in power has so promptly made good so many of its promises to the people.

Ohio—We, the Republicans of Ohio in State convention assembled, commend in highest terms the splendid administration of William H. Taft, are proud of the results he has already achieved in his seventeen months in office and pledge him our hearty and united support in his further efforts as Chief Executive of the nation. We renew our pledge of loyal support given him in 1908 and indorse him for renomination in 1912.

Pennsylvania—We heartily indorse and commend the administration of President William H. Taft, which, less than sixteen months old, is unique in its record of accomplishment. He has, in his own way, carried forward and developed the policies of William McKinley and Theodore Roosevelt, while enforcing his own and those in favor of which the party has in national platform declared. With unwearying patience and gentleness of manner, but with great firmness of purpose and unyielding determination, he will, by the time the gavel falls at the close of the present session of Congress, have succeeded in securing the enactment into law of more important recommendations than any other President has ever secured within so brief a time after his inauguration.

Tennessee—We indorse the administration of President Taft. Unless it was during the abnormal days of the civil war, no President has recommended and had so promptly accepted by Congress and enacted into laws so many measures of vital importance to the country at large. These measures stamp him for all time as one of our country's greatest statesmen.

Texas—We commend President Taft for his advocacy of the policy of progress developed by his predecessors and himself and indorse his administration for the many substantial measures of reform it has written into our statutes and assure him of our approval and support in all efforts to secure further effective reforms in legislation and administration, and reaffirm our allegiance to the Republican national platform of 1908.

Utah—We emphatically approve the wise, able, patriotic and progressive administration of President William Howard Taft. He has stood firmly, but tactfully, for the great reforms advocated by Theodore Roosevelt and they have been written into the Federal statute books in the form of enduring laws. He has proven himself a faithful exponent and custodian of the Constitution. He has enforced the law fearlessly and faithfully. He has exercised the appointive power with wisdom. He has called to the discharge of his official duties patience and perseverance in the face of misunderstanding and misrepresentation, and has preserved in all respects the exalted character of the high office which he has so splendidly filled.

Washington—Every American should be, and every loyal Republican is, justly proud of the matchless administration of William H. Taft, which has not only been thoroughly Republican and truly American, but has resulted in the enactment of more vital legislation in the interests of all the people than ever was accomplished before in the same period of time.

Wyoming—We specially commend the fidelity of President Taft and his cabinet in adhering to the spirit and letter of the law and the Constitution in the performance of their executive duties, and we

Indorse the view of President Taft upon the question of conservation that "real conservation involves wise not wasteful use of natural resources in the present generation, with every possible preservation for future generations."

Democratic platform criticisms of the administration of President Taft appear principally in the tariff planks.

THE TARIFF AND PROTECTION.

DEMOCRATIC CONVENTIONS

Alabama—We are unalterably opposed to the present high tariff, for which the Republican party is responsible, and condemn it for its failure to revise the tariff downward, as pledged in its platform; we charge the present era of almost prohibitive high prices to the instrumentality of the tariff, and favor such substantial reduction and readjustment thereof as will relieve all classes from any unjust burden and from the effect of unjust discrimination which may tend to oppress the many for the benefit of the few; and we declare that the amount of public revenue raised by taxation should not exceed the requirements of an economical administration of the affairs of the Government and the proper development of such works of public improvement as may, under the Constitution of the United States, be properly undertaken by Federal authorities.

Colorado—We denounce the work of Senator Guggenheim and his Republican associates who, in violation of that party's platform pledges and the oft-repeated promises of its presidential candidate, revised the tariff upward and not downward, thereby imposing added burdens upon the toiling and consuming masses, in order that the smelting, manufacturing, oil-producing and other industrial agencies and combinations of the trusts might add millions to their already colossal fortunes, and thereby increasing the cost of living to such an extent that the law merits the universal condemnation which has followed its passage through Congress. And we urge a prompt and thorough revision of the tariff as demanded in the Denver platform of the national Democracy.

Connecticut—We accuse the Republican party of a breach of faith to the nation in enacting a tariff law, but not such as it promised, by which duties were to be measured by the difference in the cost of production, but such as was best calculated to build up great fortunes for a favored few. We believe that an extension of the free list and a reduction in many of the rates professedly framed to secure protection to American producers, but really granted as the price of political support, would advance the prosperity of the mass of our people, without leading to any injustice to invested capital, or any reduction in the wages of employés.

Delaware—We favor a revision and gradual reduction of the tariff, keeping in view the ultimate end of equality of burdens and equality of opportunity, and the constitutional purpose of raising the revenue by taxation, to wit, the support of the Federal Government in all its integrity and virility; and we denounce the action of the Republican party for its deliberate breach of its pledges to reduce the tariff. We condemn our Senators and Representatives in Congress for voting for the Payne-Aldrich Tariff bill, whereby the already great burden of the wage-earner and consumer has been increased as is shown by the increased cost of living, and the only benefits conferred are upon the trusts and the already rich manufacturers.

Georgia—We denounce and condemn the recently enacted Payne-Aldrich Tariff law, by the operation of which the cost of living has been enormously increased and the burdens of the consuming masses made heavier. We condemn the Republican administration and the Republican Congress for its complete breach of faith with the American people. In the campaign of 1908 the Republican nominee for President and the Republican party in its platform promised the people tariff revision downward. In the law of 1909 the Republican party and its President gave to the people tariff revision upward. In 1908 relief from existing tariff burdens was promised. In 1909 increased tariff burdens were imposed. So monstrous a fraud has been practised on the American people that no further demonstration is needed of the fact that the Republican party can never be trusted to give relief from tariff burdens.

Idaho—We denounce the Payne-Aldrich Tariff law as unjust, unfair and oppressive and framed entirely in the interests of the trusts and monopolies of the United States. We call the attention of the people to the wilful failure of the Republican majority in Congress to carry into effect the promise made in the party's last national platform for the revision of the tariff. We favor a substantial reduction of the tariff on all the necessities of life, and contend that in no case should the tariff on any article exceed the difference in cost of production at home and abroad. The present excessive high cost of living is directly due to Republican policies, and we condemn the Republican majority in Congress for refusing to grant the people any relief.

Illinois—We denounce the Republican party for its failure to revise the tariff downward in accordance with the pledges contained in its platform, as was explained by President Taft in the last national campaign. We believe in a tariff for revenue, a tariff which in a period of rising prices will make the burden of the administration of the Government fall lightest upon those who are consumers principally of the necessities of life.

Indiana—We denounce the Payne-Aldrich Tariff act as a masterpiece of injustice, involving remorseless exactions from the many to enrich the few, through the trusts and monopolies which it fosters. Tariff taxation, like other taxatio· should be for public purposes only, and not for private profit; and should be so levied as not to discriminate against any section, class, industry or occupation, and limited to the actual necessities of the Government, economically administered.

Iowa—We denounce the Republican tariff act as a masterpiece of injustice, involving remorseless exactions from the many to enrich the few, through the trusts and monopolies which it fosters. Tariff taxation, like other taxation, should be for public purposes only and not for private profit, and should be so levied as not to discriminate against any section, class, industry or occupation and it should be limited to the actual necessities of the Government economically administered.

Kansas—We condemn the present Republican Tariff law, drawn by the few against the interest of the people. Statistics show that $1 out of every $5 expended for the necessities of life is paid in increased prices due to our tariff system, thus robbing every family of $100 a year, and we demand that all articles manufactured here and sold abroad for less than they are sold to the people of this country shall be placed upon the free list. We reaffirm the declaration of the national Democratic platform that private monopoly is indefensible and intolerable and must be destroyed through the power of taxation.

Massachusetts—We demand the removal of taxes upon food stuffs and other necessaries of life; a tariff low enough on all manufactured articles to prevent the control of our markets by the trusts and to impose the check of competition upon inordinate profits of capital.

Michigan—We denounce the Payne-Aldrich Tariff law as a deliberate betrayal of the American people and a repudiation of the promises made by the Republican party two years ago. Instead of lowering tariff taxation on the necessities of life it increases the burdens of the people. The shameful manipulation of certain schedules by so called "stand-pat" members of Congress in the interests of special privilege merits our severest condemnation. The new tariff law plunders the many to enrich the few; it fetters legitimate

business, corrupts the morals of the people, curtails the world's market for our products, burdens the consuming millions and robs labor of its honest reward. Sheltered and protected by it, foreign competition is destroyed and great trusts and combinations stifle domestic competition, control the output and fix the prices of the necessities of life.

Minnesota—We call upon the fair-minded people of this commonwealth to rebuke sternly the base and cynical deception practised upon them, in common with all the people of the United States, by the Republican party in causing the enactment of the Payne-Aldrich Tariff law, in defiance of the universally made promise of that party to revise the tariff downward. If the people will permit such political faithlessness to go unpunished our Government will become utterly irresponsible. We denounce the present tariff law as a repudiation of the principles of protection as laid down by the Republican national convention of 1908. Instead of its schedules imposing tariff taxes corresponding to the difference of the cost of production at home and abroad, hundreds of them impose a tax greater than the entire cost of production at home or abroad. These grinding taxes were raised or renewed at a time when the masses were staggering under an appalling increase in the cost of living, brought about largely by the malign influences of a long established protective tariff system. In addition to the excessive taxes levied through that system, it has corrupted the economy of the nation, encouraged and propagated graft and prolifically littered public and private extravagance and waste. We call upon the people of Minnesota to register this Fall their emphatic denunciation of a system fundamentally wrong, both morally and politically, which, as they now know by grievous experience will never be reformed by its friends. We deplore the weakness and timidity of President Taft, who, with his own campaign promises still fresh, but dominated by the predatory interests, weakly failed to use the tremendous forces of his high office to force a recreant Congressional majority to do its solemn duty of tariff reform. No subsequent effort to fulfil party promises can atone for this supreme failure or restore public confidence.

Missouri—We denounce the Payne-Aldrich Tariff bill as a monstrous piece of class legislation, levying tribute upon the many for the benefit of the favored few. It is a bold defiance of the public will and an utter failure to redeem the ante-election Republican promises for a revision of the tariff downward, by which promises the Republicans won in 1908. The proper function of a tariff law is to raise revenue; and we favor a tariff limited to the needs of the Government economically administered, and so levied as not to discriminate against any industry, class or section, to the end that the burdens of taxation shall be distributed as equally as possible.

Nebraska—We see in the passage of the present tariff bill an example of subserviency of the Republican administration of the privileged interests in the country. We condemn the President for surrendering to Aldrich and Cannon the control of tariff revision and for using his patronage to force unwilling Congressmen of the Republican party to accept their dictations. We deplore the President's folly and weakness in surrounding himself with a cabinet of trust advisers. We condemn the President for retaining in his cabinet the close friend and former attorney for the powerful and unscrupulous syndicate caught in the very act of plunder.

New Hampshire—We demand the immediate downward revision of the tariff in the interests of the consumer.

New Jersey—In regard to the administration of the Federal Government, we charge that the Republican party, through the present unfair tariff, devised, not as a means of protection, but as a means of patronage, is largely responsible for the high cost of living now burdening our whole people, and we demand an intelligent revision downward of the present tariff in the interest of all the people.

New York—The Payne-Aldrich Tariff law, pronounced by President Taft to be "The best tariff that the Republican party ever passed," was a flagrant breach of faith by the Republican party. The bill even increased the exactions of former Republican tariffs and has placed great additional burdens upon the shoulders of the average man, thereby largely contributing to the present high cost of living, a cost out of all proportion to the earning capacity of the great mass of the people. We declare our belief that only by an honest revision downward of the tariff, with proper regard for the welfare of the American workingman, a reform which will be effected only by the Democratic party, can this excessive cost of living be lessened and the necessaries of life again be brought within reasonable reach of the people of the country. The time has come when special privileges to favored class should be abolished.

North Carolina—We condemn and denounce the tariff policy of the Republican party as enacted in the Payne-Aldrich Tariff bill, and we declare the same to be the most iniquitous tariff burden ever placed upon the United States, formulated in behalf of sectional interests and fostering the trusts and combinations of the country at the expense of the great mass of the people, and in spite of the promises of the Republican party that prosperity would follow its adoption, we call attention to the present commercial condition of the country, its idle factories, industries and unemployed operatives. We denounce the extravagant and unbusinesslike administration of the affairs of the national Government by the Republican party whereby there has been a useless expenditure of $300,000,000 annually of the people's money. We call attention to the failure of the Republican party to revise the tariff in accordance with their pledges of its platform and its promises. We demand the enactment of a tariff for revenue only to meet the expenses of a government economically administered.

Ohio—We demand the revision of the revision of the present unjust and oppressive tariff, reducing rates so as to lower the prices imposed on the consumers; the need of revenue for the economical conduct of the Government must be the guiding principles instead of the demands of favored interests. And the chief burden of tariff taxation must be taken from articles of the cheaper grades where it was placed by the law of Payne, Aldrich, Smoot and Cannon, which the President approves. The gradual reductions in tariff to make it a means of raising revenue instead of an instrument of extortion cannot be safely left to the party of broken promises, but should be intrusted to the Democratic party, whose motto is justice to all without either favors or injury to any.

Oklahoma—We favor an honest revision of the tariff by reducing the duties to revenue basis, so as to raise the greatest amount of revenue with the least burden of taxation upon the masses of the American people, and so adjusting the rates of duty as to deal fairly with both producer and consumer with regard to the needs of the Government. We favor making the tariff as high as possible upon the luxuries of life and as low as possible upon the necessities. We favor placing lumber, leather goods, farm machinery, household tools and all trust-made goods upon the free list.

Pennsylvania—Under the mask of protection to American labor, the Republican party has taxed the necessaries of life for the benefit of corporate trusts. It has used the tariff, not with the constitutional object of raising revenue, but that the trusts may increase their profits and enlarge their dividends. By this unlawful abuse of tariff laws it has increased the cost of living and laid an oppressive and cruel burden upon the mass of the people, to whose cries for relief the present Republican Congress has turned a deaf ear. Pledged by its national platform, and by the explicit promise of the President to revise the tariff so as to reduce duties and lift from the daily need of the citizens the intolerable burden it has imposed, the Republican party has, at the dictation of the trusts, passed a tariff bill that not only fastened the existing iniquitous taxes on the necessaries of life, but in many instances augmented them and created new burdens.

Rhode Island—Indorsing what appears to be the almost unanimous verdict of the country, we

denounce the Aldrich Tariff as the most dishonest piece of tariff legislation ever enacted. It was purposely framed to yield unearned wealth to certain corporations and combinations of capitalists. It was conceived in deception practised upon the American people by the Republican party and brought forth in the infamy that has just fallen upon its sponsors.

South Dakota—We denounce this so-called Payne-Aldrich Tariff bill as a fraud upon the people, and we condemn our Representatives in Congress for supporting it. We demand an honest downward revision of the tariff in the interest of all the people, and that all goods which compete with trust-made articles in this country be admitted free of duty.

Tennessee—Trusts are the certain fruits of that system of tariff taxation called "Protection," a system that we condemn as oppressive and injurious; and in its stead we demand a system of tariff taxation wherein the tariff shall be laid primarily, not for protection, but revenue to defray the expenses of a Government, economically administered, and with such incidental protection as the higher standard of living of the American workingman demands and requires.

Texas—We reaffirm the tariff declarations of the Democratic State and national platforms of 1896 and we expressly condemn the proposition to remove all duties from the manufacturer's raw material so long as such duties remain on the manufacturer's finished product.

Utah—Tariff is tax paid by the consumer. The modern "Republican Tariff" was enacted from necessities for revenue during the great civil war and has been perpetuated by selfish and corrupt men for fifty years, until it threatens the very life of the country. Like all taxation, it should be for public purposes only and not for private profit and should be so levied as not to discriminate against any section, class, industry or occupation, and be limited to the actual needs of the Government, honestly and economically administered. To avoid injury to any legitimate industry through necessary tariff changes we favor the creation of a non-partisan tariff commission, empowered to investigate economic conditions and to report publicly to Congress. We denounce the Payne-Aldrich Tariff act as a masterpiece of injustice, dictated by special interests and making remorseless exactions to enrich a few at the expense of the many through trusts and monopolies, which it fosters, and the brazen violation of pledges made by the Republican party to the nation.

Vermont—We condemn the Payne-Aldrich Tariff bill passed in 1909 as being unjust and illogical, and demand a speedy revision downward.

Wisconsin—We denounce the Payne-Aldrich Tariff act passed by the Republican party in flagrant violation of a solemn promise made by such party to the people as an indefensible masterpiece of injustice, legally authorizing remorseless extortions from the many to enrich the few through the operations of trusts and monopolies which it fosters. Tariff taxation, like other taxation, should be for revenue purposes only and not for private profit, and should be so levied as not to discriminate against, nor be in favor of any section, class, industry or corporation and limited to the actual necessities of Government, honestly and economically administered. We insist that any law enacted with the intention of enabling individuals, or corporations, to levy tribute upon the American people, or to guarantee a "reasonable profit" to any class, is in violation of the Constitution of the United States and is indefensible from either a legal or moral standpoint. We favor any honest, non-partisan investigation of the tariff by authorized experts to the end that the electors of the nation may be enlightened as to the iniquity of the present system of spoliation, established and maintained by the Republican party for the past fifty years; but we regard the creation of a Board of tariff experts by the last Congress and the appropriation of a quarter of a million of dollars to enable them to visit foreign countries, and then specifically limiting the report of their investigation to the President alone as a mere subterfuge satisfactory to the special interests, intended to deceive the American people, and deliberately proposed to indefinitely postpone a reduction of tariff taxation.

Wyoming—We denounce the Payne-Aldrich Tariff law.

REPUBLICAN CONVENTIONS.

Arkansas—We reaffirm our belief in the virtue of the protective principle which has continuously maintained business in this country at the highest prosperity mark. Notwithstanding the mass of diverging opinion, not only among members of other parties, but among Republican leaders, the Congress has succeeded in enacting a composite measure that has met the demands of business, heightened prosperity and, what was imperative, increased the national revenue. Its increase of income to the Government in its ten months of existence, approximately $55,000,000, demonstrating its virtue as a revenue producing measure. Notwithstanding the Treasury has advanced this year from current revenues $31,207,000 for the construction of the Panama Canal. In addition to the regular governmental expenses, so well is the tariff law operating that the current Treasury statement foreshadows a comfortable surplus at the end of the present fiscal year.

California—We declare our unswerving adherence to the Republican doctrine of protection, without which the American standard of living cannot be maintained. We hold that the true measure of protection is the difference in the cost of production and distribution at home and abroad. Less than this is unjust to the American laborer and producer; more is unjust to the American consumer.

Colorado—We reaffirm our adherence to the principles of a protective tariff as declared in the Republican national platform of 1908. We believe that the maintenance of this principle is necessary for the future prosperity of our country and its people. We point to our present tariff law as a substantial step in the direction of downward revision to which the Republican party is unqualifiedly committed. As a revenue measure it has proved an entire success, changing a large deficit into a substantial surplus, and this notwithstanding the fact that under it the duties on articles which enter the general consumption have been largely reduced, while increases where made were upon articles of luxury, the burden of which falls upon those most able to bear them. Inequalities will be found in any tariff law, and other reductions will be necessary. These changes should be made as speedily as possible and in such manner as to avoid the disturbance and derangement of business inevitably attending what is known as a general revision. Future revisions should be made only after careful investigation and upon full information and through laws applying to individual schedules. This is made possible by the establishment of a permanent tariff board which will go far to remove this question from party politics and the influence of special interests.

Delaware—We indorse and approve the bill revising the tariff, passed in 1909 and, while not a perfect measure we regard it as an earnest endeavor to fulfil, as far as was possible, the promises of the party. Of the 874 changes made by the new law, two-thirds were decreases, the great majority of the increases being upon luxuries and upon articles not in ordinary use. We brand as ridiculous the assertion that the present tariff is responsible for increase of price in the necessaries of life, for the reason that such increases, in almost every case, affect articles upon which there was no augmentation of tariff rates, or with respect to which the tariff duties were materially reduced.

Idaho—The Republican party believes in a protective tariff. It will put forth its efforts to retain this policy at all times, but that it may retain and secure its full benefit to American industries and American labor it is important that we neither permit its abuse nor shut our eyes to changed conditions. There should be an honest and continued effort to fix duties according to the rule heretofore announced by the Republican party, to wit: The difference between the cost of production at home and abroad. There should be as nearly as possible a scientific adjustment of the tariff upon this basis. In order that this may be done efficiently

and that the facts may be had for an intelligent application of the rule, we favor a tariff commission with ample power to gather data and facts to the end that while all abuses may be eliminated we may still preserve unimpaired the doctrine of protection as understood and defended by Hamilton, Clay, Lincoln, Garfield, Blaine and McKinley.

Illinois—Notwithstanding the general and manifest advantages of the present tariff law, criticism has been made regarding particular schedules. This was unavoidable and inevitable under present conditions, and has been our experience with every general revision of the tariff. The President himself has criticised the present tariff measure. The difficulty in framing an entirely satisfactory law lies in the lack of accurate and comprehensive information in regard to the comparative cost of production at home and abroad and the advantage which special interests may take of such a situation. President Taft wisely met this difficulty by taking the initiative and requesting Congress to create a tariff commission for the purpose of studying the difference in cost of production at home and abroad to furnish an intelligent basis for tariff revision in the future and create an enlightened public opinion in reference thereto. Should the investigations of this commission show the need of further revision of particular schedules, we favor such revision, schedule by schedule, and the adoption of a joint rule by the Senate and House of Representatives which will permit such mode of revision.

Indiana—We believe in a protective tariff, measured by the difference between the cost of production here and abroad. Less than this is unjust to American laborers; more is unjust to American consumers. That difference should be ascertained with the utmost speed, and the present law modified accordingly. We demand the immediate creation of a genuine, permanent, non-partisan tariff commission with ample powers and definite duties fixed in the law itself.

Iowa—The Republicans of Iowa especially emphasize their long and well settled faith in the Republican doctrine of protection. Its soundness and wisdom are beyond controversy and it ought to be accepted as the established policy of the nation. The last Republican national platform announced with clearness and precision the rules for its application to imports, and when so applied it safeguards equally the interests of labor and capital and promotes equally the welfare of the producer and the consumer. They do not recognize the revision of 1909 as a satisfactory fulfilment of the party promises. In order to bring the tariff law into a complete compliance with the rule of the platform, it is necessary that the difference between the cost of producing dutiable commodities at home and abroad should be correctly known. Therefore they favor the creation of an independent, non-partisan tariff commission, which shall be the instrumentality of Congress to ascertain the difference between the cost of production here and in other countries, and publish the facts so that not only Congress but the people shall be advised of the results of its investigations. Until such a commission is authorized they approve the effort of the President to secure the desired information through a board of experts employed for that purpose. They profoundly believe that when the tariff is again revised its schedules should be considered separately, so that each subject can be dealt with upon its own merits, and thus secure fair and impartial action upon the part of Congress.

Kansas—We pledge anew our loyalty to the Republican national platform of 1908, and bind ourselves to carry out its declarations, accepting the policy of protection as outlined in our party platform as the established policy of the nation, and binding our members of Congress in both houses to vote steadfastly and without reference to any other instructions for a revision of the tariff law of 1900, using as a basis for fixing duties the difference between the cost of production at home and abroad with a reasonable profit for American manufacturers. We do not recognize the revision of the tariff of 1909 as a satisfactory fulfilment of the tariff pledge of the Republican platform. We therefore pledge the people of Kansas and our Republican Senators and Congressmen to work and vote for legislation that will create an independent non-partisan tariff commission to ascertain accurately the difference between the cost of production at home and abroad, and immediately to fix the duties on the basis of this information. We pledge our Senators and Representatives to vote for a joint resolution that will promote the revision of the tariff, one schedule at a time.

Kentucky—The law has fully demonstrated, in less than one year of its enforcement, that it will provide an amount of revenue necessary to be raised by duties on importations from foreign countries. The duties on necessaries and raw materials for manufacture have been largely reduced, or wholly abolished, while the duties upon luxuries, such as wines and liquors, and other products of foreign countries, used or consumed by the wealthy and extravagant class, have been advanced, and the list of articles admitted free of duty has been largely increased. The misrepresentations of the law by dissatisfied interests cannot mislead the people, for they will soon recognize its fairness as a revenue and protection measure, which President Taft has pronounced the best tariff bill ever passed by the Congress of the United States, in which we fully concur. The new tariff board provided by the Sixty-first Congress and clothed with full power to investigate the cost of production here and in foreign countries, will enable Congress to correct inequalities which may occur by reason of changing conditions. Therefore, the tariff law may be gradually perfected, in harmony with economic and scientific principles, without widespread disturbance of the business interests of the country.

Maine—The tariff question has been adjusted by legislation which in its broad and general features, as is being shown by its practical application, meets to an eminent degree the demands and expectations of the American people; and by a provision for such further scientific investigation as may be needed in the details of future adjustments. And we condemn the efforts of the Democratic party to precipitate another general revision, with the consequent disturbance of business conditions.

Massachusetts—We believe that permanency in our tariff law is of great importance to our business interests and to the workingmen who depend upon such interests for steady employment. No tariff rate should be changed until the necessity for such change is demonstrated. When, however, the Commission reports facts which show the tariff to be wrong in any particular, we believe that Congress should, after a proper hearing, amend the tariff in that particular. The Payne Tariff law has been in operation a little more than a year. An examination of the schedules establishes the fact that it is a downward revision. Generally speaking, it reduces the duties on 654 articles, for the most part necessities, and increases the duties on 220 articles, for the most part luxuries. Hides were put upon the free list, and the duties on many raw materials largely used in New England were very much reduced. The charge that the present tariff is responsible for increases in the prices of necessities has been demonstrated to be false, both in the report of the United States Senate Committee, of which the senior Senator from Massachusetts was chairman, and in the report of the Massachusetts Commission on the Cost of Living, of which the presiding officer of this convention was chairman. That no other conclusion could have been reached is evident from the fact that upon all food products the duties have either been reduced or remain unchanged in the Payne bill.

Michigan—We commend Congress for the beneficent legislation which it has enacted. In no other Congress have more and better laws been enacted for the welfare of our people. Under the leadership of the President, Congress promptly passed a tariff law giving especial attention to the preservation of the wage-scale of our workingmen from injurious foreign competition, to the protection of American industries and to the financial necessities of the Government.

Minnesota—The Republicans of Minnesota renew their adherence to the policy of protection to American industries and American labor as defined and declared by the Republican national platform of 1908. We especially commend the provision of tariff legislation of the Sixty-first Congress, which provides for a

minimum and maximum tariff rate whereby the President, by proclamation, has been able to remove all discrimination against the importations of American products into foreign countries and at the same time apply the minimum rate of duty fixed by such law on the products of all foreign countries admitted to our markets.

Missouri—We renew our fidelity to the principle of protection as stated in the national platform of 1908. And we indorse the tariff law of 1909, reducing, as it does, the duty on the necessities of life and making increases on luxuries. It upholds the principle of protection to American labor and American industry and has turned a Treasury deficit into a surplus, at the same time reducing the average rate of all duties. And we especially indorse the provisions of the tariff law providing for a tariff commission whereby information can be secured on which, without disturbing general business conditions changes in specific tariff schedules may be made from time to time, so as to provide such measure of protection as will equal the difference in cost of production at home and abroad with a reasonable profit added.

New Hampshire—We are in favor of a tariff to conform to the national Republican platform of 1908, which is the difference in the cost of production at home and abroad, with a fair profit to the producer. We therefore urge the appointment of a non-partisan tariff commission with full powers to ascertain the information required in order that the tariff, in accordance with the suggestion of President Taft, may be scientifically revised, schedule by schedule, at the earliest possible date. We favor such reciprocal tariff relations with the Dominion of Canada as shall promote increased trade between the two countries, without unduly sacrificing the interests of our own people.

New Jersey—We especially commend the protective tariff; it has changed a deficit of $58 000,000 into a surplus of $28,000,000. We indorse the action of President Taft and a Republican Congress in providing an expert and impartial permanent tariff board to investigate tariff schedules.

New York—The Payne Tariff law reduced the average rate of all duties 11 per cent. By increasing the duties on some luxuries and articles not of ordinary use, making, however, no increase on any common food product, it turned a national deficit into a surplus. Under its first year of operation the value of imports free of duty was the greatest in our history by $109,000,000, and the average rate of duty was less than under the Wilson law. Unlike the Democratic law, its great reductions of duty have not stopped industry nor deprived labor of any part of its hire. It gives free trade with the Philippine Islands and it establishes a Customs Court. Its maximum and minimum rates give us for the first time equality of opportunity with other nations in our foreign trade. In providing, upon the suggestion of President Taft, for a tariff board, it affords the means of still more accurately determining the difference in cost of production at home and abroad. A Republican Congress is necessary to provide needed appropriations for thi board and to assure business and labor that changes in rates will be made only to equalize the difference in cost of production and not to reduce rates to the free trade or purely revenue basis favored by the Democratic party. To avoid disturbance of business we urge the adoption by the Congress of the joint rule of the two houses recommended by the President and leaders in Congress, by which the two houses could consider a single schedule or a single paragraph of the tariff without the necessity for amendment which would lead to a general revision. Advances in the cost of living are only the local reflection of a tendency that is world-wide and cannot be truthfully said to be due to the present tariff.

North Carolina—We renew our allegiance to the Republican policy of protection. The Southern States and North Carolina in particular, have profited by the policy in the past, and have every reason to expect increased benefits from it in the future.

Ohio—The tariff has been revised in accordance with the Republican doctrine of protecting home industries and American labor. It did not raise the rate of duty on a single common food product. The increases made were on luxuries and articles not of ordinary use. It affords no more than adequate protection to the industries of the nation, and is fair alike to consumers, laborers and producers. No tariff bill was ever more unjustly assailed. It has justified the expectations of its friends by turning a national deficit into a surplus, while at the same time reducing the average rate of all duties. Its maximum and minimum rates have operated to give us for the time equality of opportunity with other nations in our foreign trade.

Pennsylvania—We believe that the tariff bill recently enacted is in accord with the Republican policy expressed in its last national platform "to preserve, without excessive duties, the market against foreign competition to which American manufacturers, farmers and producers are entitled, but also to maintain the high standard of living of the wage-workers of this country, who are the most direct beneficiaries of the protective system." Since the passage of that bill the wages of employés in this country have been increased more than five hundred millions of dollars per annum. In a few instances the tariff on luxuries was increased, but on other articles the revision was downward. No increase in the price of the common necessities of life can honestly be attributed to the tariff, for the duties upon them were not raised. We agree with President Taft that it "is the best tariff bill the Republican party ever passed."

Utah—We again proclaim our adherence to the common-sense policy of protection to American industrial interests and labor. We affirm that tariff protection is necessary and vital to our local industries, and assert that without this protection not one lead, copper or coal mine could be profitably operated in Utah, and that our ranges would be despoiled of their flocks. Our Government has expanded so vastly that great revenue is needed to carry on its administrative and constructive work. Without the revenue raised from a protective tariff our country could not have commenced the construction of the Panama Canal, built up its great navy, pushed forward its great reclamation policy, aided in the establishment of agricultural colleges, established rural free delivery and extended the postal system, and above all, could not continue the payment of pensions to our veterans, without issuing bonds, or increasing domestic taxation. Our country must have revenue, and we believe in collecting, as far as possible, from the foreigner who seeks to sell in our markets in competition with our home labor and products, and not by increasing the financial burdens of our own citizens.

Vermont—We again announce our faith in the principle of protection for American industries, and we regard the Payne bill with favor. Under its wise provisions the revenues of the Government have been greatly increased, labor is being fully and amply employed everywhere and the farmer is enjoying prosperity unparalleled in all history. We therefore most cordially approve the course of our Senators and Representatives in Congress in voting for the measure.

Washington—The principle of protection is an essential part of Republicanism. The American market should and must be preserved for American producers. The late revision of the tariff was made by a Republican Congress in sympathy with this established Republican doctrine. The new tariff, is in our judgment, a practical fulfilment of the pledge of 1908. This law has substantially reduced the tax on many of the necessities of life and it raised them on nothing but luxuries. It has converted a deficit in the national revenues into a surplus. It has been placed on our statutes without disturbing the business of the country, and causing a loss of employment to any laboring man. We believe in the revision of the tariff, from time to time, as conditions change. We believe that the wisdom of entrusting revision of the tariff to its friends has been fully justified by the Payne-Aldrich law.

Wisconsin—The Payne-Aldrich Tariff is not a compliance with the pledge of the Republican party made in its national platform. The true basis of a protective tariff is the difference between the cost of

production at home and abroad, and we hold that any increased cost of production, due to higher wages and standard of living of American labor, should be accompanied by compensatory tariff duties. This principle was not recognized. The present tariff board has no power of investigation and is not required to report to Congress. We favor the creation of a non-partisan tariff commission empowered to ascertain the cost of production in this and other countries and required to make frequent reports of the information gained to Congress. Upon the information so obtained Congress should proceed to revise the different schedules independently of each other according to protective principles.

Wyoming—The Payne Tariff law has proven to be the best revenue producer ever placed upon the statute books, and under it the industries of the country have been generally prosperous. We oppose any change in this law until it has been fairly tested.

TRUSTS.

DEMOCRATIC CONVENTIONS.

Illinois—All trusts and combinations, formed in restraint of trade and to stifle competition, are wrong in principle and contrary to the law. We favor an honest and vigorous enforcement of all existing laws against unlawful trusts and combinations; and we favor the passage of new laws, from time to time, which may become necessary to dissolve all such unlawful trusts and combinations as well as to prevent the formation of new ones. Railroads have materially aided in the progress and prosperity of our country. They are entitled to a fair return upon the money actually invested in them, but they are not entitled to receive extortionate prices for services rendered in order to pay interest and fixed charges upon watered stock and inflated bond issues. We are opposed to the confiscation of private property, but we believe in proper and just regulation and control of common carriers. We believe the actual valuation of the property of such carriers should be made, and that all transportation rates should be fixed by some lawfully constituted Federal authority, based upon such actual valuation.

Iowa—Illegal trusts and combinations are intolerable. They are fostered by Republican tariff regulation. We favor the vigorous enforcement of the criminal law against guilty trust magnates and officials. We believe the true method of enforcing the criminal statutes of the United States is by the prosecution of the individual guilty of wrong. The assessment of a fine against a corporation is inoperative and inspires only contempt for the law.

Michigan—We believe that the trusts and combines that wrote the schedules of the tariff, through the control of the Cannon-Aldrich machine, must be driven from power and that the dictation of governmental policies by these interests must cease; that the system called "Cannonism" can only be destroyed by the election of a Democratic Congress. In brief, we demand the dissolution of the existing partnership between rotten politics and rotten business.

Missouri—A private monopoly is indefensible and intolerable. We therefore favor the vigorous enforcement of the criminal law against guilty trust magnates and officials, and demand the enactment of such additional legislation as may be necessary to make it impossible for a private monopoly to exist in the United States.

Pennsylvania—We declare that trusts and monopolies should be abolished or controlled by the supervision and management of their business by legislation which defines and forbids those acts and practices and those methods which have proved destructive to free competition and detrimental to the people's welfare, and by visiting penalties upon individuals controlling such combinations, rather than upon the corporations themselves. And we favor imposition of fines and penalties upon managers of such organizations for the violation of such remedial legislation.

Tennessee—The modern business combinations called trusts are menaces to the republic, in that they increase the cost of living, extract from the consumer, are hostile to opportunity and tend to suppress "independent individual efforts."

Utah—We call attention to the rapid growth of trusts, monopolies and organizations in restraint of trade and to dangerous conditions which threaten the industrial and economic life of the people as a direct result of Republican rule, both in nation and State, and hold the present administration responsible therefor.

REPUBLICAN CONVENTIONS.

Colorado—We call attention to the success attending the prosecution of those combinations and conspiracies in restraint of trade by concerns engaged in interstate commerce under the Sherman Anti-Trust law. There are, however, many such illegal combinations which cannot be reached through Federal action. We declare ourselves in favor of the enactment of a law through which these combinations commonly known as trusts can be reached and effectively prosecuted.

Kansas—We demand the strictest enforcement of the anti-trust laws and enactment of a law providing a jail sentence for wilful violation of the anti-trust laws.

Wisconsin—Under the pretense of equal treatment of capital and labor, the farmer and the laborer, whose capital is their labor and their savings from their labor, have been compelled to pay toll to those whose capital is their power to withhold money and credit from the commerce and industry of the country. We favor such separate classification of unions, associations, monopolies and trusts, as shall abolish this pretense and shall establish real equality before the law. Where monopoly is inevitable, we favor complete Government regulation. Except as herein stated, we are opposed to any change in the laws against trusts and monopolies until the people have regained control of Government and have been able to assert complete control over all questions of monopoly affecting the public interest, and this control should include the fullest exercise of the power of the Federal and State Governments to protect *bona fide* investors of savings from the frauds and wrongdoing of corporate officials and promoters and financial speculators.

SPEAKER CANNON.

DEMOCRATIC CONVENTIONS.

Delaware—The Democrats of Delaware as well as the progressive Republicans have been misrepresented by Congressman Heald in his persistent and unwavering support of Speaker Cannon in all of the Speaker's measures to dominate and control the action of the House of Representatives according to his individual will.

Minnesota—We declare that those members of the delegation who so faithfully supported Cannon and "Cannonism" knowingly misrepresented their constituents and should be retired from Congress by the action of their own partisans, as failing which, they will inevitably be by the people.

Missouri—We congratulate the people that at last they have determined to destroy the despotism which has stifled the voices of the Representatives in Congress. We commend the Missouri Democrats in Congress for the leading part they have taken in this contest. We regret that President Taft and ex-President Roosevelt did not see proper to throw the weight of their great influence against "Cannonism" until after it had been repudiated by the country.

New Hampshire—We demand the elimination of one-man control of Congress as expressed by "Cannonism."

Rhode Island—We denounce the conditions prevailing in our national House of Representatives which are fittingly described by the term "Cannonism" and we challenge the Republican candidates for Congress in this State to say whether if elected they will support or oppose Speaker Cannon and "Cannonism."

Vermont—We condemn that despotism on the part of the Speaker of the House of Representatives known as "Cannonism." To prevent this form of tyranny we favor an amendment to the United States Constitution, if necessary, which will render this method of overriding the rights of the citizens absolutely impossible. We lament the fact that the Vermont delegation in Congress were not found voting with those who have been successful in ridding of the country, for a while at least, of the abuse known as "Cannonism."

REPUBLICAN CONVENTIONS.

Delaware—As the undue power heretofore enjoyed by the Speaker of the national House of Representatives enabled him in practice to control legislation we approve and indorse the recent changes in its rules made by the House of Representatives which enables committees to be discharged and measures approved by a majority of the members to be brought to a vote.

Iowa—The Republicans of Iowa commend the action of the House of Representatives in revising its rules giving to the individual member a greater form of expression and initiative in the discharge of his duty and they indorse the contributions of Iowa's Representatives to this most important reform.

Kansas—We pledge our Republican members of the lower house of Congress to support and vote for a rule that will make the membership of the more important House committees elective instead of appointive.

Massachusetts—We believe that such changes should be made in the rules of the House of Representatives and of the Senate of the United States as may be necessary to make practicable the amendment of the tariff, one schedule at a time.

New Hampshire—We commend the recent changes in the rules of the National House of Representatives, and we favor such further changes as may be necessary to make it impossible for any man or small group of men to prevent the consideration of legislation.

Wisconsin—We indorse and commend the services of progressive Republicans from Wisconsin in the House of Representatives who consistently fought to fulfil the promises of the Republican party and their efforts to amend the rules in order that the House may again become a representative body. Wisconsin is to be congratulated upon having representatives in the Senate and House who remained true to the people and to the National platform of the party, notwithstanding the efforts to punish them for so doing by withdrawal of Federal patronage.

CONSERVATION OF NATIONAL RESOURCES.

DEMOCRATIC CONVENTIONS.

Colorado—We are in favor of the development and conservation of all the natural resources of the State without waste of the substance or affording opportunity for a monopoly of the use. We believe that the control of the irrigation resources of Colorado should continue to be left with the people of the State under the local laws, customs and decisions of courts. The right to appropriate the waters of the non-navigable streams has been dedicated by the Government to the use of the people, and we believe that no further or other regulation is required to develop, promote or conserve this resource.

Illinois—We are in favor of the conservation of the nation's natural resources. We are opposed to the gobbling up of the mines, the forests, the oil fields and the water power sites of the country by the greedy representatives of big business. The bounties of the earth belong to the people thereof.

Indiana—We favor the conservation of our natural resources and demand the withdrawal from entry of our remaining timber, oil, coal and iron lands and water power sites. The Republican course of favoritism and the countenancing of fraud in relation to these matters have become a national scandal. The remnants of our resources should be preserved in the Government for the benefit of the people. We favor the improvement of interior waterways and urge appropriations for such purpose.

Iowa—We favor the conservation of our natural resources. The Democratic party has always opposed gifts of public property to private individuals. We demand the withdrawal from entry of our remaining timber oil, coal and iron lands and water sites. The Republican course of favoritism and the countenancing of fraud in relation thereto have become a national scandal. The remnants of our resources should be preserved in the Government for the benefit of the people. We favor the improvement of interior waterways and urge appropriation for such purposes.

Kansas—We pledge our Congressional candidates to the policy of conserving all natural resources.

Michigan—We believe in a strict conservation of our natural resources not already absorbed by private corporations, and demand the reclamation of the lands and rights that have been illegally disposed of.

Minnesota—We condemn the national administration for its initial effort to prevent the conservation of natural resources, and have nothing but contempt for its insincere efforts to appear to support conservation after public disapproval of its course was manifested. The appointment and retention of Ballinger, the attorney for the raiders of public property, as Secretary of the department charged with the administration of that property, is a national scandal. The discharge of Gifford Pinchot, the faithful guardian of that property, is a national crime.

Nebraska—We favor the conservation of the natural resources of the country, condemn the policy under which favored capitalists and political syndicates secured control of water power, coal mines and other sources of the nation's wealth in the States and Alaska, unrestrained and apparently favored by the present national administration.

New York—The benefit of public lands and water powers should be preserved to the people at large and as the value of these natural resources and returns from them increase, whether from development or otherwise the State would benefit in the largest possible measure consistent with the honest enterprise of the present generation.

Ohio—We believe in the conservation of our natural resources and we denounce the administration, and especially Secretary Ballinger, for dismissing from the public service tried and true officers, whose only aim was the preservation to the people of such resources.

Pennsylvania—The public lands, the forests, the water power, the mineral resources of the Territories of the United States which have not passed out of governmental control, must be safeguarded by thorough legislation from exploitation of any kind that will render them private property and take them out of the control of the Government or involve their use without full payment for their privilege into the public Treasury. The profit and use of them should accrue to the nation. The present national administration has been convicted in the eyes of the world of being in league with favored corporations and

capitalists who seek selfishly to grasp the rich natural resources of our distant possessions in order that they may increase their already swollen and dangerous wealth and tighten their control of the comforts and living of the people The scandal of the disposition of the Friars' lands in the Philippines and the ore and mineral wealth of Alaska is a national disgrace for which the Republican administration is directly responsible. The retention by the President of his incumbent Secretary of the Interior is an affront to the honesty and moral sense of the nation.

Rhode Island—We commend the movement to conserve the public domain for the benefit of all the people but cannot put trust in the sincerity of an administration which leaves the control of this movement in the hands of the present Secretary of the Interior.

Wisconsin—The Democratic party favors the conservation of all the natural resources of the State for the benefit of the many instead of the few. We believe that the resources of the State are the heritage of all and should be conserved for the benefit of all

Wyoming—We favor the conservation of all our natural resources for the benefit of all the people. but hold that the State authorities instead of the national Government should have charge of these interests.

REPUBLICAN CONVENTIONS.

California—We indorse and heartily approve the admirable policies of national conservation initiated by President Roosevelt and organized by Gifford Pinchot We recommend the enactment by the Legislature of laws which, without conflicting with national conservation. shall apply similar standards to the conservation of such natural resources as come under the jurisdiction of the State.

Idaho—We earnestly favor such a policy of conservation as will safeguard and protect our natural resources from waste, extravagance and monopoly Conservation does not mean non-use or non-development. It does not mean the tying up of the natural resources of our State It means the utilization of those resources under such regulation and control as will prevent waste. extravagance and monopoly and at the same time not merely permit but encourage such use and development as will serve the uses of the people generally. We believe that the national Government and the State Government should co-operate in the carrying on of this important work, and that such rights and powers as belong to the national Government should be by it exercised and that such rights and powers as belong to the State Government should be maintained, preserved and exercised by it. In other words, that we should accept the plain terms of the Constitution as our guide and proceed in good faith to protect, preserve and dedicate these natural resources to the use of the people.

Illinois—We commend President Taft for the steps he has taken to advance the cause of conservation and to conserve for the public benefit our great wealth of natural resources. We favor the conservation and development of the natural resources of the State and nation.

Indiana—We demand comprehensive laws for the conservation of our natural resources.and especially that the coal deposits of Alaska shall be kept the property of the nation, to be developed only under lease and payment of just royalties to the Government.

Kansas—We pledge our Kansas Republican Congressmen and Senators to vote on all measures concerning the conservation of our natural resources along the lines advocated by former President Roosevelt as opposed to the lines laid down by those who are hiding behind outworn doctrine of State's rights, and we demand that every possible effort be made to prevent private interests from obtaining unrestricted ownership or unchecked control over the vast mineral and water and timber resources

Massachusetts—The conservation of natural resources is a policy originated by the Republican party, which receives our unqualified approval We commend our Senators and Congressmen for their support of the bill for national forest reserves in the Appalachian Mountains. The author and untiring champion of this measure of benefit alike to South and North is a Massachusetts Republican Congressman, John W. Weeks.

Minnesota—We are unqualifiedly in favor of the conservation of our national and State resources along the line suggested by Theodore Roosevelt and begun by him during his administration. We especially commend the efforts of the national administration and of the officials of our own State furthering this movement.

Missouri—We favor that policy of conservation of our public domain and natural resources as established by President Roosevelt and continued by President Taft, including the improvement of our great inland waterways for the purposes of navigation and also for the purpose of reclaiming the swamped and flooded lands which are now impaired for the purpose of cultivation.

New Hampshire—We demand the effective conservation of the natural resources of the nation, and favor the retention of title to water power sites and coal and timber lands now owned by the Federal Government, allowing their use under such form of lease as shall protect the interests of the public in the same and prevent monopoly We urge that the bill for the creation of forest reserves in the Appalachian system shall be passed in order that the forests and water powers of this State shall be preserved for the benefit not only of New Hampshire but also of the nation.

New Jersey—We approve the policy of conservation announced by the President. and, we believe, in so far as it is possible, the principles which govern that policy for the administration of the nation should apply to the State.

New York—In the interests of the growth and prosperity of the State we favor the conservation, development and utilization of all our natural resources, under conditions, however, which will protect and safeguard the rights of the State We favor such regulation of our rivers by storage reservoirs, or otherwise, as will multiply and equalize the hydraulic power, give relief to thousands of wage earners who are now regularly deprived of work during the Summer months, prevent needless loss of profits to manufacturing and mercantile communities, stimulate the upbuilding of our industries, eliminate the annual destruction of property by floods and improve unsanitary conditions, and we pledge ourselves to the prompt adoption of such constitutional and statutory enactments as will accomplish these ends.

North Carolina—We commend also the vigorous measures already taken to conserve our national resources for all the people

Ohio—We indorse the principle of conservation of our natural resources and cordially indorse the action of the present Congress in enacting and of President Taft in approving legislation along this line We refer particularly, first, to the act of Congress conferring upon the President express power to withdraw public lands from entry and settlement whenever the public welfare demands; and, second, to the act separating the surface from the coal and authorizing agricultural homestead entries on lands heretofore withdrawn from entry or settlement under coal land classification Under this act millions of acres of the public domain can be entered by homesteaders and limited patent to the surface granted, reserving the title to the coal in the Federal Government for future disposition in accordance with law.

Utah—We unqualifiedly indorse the conservation policy commenced by the Republican party.

We believe the great mineral, water and forestry interests should be preserved and utilized for the benefit of the whole people.

Washington—We believe in a sane and sensible policy of conservation of natural resources therefore utilization without waste should be the governing principle. Monopoly of water power should be instantly suppressed, but the progress of our people should not be dwarfed by unreasonable and unjust withdrawals from public entry of the Government domain. Common sense and progress should prevail over sentiment and hysteria. We believe that the interests of those States most affected should be first consulted, therefore the interests of public land States whose development and progress are deeply concerned should prevail over the sentimentalists and alarmists of the East, who have appointed themselves the conservators and guardians of the West. A wise and beneficent progress is better than a blind and unreasoning conservation. We call attention to the fact that nearly a third of the landed area of this State is now in forest and Indian reserves, national parks and other unsurveyed and unoccupied lands withdrawn from entry. We believe that lands most suitable for agricultural purposes in the forest reserves should be restored to entry, that homes may be established and civilization extended wherever possible and that the development of our mineral resources should be encouraged. We commend the selection by President Taft, as a member of his Cabinet, of that distinguished citizen of this State, the Hon. Richard Ballinger, in whose judgment, wisdom and integrity and patriotism we have unbounded confidence.

Wisconsin—The conservation of the natural resources of soil, forest, mine and water power and the settlement of the uncultivated lands suitable for agriculture are the foundation of the prosperity of the State. We pledge legislation that shall encourage the earliest and highest development of these resources, while retaining all the rights of the people in them. A general law should be passed, outlining a comprehensive plan for the development and operation of water power plants and providing proper restrictions under which water power franchises may be obtained, to the end that all persons holding water power rights may be made subject to the same general law. Private monopoly should be controlled by the leasing of water power on limited permits subject to regulation, valuation and reasonable compensation. Prompt action should be taken to complete our forest reserves as soon as practicable and to preserve our forests from destruction by fire.

THE INCOME TAX AMENDMENT.

DEMOCRATIC CONVENTIONS.

Connecticut—We favor the ratification of the income tax amendment to the Constitution.

Georgia—We commend the action of the last legislature in approving the proposed amendment to the Constitution of the United States authorizing the imposition of an income tax.

Idaho—We favor the ratification by the State Legislature of the proposed amendment to the Constitution of the United States providing for an income tax.

Illinois—We favor an income tax law to the end that the rich shall be required to bear their just share of the expenses of government. The burden of taxation should in justice be laid upon the ability of the individual to pay.

Indiana—We most heartily favor the ratification of the proposed amendment to the Constitution of the United States authorizing Congress to levy an income tax.

Iowa—We favor an income tax and we most heartily favor the ratification of the proposed amendment to the Constitution of the United States authorizing the levy of such tax.

Kansas—We favor an income tax law by means of which the vastly rich shall be required to bear their just share of the expenses of government.

Maine—We indorse the proposed amendment to the Constitution of the United States relative to the taxation of incomes.

Michigan—We congratulate the country upon the acceptance of the Democratic doctrine of income taxation as evidenced by the pending constitutional amendment.

Minnesota—We favor a Federal income tax law.

New Hampshire—We demand the adoption of the Federal income tax amendment.

New York—We favor an amendment to the Federal Constitution to permit the imposition by Congress of an income tax, a tax which falls most evenly upon the people in proportion to their ability to share in the expense of government.

Ohio—We favor the ratification of the income tax amendment of the Federal Constitution, which was stifled by the present Republican Legislature.

Oklahoma—We favor an income and an inheritance tax.

Pennsylvania—Believing that all should pay proportionately for the protection and benefit of a popular government, we favor an income tax as a part of our revenue system and declare for a proposed constitutional amendment authorizing Congress to levy and collect a tax upon individual and corporate incomes, limited to certain amounts, to the end that wealth may bear its due share of the burdens of the government.

Rhode Island—We favor an amendment to the Constitution providing for an income tax, and we condemn the cowardly attitude of the Republican legislators of this State upon the income tax question.

Tennessee—We favor the proposed Federal income tax amendment.

Utah—We favor an income tax as being a just means of equitably distributing the burden of maintaining the Government, applicable alike to individuals and corporations.

Vermont—We demand the passage by the coming Legislature of Vermont of the proposed amendment to the United States Constitution giving Congress the power to levy an income tax.

Wisconsin—We favor the ratification of the proposed amendment to the United States Constitution, authorizing Congress to levy and collect a graduated income tax.

REPUBLICAN CONVENTIONS.

California—We recommend our Representatives in the Legislature to work and vote for the amendment to the Constitution of the United States, recently submitted to the various legislatures by Congress, permitting an income tax to be levied.

Colorado—We highly indorse this amendment, and promise its ratification in case the Republicans shall control the next legislature of this State.

Idaho—The Republican party believes that the United States should have the unquestioned power to levy and collect a tax upon incomes, and it therefore urges the next Legislature of the State of Idaho to ratify the amendment to the Constitution now proposed upon that subject.

Indiana—In time of war, or any other emergency, when ordinary forms of taxation are not enough

for the needs of the Government, the nation should have the constitutional power to tax incomes We heartily favor an amendment to the Constitution giving Congress this power

Kansas—We pledge all Republicans in the Kansas Legislature to vote for the ratification of the amendment to the United States Constitution providing for a Federal tax on incomes

Maine—We favor the ratification by the next Legislature of the amendment to the Federal Constitution as proposed by Congress, relative to an income tax.

Michigan—We congratulate the President and Congress on the passage of an income tax amendment to the Constitution.

Ohio—We favor the ratification of the income tax amendment to the Federal Constitution.

Utah—We favor the ratification by the coming legislature of the proposed income tax amendment to the Federal Constitution.

Wisconsin—We favor the immediate passage of a graduated income tax law, with reasonable exemptions, and the ratification of the proposed amendment to the Federal Constitution permitting a national income tax.

PENSIONS.

DEMOCRATIC CONVENTIONS.

Indiana—We favor the immediate enactment of a pension law, by Congress, providing for a pension of not less than one dollar a day for all Union veterans of the civil war.

Ohio—We favor the immediate enactment of the dollar a day pension bill introduced and championed in both the Sixtieth and Sixty-first Congresses by that Democratic veteran, Gen. Isaac R Sherwood, of Ohio, and we condemn the arbitrary action of the Speaker of the House and the administration in refusing to allow this beneficent and patriotic measure to come to a vote in the House of Representatives.

Wisconsin—We favor the immediate enactment of the one dollar a day pens on bill introduced at and championed in both the Sixtieth and Sixty-first Congress by that Democratic veteran, Gen Issac R. Sherwood, of Ohio, and we condemn the arbitrary action of the Speaker of the House and the administration in refusing to allow this beneficent and patriotic measure to come to a vote in the House of Representatives.

REPUBLICAN CONVENTIONS.

Illinois—The Republican party always has stood for liberal pensions to the soldiers and sailors of the nation We therefore recommend a prompt amendment to the age service pension law for soldiers and sailors by the enactment of the bill which, among other things, provides that at the age of 62 the rate shall be $15 a month, at the age of 65, $20 a month, at the age of 70, $30 a month, and at the age of 75 over $40 a month

Kentucky—We favor the enactment of additional legislation providing pensions for the soldiers and sailors of the republic.

Ohio—The survivors of the civil war, whose ranks are rapidly thinning, deserve the nation's gratitude and support in their declining years. We favor further generous pension legislation and liberal administration of all pension laws The Republican party has enacted all general pension legislation on the statute books and will not fail in continued recognition of the services rendered by these brave men who saved the Union: and we denounce the insincere declaration of the Ohio Democracy in its platform in favor of a certain dollar-a-day pension bill, alleged to have been introduced in the Sixtieth Congress by an Ohio Democratic member, whereas no such dollar-a-day bill was introduced by him.

Pennsylvania—Recognizing our deep and lasting obligation to the soldiers and sailors of our several wars, we most heartily urge our Senators and Representatives in Congress to support all pension measures necessary to secure them from want in their declining years and increasing infirmities.

Tennessee—We declare in favor of continuing liberal appropriations for Federal soldiers by the Federal Government; and to the Confederate soldiers by the State.

Utah—We approve the pension policy of our Government. The men who risked their lives to save the nation are entitled to and should receive in bounteous measure the substantial evidence of the nation's gratitude. We call attention to the splendid and patriotic work of our congressional delegation, in securing pensions for many of our veterans, and an increase for others.

LABOR.

DEMOCRATIC CONVENTIONS.

Illinois—The Democratic party, always the stanch friend of the laboring man, favors the passage of all proper legislation conducive to his prosperity, his happiness, and his safety. We favor the passage by Congress and the General Assembly of this State of adequate and just workingmen's compensation acts. We favor a Federal and State Employers' Liability act, as well as safety appliance legislation calculated to protect the lives and persons of those who toil. We believe the laboring men have a legal and a moral right to form trades unions for the purpose of peaceably assuring concerted action in behalf of those things to which they are entitled and which without organization individuals cannot obtain. We therefore, favor an amendment to the Sherman Anti-Trust law, providing that labor organizations and trades unions shall not come within the provisions of that law. We advocate and defend the right of workers in every branch of activity to organize for the purpose of securing shorter hours of labor and increased wages, and we favor such State and Federal legislation as will enable them to secure complete industrial and economic reform.

Kansas—The settlement of labor disputes concerns the general public together with the employer and the employed. The State should intervene either through receiverships or compulsory arbitration to compel the operation of the industry affected until a settlement is obtained

Massachusetts—We are in sympathy with all practicable measures for improving the conditions of labor. We demand in the interest of both employer and employé, an effective workingmen's compensation act. We demand a reform of injunction abuses, including provisions for trial by jury in cases of indirect contempt We demand shorter working hours for women and children, and the enactment of the eight-hour bill twice vetoed by Governor Draper.

Minnesota—We pledge the working classes of Minnesota that if the Democratic party is placed in control of the government of this State we will correct the defects of existing laws which do not now adequately protect their health, their limbs and their lives. We will strengthen the child labor law so that it can be more easily enforced and we will enact such laws as will better protect all men and women wage-earners in following their daily tasks.

New York—We favor the enactment of laws establishing the right of laboring men in case of injury

to indemnity out of the fruits of their own industry and the enlargement and more efficient enforcement of legal restrictions upon child labor.

Utah—We favor exclusion of all "coolie" labor from competition with American labor.

REPUBLICAN CONVENTIONS.

California—In the contest between the wage-worker and the capitalist we stand for the square deal for both and favor legislation by State and nation which will improve the conditions of labor and best conserve the source of all wealth—human life. We recognize that the wage-earner has the same right to organize for the improvement of the conditions under which he labors that the capitalists has to use his capital in corporate enterprises. Both forms of organization should be given equal opportunity before the law to carry out their legitimate aims.

Minnesota—The birth cause of Republicanism was the principle that all men were equal before the law. The Republican party of Minnesota, recognizing that the fundamental unit of nationality is the "man and not the dollar," has specially provided, cared for and protected the rights of workingmen and workingwomen, as reference to the laws enacted by Republican legislators fully testify, and the best thought and ability of the Republican party is pledged to the continuance of such policy. In pursuance thereof we recommend that the legislature enact suitable laws providing for the further protection of laboring men and women injured in industrial pursuits, in accordance with such recommendations as may be made by the commission appointed to investigate and report thereon pursuant to the legislation enacted at the last session of the legislature.

Wisconsin—Excessive hours of labor of children and women are a menace to the health, intelligence and industry of the State; adults working under wholesome conditions and excessive hours require the protection of the law; public employment should be made model employment; we favor such law and factory legislation, such thorough factory inspection, such provision for the health of workers, such enforcement of the truancy laws and such investigation of tenement house conditions as shall place Wisconsin on a level with the most progressive States or nations.

Wyoming—The Republican party has ever been the friend of labor and the champion of the workingman. It has legislated to reduce hours of labor, to prohibit child labor, to protect the lives, limbs and health of the workers, and under its administration labor has been continuously employed and better paid than at any other time or place in history. The party will continue to guard the interests of those who toil, and in recognition of the dignity of labor we recommend that Labor Day be made a legal holiday in this State, the abolition of the contract leasing system in our State prison, the enactment of a law that eight hours shall constitute a day's work on all State or county work, and the enactment of a law giving the wages or workers the same liens on property as the mechanic.

ELECTION OF SENATORS BY THE PEOPLE.

DEMOCRATIC CONVENTIONS.

Connecticut—We declare for the popular election of United States Senators.

Idaho—We favor the election of United States Senators by the direct vote of the people, and until such amendment to the Constitution of the United States be adopted we favor an amendment to the election laws of the State so as to provide for the nomination of United States Senators by the people and pledging legislative candidates to vote for the candidate for United States Senator who receives the highest number of votes at such election, regardless of party.

Indiana—We favor an amendment to the Constitution of the United States providing for the election of United States Senators by a direct vote of the people.

Iowa—We favor an amendment to the Constitution of the United States providing for the election of United States Senators by a direct vote of the people.

Maine—We demand the election of United States Senators by the people.

Massachusetts—Again we demand the nomination of United States Senators by the people and their direct election as soon as it can be secured by constitutional amendment.

Minnesota—We favor the direct election of United States Senators by the people.

New Hampshire—We demand the election of United States Senators by the people.

New Jersey—We insist * * * that our citizens should be given an opportunity forthwith to pass upon a constitutional amendment providing for the election of United States Senators by popular vote.

New York—We favor the popular election of United States Senators.

Ohio—We demand an election of the United States Senators by direct vote of the people. To that end we pledge a Democratic Legislature to take the necessary action looking to a convention of the States to adopt the constitutional amendment required.

Oklahoma—We favor the election of United States Senators by the direct vote of the people.

Rhode Island—We favor and pledge our candidates for Congress to support an amendment to the Constitution providing for the election of United States Senators by direct vote of the people.

South Dakota—We favor the election of the United States Senators by direct vote of the people.

Vermont—We demand the election of United States Senators and President by a direct vote of the people.

Wisconsin—We favor the amendment of the Constitution of the United States in such manner as to permit of the election of United States Senators by the direct vote of the people.

REPUBLICAN CONVENTIONS.

California—We recommend the enactment by the next legislature and transmission to Congress of an act or joint resolution favoring an amendment to the Constitution of the United States providing for the election of the United States Senators by direct vote of the people, and pending the adoption of this Federal amendment such a revision of the primary law of the State as shall afford a State-at-large advisory vote as to the election of United States Senator.

Idaho—The Republican party of Idaho reiterates its demands for the election of United States Senators by direct vote.

Illinois—We favor an amendment to the Federal Constitution to enable electors to vote directly for United States Senators and request our representatives in Congress to do all within their power to bring about such constitutional amendment.

Indiana—We demand that United States Senators shall be elected by the direct vote of the people.

Kansas—We hereby bind our Kansas Republican members of Congress in both houses to make every effort to secure the submission to the people of a constitutional amendment that will provide for the direct election of United States Senators by the people.

Michigan—We declare in favor of the election of United States Senators by direct vote of the people.

Wisconsin—Election of United States Senators by direct vote has long been demanded by an overwhelming majority of the people. The House of Representatives has five times, the last time by unanimous vote, adopted and transmitted to the Senate a resolution proposing a constitutional amendment to that end. The Senate has refused to permit a vote upon these resolutions. We favor the election of Senators by direct vote and urge that Congress take immediate action accordingly.

SHIP SUBSIDIES.

DEMOCRATIC CONVENTIONS.

Delaware—We favor the upbuilding of a merchant marine without new or additional burdens upon the people and without bounties from the public treasury, and we denounce the efforts of the Republican party to pass the proposed Ship Subsidy bill, which is an iniquitous attempt to appropriate the public funds for private purposes, and a wasteful, illogical and useless attempt to overcome by subsidy the obstructions already raised by the Republican Legislation to the growth and development of American commerce on the sea.

Indiana—We are opposed to all subsidies by the Government, and we especially condemn the present Ship Subsidy bill.

Missouri—We believe in the upbuilding of the American merchant marine without new or additional burdens upon the people and without bounties from the public treasury.

Nebraska—We congratulate the country that Democratic opposition has thus far succeeded in defeating the iniquitous Ship Subsidy bill.

Oklahoma—We oppose a Ship Subsidy and a central bank.

Wisconsin—We are opposed to all subsidies by the Government, and we especially condemn the Ship Subsidy bill pending before Congress.

REPUBLICAN CONVENTIONS.

Ohio—We favor legislation which will revive our merchant marine.

Wisconsin—We are unequivocally opposed to the granting of shipping subsidies by the Federal Government in the form of ocean mail subvention or otherwise. We hold that an American merchant marine cannot be upbuilt by appropriations from the tax-contributed treasury of the people for the enrichment of a special interest.

THE INITIATIVE AND REFERENDUM.

DEMOCRATIC CONVENTIONS.

Massachusetts—Without abandoning our representative Government, we advocate the use of the Initiative and the Referendum as a check upon machine domination.

Minnesota—We hold that all questions affecting the moral, political and economic welfare of the people should be directly subject to the conscience and will of the people. To this end we demand of the incoming State legislature, regardless of the political affiliations of its members, that it submit to the voters of this State at the next general election a constitutional amendment providing for the initiative, the referendum and the recall.

Nebraska—We favor an amendment to our Constitution providing for the initiative and referendum.

Utah—We declare in favor of necessary legislation to carry into effect provisions of State Constitution providing for initiative and referendum and the right of recall of any unfaithful or incompetent public servant, particularly in case of municipal officers.

Wisconsin—We favor the submission to the voters of an amendment to the Constitution providing for the initiative, the referendum and the recall.

Wyoming—We favor the initiative and referendum and recall.

REPUBLICAN CONVENTIONS.

Illinois—We favor an amendment to the Constitution providing for the initiative and referendum.

PRIMARY ELECTION LAWS.

DEMOCRATIC CONVENTIONS.

Connecticut—The Connecticut Democracy favors the direct primary form of nominations in order that the people may select their own servants.

Idaho—We reaffirm our unfaltering allegiance to the principles of the direct primary and we demand such amendments to the existing law as recent experience has demonstrated are necessary to make it simple and effective.

Iowa—We believe in such amendment of the Primary law as will reduce enormous expense thereof and as will more effectually enable the people to actually control a nomination of their candidates for office.

Massachusetts—We advocate direct primaries and caucus reform. We favor the reform of the convention system wherever direct nominations can be obtained.

Michigan—We pledge the Democratic party to the perfection of the Primary Nominating law and the amendment of our election laws, so as to require the publication before the primary and also immediately preceding the election of all campaigns, contributions and expenditures from whatever source derived.

New York—We declare in favor of State-wide direct primaries to insure to the people the right to choose members of political committees and nominate candidates for public office.

Rhode Island—We favor a direct primary law.

South Dakota—We favor a primary election law, but the present primary law was evidently drawn by the Republican party bosses in control of our legislature for the purpose of perpetuating party government. We pledge the Democratic government to the enactment of amendments to said law, which will make it understood and leave the voter untrammeled in the selection of his choice for the candidates for office.

REPUBLICAN CONVENTIONS.

California—The system of direct primary nominations has justified itself by results. It has eliminated log-rolling and trading, the stock resources of the political boss, and has substituted the directly expressed will of the party members.

Idaho—We compliment the citizens of Idaho upon the passage by a Republican Legislature of our

present Direct Primary law and while favoring changes in the same that recent election suggests, we affirm our allegiance to the principle of nomination of candidates by direct vote of the people.

Illinois—We favor a direct primary law and such amendment of the present law as experience may show to be necessary.

Minnesota—It has become notorious that the great expense attendant upon primary elections practically precludes men of moderate means from becoming candidates for important offices, and it has become a common thing for voters to vote for and help to secure the nomination of men of opposite political faith for whom they do not intend to vote at the election, and we declare that legislation is imperatively needed that will reduce the expense of conducting a primary campaign and to prevent voters from aiding in the nomination of candidates that they are seeking to defeat.

New Hampshire—The Direct Primary law has proved an unqualified success. The choice of delegates to national conventions should be brought under its provisions.

New Jersey—We favor such amendments in election and primary laws as will make the decision of the people at the elections and primaries easy of expression and sure of execution, and we favor the election of all delegates to conventions under the primary laws of the State.

New York—We believe that the same safeguards should surround primary elections as have been shown to be effective in preventing repeating and frauds at general elections. We therefore favor extending the signature law, as now applied to general elections, to primary elections. We demand the most rigid economy in every department of the State, always with due heed to the growing needs of a great commonwealth.

Utah—We declare in favor of the enactment of direct primary law by which all general officers including candidates for the United States Senate, may be chosen by vote of the whole people.

Wisconsin—We favor amendments to the primary election law which will simplify and make it as nearly as may be expressive of the free choice of the people.

Wyoming—We favor the enactment of a direct primary law and recommend the Oregon method of selecting United States Senators.

EMPLOYERS' LIABILITY AND WORKMEN'S COMPENSATION.

DEMOCRATIC CONVENTIONS.

Connecticut—The Connecticut Democracy favors the enactment of a workmen's compensation law for injuries.

Delaware—We favor the enactment of a fair employers' liability act for the protection of the workingman of this State, so that in case of injury or death in the course of his employment, the whole loss shall not fall upon him or those dependent upon him

Michigan—The Democratic party, recognizing the vast changes in the industrial world, pledges itself to a careful investigation and an honest effort to bring about a correct and just solution of the problem arising out of the law of "fellow servant" "assumed risk and contributory negligence," in cases of personal injury to the employed, so that the worker and the employer shall both have exact justice done to them.

Minnesota—We stand committed to the enactment of a workingmen's compensation act that will justly and fairly compensate without delay every person injured in industry, irrespective of whether he assumed the risk, contributed to negligence, or suffered injury through the act of a fellow servant. It was the administration of the late Governor Johnson which inaugurated the movement of this kind of legislation, and we pledge our party to bring it to a successful termination, assuring both capital and labor of our desire to do each exact justice.

Missouri—We favor the enactment by the next legislature of a law that will provide an absolute and definite liability for injuries and deaths of employés in the dangerous occupations, to be secured and paid through insurance.

New Jersey—We favor * * * the enactment of an employers' liability act which will satisfy the just demands of labor and secure safety and efficient sanitation in all manufacturing processes and employments.

Oklahoma—We favor the extension of the adoption of the fellow servant rule to all others engaged in hazardous and dangerous pursuits besides those already exempt from that rule in this State.

REPUBLICAN CONVENTIONS.

California—We demand an employers' liability act which shall put upon the industry the charges of its risks to human life and limb along the lines recommended by Theodore Roosevelt.

Illinois—We favor an employers' liability act and supplemental thereto a workmen's compensation act which in the event of accidental death or maiming of those employed by public service companies and industrial establishments shall, without expense to the public, secure to the victims or their dependent families a certain sum graduated in amount to the injury received, irrespective of the negligence of either party.

Kansas—We pledge the Republican members in the Kansas Legislature to vote and work for a measure creating a commission under the authority of the next Kansas Legislature which shall make inquiry into the practicability of a workingman's compensation law framed to meet labor conditions in Kansas

Massachusetts—We commend the action of the legislature in passing the resolution declaring that the public good requires a change in the present system of determining the compensation of employés for injuries sustained in industrial accidents, and that the commonwealth ought to provide different and more suitable relief, and in providing for the drafting of a law after a thorough investigation.

Missouri—We favor the enactment of a law changing the present rule establishing the liability of employers to employés injured in hazardous occupations, and the enactment of laws providing for the compensation of workmen injured in industrial pursuits. We approve the appointment of a commission for the investigation of this question and the submission of a bill to the next legislature.

New Jersey—We believe in the principle that an industry ought to bear the cost of personal injuries sustained in the business, and we pledge ourselves to the enactment of a statute in pursuance of these principles.

Ohio—We commend the action of Congress in the creation of a commission to investigate the question of employers' liability laws and workmen's compensation acts and to make recommendations to the President and to the Congress. We believe that industrial accidents to workmen should be treated as inevitable incidents to industrial operations and the compensation therefor as a part of the cost of production. The experience of other countries demonstrates that this principle can be applied to our industrial conditions without increasing the burdens of industry.

Tennessee—When the fellow-servants' doctrine was originally adopted by the courts fellow-employés labored side by side, and each had the opportunity of observing the work of his colaborer and of protecting himself against his negligence. In view of the development of the various industries and of transportation facilities and the complicated methods and mechanisms by which they are now prosecuted, we believe this doctrine, under many circumstances, deprives the employé of that protection

to which he is justly entitled, and we therefore recommend such a modification thereof by legislation as will meet the changed conditions under which the laborer toils.

Washington—We favor the passage of an employers' limited liability law which shall lay the burden of accidents accruing in industrial pursuits on such industries and not upon the shoulders of the helpless victims of such accidents.

Wisconsin—Losses occasioned by bodily injuries in industrial accidents should be borne by the industry in the first instance rather than by the disabled wage-earner or his dependents. We pledge immediate enactment of employers' liability laws, so framed as to meet the requirements of present conditions, and to the immediate creation of a system of workingmen's compensation. We favor a thorough investigation of the subject of occupational diseases with a view to the early enactment of suitable legislation.

MISCELLANEOUS.

DEMOCRATIC CONVENTIONS.

Delaware—The States, one and all—the smallest as well as the greatest—stand on the firm ground of their equal sovereignty as all being charter members of the great corporation of American liberty. It is with patriotic pride that we contemplate this inestimable birthright of the States and of the people to the continuance and protection of which our Federal Government is pledged by the organic law of its existence, and we declare ourselves to be unalterably opposed to any encroachment upon the rights inherent in our State, either by executive legislation or judicial action.

Georgia—This is the white man's country and should be a white man's government, participated in only by those races or representatives of races qualified for self-government. We strongly commend the administration, and the Legislature of 1907-8 for their best work in perpetuating Democratic government by submitting to the people a constitutional amendment disfranchising the ignorant and purchasable negro vote, and we rejoice that the people with practical unanimity ratified this amendment and made it part of our fundamental law. Under this wise constitutional enactment, for the first time in more than a generation, Georgia and every political division of the State is freed from the danger of domination by the ignorant and corruptible negro vote and who is incapable of self-government and unfit to participate in the government of white men.

Illinois—This nation can not be made truly great and influential by means of a great standing army and a big navy. For a big nation to play the bully with a weak nation is not greatness. This nation can be made truly great only by doing the acts of justice, only by being just and considerate to its national neighbors throughout the world.

Indiana—We are opposed to the indiscriminate use of the power of injunction by the courts without notice to the defendants and without a hearing, and we demand that the right of trial by jury in proceedings arising out of indirect contempt of such injunctions shall not be denied to a defendant in such cases.

Iowa—We are opposed to any legislation under which there may be established a central bank, and we condemn the Republican party for permitting in the establishment of the postal savings banks the funds to be withdrawn from the local community and sent to the large financial institutions of the East, and we recommend such legislation as shall prevent this discrimination against the people of the great West.

Kansas—We denounce the present so-called Postal Savings Bank law, enacted at the behest of President Taft, as a short cut for the savings of the Kansas people into banks of Wall Street, and demand its repeal and the enactment of a true Postal Savings law in the interests of the whole people—a law that will leave deposits in the community where savings are deposited.

Missouri—The constitutional provision that a navy shall be provided and maintained means an adequate navy, and we believe that the interests of this country would be best served by having a navy sufficient to defend the coasts of this country and protect American citizens wherever their rights may be in jeopardy.

New York—We again declare that all powers not specifically granted to the Federal Government belong to and of right must be exercised by the States in their sovereign capacity, and we reassert that the most efficient results in government are attained by the complete exercise by the States of these reserved sovereign powers. We are unalterably opposed to any usurpation by the Federal Government of the rights of the States.

Lastly, we solemnly declare our inflexible opposition to the so-called "new nationalism." Its inventor put this forward as if it were progressive, while in reality it is sheer reaction to tyrannical methods long ago shaken off by the free peoples of the world, oftentimes at cruel cost in treasure and blood. The settlers of our country fled from Europe to escape it. Whatever advance its adoption would bring is advance toward socialism. They would have to abandon freedom. They would reduce the States to prefectures governed from Washington. They would clothe the President with power to declare what is lawful—a power usurped by one President in the case of a giant corporation absorbing a competitor. Such a "new nationalism" would lay the meddling hand of a bureaucracy upon every industry, increasing the burdens of taxation, making the struggle for life still harder, and compelling every American workman to carry on his back a Federal inspector. Against all this exaltation of Federal centralization power to the destruction of home rule, against this despair of representative government, against this contemptuous impatience of the restraints of the law and of the decisions of the courts—we contend, in supreme confidence, that the people of this State and of this nation will not forget the noble heritage of their past, but upon that foundation will build the still nobler progress of their future.

We are opposed to unjust and oppressive sumptuary legislation which interferes with the personal rights of the citizen.

We recommend the extension and development of the parcels post so as to increase the weight and size of parcels which may be carried by United States mail.

Vermont—We condemn the present Federal Corporation Tax law and recommend its repeal.

Wisconsin—We denounce the Postal Savings Bank law passed by the Republican party, which forces the savings of the people from the localities where such moneys are needed for business purposes to the money centres of Wall Street, and specifically reaffirm the declaration contained in the last national Democratic platform in favor of guaranteed bank deposits and postal savings banks.

REPUBLICAN CONVENTIONS.

Arkansas—We most cordially welcome the return of Col. Theodore Roosevelt to his native land, which of itself is an inspiration for greater activity and enthusiastic co-operation with him in his wise and strenuous efforts in support of the present administration, which is so courageously carrying into effective legislation the policies which he so ably advocated for the universal uplift of the American people.

California—We declare our faith in the unswerving opposition of the people of California to the further admission of Oriental laborers, and we urge on Congress and the President the adoption of all necessary measures to guard against this evil.

We favor the submission to the judgment of the voters of California of a constitutional amendment providing for woman suffrage.

We favor the better definition and limitation of the rights of the courts in the issuance of injunctions in labor disputes, along the lines recommended by President Taft to the last national Republican convention.

Indiana—We favor such limitation of the powers of injunction as will not imperil the liberty of any man without notice and hearing.

Kansas—We send our greetings to Theodore Roosevelt, the new world's champion of the rights of man in the world-old contest between rising humanity and the encroachments of special privilege. And as Republicans we stand ready to enlist under his banner in the right for human rights.

Kentucky—We favor the continued enlargement and improvement of the navy as the surest method of preserving peace, until arbitration for national disputes has been adopted and accepted by the powerful nations of the world and universal disarmament is made possible.

Ohio—We favor a navy ample enough to protect all our interests home and abroad. We demand equal justice for all men without regard to race or color. We declare once more and without reservation for the enforcement in letter and spirit of the thirteenth, fourteenth and fifteenth amendments to the Constitution, which were designed for the protection and advancement of the negro, and we condemn all devices which have for their real aim his disfranchisement, and that for reason of color alone, as unfair, un-American and repugnant to the supreme law of the land.

Wisconsin—The high cost of living in cities compared with the prices received by farmers for their products requires our immediate attention; we denounce the suppression by special interests in Congress of the investigations of the country life commission, and we favor a thorough investigation of the conditions of country and city life, as an aid in bringing the wage-earner and farmer closer together, eliminating the wastes of distribution, promoting co-operative selling, buying, storage and warehousing, co-operative credit and knowledge of co-operative methods, collective bargaining and arbitration between employers and employés, and the encouragement of the ownership of homes by wage-earners and farmers.

The Missouri Democrats nominated Joseph W. Folk and the Texas Democrats Joseph W. Bailey for President in their respective State platforms.

NATIONAL PLATFORM OF THE SOCIALIST LABOR PARTY, ADOPTED AT NEW YORK, JULY, 1908.

The Socialist Labor party of America, in convention assembled, reasserts the inalienable right of man to life, liberty, and the pursuit of happiness.

We hold that the purpose of government is to secure to every citizen the enjoyment of this right; but, taught by experience, we hold furthermore that such right is illusory to the majority of the people, to wit, the working class, under the present system of economic inequality that is essentially destructive of their life, their liberty, and their happiness.

We hold that the true theory of politics is that the machinery of government must be controlled by the whole people; but again, taught by experience, we hold, furthermore, that the true theory of economics is that the means of production must likewise be owned, operated and controlled by the people in common. Man cannot exercise his right of life, liberty and the pursuit of happiness without the ownership of the land on and the tools with which to work. Deprived of these, his life, his liberty, and his fate fall into the hands of the class that owns those essentials for work and production.

We hold that the existing contradiction between the theory of Democratic government and the fact of a despotic economic system—the private ownership of the natural and social opportunities—divides the people into two classes—the capitalist class and the working class; throws society into the convulsions of the class struggle, and perverts government to the exclusive benefit of the capitalist class.

Thus labor is robbed of the wealth which it alone produces, is denied the means of self-employment, and, by compulsory idleness in wage slavery, is even deprived of the necessaries of life.

Against such a system the Socialist Labor party raises the banner of revolt, and demands the unconditional surrender of the capitalist class.

The time is fast coming when, in the natural course of social evolution, this system, through the destructive action of its failures and crisis on the one hand, and the constructive tendencies of its trusts and other capitalist combinations on the other hand, will have worked out its own downfall.

We, therefore, call upon the wage-workers of America to organize under the banner of the Socialist Labor party into a class-conscious body, aware of its rights, and determined to conquer them.

And we also call upon all other intelligent citizens to place themselves squarely upon the ground of working-class interests, and join us in this mighty and noble work of human emancipation, so that we may put summary end to the existing barbarous class conflict by placing the land and all the means of production, transportation and distribution into the hands of the people as a collective body, and substituting the co-operative commonwealth for the present state of planless production, industrial war and social disorder—a commonwealth in which every worker shall have the free exercise and full benefit of his faculties, multiplied by all the modern factors of civilization.

NATIONAL PLATFORM OF THE PROHIBITION PARTY ADOPTED AT COLUMBUS, OHIO, JULY 16, 1908.

The Prohibition party of the United States, assembled in convention at Columbus, Ohio, July 15-16, 1908, expressing gratitude to almighty God for the victories of our principles in the past, for encouragement at present, and for confidence in early and triumphant success in the future, makes the following declaration of principles, and pledges their enactment into law when placed in power:

1. The submission by Congress of the several States, of an amendment to the Federal Constitution prohibiting the manufacture, sale, importation, exportation, or transportation of alcoholic liquors for beverage purposes.
2. The immediate prohibition of the liquor traffic for beverage purposes in the District of Columbia, in the Territories and all places over which the national Government has jurisdiction; the repeal of the internal revenue tax on alcoholic liquors and the prohibition of interstate traffic therein.
3. The election of United States Senators by direct vote of the people.
4. Equitable graduated income and inheritance taxes.
5. The establishment of postal savings banks and the guaranty of deposits in banks.
6. The regulation of all corporations doing an interstate commerce business.
7. The creation of a permanent tariff commission.
8. The strict enforcement of law instead of official tolerance and practical license of the social evil which prevails in many of our cities, with its unspeakable traffic in girls.
9. Uniform marriage and divorce laws.
10. An equitable and constitutional employers' liability act.
11. Court review of Post-Office Department decisions.
12. The prohibition of child labor in mines, workshops and factories.
13. Legislation basing suffrage only upon intelligence and ability to read and write the English language.
14. The preservation of the mineral and forest resources of the country, and the improvement of the highways and waterways.

Believing in the righteousness of our cause and the final triumph of our principles, and convinced of

the unwillingness of the Republican and Democratic parties to deal with these issues, we invite to full party fellowship all citizens who are with us agreed.

PLATFORM OF THE NEW YORK SOCIALIST PARTY.

The Socialist party of the State of New York in convention assembled, reaffirms its allegiance to the principles of international Socialism and again indorses the platform of the Socialist party of the United States.

In entering upon the campaign of 1910, the Socialist party presents itself to the voters of the State of New York as the party of the workers.

The two dominant political parties pretend to stand for all the people; the so-called reform parties claim to speak for the good people; the Socialist party frankly acknowledges that it is concerned chiefly with the working people.

The State of New York is the citadel of American commerce and finance, the headquarters of the most powerful corporations and trusts, and the centre of the greatest wealth, but it is at the same time the home of the vilest slums, of most abject poverty and widespread misery.

The great fortunes of the wealthy come from the spoliation of the poor. Large profits for the manufacturers mean starvation wages for the workers; the princely revenues of the landlords are derived from excessive rents of the tenants, and the billions of watered stock and bonds crying for dividends and interest are a perpetual mortgage upon the work and lives of the people of all generations to come.

Every legislative act in favor of the wealthy is an assault upon the workers: every measure truly redounding to the benefit of the workers is an attack upon the wealthy. Every franchise, grant and privilege is a license to rob the people, while every effective law for the protection and welfare of labor places a limit upon the power of the capitalist to exploit the workers and curtails his profits.

No political party can honestly serve all the people of the State—those who prey and those who toil; those who rob and those who are robbed. The parties as well as the voters of this State must take their stand in the conflict of interests of the different classes of society—they must choose between the workers and their despoilers.

The Republican and Democratic parties alike always have been the tools of the dominating classes. They have been managed, supported and financed by the money powers of the State, and in turn they have conducted the legislatures, courts and executive offices of the State as accessories to the business interests of those classes. Under Democratic and Republican administration alike, the laws of our State have always been most generous to the possessing classes, and most backward in the field of labor legislation; the courts of our State have been most zealous in the protection of the "rights" of the wealthy and most ready to distort or nullify laws for the benefit of labor, while the executive powers of the State have regularly ranged themselves squarely on the side of the employer in all acute labor disputes.

Under alternating Republican and Democratic control, the administration of our State has been mainly characterized by servility to wealth and by graft and corruption in office.

These vices of our government are not accidental, but are deeply and firmly rooted in our industrial system. So long as we have a class of capitalists who own all social instruments of wealth and control all means of existence, and a class of wage-earners who own nothing but their right to work and live, so long will there be an irrepressible conflict of interests between these two classes. To maintain its supremacy in this conflict the dominating class must strive to control our Government and politics, and must influence and corrupt our public officials.

The two old political parties as well as the so-called reform parties of the middle classes, which spring up in New York politics from time to time, all stand for the continuance of that system, hence they are bound to perpetuate and to aggravate its inevitable evils. No individual in their councils or under their control can abolish or mitigate these evils, and the favorite slogan of "Good men in office" is only a blind on the part of the shrewd machine politicians and a sign of political immaturity on the part of the deluded voters. The pitiable failure of Governor Hughes' reform programme in this State, and the ludicrous collapse of the so-called Roosevelt policies in the national Government have once more demonstrated that the individual is powerless against the system.

The Socialist party advocates a radical change in the entire social scheme of modern society. It proclaims that the business of providing the people with the necessaries of their lives. The management of our main industries is a social function and not a subject for private enterprise. The Socialist party demands that all social instruments of production, such as land, mines, railroads, factories and modern machinery, and industries which have reached a state of monopoly, be owned by the people collectively, and used by them for the common good, thus doing away with all the evils of private ownership, monopolies, trusts, wage labor, competition, exploitation, corruption, class wars, poverty and destitution.

This is the ultimate aim of socialism. It will be realized when the workers of this State and of most other States of the Union, as the class directly and immediately interested in the change, will espouse the cause of the Socialist party and rally to its support. In the mean time the Socialist party and all its representatives who may be elected to public office in this State will support and work for every measure which will tend to better the material conditions of the workers, protect their lives and health, and increase their power as a class, as well as all measures tending to secure to the people a fuller measure of true democracy in government and justice in social relations.

The Socialist party specifically demands the enactment of the following measures:

Industrial Demands. 1—A Workmen's Compensation act which shall provide for compensation to all workers injured in the course of their employment and to the dependents of all workers killed in the course of their employment. Such compensation to be equal to the full economic loss caused by the injury, to be recoverable without delay or litigation and to be secured by the State.

2—A law for proper safeguards and sanitary regulations in all occupations with ample provisions for frequent and effective inspection of the places of employment, machinery and appliances.

3—State insurance of all workers against sickness, invalidity and old age.

4—Public industries for the unemployed.

5—The enactment of a legal maximum work day of eight hours and its gradual shortening in keeping with the increased productiveness of modern machinery, and a rest period of at least a day and a half in each week for workers in all industries.

6—Prohibition of the employment of children under the age of sixteen years.

7—Prohibition of the use of State militia, police force and court injunctions in labor disputes.

8—Statutory recognition of the unrestricted right of workers to strike and boycott and to employ all peaceable means in furtherance of such struggles. The union funds shall not be subjected to liability for damages to the employer.

Political Demands. 9—Equal suffrage for all adult men and women.

10—Equal pay for equal work to men and women employed by the State or any of its subdivisions

11—The initiative, referendum, proportional representation and right of recall.

12—Home rule for municipalities.

13—Direct election of all public magistrates by the people.

14—The extension of inheritance taxes, graduated in proportion to the amount of the bequests and to the nearness of kin.

15—A graduated income tax.

16—Election of United States Senators by popular vote.

General Demands. 17—Public ownership of all means of transportation, communication and exchange.

18—Provision for proper and sanitary housing of the people.

19—Free feeding of school children.

20—Free and speedy administration of justice.

21—Abolition of the death penalty and of every form of punishment based upon the principles of revenge and deterrence; criminals to be treated as defective or victims of environment.

22—The abrogation of the power of courts and judges to nullify laws on the ground of unconstitutionality or on any other ground.

23—The absolute freedom of press, speech and assemblage.

PLATFORM OF THE INDEPENDENCE LEAGUE.

The platform adopted by the Independence League at Cooper Union, New York, October 5, 1910, was as follows:

Our duty is, disregarding all considerations of personal preference and partisan advantage, to do for the State what we did last Fall for the city of New York, and, in the interest of honesty and public decency, deal a crushing blow to Murphy's scheme to Tammanyize New York and rule the State.

We enter the fight with enthusiasm and confidence and again submit to independent voters a plain and unequivocal statement of our political beliefs and real purposes.

First and foremost we declare for and reaffirm our belief in genuine direct nominations, State-wide in its application to every elective office, doing away completely with the party conventions.

In order that the system of direct nominations may be genuine and effective, we demand personal enrolment and registration throughout the entire State, an official primary ballot and the extension to primary elections of all the safeguards that have been effective in limiting repeating and frauds at general elections, and, in particular, the signature law as now applied to general elections.

Once more we call to the attention of the intelligent voters of the State the vital necessity of ballot reform, and pledge our support to the Massachusetts form of ballot, so that the will of the voter may be clearly expressed and easily ascertained and the ballots may be accurately counted.

We believe in the principles of the initiative and referendum, and we particularly declare that no franchise grant of importance should become effective until the terms and conditions have been approved by popular vote in the locality interested.

The power to make officials resides in the people, and in them also should reside the power to unmake and remove from office any official who demonstrates his unfitness or betrays the public trust. We therefore demand for the people, under reasonable and proper safeguards against abuse, the right to recall public officials from the public service.

We shall continue to work for the popular election of United States Senators, and, pending a constitutional amendment, we demand an instructive vote to the legislature for United States Senators.

We condemn the dishonest juggiery by which there was defeated in the legislature the amendment to the Federal Constitution permitting an income tax, and we call for a new and immediate vote in the legislature upon this necessary reform which every political party has indorsed in national and State platforms.

In this connection we call for a progressive inheritance tax, to be shared between the States and the national Government.

We express our disgust and abhorence at the revelations of the graft and dishonesty in public office and the sale of legislation by both the old party machines, and we demand criminal prosecution for these treasonable practices. The statute of limitations is the friend and protector of every political grafter, and period within which prosecutions must be taken should be materially lengthened.

We renew our demand for a revision of the antiquated and conflicting sumptuary laws; and, while we reaffirm our adherence to the principles of personal liberty, we call for a cleansing for the present vicious conditions prevailing in the city of New York and a scourging of the alliance between protected vice and Tammany Hall.

We favor the taking of vigorous steps by the State to stamp out tuberculosis by improving and extending the means for its prevention and cure.

The State should apply itself earnestly to the policy of abolishing grade crossings and, in particular, should without any further delay put an end to the death dealing occupation of the streets of New York City by the New York Central Railroad.

We call for constitutional amendments which will permit the municipal ownership and operation of all municipal utilities, leaving the question whether such ownership and operation shall or shall not be undertaken to the determination of the localities affected.

In dealing with cities and counties throughout the State, the principle of home rule should be scrupulously observed, so that all such questions as franchises, taxation, etc., peculiar to localities may be decided by the people of the localities affected.

A new charter and administrative code for the city of New York are vitally needed, and should have the early attention of the legislature.

We favor the enactment of a law making it a felony to participate in any combination or conspiracy to blacklist employés.

We pledge ourselves to support the policy of liberal appropriations for the extension of fac lities for agricultural education and for preventing the spread of diseases of animals.

The principle of conservation of public lands and water powers should be put into practical operation and there must be an end of illegal special privileges in public land.

While emphasizing the importance of a businesslike and economical administration, we believe that the State should unhesitatingly expend whatever is necessary for the complete performance of its functions, but these expenditures should be for the benefit of the people and not for the benefit of politicians.

Upon this platform, to the end that no traitorous legislator shall be re-elected who has served the bosses, protected the trusts and betrayed the people, and that no faithless Congressman who took part in the infamous Cannon compact shall be returned to Congress to make further deals with corrupt politicians in defiance of public sentiment and the public interest, and with the special object of destroying the power and corrupt rule of Boss Murphy and saving the State from being Tammanyized, we call for united and non-partisan support of all citizens who favor pure politics, good government and progressive principles.

Franchises have from time to time been granted by the legislature to the public service corporations, permitting them to occupy the public streets in the cities, towns and villages of the State. Many of these franchises have not been accepted in good faith by the grantees, and either no construction under them has been done, or after the construction has been done, no service has been rendered to the public. We pledge ourselves to introduce such legislation as may be necessary to clear from the statute books any laws which protect such corporations in their holdings of these unused franchises

We favor the submission to the voters of the State of a constitutional amendment guaranteeing suffrage to the women of New York.

NEW YORK PROHIBITION PARTY PLATFORM, ADOPTED AT STATE CONVENTION AT CORTLAND, N. Y., ON OCTOBER 5, 1910.

The Prohibition party of the State of New York, acknowledging Almighty God as the source of all power, and pledging itself to every reform well calculated to advance the prosperity and happiness of all our citizens, hereby declares in favor of the following:

1 Absolute prohibition of the manufacture and traffic in alcoholic liquors for beverage purposes; prohibition officials to enforce the law.

2. A county prohibition law enabling the citizens of each county to prohibit the liquor traffic therein during the period before complete State-wide prohibition. Election of local prohibition officials to enforce the law.

3. Initiative, referendum and right of recall.

4 Direct primary nominations under a statute which shall protect the political rights of minor parties.

5 Short ballot plan reducing the number of elective State officers, giving to the Governor power of appointment analagous to the power of the President to appoint a cabinet.

6. Direct election of United States Senators.

7. Protection of womanhood by relentless effort to suppress the so-called "White Slave Traffic."

8. Protection of the rights of wage-earners, laws insuring safe and sanitary condition where labor is employed; abolition of sweatshops and child labor; such hours as will insure to labor time for culture and recreation. Equitable employers' liability law and all just measures to safeguard the rights of both employer and employé.

9. Conservation of our material resources and protection of our waters from pollution.

10. Public control of public utilities and a proper governmental control of corporations.

11. An equitable system of taxation

12. Suffrage without limitation as to sex, but with reasonable educational qualifications.

13. Extension and enforcement of civil service laws.

14. Honest, energetic impartial enforcement of all law.

15. Uniform divorce laws.

16. The abolition of railroad grade crossings.

17. Protection by Congress of prohibition territory from interstate shipment of liquors and against the issuance of internal revenue tax receipts by the Government for sale of liquors in such territory.

18. A permanent non-partisan tariff comm'ssion.

19. The extension of the postal savings bank system and the establishment of parcels post.

20. We declare that the election of good men who are candidates of parties committed to the license system does not bring the State any nearer to the adoption of the policy of prohibition which we regard as of first importance and we deprecate the nomination, indorsement or support of such candidates by the Prohibition party

The Prohibition party, therefore, invites to the support of these principles at the polls, men of all parties and of no party, whether Republicans, Democrats, regulars, progressives, insurgents or independents who seek the suppression of the legalized liquor traffic and believe that the enactment of these principles into law and their faithful enforcement would promote the industrial, political, moral and social well being of the citizen, the home and the State.

Political Record of 1910.

Jan. 26. Virginia Legislature re-elected John W. Daniel (Dem.) United States Senator for the sixth time.

Feb. 1 In the sixth Missouri congressional district Clement C. Dickinson (Dem.) was elected Representative to succeed David A. de Armond (Rep.), deceased.

Feb. 23. Mississippi Legislature elected Leroy Perkins (Dem.) United States Senator over ex-Gov. James K. Vardaman.

March 22. In the fourteenth Massachusetts congressional district Eugene N Foss (Dem.) was elected Representative by 5 645 plurality to succeed William C. Lovering (Rep.), deceased.

April 5. In the Milwaukee, Wis., municipal election Emil Seidel, Socialist candidate for Mayor, was elected over the Democratic and Republican candidates, and the Socialists carried both branches of the Common Council.

April 5 Indiana Republican convention at Indianapolis nominated Ellis Gully for Secretary of State with a State ticket.

April 19. In the thirty-second New York congressional district James S. Havens (Dem.) was elected Representative by 5 831 plurality to succeed James S. Perkins (Rep.), deceased.

April 28. Indiana Democratic convention at Indianapolis nominated L. C. Ellingham for Secretary of State with a State ticket.

June 8. Ex-Gov. Napoleon B. Broward was nominated in the Florida Democratic State primaries for United States Senator over James P. Taliaferro.

June 15. Pennsylvania Democratic Convention at Allentown nominated Webster Grim for Governor with a State ticket.

June 15. Maine Democratic Convention at Augusta nominated Frederick W. Plaisted for Governor over Obadiah Gardner

June 22 Ohio Democratic Convention at Dayton nominated Judson Harmon for Governor with a State ticket and indorsed Harmon for President.

June 22. Pennsylvania Republican Convention at Harrisburg nominated John K. Tener for Governor with a State ticket.

June 26 New York Socialist Party Convention at Schenectady nominated Charles Edward Russell for Governor with a State ticket.

June 30. Vermont Republican Convention at Montpelier nominated John A. Mead for Governor with a State ticket. The ballot for Governor was: Mead, 344, Frederick G. Fleetwood, 262.

July 12 Alabama Republican Convention at Birmingham nominated Joseph O Thompson for Governor.

July 12. Louisiana Legislature elected Gov. J. Y. Sanders United States Senator to succeed Samuel D. McEnery, deceased.

July 13. Wisconsin Democratic Convention at Milwaukee nominated Adolph J Schmitz for Governor with a State ticket and indorsed Burt Williams for United States Senator.

July 14. Vermont Democratic Convention at St. Albans nominated Charles D. Watson for Governor with a State ticket

July 14. North Carolina Democratic Convention at Charlotte nominated a judiciary ticket.

July 26. Nebraska Democratic Convention at Grand Island rejected William J. Bryan's "county option" plank in the party platform.

July 27. Iowa Democratic Convention at Ottumwa nominated Claude R. Porter for Governor, with a judiciary ticket

July 27 Ohio Republican Convention at Columbus nominated Warren G Harding for Governor on the third ballot, with a State ticket. The ballot stood: Harding, 746; Nicholas Longworth, 195.

July 28. Minnesota Democratic Convention at Minneapolis nominated John Lind for Governor, with a State ticket.

July 28 Pennsylvania Keystone Independent Convention at Philadelphia nominated William H. Berry for Governor, with a State ticket.

Aug 1 The Governor of Virginia appointed Claude A. Swanson United States Senator to succeed the late John W. Daniel.

Aug. 2. Republican primaries in Kansas were generally carried by the "insurgent" candidates

Aug 3. Iowa Republican Convention at Des Moines indorsed Senators Cummings and Dolliver and the "insurgent" programme.

Aug. 4. In the Tennessee judiciary election the Independent ticket was successful.

Aug. 9. Texas Republican Convention at San Antonio nominated J. O. Terrill for Governor, with a State ticket.

Aug. 10. Texas Democratic Convention at Galveston nominated O. B. Colquitt for Governor and indorsed Joseph W Bailey for President.

Aug. 16. Tennessee Republican Convention at Nashville nominated Benjamin W. Hooper for Governor, the balloting being: Hooper, 382; Alfred A. Taylor, 207.

Aug. 15. The United Labor Party of New York was organized in New York City.

Sept. 1. In the Georgia Democratic primaries Hoke Smith was nominated for Governor over Joseph M. Brown, the ballot under the county-unit system being 233 to 78.

Sept. 7. New Mexico election for delegates to the constitutional convention returned 68 Republicans and 32 Democrats.

Sept. 7. Vermont State and congressional elections were carried by the Republicans, Mead (Rep.) having 17,986 plurality for Governor.

Sept. 7. Wisconsin Republican primaries were carried by Senator La Follette and the "insurgents."

Sept. 8. Connecticut Democratic Convention at New Haven nominated Simeon E. Baldwin for Governor, with a State ticket.

Sept. 12. Arkansas State election was carried by the Democrats, George W Donaghey being elected Governor.

Sept. 12. Governor Sanders of Louisiana declined the United States Senatorship and appointed John R. Thornton to serve until the next legislature.

Sept. 12. Arizona election for delegates to the constitutional convention returned a large Democratic majority.

Sept. 12. Maine State was carried by the Democrats, Plaisted's plurality for Governor being 8,732. The Democrats elected a majority of the legislature.

Sept. 14. Connecticut Republican Convention at Hartford nominated Charles A. Goodwin on the second ballot for Governor, with a State ticket. The ballot stood, Goodwin, 318; Everett J. Lake, 259.

Sept. 14. Missouri Democratic Convention at Jefferson City indorsed Joseph W. Folk for President.

Sept. 14. Tennessee Independent Democratic Convention at Nashville indorsed the Republican candidate for Governor.

Sept. 15. New Jersey Democratic Convention at Trenton nominated Woodrow Wilson for Governor, the ballot being: Wilson, 811½; Frank S. Katzenbach, 372; George Sulzer, 148; scattering, 83½.

Sept. 20. New Jersey Republican Convention at Trenton nominated Vivian N. Lewis for Governor.

Sept. 23. Illinois Democratic Convention at East St. Louis nominated candidates for University Trustees.

Sept. 23. Illinois Republican Convention at Springfield nominated candidates for University Trustees

Sept. 27. New Hampshire Republican Convention nominated Robert P. Bass for Governor.

Sept 28. New York Republican Convention at Saratoga Springs nominated Henry L. Stimson for Governor, with a State ticket, the ballot for Governor being: Stimson, 648; William S. Bennet, 242.

Sept. 29. Rhode Island Democratic Convention at Providence nominated Lewis A. Waterman for Governor, with a State ticket.

Sept. 30. New York Democratic Convention at Rochester nominated John A. Dix for Governor, with a State ticket. The ballot for Governor was: Dix, 434; William Sulzer, 16.

Oct. 4. New York Independence League at Cooper Union, New York, nominated John J. Hopper for Governor. William Randolph Hearst for Lieutenant-Governor, and a State ticket.

Oct. 6. Massachusetts Republican Convention at Boston re-nominated Eben S. Draper for Governor, with a State ticket

Oct. 6. Michigan Republican Convention nominated Chase S. Osborn for Governor, with a State ticket.

Oct. 6. Tennessee Democratic Convention at Nashville nominated Senator Robert L. Taylor for Governor

Oct 6 Massachusetts Democratic Convention at Boston nominated Frederick W. Mansfield for Governor with a State ticket On Oct. 19 Mansfield withdrew and Eugene N. Foss was substituted.

Oct 19 Rhode Island Republican Convention at Providence nominated Aram J. Pothier for Governor, with a State ticket

Nov. 8. Congressional and State elections in most of the States.

Laughlin, Laramie; O. J. Sawyer, Laramie.

* Deceased.

People's Party National Committee.

Chairman.....JAY W. FORREST, Albany, N. Y.
Vice-Chairman and Treasurer.....J. L. BIARD, Paris, Tex.
Secretary.....J. H. FELTER, Springfield, Ill.

Socialist Labor Party National Executive Committee.

PAUL AUGUSTINE, National Secretary, 28 City Hall Place, New York City. The National Executive Committee is composed of Olive M. Johnson, Fruitvale, Cal.; Joseph Marek, New Haven, Ct.; F. H. Kuchenbecker, Chicago, Ill.; Joseph Matz, Indianapolis, Ind.; James H. Arnold, Louisville, Ky.; Arthur E. Reimer, South Boston, Mass.; George Hasseler, Detroit, Mich.; Dr. J. D. DeShazer, Durango, Col.; Samuel Johnson, St. Paul, Minn.; Rudolph Katz, Paterson, N. J.; C. F. Meier, St. Louis, Mo.; John Kircher, Cleveland, Ohio; Boris Reinstein, Buffalo, N. Y.; A. S. Dowler, Des Moines, Ia.; C. M. Carlson, Tacoma, Wash.; Albert Schnabel, Milwaukee, Wis.; Dr. B. Dorsey Downey, Portsmouth, Va.; William H. Thomas, Buena Vista, Pa.

The party is organized in local organizations known as "sections," such sections existing in thirty States. Any seven persons in any city or town of the United States may form a section, providing they acknowledge the platform and constitution of the Socialist Labor party and do not belong to any other political party. In places where no section exists or where none can be formed, any person complying with the aforesaid provisions may become a member-at-large upon application to the National Executive Committee. Sections are not permitted to charge initiation fees. All questions of importance arising within the party are decided by general vote. At each meeting of the section a chairman is elected, and the same rule holds good with all standing committees.

Socialist Party National Committee.

J. MAHLON BARNES, National Secretary, 180 Washington Street, Chicago. This organization, known nationally as the Socialist Party, is officially known as the Social Democratic Party in Wisconsin, and the Public Ownership Party in Minnesota, to conform to the election laws in those States. The National Executive Committee is composed of seven men, elected by a national referendum of party members. The national secretary is elected in like manner. The term of office is one year. The following are the members of the National Executive Committee: Victor L. Berger, Milwaukee, Wis.; Lena M. Lewis, California; George H. Goebel, New Jersey; Morris Hillquit, New York, N. Y.; James F Carey, Boston, Mass.; Robt. Hunter, Noroton Heights, Ct.; John Spargo, Yonkers, N. Y. The National Committee is composed of representatives from each organized State or Territory, of which there are 42. Representation is as follows: "Each State or Territory shall be represented on the National Committee by one member and by an additional member for every one thousand members or major fraction thereof in good standing in the party." The apportionment is made by the national secretary at the beginning of each year, based upon the dues received from the respective States.

National Democratic League of Clubs.

CHAIRMAN, William C. Liller, Indianapolis, Ind.; General Treasurer, Frank S. Clark, Indianapolis, Ind; General Secretary, Robert J. Beatty, Columbus, Ohio; Manager Press Bureau, Harry B. Darling, La Porte, Ind.

The National Democratic League of Clubs is engaging actively in the work of adding to the Democratic vote in the nation. Its labors are purely a party work, aiming simply at the increase of Democratic strength. The League exists as a vote getting auxiliary of the regular Democratic organizations, and its success depends upon the hearty co-operation of Democrats throughout the country. It is the aim and endeavor of the National Democratic League of Clubs to aid in work of organization and to help the regular organizations to achieve greater success.

The League is a union or federation of Democratic clubs and associations, in all parts of the country. It is now in its third year. At the bi-annual meeting held in Indianapolis, Ind., Jefferson's birthday, April 13, 1910, twenty-seven States of the Union were represented. Its management is intrusted to a board of directors composed of some of the foremost men in the party, who take an active interest in its success.

The National Democratic League of Clubs is not organized for the purpose of either advocating or opposing any Democrat before he shall have been chosen by the constituted bodies or of furthering the interests of any man or set of men, before being indorsed by the party, but for the attainment and preservation of unity, the upbuilding of the party, and the promotion of its principles and welfare. Nor is it intended that any club or the League of Clubs shall usurp the functions of the several State, county or district committees, but rather work in harmony and in co-operation with them.

The National Democratic League of Clubs aims:

To make loyal Democrats of young men who are about to cast their first votes.

To explain clearly to the foreign-born voters the practical helpfulness and patriotic purposes of the Democratic party, and to enlist the new-made citizen in its ranks, thus making them good Democrats and therefore better Americans.

To confirm in the wavering an inclination toward Democracy and to make a habit of party fealty.

To preach early and late, day in and day out, the politics of Jefferson and Jackson.

To enlist voters, regardless of previous party affiliations, in the cause of Democracy, by every honorable means.

State Leagues or Federations of Democratic clubs, working under the National League, have been organized in thirty-eight of the States and have a membership in excess of 875,000.

National Republican League of the United States.

THE National Republican League of the United States was organized in Chickering Hall, New York City, December 15-17, 1887, by delegates from about 350 Republican clubs of the United States, assembled in national convention, pursuant to a call issued by the Republican Club of New York City. It is composed of the Republican clubs of the United States, organized by States and united in a national organization. Its purpose is "Organization and Education." It aims to enlist recruits for the Republican party, particularly the younger men and the "first voters." National conventions have since been held at Baltimore, 1889; Nashville, 1890; Cincinnati, 1891; Buffalo, 1892; Louisville, 1893; Denver, 1894; Cleveland, 1895; Milwaukee, 1896; Detroit, 1897; Omaha, 1898 (biennial sessions afterward); St. Paul, 1900; Chicago, 1902; Indianapolis, 1904; Philadelphia, 1906; Cincinnati, 1908; New York, 1910. At the close of the campaign of 1908, the League, including the Taft campaign clubs, comprised approximately 4,000 clubs, with a membership of 1,500 000. *Officers*—President, John Hays Hammond, Gloucester, Mass.; Secretary-Treasurer D. B. Atherton, Union Trust Building, Washington, D. C.

The New York Democratic League.

AT a conference of Democrats of the State of New York, held at Saratoga, September 10, 1909, the New York Democratic League was organized and the following platform of principles was enunciated:

Equal and uniform taxation, taking no more money from the people than the just needs of government economically administered requires.

The abandonment at the earliest moment practicable of our imperialistic venture in the Philippine Islands, first safeguarding their independence by sufficient guarantees.

Steady adherence to the principle of home rule and local self-government by the State and each of its political subdivisions.

Rigid economy in Government expenditures.

Enforcement of Federal and State laws against criminal trusts and combinations in restraint of trade.

Election of United States Senators by the direct vote of the people.

Reform in our registration and in enrolment laws, so that personal registration and enrolment shall be required in every political subdivision of the State. Reform in our methods of election, so that each elective officer shall be the separate, deliberate and intelligent selection of the voters of the State.

Reform in our methods of nominating candidates for public office, so that nominating conventions shall be composed of representatives directly chosen by the members of the party.

Reform in our primary laws, so as to give to every citizen greater direct influence in naming candidates for office and surrounding the primaries with such safeguards as will insure their honesty and providing the necessary time and legal machinery to insure the choice of a majority of the voters being respected and enforced in convention and committee.

No interference with the personal liberty of any citizen except such as is essential to secure the equal rights of all the citizens.

Taxation of corporations by the States alone.

A constitutional amendment authorizing the levy of a Federal income tax.

The election of officers was deferred until January 27, 1910, when the delegates assembled and made the following choice: Chairman, Thomas M. Osborne, of Auburn; Secretary, Francis A. Willard, of Albany; Treasurer, William Gorham Rice, of Albany. The term of service of these officers is one year. There is an executive committee of fifteen members, with the three general officers as members *ex-officio*.

Qualifications for Voting in Each State of the Union.

(Communicated to THE WORLD ALMANAC and corrected to date by the Attorneys-General of the respective States.)

In all the States except Colorado, Idaho, Utah, and Wyoming the right to vote at general elections is restricted to males of 21 years of age and upward. (See also "New York," next page.) Women are entitled to vote at school elections in several States. They are entitled by law to full suffrage in the States of Colorado, Idaho, Utah, and Wyoming. (See article entitled "Woman Suffrage.")

States.	Requirements as to Citizenship.	Previous Residence Required. In State.	In County.	In Town.	In Precinct.	Persons Excluded from Suffrage.

Wyom.*...	Citizen of the United States, male or female.	1 yr...	60 dys	10 dys	10 dys	Idiots, insane, felons, unable to read State Constitution in the English language.

* Australian Ballot law or a modification of it in force. † Indian must have severed tribal relations. § One year's residence in the United States prior to election required. (a) Women can vote in school elections. (c) Ministers in charge of an organized church and teachers of public schools are entitled to vote after six months' residence in the State. (d) Actual residence in the precinct or district required. (e) Who has paid six months before election any poll-tax then due, and can read and write any section of the State Constitution, or can show that he owns and has paid all taxes due the previous year on property in the State assessed at $300 or more. (f) Or convicted of bribery, embezzlement of public funds, treason, forgery, perjury, felony, and petty larceny, duelliste and abettors, unless pardoned by Legislature. (g) Or persons non compos mentis, sentence to State Prison for one year or more takes away right to vote until restored by General Assembly, under guardianship. (h) Also persons excused from paying taxes at their own request, and those unable to read the State Constitution in English, or write. (j) No soldier, seaman, or marine deemed a resident because stationed in the State. (k) Inhabitance not residence. (l) Thirty days in election district. (m) And any person subject to poll-tax who failed to pay same prior to Feb. 1 of year in which he offers to vote. (n) Must be resident of County to vote for County officers. (o) All persons unable to read and write, and whose ancestor was not entitled to vote prior to Jan. 1, 1867. (p) Unless restored to civil rights. (q) Except Federal and Confederate ex-soldiers. (r) Those unable to read and write State Constitution.

In Virginia.—Voting qualifications. All persons who six months before the election have paid their State poll-taxes for the three preceding years. Also any person who served in time of war in the army or navy of the United States, of the Confederate States, or of any State of the United States or of the Confederate States.

Residents of the District of Columbia never had the right to vote therein for national officers, or on other matters of national concern, after the Territory embraced in it was ceded to the United States and became the seat of the general government.

Requirements Regarding Registration of Voters.

(Continuation of "Qualifications for Voting," on preceding pages.)

THE registration of voters is required in the States of Alabama, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi (four months before election), Montana, Nevada, New Jersey, New York, North Carolina, Oregon, Pennsylvania (in cities), South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming, and the Territories of Arizona and New Mexico.

In Ohio it is required in cities of 11,800 to 100,000 population in presidential years; annually in cities of 100,000 or over.

In Illinois registration of voters is required by law. In all incorporated cities, villages and towns, which have adopted the Election Commissioner act of the State, persons not registered are not entitled to vote; but elsewhere generally they can vote if not registered by swearing in their votes, and producing one witness, a householder and registered voter of the voting district, as to their qualifications as electors severally.

In Iowa in cities having 3,500 inhabitants. In Nebraska in cities of over 7,000 inhabitants.

In Kentucky in all cities of the first, second, third and fourth classes, in Kansas in cities of the first and second classes, in North Dakota in cities and villages of 800 inhabitants and over, in Ohio in cities of the first and second classes.

In Missouri it is required in cities of 25,000 inhabitants and over.

In Oklahoma it is required in all cities of the first class.

In Rhode Island non-taxpayers are required to register yearly before June 30.

The registration of voters is not required in Arkansas, Indiana, New Hampshire or Texas.

Woman Suffrage.

IN the United States women possess suffrage upon equal terms with men at all elections in four States: In Wyoming, established in 1869; in Colorado, in 1893; in Utah, in 1896, and in Idaho, in 1896.

In Kansas women possess school suffrage established in 1861, municipal suffrage established in 1887 and bond suffrage in 1903. Full suffrage was rejected by the Kansas Legislature in 1909.

In 1910 woman suffrage was defeated in the Massachusetts House of Representatives by a vote of 47 to 148. It was acted upon unfavorably by the Judiciary Committees of both houses of the New York Legislature. Woman school suffrage was rejected by the Louisiana Legislature, and municipal suffrage by the Maryland Legislature.

The California Republican State convention of 1910 adopted a resolution favoring submission to the voters of a constitutional amendment providing for woman suffrage.

Woman suffrage amendments were voted upon in Oregon, Washington, South Dakota, Oklahoma, New Mexico, and Arizona in November, 1910.

School suffrage for women prevails in some form in twenty-nine States, as follows: Arizona, Colorado, Connecticut, Delaware, Florida, Iowa, Illinois, Indiana, Idaho, Kansas, Michigan, Massachusetts, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Ohio, South Dakota, Utah, Vermont, Washington, Wyoming and Wisconsin.

In 1887 Montana gave tax-paying women the right to vote on questions submitted to taxpayers; in 1894 bond suffrage was given to women in Iowa; in 1898 the women of Minnesota were given the right to vote for library trustees, and in the same year Louisiana gave women taxpayers the right to vote in person or by proxy on all questions of taxation. In 1908 Michigan adopted a constitutional amendment providing for tax-paying suffrage for women taxpayers.

In 1901 the New York Legislature passed a law providing that "a woman who possesses the qualifications to vote for village or for town officers, except the qualification of sex, who is the owner of property in the village assessed upon the last preceding assessment roll thereof, is entitled to vote upon a proposition to raise money by tax or assessment."

In Great Britain women can vote for all officers except members of Parliament.

In Australia and New Zealand women have full suffrage; also in the Isle of Man, Iceland and Finland. They have full parliamentary suffrage in Norway.

Women have municipal suffrage in Ontario, Nova Scotia, Manitoba, Quebec, British Columbia and the Northwest Territory, in Iceland, Denmark and Sweden. In France women engaged in commerce have the right to vote for Judges of the Tribunal of Commerce. Women have some voting privileges in Cape Colony.

The International Woman Suffrage Alliance is composed of National Woman Suffrage Associations composed of twenty-two nations. Its officers are: President, Carrie Chapman Catt, New York; Vice-President, Millicent Garrett Fawcett, London; Second Vice-President, Annie Fuhrlyelm, Finland; Treasurer, Mrs. Stanton Coit, London; Secretaries—First, Mrs. Annie Lundin, Germany; Second, Miss Martina Kramers, Holland; Miss Signe Bergman, Sweden.

The officers of the National American Woman Suffrage Association are: Rev. Anna Howard Shaw, Moylan, Pa., President; Catharine W. McCulloch, Evanston, Ill., First Vice President; Kate M. Gordon, New Orleans, La., Second Vice-President; Mary W. Dennett, 505 Fifth Ave., New York City, Corresponding Secretary; Mrs. Ella S. Stewart, Chicago, Recording Secretary; Jessie Ashley, 505 Fifth Ave., New York City, Treasurer; Miss Laura Clay, Lexington, Ky. First Auditor; Alice Stone Blackwell, Dorchester, Mass., Second Auditor. National Headquarters, 505 Fifth Ave., New York City.

The New York State Association Opposed to Woman Suffrage has its central office in New York City. Its officers are as follows: Mrs. Francis N. Scott, President; Mrs. Fritz Achelis, First Vice-President; Mrs. Elihu Root, Mrs. Richard Watson Gilder, Mrs. William A. Putnam, Mrs. Robert McVickar, Mrs. George D. Miller, and Mrs. William P. Northrup, Vice-Presidents; Mrs. Francis S. Bangs, Treasurer, Mrs. George Phillips, Secretary, Room 819, Engineering Societies Building, 29 West 39th St., New York City. There are also organizations in Massachusetts, Illinois, Oregon, Iowa, Washington and California. These are founded with the object of testifying to legislative committees and through the medium of the public press that the opposition to woman suffrage is based upon what is claimed to be "the intelligent conviction of the majority of representative women in all lines of social, industrial, and domestic progress." Pamphlets with information as to the objects of the Association may be had from the Secretary.

The Presidential Election of 1912.

THE next Presidential election will take place on Tuesday, November 5, 1912.

The President and Vice-President of the United States are chosen by officials termed "Electors" in each State, who are, under existing State laws, chosen by the qualified voters thereof by ballot, on the first Tuesday after the first Monday of November in every fourth year preceding the year in which the Presidential term expires.

The Constitution of the United States prescribes that each State shall "appoint," in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be an elector. The Constitution requires that the day when electors are chosen shall be the same throughout the United States. At the beginning of our Government most of the electors were chosen by the Legislatures of their respective States, the people having no direct participation in their choice; and one State, South Carolina, continued that practice down to the breaking out of the civil war. But in all the States now the electors are, under the direction of State laws, chosen by the people on a general State ticket.

The manner in which the chosen electors meet and ballot for a President and Vice-President of the United States is provided for in Article XII. of the Constitution, and is as follows:

The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit, sealed, to the seat of government of the United States, directed to the President of the Senate.

The same article then prescribes the mode in which the Congress shall count the ballots of the electors, and announce the result thereof, which is as follows:

The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed; and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice.

The procedure of the two houses, in case the returns of the election of electors from any State are disputed, is provided in the "Electoral Count" act, passed by the Forty-ninth Congress. The act directs that the Presidential electors shall meet and give their votes on the second Monday in January next following their election. It fixes the time when Congress shall be in session to count the ballots as the second Wednesday in February succeeding the meeting of the electors.

The Constitution also defines who is eligible for President of the United States, as follows:

No person except a natural-born citizen or a citizen of the United States at the time of the adoption of this Constitution shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years.

The qualifications for Vice-President are the same.

SALARY OF THE PRESIDENT.

The salary of the President of the United States was the cause of discussion in the First Congress, in view of the fact that the Constitution declared that the President should receive compensation for his services. Washington had notified his fellow citizens that he desired no salary. The limits suggested in Congress ranged from $15,000 to $70,000. The salary was finally placed at $25,000 and this remained the compensation until President Grant's second term (March 3, 1873), when it was increased to $50,000. Chapter 291S of the Laws of the Second Session of the Fifty-ninth Congress, Approved March 4, 1907, appropriated "for travelling expenses of the President of the United States, to be expended at his discretion and accounted for by his certificate solely, $25,000." In the Second Session of the Sixtieth Congress the matter of increasing the President's salary was again considered, and it was decided that the President's salary be fixed at $75,000 a year. At the Second Session of the Sixty-first Congress an appropriation of $25,000 was made for travelling expenses to be available during the fiscal years 1910 and 1911.

REFERENCE NOTES TO THE TWO FOLLOWING PAGES.

* The candidates starred were elected. (a) The first Republican Party is claimed by the present Democratic Party as its progenitor. (b) No candidate having a majority of the electoral vote, the House of Representatives elected Adams. (c) Candidate of the Anti-Masonic Party. (d) There being no choice, the Senate elected Johnson. (e) Eleven Southern States, being within the belligerent territory, did not vote. (f) Three Southern States disfranchised. (g) Horace Greeley died after election, and Democratic electors scattered their votes. (h) There being a dispute over the electoral vote of Florida, Louisiana, Oregon, and South Carolina, they were referred by Congress to an electoral commission composed of eight Republicans and seven Democrats, which, by a strict party vote, awarded 185 electoral votes to Hayes and 184 to Tilden. (i) Free Democrat. (j) Free Silver Prohibition Party. (k) In Massachusetts. There was also a Native American ticket in that State, which received 184 votes. (m) Middle of the Road or Anti-Fusion People's Party. (n) United Christian Party. (o) Union Reform Party.

Presidential Elections

FROM 1789 TO 1908.

AGGREGATE POPULAR VOTE AND ELECTORAL VOTE FOR CANDIDATES FOR PRESIDENT AND VICE-PRESIDENT AT EACH ELECTION.

NOTE.—There is, properly speaking, no popular vote for President and Vice-President; the people vote for electors, and those chosen in each State meet therein and vote for the candidates for President and Vice-President. The record of any popular vote for electors prior to 1824 is so meagre and imperfect that a compilation would be useless. In most of the States, for more than a quarter century following the establishment of the Government, the State Legislatures "appointed" the Presidential electors, and the people therefore voted only indirectly for them, their choice being expressed by their votes for members of the Legislature. In this tabulation only the aggregate electoral votes for candidates for President and Vice-President in the first nine quadrennial elections appear.

ELECTORAL VOTES.

1789. Previous to 1804, each elector voted for two candidates for President. The one who received the largest number of votes was declared President, and the one who received the next largest number of votes was declared Vice-President. The electoral votes for the first President of the United States were: George Washington, 69; John Adams, of Massachusetts, 34; John Jay, of New York, 9; R. H. Harrison, of Maryland, 6; John Rutledge, of South Carolina, 6. John Hancock, of Massachusetts, 4, George Clinton, of New York, 3; Samuel Huntingdon, of Connecticut, 2; John Milton, of Georgia, 2; James Armstrong, of Georgia, Benjamin Lincoln, of Massachusetts, and Edward Telfair, of Georgia, 1 vote each. Vacancies (votes not cast), 4. George Washington was chosen President and John Adams Vice-President.

1792. George Washington, Federalist, received 132 votes; John Adams, Federalist, 77; George Clinton, of New York, Republican (a), 50; Thomas Jefferson, of Virginia, Republican, 4, Aaron Burr, of New York, Republican, 1 vote. Vacancies, 3. George Washington was chosen President and John Adams Vice-President.

1796. John Adams, Federalist, 71; Thomas Jefferson, Republican, 68; Thomas Pinckney, of South Carolina, Federalist, 59; Aaron Burr, of New York, Republican, 30; Samuel Adams, of Massachusetts, Republican, 15; Oliver Ellsworth, of Connecticut, Independent, 11; George Clinton, of New York, Republican, 7, John Jay, of New York, Federalist, 5; James Iredell, of North Carolina, Federalist, 3; George Washington, of Virginia; John Henry, of Maryland, and S. Johnson, of North Carolina, all Federalists, 2 votes each; Charles Cotesworth Pinckney, of South Carolina, Federalist, 1 vote. John Adams was chosen President and Thomas Jefferson Vice-President.

1800. Thomas Jefferson, Republican, 73; Aaron Burr, Republican, 73; John Adams, Federalist, 65, Charles C. Pinckney, Federalist, 64, John Jay, Federalist, 1 vote. There being a tie vote for Jefferson and Burr, the choice devolved upon the House of Representatives. Jefferson received the votes of ten States, which, being the largest vote cast for a candidate, elected him President. Burr received the votes of four States, which, being the next largest vote, elected him Vice-President. There were 2 blank votes.

1804. The Constitution of the United States having been amended, the electors at this election voted for a President and a Vice-President, instead of for two candidates for President. The result was as follows.: For President, Thomas Jefferson, Republican, 162; Charles C. Pinckney, Federalist, 14. For Vice-President, George Clinton, Republican, 162; Rufus King, of New York, Federalist, 14. Jefferson was chosen President and Clinton Vice-President.

1808. For President, James Madison, of Virginia, Republican, 122, Charles C Pinckney, of South Carolina, Federalist, 47; George Clinton, of New York, Republican, 6. For Vice President, George Clinton, Republican, 113; Rufus King, of New York, Federalist, 47; John Langdon, of New Hampshire, 9; James Madison, 3; James Monroe, 3. Vacancy, 1. Madison was chosen President and Clinton Vice-President.

1812. For President, James Madison, Republican, 128, De Witt Clinton, of New York, Federalist, 89. For Vice-President, Elbridge Gerry, of Massachusetts, 131; Jared Ingersoll, of Pennsylvania, Federalist, 86. Vacancy, 1. Madison was chosen President and Gerry Vice-President.

1816. For President, James Monroe, of Virginia, Republican, 183; Rufus King, of New York, Federalist, 34. For Vice-President, Daniel D. Tompkins, of New York, Republican, 183, John Eager Howard, of Maryland, Federalist, 22, James Ross, of Pennsylvania, 5; John Marshall, of Virginia, 4; Robert G. Harper, of Maryland, 3. Vacancies, 4. Monroe was chosen President and Tompkins Vice-President.

1820. For President, James Monroe, of Virginia, Republican, 231, John Q. Adams, of Massachusetts, Republican, 1. For Vice-President, Daniel D. Tompkins, Republican, 218, Richard Stockton, of New Jersey, 8; Daniel Rodney, of Delaware, 4, Robert G. Harper, of Maryland, and Richard Rush, of Pennsylvania, 1 vote each. Vacancies, 3. James Monroe was chosen President and Daniel D. Tompkins Vice-President.

THE PRESIDENTS OF THE UNITED STATES—*Continued.*

NOTES TO THE TABLES OF THE PRESIDENTS, ON THE TWO PRECEDING PAGES.

* Monroe abandoned the profession of law when a young man, and was afterward, and until his election, always holding public office. † Jackson called himself a South Carolinian, and his biographer, Kendall, recorded his birthplace in Lancaster Co., S. C.; but Parton has published documentary evidence to show that Jackson was born in Union Co., N. C., less than a quarter mile from the South Carolina line. ‡ Or of departure from college.

§ Widows. Their maiden names are in parentheses. ‖ She was the divorced wife of Captain Robards. (*a*) The Democratic party of to-day claims lineal descent from the first Republican party, and President Jefferson as its founder. (*b*) Political parties were disorganized at the time of the election of John Quincy Adams. He claimed to be a Republican, but his doctrines were decidedly Federalistic. The opposition to his Administration took the name of Democrats, and elected Jackson President.

(*c*) Randall, the biographer of Jefferson, declares that he was a believer in Christianity, although not a sectarian. (*d*) While President Johnson was not a church-member, he was a Christian believer. His wife was a Methodist.

Washington's first inauguration was in New York, and his second in Philadelphia. Adams was inaugurated in Philadelphia, and Jefferson and the Presidents following elected by the people, in the City of Washington. Arthur took the Presidential oath of office first in New York City. John Adams and Jefferson died on the same day, the Fourth of July, 1826, and Monroe died on the Fourth of July five years later. John Quincy Adams was a Representative and Andrew Johnson a Senator in Congress after the expiration of their Presidential terms, and both died while holding those offices. Tyler was a Representative in the Confederate Congress from Virginia, and died in office.

Lincoln, Garfield and McKinley were assassinated while in office. Lincoln at Ford's Theatre, Washington, D. C., April 14, 1865, from a pistol shot fired by John Wilkes Booth, who was killed near Fredericksburg, Va., April 26, 1865, by Sergeant Boston Corbett. Garfield was shot in the Pennsylvania Railroad Depot, Washington, D. C., July 2, 1881, and died at Elberon, Long Branch, N. J., September 19, 1881. The assassin was Charles Jules Guiteau, who was hanged at Washington, D. C., June 30, 1882. McKinley was shot twice September 6, 1901, while in the Temple of Music of the Pan-American Exposition, Buffalo, N. Y., and died from his wounds at the home of John G. Milburn, Buffalo, September 14, 1901. The assassin was Louis Czolgosz, who was electrocuted at Auburn State Prison, New York, October 29, 1901.

Jackson was shot at in the Capitol at Washington, D. C., January 29, 1835, by a house painter named Richard Lawrence, escaping because the pistol of the assassin missed fire.

Cleveland after taking the oath as President, kissed the open bible, his lips touching Psalm CXII, verses 5-10, inclusive. Garfield's first act after taking the oath was to kiss his mother.

The sixth President was the son of the second President, and the twenty-third President was the grandson of the ninth President. William Henry Harrison was the eighth and Benjamin Harrison the tenth in descent from Pocahontas and John Rolfe. Lincoln was the first President wearing a full beard. Grant the first wearing a mustache. Buchanan and Cleveland were bachelors when they entered the White House as Presidents, but Cleveland surrendered during his first term. Washington, Madison, Monroe, Pierce and Hayes were born on Friday. J. Q. Adams, Pierce, Garfield and McKinley (second term), were inaugurated on Friday. Tyler, Polk, Pierce and Arthur died on Friday. Lincoln was assassinated on Friday.

There were remarkable coincidences in the lives of Abraham Lincoln and Jefferson Davis. Both were born in Kentucky; Lincoln in 1809, Davis in 1808. Both removed from their native State in childhood, Lincoln to the Northwest, Davis to the Southwest. Lincoln was a Captain of Volunteers and Davis a Second Lieutenant of Regulars in the Black Hawk War of 1832. They began their political careers the same year, 1844, Lincoln being a Presidential Elector for Clay, and Davis for Polk. They were elected to Congress about the same time, 1845 and 1846. They were called to preside over their respective governments the same year and within a few days; Davis, February 8, 1861, Lincoln, March 4, 1861.

Washington, Monroe, and Jackson were soldiers in the Revolutionary war: Jackson, W. H. Harrison, Tyler, Taylor, and Buchanan in the war of 1812-15; Lincoln in the Black Hawk war; Taylor, Pierce, and Grant in the Mexican war; Grant, Hayes, Garfield, Arthur, B. Harrison, and McKinley in the civil war, and Roosevelt was in the war with Spain. Adams and Jefferson were signers of the Declaration of Independence, and Washington and Madison of the Constitution.

Grant was christened Hiram Ulysses and Cleveland Stephen Grover. W. H. Harrison was the oldest man elected to the Presidency, and Roosevelt the youngest, Grant being the next youngest by six months. Cleveland was the only President married in the White House, and his second daughter the only President's child born therein. Monroe's daughter (Mrs. Gouverneur), Grant's daughter (Mrs. Sartoris), and Roosevelt's daughter (Mrs. Longworth), were the only children of Presidents married therein. Wives of Tyler and Benjamin Harrison died in the White House. W. H. Harrison was father of the largest family, six sons and four daughters.

THE PRESIDENTIAL SUCCESSION.

The Presidential succession is fixed by chapter 4 of the acts of the Forty-ninth Congress, first session. In case of the removal, death, resignation, or inability of both the President and Vice-President, then the Secretary of State shall act as President until the disability of the President or Vice-President is removed or a President is elected. If there be no Secretary of State, then the Secretary of the Treasury will act; and the remainder of the order of succession is as follows: The Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy, and Secretary of the Interior. The acting President must, upon taking office, convene Congress, if not at the time in session, in extraordinary session, giving twenty days' notice. This act applies only to such Cabinet officers as shall have been confirmed by the Senate and are eligible under the Constitution to the Presidency.

Title and Term of the President.

THE address of the President is simply "The President of the United States." In the First Congress, there was debate over a title and it was proposed by some members that he be addressed as "His Excellency" and by others as "His Highness," but a committee reported that "it is not proper to annex any style or title other than that expressed in the Constitution." In the Constitutional Convention the first report fixed the term of office at seven years without eligibility to re-election. In debate various periods from "during good behavior" to twenty years were favored. The limit to four years was finally adopted in grand committee and ratified by the convention.

Federal Employer's Liability Commission.

JOINT Resolution No. 41 passed by Congress and approved June 25, 1910, provided for the appointment of a commission to investigate the matter of employer's liability and workman's compensation, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, that a commission be, and is hereby, created consisting of two members of the Senate, to be appointed by the President of the Senate, and two members of the House of Representatives to be appointed by the Speaker thereof, together with two persons to be selected by the President of the United States for the purpose of making a thorough investigation of the subject of employer's liability and workman's compensation, said commission to submit a report through the President to the Congress of the United States not later than the first Monday in December, nineteen hundred and eleven; and any vacancy occurring on said commission shall be filled in the same manner as the original appointment.

To carry out the purpose of this resolution the commission hereby created is authorized to employ persons who are familiar with the subject, and take such other steps as are necessary to make a thorough examination in the matter.

In submitting its report the commission shall recommend to Congress such legislation as to the commission seems advisable.

All expenses of said commission, together with compensation to be fixed by the President for the two members of the commission to be appointed by the President, for all time in which said commission shall be actually engaged in this investigation shall be paid out of any funds in the Treasury of the United States not otherwise appropriated, on a certificate of the chairman of said commission, who shall be selected from the membership of the commission named under this resolution, and the sum necessary for carrying out the provisions of this resolution is hereby appropriated: Provided, That the total expense authorized by this resolution shall not exceed the sum of fifteen thousand dollars, which shall include the compensation herein authorized.

To carry out and give effect to the provisions of this resolution the commission hereby created shall have power to issue subpoenas, administer oaths, summon witnesses, require the production of books and papers, and receive testimony taken before any proper officer in any State or Territory of the United States.

Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt and peas. Receipts at New York, Portland, Boston, Philadelphia and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers and therefore duplicate an equivalent quantity of wheat received in grain.

Government Securities.

AVERAGE ANNUAL NET PRICE OF GOVERNMENT BONDS OF ENGLAND, FRANCE, GERMANY AND UNITED STATES.

FROM THE REPORT OF THE NATIONAL MONETARY COMMISSION. 1910

The quotations for English consols, French rentes and German imperial loans from 1878 to 1907 are taken from the "Materialien zur Beurteilung der Zusammenhange zwischen dem offentlichen Schuldenwesen und dem Kapitalmarkte." Berlin. 1908. The quotations for United States bonds were compiled by the United States Treasury Department.

* These bonds are here listed as maturing August 1, 1908.

Public Debt of the United States.

OFFICIAL STATEMENT OF DECEMBER 1, 1910.

INTEREST-BEARING DEBT.

Consols of 1930, 2 per cent	$646,250,150 00
Loan of 1908-1918, 3 per cent	63,945,460 00
Loan of 1925, 4 per cent	118,489,900 00
Panama Canal loan. Series of 1906	54,631,980.00
Panama Canal loan. Series of 1908	30,000,000.00
Aggregate of interest-bearing debt	$913,317,490.00

DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

Aggregate debt on which interest has ceased since maturity	$2,042,255.26

DEBT BEARING NO INTEREST.

United States notes	$346,681,016 00
Old demand notes	53,282.50
National bank notes: Redemption account	33,151,133.00
Fractional currency	6,858,435.93
Aggregate of debt bearing no interest	$386,743,867.43

CERTIFICATES AND NOTES ISSUED ON DEPOSITS OF COIN AND SILVER BULLION.

Gold certificates	$910,354,669.00
Silver certificates	488,190,000.00
Treasury notes of 1890	3,494,000.00
Aggregate of certificates and Treasury notes, offset by cash in the Treasury	$1,402,038,669.00

CLASSIFICATION OF DEBT DECEMBER 1, 1910.

Interest-bearing debt		$319,317,490.00
Debt on which interest has ceased since maturity		2,042,255 26
Debt bearing no interest		386,743,867 43
Aggregate of interest and non-interest bearing debt		$1 302,103,612.69
Certificates and Treasury notes offset by an equal amount of cash in the Treasury		1,402,038,669.00
Aggregate of debt, including certificates and Treasury notes		$2,704,142,281.69
CASH IN THE TREASURY.		
Gold certificates	$910,354,669.00	
Silver certificates	488,190,000.00	
Treasury notes of 1890	3,494,000.00	
		1,402,038,669.00
National bank 5 per cent. fund	$27,148,193.08	
Outstanding checks and warrants	13,817,411.26	
Disbursing officers' balances	82,218,077.86	
Post-Office Department account	3,625,064.87	
Miscellaneous items	1,672,855.35	
		128,481,602.42
Reserve fund	$150,000,000.00	
Available cash balance	86,683,885.80	
		236,683,885.80
Total		$1,767,204,157.22
Cash balance in the Treasury November 1, 1909, exclusive of reserve and trust funds		886,683,885.80

Total minor	2,944,063,098	$56,184,332.67
Total coinage	5,327,032,048	$4,168,798,091.12

Silver-dollar coinage under acts of April 2, 1792, $3,031,288; February 28, 1878, $378,166,793; July 14, 1890, $187,027,345 March 3, 1891, $5,078,472—total, $578,303,848.00.

PRESENT MONETARY SYSTEM OF THE UNITED STATES ILLUSTRATED.

	Gold Coin.	Standard Silver Dollars.	Subsidiary Silver Coin.	Minor Coin.
Weight	25.8 grains to the dollar.	412.5 grains.	385.8 grains to the dollar.	5c. piece: 77.16 grains, 75 p. c. copper, 25 p. c. nickel.
Fineness	900-1000.	900-1000.	900-1000.	1c. piece: 48 grains, 95 p. c. copper, 5 p. c. tin and zinc.
Ratio to gold	.....	15.988 to 1.	14.953 to 1.	
Limit of issue	Unlimited.	Coinage ceased in 1905.	Needs of the people.	Needs of the people.
Denominations	$20, $10, $5, $2½.	$1.	50 cents, 25 cents, 10 cents.	5 cents, 1 cent.
Legal tender	Unlimited.	Unlimited, unless otherwise contracted.	Not to exceed $10.	Not to exceed 25 cents.
Receivable	For all public dues.	For all public dues.	For all dues up to $10.	For all dues up to 25 cents.
Exchangeable	For gold certificates, as below, and subsidiary and minor coin.	For silver certificates and smaller coin.	For minor coin.	.....
Redeemable	.....	.....	In "lawful money" at the Treasury in sums or multiples of $20.	In "lawful money" at the Treasury in sums or multiples of $20.

	Gold Certificates.	Silver Certificates.	United States Notes.	Treasury Notes of 1890.	National Bank Notes.
Limit of issue	Unlimited for gold coin unless gold reserve falls below $100,000,000.	Amount of silver dollars coined, $562,173,530.	$346,681,016.	No further issues; volume steadily diminishing by redemption in silver dollars.	Not to exceed capital of banks.
Denominations	$10,000, $5,000 $1,000, $500, $100, $50, $20, $10.	$100, $50, $20, $10, $5, $2, $1.	$1,000, $500, $100, $50, $20, $10, $5, $2, $1.	$1,000, $100, $50, $20, $10, $5, $2, $1.	$1,000, $500, $100, $50, $20, $10, $5.
Legal tender	Not a tender.	Not a tender.	For all debts, public and private, except customs and interest on public debt.	Unlimited, unless otherwise contracted.	Not a tender.
Receivable	For all public dues.	For all public dues.	For all public dues.	For all public dues.	For all public dues except customs.
Exchangeable	For subsidiary and minor coin.	For silver and minor coin.	For subsidiary and minor coin.	For silver and minor coin.	For subsidiary silver and minor coin.
Redeemable	In gold coin at the Treasury.	In silver dollars at the Treasury.	In gold at the Treasury.	In gold at the Treasury.	In "lawful money" at the Treasury, or at bank of issue.

"Lawful money" includes gold coin, silver dollars, United States notes and Treasury notes. United States notes are by regulation receivable for customs so long as they continue redeemable in coin. There are still in use small amounts of $1 and $2 national bank notes; also $500 and $1,000 silver certificates. Treasury notes were issued for purchases of silver bullion, which was coined into dollars wherewith the notes are being redeemed as rapidly as practicable. The issue of national bank notes is practically dependent upon the market price of United States bonds; when the premium is high it is not profitable to issue notes. "Emergency" issues based upon other bonds and upon commercial paper are authorized under certain conditions beyond the amount of the capital.

The above table was prepared for THE WORLD ALMANAC by Maurice L. Muhleman, former Deputy Assistant United States Treasurer, New York.

Banking Statistics.

THE NATIONAL BANKS OF THE UNITED STATES.

(From the annual report of the Comptroller of the Currency.)

Year Ending Sept. 1.	No. of Banks.	Capital.	Surplus.	Total Dividends.	Total Net Earnings.	Ratio of Dividends to Capital.	Ratio of Dividends to Capital and Surplus.	Ratio of Earnings to Capital and Surplus.

The Bankruptcy Law.

EXTRACTS FROM THE UNITED STATES BANKRUPTCY ACT OF JULY 1, 1898, AS AMENDED BY ACT OF JUNE 25, 1910.

SEC. 4. WHO MAY BECOME BANKRUPTS.—(*a*) Any person except a municipal railroad, insurance or banking corporation shall be entitled to the benefits of this act as a voluntary bankrupt.

(*b*) Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any incorporated company and any moneyed business, or commercial corporation, except a municipal railroad, insurance or banking corporation, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial and shall be subject to the provisions and entitled to the benefits of this act.

SEC. 7. DUTIES OF BANKRUPTS.—(*a*) The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days, unless further time is granted, after the adjudication if an involuntary bankrupt, and with the petition if a voluntary bankrupt, a schedule of his property, showing the amount and kind of property, the location thereof, its money value in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings.

Provided, however, that he shall not be required to attend a meeting of his creditors, or at or for an examination at a place more than one hundred and fifty miles distant from his home or principal place of business, or to examine claims except when presented to him, unless ordered by the court, or a judge thereof, for cause shown, and the bankrupt shall be paid his actual expenses from the estate when examined or required to attend at any place other than the city, town, or village of his residence.

THE WORLD ALMANAC is indebted to "Bradstreet's" for the stock list and prices of stocks.

New York Stock Exchange Seats.

THE following table, prepared by the *Wall Street Journal*, shows the high and low prices of New York Stock Exchange seats since 1900:

Year.	High.	Low.	Year.	High.	Low.	Year.	High.	Low.
1900	$35,000	$30,000	1904	$81,000	$57,000	1908	$72,000	$52,000
1901	50,000	48,000	1905	95,000	70,000	1909	96,000	72,500
1902	81,000	65,000	1906	95,000	78,000	1910	91,000	65,000
1903	82,000	51,000	1907	80,000	51,500			

Fluctuations are due to the trend upward and downward of the stock market. A sale was effected in August, 1910, as low as $68,000.

To show how the aggregate value of all the seats on the Stock Exchange has enhanced, the following table is appended. The average number of seats, now approximately 1,100, is used, and the high price each year is taken in computing the table:

Year.	High price.	Aggregate value.	Year.	High price.	Aggregate value.	Year.	High price.	Aggregate value.
1909	$96,000	$105,600,000	1904	$81,000	$88,000,000	1879	$20,000	$22,000,000
1908	72,000	79,000,000	1903	82,000	96,800,000	1866	10,000	11,000,000
1907	80,000	88,000,000	1902	81,000	88,000,000	1863	4,500	4,950,000
1906	95,000	104,500,000	1901	50,000	55,000,000	1823 (500 seats)	25	12,500
1905	95,000	104,500,000	1900	35,000	38,500,000			

In 1823 the initiation fee was $10, while at the present time it is $2,000. From 1863 to the high-record mark reached in 1909 the total number of seats increased in value $105,600,000, or over 2,300 per cent.

Cost of Membership in Leading Exchanges.

THE *Investment Guide* of Henry Clews & Co., for 1911, gives the following table of cost of membership in the leading exchanges of the world, as of November 15, 1910:

Baltimore Stock Exchange	$4,500	New Orleans Cotton Exchange	$3,000
Berlin Bourse (entrance fee, not transferable)	750	New York Coffee Exchange	2,000
Boston Stock Exchange	28,700	New York Cotton Exchange	15,100
Chicago Stock Exchange	1,975	New York Produce Exchange	450
Cincinnati Stock Exchange	3,100	New York Stock Exchange	75,000
Cleveland Stock Exchange	1,800	Paris Bourse (appointments made and controlled by French Government)	....
Consolidated Stock and Petroleum Exchange, New York	250	Philadelphia Stock Exchange	6,000
Liverpool Cotton Exchange	4,000	Pittsburgh Stock Exchange	3,000
London Stock Exchange (entrance fee, not transferable)	2,000	St. Louis Stock Exchange	2,500
Montreal Stock Exchange	29,500	Toronto Stock Exchange	24,500
		Washington Stock Exchange	4,500

The value of a membership in an exchange depends in a large measure upon the prevailing state of business and the market level of securities.

Comparative Prices of Commodities.

QUOTATIONS RULING FOR STANDARD GRADES. 1896 TO 1910.

THE following table from "Bradstreet's Journal" shows average ruling prices for 106 commodities in the United States at various periods from 1896 to 1910:

COMMODITIES.	1896. July 1.	1900. Feb. 1.	1907. Mar. 1.	1908. Nov. 1.	1909. Nov. 1.	1910. Nov. 1
BREADSTUFFS.						
Wheat, No. 2, red Winter, in elevator, per bush.	$0.64375	$0.75125	$0.83	$1.085	$1.235	$0.96

† Pacific Coast. An average of the index numbers yearly since 1893 reveals the following:

Year.	Number.	Year.	Number.	Year.	Number.
1893	$7.5324	1899	$7.2100	1905	$8.0987
1894	6.6846	1900	7.8839	1906	8.4176
1895	6.4346	1901	7.5746	1907	8.9045
1896	5.9124	1902	7.8759	1908	8.6094
1897	6.1159	1903	7.9364	1909	8.4556
1898	6.5713	1904	7.9187	1910	9.0053

The figures for 1910 are based on the numbers ruling on the first of January, February, March, April, May, June, July, August, September, October and November. The present average represents the highest point made within the life of the data, nineteen years. The current level is 1.1 per cent. higher than that of 1907.

Nutritiveness of Foods.

AVERAGE quantity of nutritive matter in 1,000 parts of varieties of animal and vegetable food.

Life Insurance Progress in the United States.

It is within the past sixty years that the vast business of life insurance in the United States has been developed. The experimental stage was ended and the era of advance was opened when, in 1843, the Mutual Life Insurance Company of New York began business, its first policy having been issued on February 1 of that year.

Since then a large number of life insurance companies have been established. The following list includes those now transacting business which had their inception between 1843 and 1860 inclusive, arranged according to the date of the first policy issued:

Mutual Life Insurance Company, 1843, February 1; New England Mutual Life Insurance Company (1), 1844, February 1; New York Life Insurance Company, 1845, April 17; Mutual Benefit Life Insurance Company (2), 1845, May 6; State Mutual Life Assurance Company (3), 1845, June 1; Connecticut Mutual Life Insurance Company, 1846, December 15; Penn Mutual Life Insurance Company, 1847, June 25; Union Mutual Life Insurance Company, 1849, October 1; National Life Insurance Company of Vermont, 1850, February 1; United States Life Insurance Company, 1850, March 4; Ætna Life Insurance Company, 1850, August 1; Manhattan Life Insurance Company, 1850, August 1; Massachusetts Mutual Life Insurance Company, 1851, August 2; Phœnix Mutual Life Insurance Company, 1851, September 11; Berkshire Life Insurance Company (4), 1851, October 27; Northwestern Mutual Life Insurance Company, 1858, November 25; Equitable Life Assurance Society, 1859, July 28; Washington Life Insurance Company, 1860, February 2; Home Life Insurance Company, 1860, May 1; Germania Life Insurance Company, 1860, July 16.

How life insurance has progressed since the early part of 1843 is shown in the subjoined table by periods of years as indicated, assessment insurance not being included.

December 31.	Amount of Outstanding Insurance.	Amount of Assets.
1843	$6,500,000	$1,000,000
1867	1,235,000,000	124,534,000
1892	4,898,000,000	907,441,000
1899	6,266,000,000	1,576,000,000
1910	15,480,721,211	3,643,857,971

American Experience Table of Mortality.

This is the mortality table prescribed by statute in most of the States as the basis upon which the reserves of life insurance companies shall be computed:

Age.	Number Living.	Number Dying.	Expectation of Life.	Age.	Number Living.	Number Dying.	Expectation of Life.	Age.	Number Living.	Number Dying.	Expectation of Life.
10	100,000	749	48.72	39	78,862	756	28.90	68	43,133	2,243	9.47
11	99,251	746	48.08	40	78,106	765	28.18	69	40,890	2,321	8.97
12	98,505	743	47.45	41	77,341	774	27.45	70	38,569	2,391	8.48
13	97,762	740	46.80	42	76,567	785	26.72	71	36,178	2,448	8.00

Health	5,714,579	2,173,386	38.0	Sprinkler	213,015	48,861	22.9
Liability	23,845,147	9,861,187	42.6				

Ocean Marine Insurance.

Eighteen marine insurance companies reporting to the New York State Insurance Department had on January 1, 1910, assets of $26,619,516, net surplus of $9,557,473 and premiums received in preceding year $10,916,357, losses paid $5,534,503, risks written $6,222,385,385.

Great Conflagrations

IN THE LAST AND PRESENT CENTURY.

Date.		LOCATION.	Loss.
1835—Dec.	16	NEW YORK—674 houses and warehouses, including Merchants' Exchange, burned. The extent of this fire was attributable to narrow streets, a gale of wind and the intense cold, which froze the engines and rendered them useless	
1839—Sept.	23	NEW YORK—46 commercial buildings burned	$17,500,000
1842—May	4	HAMBURG—The number of streets burned through was 61; courts. 120; dwelling floors, 1,716; dwelling cellars, 468; cottages, 498. Total houses, 1,992. The number of persons rendered homeless was 21,526	4,000,000
1845—July	19	NEW YORK—302 houses destroyed in the best business part of the city	35,000,000
1846—June	9	ST. JOHN'S, N. F.—Nearly the whole of the town destroyed	7,500,000
1848—Aug.	16	CONSTANTINOPLE—Some 2,500 shops and 500 houses, including some splendid palaces, burned	5,000,000
1848—Aug.	17	ALBANY, N. Y.—439 houses burned	15,000,000
1849—May	18	ST. LOUIS—About one-half the business portion of the city destroyed	3,000,000
1851—May	3	SAN FRANCISCO, Cal.—2,500 houses burned. The fire extended over three parts of the city	3,000,000
1852—July	8	MONTREAL—A large part of the city destroyed. Some 15,000 persons rendered homeless	3,500,000
1852—Nov.	12	SACRAMENTO CITY, Cal.—About 2,500 buildings destroyed. The city almost entirely burned up	5,000,000
1861—Dec.	12	CHARLESTON, S. C.—A considerable portion of the city destroyed	5,000,000
1862—June	10	ST. PETERSBURG, Russia	10 000,000
1866—July	4	PORTLAND, Me.—A cracker thrown by a boy during the celebration of Independence Day led to the destruction of nearly all the business portion of the city, including eight churches, the banks, newspaper offices, etc. More than 2,000 families were rendered homeless	5,000,000
1866—Oct.	16	QUEBEC—2,500 houses and 17 convents and churches burned; 18,000 people rendered homeless	10,000,000
1866—Nov.	30	YOKOHAMA, Japan—Tremendous conflagration in the European quarter. Ruins covered 50 acres	3,000,000
1869—Aug.	4	PHILADELPHIA—Patterson's whiskey stores, containing over 25,000 barrels, burned	3,000,000
1870—June	5	CONSTANTINOPLE—The greater part of Pera was destroyed, including the English Embassy and about 7,000 houses	3,500,000
1871—Oct.	8	CHICAGO—This fire destroyed 18,000 buildings, covering an area of nearly five square miles	25,000,000
1872—Nov.	9	BOSTON—This fire broke out on a Saturday afternoon and is regarded as the third largest in modern history. In less than 48 hours it reduced to ruins 748 houses, including many of the largest business blocks in the city, covering some 60 acres, including the old post-office and old Trinity Church	165,000,000
1874—Feb.	12	LONDON—The Pantechnicon, Belgrave Square	70,000,000
1874—July	14	CHICAGO—New Post-Office, five hotels, four chapels, two theatres, etc., extending over a district of 60 acres	9,250,000
1875—Oct.	26	VIRGINIA CITY, Nev.—This city, forming the centre of one of the richest mining districts in the United States, burned	4,000,000
1875—Oct.	27	The machinery of many of the mines seriously damaged	
1876—June	18	IQUIQUE, Peru—This fire was discovered at 2 A. M., and before noon three-fourths of the city had vanished	7,500,000
1876—Sept.	3	QUEBEC—Both sides of Richelieu Street and east side of Champlain Street destroyed	5,000,000
1877—June	20	ST. HYACINTH, Canada—Town nearly consumed, including the Post-Office, Market, Court House, 3 banks, 80 stores and 500 other buildings	6,000,000
1882—Dec.	11	ST. JOHN, N. B.—This fire began in a boiler shop in the Portland suburb, and extended over an area of 600 acres. Loss of life estimated at 100	15,000,000
1889—June	10	KINGSTON, Jamaica—This fire started on the wharves along the river. Thousands of people were rendered homeless	15,000,000
1889—Nov.	27	SEATTLE, Wash.—General fire	10,000,000
1892—July	8	BOSTON—Bedford Street, buildings	6,626,000
1892—Oct.	20	ST JOHN'S, N. F.—600 buildings	5,000,000
1896—Oct.	5	MILWAUKEE, Wis.—General fire	25,000,000
1897—Nov.	19	GUAYAQUIL, Ecuador	5,000,000
1900—April	27	LONDON—Cripplegate, 122 warehouses	22,000,000
1900—June		OTTAWA, Hull, Ontario	5,000,000
1901—May	3	HOBOKEN, N. J.—Dock property, merchandise and steamers	10,000,000
1902—Feb.		JACKSONVILLE, Fla—General conflagration	4,627,000
1904—Jan.	23	PATERSON, N. J.—456 buildings	10,050,000
1904—Feb.	7	AESLAND, Norway—Entire town, built of wood, destroyed	5,817,305
1904—April	19	BALTIMORE—Over seventy blocks and 2,500 buildings were totally destroyed	6,000,000
1906—April	18	TORONTO—Three and a half blocks destroyed	50,000,000
1908—April	12	SAN FRANCISCO, Cal.	12,000,000
		CHELSEA, Mass.—General fire	350 000,000
			6,000,000

Fire Insurance Statistics.

CONDITION AND TRANSACTIONS OF COMPANIES DOING BUSINESS IN THE UNITED STATES, YEAR ENDING JANUARY 1, 1910.

Number of Companies.	Capital.	Assets Exclusive of Premium Notes.	Net Surplus.	Cash Premiums Received during Year.	Total Cash Income during Year.
322 Stock* 272 Mutual	$87,504,299	$659,451,677	$238,981,691	$328,957,313	$362,032,354

Number of Companies.	Paid for Losses during Year.	Paid for Dividends during Year.	Expenses other than Losses and Dividends during Year.	Total Disbursements during Year.	Risks Written during Year.
322 Stock* 272 Mutual	$154,099,782	$30,154,845	$115,878,527	$300,133,154	†$34,000,000,000

* Including Lloyds. † Approximation. These statistics of fire insurance business in the United States are, with the exception of the estimate of risks written during the year, compiled from *The Insurance Year-Book*, published by The Spectator Company. They do not include the returns of a few stock companies and some 500 mutuals and town and county mutuals, whose transactions are purely local and individually of small volume.

CONDITION OF THE PRINCIPAL JOINT-STOCK COMPANIES DOING BUSINESS IN THE UNITED STATES JANUARY 1, 1910.*

* Annual statements of the fire insurance companies are rendered to the insurance departments during the month of January; therefore the statistics of condition January 1, 1911, were not ready when this publication went to press.

† The New York law requires a deposit of $200,000 from foreign companies with the insurance department. This is treated by the department as "deposit capital," and the surplus stated in the next column is "surplus beyond deposit capital" and other liabilities.

ANNUAL PROPERTY LOSSES IN THE UNITED STATES BY FIRES—1879-1910.

Years.	Property Loss.	Insurance Loss.	Years.	Property Loss.	Insurance Loss.

*This is the heavies' locomotive ever built. The length over all including the tender is more than 100 ft., and the weight including the tender, 700,000 pounds, which is the weight of a complete train, including the engine, which would have been considered heavy a few years ago. † This is a passenger locomotive and is far and away the heaviest passenger locomotive ever built and is the first Mallet built for passenger service. It was built for use on grades ranging from 90 to 95 ft. to the mile, and where there is a rise of about 5,000 ft. on a division, and over which the schedule speed averages about 25 miles.

HEAVY ELECTRIC LOCOMOTIVES.

Railways of America "Grouped" by Capitalists.

THE great railroad systems of the United States have been reduced to a few "groups" by means of consolidation and reconsolidation. The following is a list of these groups, which comprise three-quarters of all the railroad lines of the country:

Groups.	Mileage.	Stocks.	Bonds.
Vanderbilt	24,670	$618,300,000	$752,800,000
Pennsylvania	19,560	766,900,000	567,600,000
Harriman	28,542	948,300,000	1,233,400,000
Hill-Morgan	12,820	384,600,000	419,800,000
Morgan	12,840	567,215,000	539,915,000
Gould	21,114	532,308,000	813,500,000
Moore-Reid	28,107	365,900,000	483,300,000
Rockefeller's	16,185	252,500,000	309,700,000
Walters'	11,143	147,600,000	199,300,000
*Hawley	11,819	337,687,655	517,136,826
Independent	24,140	451,900,000	343,165,000
Total	210,940	$5,373,210,655	$6,179,616,826

* Absorbed Missouri, Kansas & Texas Ry.

The Railways of the World.

A TABLE prepared for the Archiv für Eisenbahnwesen, states that at the commencement of 1908 the total railway mileage of the whole world was 594,842 miles, divided as follows: America, 302,928; Europe, 199,346; Asia, 56,284; Africa, 18,518; and Australia, 17,766. The cost of construction per mile has been highest in Great Britain and Ireland, where it averaged $271,000 per mile. In Belgium the cost was $172,900; France, $122,000; Germany, $108,500; Italy, $125,300; Russia, $79,600 per mile. In the United States the average cost has been $68,800; in Canada, $58,000; in New Zealand, $60,300; and in Queensland, Australia, it is as low as $34,200.—*Railway Age-Gazette.*

† Excludes mileage in Alaska. (302.92 miles, unofficial) and Hawaii (149.34 miles.)

Railway Payments in Damage Suits.

THE Bureau of Railway News and Statistics points out that twenty-one railroads of the United States, doing more than one-half of the business of the country, paid approximately $56,700,000 for "loss and damage" and "injuries to persons" during the year ending June 30, 1908. In the preceding year these accounts amounted to $47,258,587, and in 1898 to $12,182,003. This table shows the amounts paid by the railways of the United States for "loss and damage" and "injuries to persons" during the decade 1897 to 1907, inclusive, and proportion to gross earnings:

	Loss and Damage		Injuries to Persons			Loss and Damage		Injuries to Persons	
	Amount.	Per Cent.	Amount.	Per Cent.		Amount.	Per Cent.	Amount.	Per Cent.
1897..	$4.793.143	.427	$6.049.889	.539	1903..	$13.726.508	.722	$14.052.123	.739
1898..	5.409.544	.433	6.772.459	.543	1904..	17.002.602	.861	15.838.179	.802
1899..	5.976.082	.455	7.116.212	.541	1905..	19.782.692	.946	16.034.727	.770
1900..	7.055.622	.474	8.405.980	.565	1906..	21.086.219	.907	17.466.864	.751
1901..	8.109.637	.510	9.014.144	.567	1907..	25.796.083	.996	21.462.504	.829
1902..	11.034.686	.639	11.682.756	.676					

From which it appears that where the payments on account of "loss and damage" increased $21,002,940, or 437.9 per cent. in ten years and of "injuries to persons" $15,412,615, or 254 7 per cent., the increase relatively to gross earnings was 130.2 per cent. and 54.5 per cent. respectively.—Bradstreets.

Passenger Railway Rates in Europe.

PASSENGER rates differ considerably in the different countries. Most of the railroads are owned and operated by the State, but in some countries there are both State and private roads, and in England the railroads are all private corporations. The following are the regular passenger rates, reduced to cents per mile, in the various European countries:

OWNERSHIP.	Class I. Cents.	Class II. Cents.	Class III. Cents.	OWNERSHIP.	Class I. Cents.	Class II. Cents.	Class III. Cents.
Germany, Government	2.73	1.75	1.16	Italy, Government	3.60	2.52	1.62
Belgium, Government	2.91	1.98	1.17	England —			
France, Government	3.16	2.35	1.53	Gt. East. Ry., min	4.02	3.02	2.01
France, private	3.48	2.34	1.53	Gt. East. Ry., max	6.03	4.02	3.02
Holland, Government	3.29	2 47	1.65	Southeast'n & Chatham Railway	4.02	2.51	2.01
Holland, private	3.29	2.47	1 65				

In Italy the rate per mile is higher than on any other Government-owned road, though a differential tariff offers some advantages that tend to reduce the price and to make the long-distance journeys as cheap as in other countries.

UNITED STATES INTERSTATE COMMERCE COMMISSION.

WASHINGTON, D. C.

Martin A. Knapp, of New York, Chairman; Judson C. Clements, of Georgia; Charles A. Prouty, of Vermont; Francis M. Cockrell, of Missouri; Franklin K. Lane, of California; Edgar E. Clark, of Iowa; James S. Harlan, of Illinois. Edward A. Moseley, Secretary.

STATE RAILROAD COMMISSIONERS.

Alabama Railroad Commission—Montgomery, Chas. Henderson, President, Troy; W. D Nesbitt, Birmingham; John A. Lusk, Guntersville, S. P. Kennedy, Secretary, Montgomery.

Arizona Railway Commission—Phoenix. W. P. McNair, Chairman; Geo. J. Stoneman, Globe; E. S. De Pass, Secretary.

Arkansas Railroad Commission—Little Rock. Wm. A. Falconer, Chairman; J. W. Crockett, R. P. Allen; Wm. E. Floyd, Secretary.

California Railroad Commission—San Francisco. A. C. Irwin, President, 1st Dist., Sacramento; H. D. Loveland, 2d Dist., San Francisco; Theo. Summerland, 3d Dist., Los Angeles; Walter D. Wagner, Secretary, San Bernardino.

Colorado Railroad Commission—Denver. A. P. Anderson, President; D. H. Staley; W. L. Seely, Secretary.

Connecticut Railroad Commissioners—Hartford. A. F. Gates, Chairman; William O. Seymour, Ridgefield; E. J. Doolittle, Meriden; Henry F. Billings, Clerk, Hartford.

Florida Railroad Commissioners—Tallahassee. R. Hudson Burr, Chairman; N. A. Blitch; Roya. C. Dunn; J. Will Yon, Secretary.

Georgia Railroad Commission—Atlanta. H. W. Hill, Chairman, Greenville; O. B. Stevens, George Hillyer, C. M. Candler, Decatur; Joseph F. Gray, Savannah; Campbell Wallace, Secretary.

Idaho—S. D. Taylor, State Auditor, Boisé City. Secretary State Board of Equalization.

Illinois Railroad and Warehouse Commission—O. F. Berry, Chairman, Carthage; B. A. Eckhart, Chicago; J. A. Willoughby, Belleville; Wm. Kilpatrick, Secretary, Springfield.

Indiana Railroad Commissioners—Indianapolis. Wm. J. Wood, Chairman; John F. McClure, Frank E. Payne; Jos. L. Reilly, Secretary.

Iowa Board of Railroad Commissioners—Des Moines. D. J. Palmer, Chairman; W. L. Eaton, N. S. Ketchum; D. N. Lewis, Secretary.

Kansas Railroad Commission—Topeka. G. W. Kanavel, Chairman; C. A. Ryker, F. J. Ryan; E. C. Shiner, Secretary.

Kentucky Railroad Commission—Frankfort. A. T. Siler, Chairman, Williamsburg; L. B. Finn, Franklin; L. P. Tarlton; D. B. Cornett, Secretary.

Louisiana Railroad Commission—Baton Rouge. J. J. Meredith, Chairman, Columbia; C. L. de Fuentes, New Orleans; Shelby Taylor, Crowley; W. M. Barrow, Secretary.

Maine Railroad Commissioners—Augusta. Elmer P. Spofford, Chairman, Deer Isle; John O. Jones, Lewiston; Frank Keizer, Rockland; Geo. F. Giddings, Clerk, Augusta.

Maryland Public Service Commission—Baltimore. James M. Ambler, Chairman; J. W. Hering, Philip D. Laird.

Massachusetts Board of Railroad Commissioners—Boston. Walter P. Hall, Chairman, Fitchburg; Clinton White, Melrose; George W. Bishop, Newtonville; Charles E. Mann, Clerk, Malden.

Michigan Railroad Commission—Lansing. C. L. Glasgow, Chairman; G. W. Dickinson, James Scully; Samuel H. Kelley, Secretary.

Minnesota Railroad and Warehouse Commission—St. Paul. Ira B. Mills, Chairman; C. E. Elmquist, C. F. Staples; A. C. Clausen, Secretary.

Mississippi Railroad Commission—Jackson. John A. Webb, President; F. M. Sheppard, W. R. Scott; T. R. Maxwell, Secretary.

Missouri Railroad and Warehouse Commission—Jefferson City. F. A. Wightman, Chairman; John A. Knott, H. R. Oglesby; T. M. Bradbury, Secretary.

Montana Railroad Commission—Helena. E. A. Morley, Chairman; Dan Boyle, B. T. Stanton, R. F. McLaren, Secretary.

Nebraska State Railway Commission—Lincoln. H. T. Clarke, Jr., Chairman; W. H. Cowgill, H. J. Winnett; Clark Perkins Sec.

Nevada—Carson City. H. F. Bartine, Chairman; Henry Thurtell, J. F. Shaughnessy, E. H. Walker, Secretary.

New Hampshire Railroad Commission—Concord. Arthur G. Whittemore, Chairman, George E. Bales, Oscar L. Young.

New Jersey Board of Public Utility Commissioners—Trenton. Frank H. Sommers, President, Newark; Thos. J. Hillery, Boonton; Robert Williams, Paterson; A. N. Barber, Secretary.

New York Public Service Commission—First District—(Greater New York) New York City—Wm. R. Willcox, Chairman; Wm. McCarroll, Edward M. Bassett, Milo R. Maltbie, John E. Eustis; T. H. Whitney, Secretary. Second District—(all of State outside Greater New York, Albany, N. Y. Frank W. Stevens, Chairman; John B. Olmsted, Thos. M. Osborne, James E. Sague, Martin S Decker; J. S. Kennedy, Secretary.

North Carolina Corporation Commission—Raleigh. Franklin McNeill, Chairman; Sam. L. Rogers; H. C. Brown; A. J. Maxwell, Secretary.

North Dakota Commissioners of Railroads—Bismarck. W. H Stutsman, President, Mandan; O. P. N. Anderson, Starkweather; W. H. Mann, New Salem; Thomas Hall, Secretary.

Ohio Railroad Commission—Columbus O. H. Hughes, Chairman; O. P. Gothlin, J C. Sullivan; C. A Radcliffe, Secretary

Oklahoma Corporation Commission—Guthrie. J. E Love, Chairman; A. P Watson, J. J. McAlester; E. C. Patton, Secretary.

Oregon Railroad Commission—Salem. Thos. K. Campbell, Chairman; Oswald West, Clyde B. Aitchison; George O. Goodall, Secretary.

Pennsylvania State Railroad Commission—Harrisburg. Nathaniel Ewing, Chairman; John Y. Boyd, Chas. N. Mann; W. S. Siebert, Acting Secretary.

Rhode Island Railroad Commission—Providence J. P. Burlingame, D. J. White. Deputy, East Greenwich

South Carolina Railroad Commissioners—J. H Earle, Chairman, Greenville; B L. Caughman, Columbia; J. M. Sullivan, Anderson; T. B. Lumpkin, Secretary, Columbia.

South Dakota Railroad Commissioners—Pierre. W G. Smith, Glends; George Rice, Flandreau; F. C. Robinson, Groton; T E Cassill, Secretary.

Tennessee Railroad Commissioners—Nashville B. A. Enloe, Chairman; Frank Avent, H. H. Hannah; Miss Willie Fields, Secretary.

Texas Railroad Commission—Austin. Allison Mayfield, Chairman; O. B Colquitt W. D. Williams; E. R. McLean, Secretary

Vermont Public Service Commission—Montpelier. J. W. Redmond Chairman, Newport; Eli H. Porter, Wilmington; S. H. Jackson, Barre; R. W. Spear, Clerk, Newport.

Virginia State Corporation Commission—Richmond. Robert R. Prentis, Chairman, Richmond; William F. Rhea, J. R. Wingfield; R. T. Wilson, Clerk

Washington—Olympia H. A Fairchild, Chairman; J. C. Lawrence, J. S. Jones; Frank M Larned, Secretary.

West Virginia—T. C Townsend, State Tax Commissioner, Charleston.

Wisconsin Railroad Commission—Madison. B H. Meyer, Halford Erickson, J. H. Roemer; John M. Winterbotham, Secretary

Wyoming Board of Equalization—Cheyenne, Edward Gillette, President; Wm. R. Schnitger; Le Roy Grant, Secretary.

Oct., 1904.	N. Y. Central & H. R.	Croton—Ossining	3.51	2 00	105

The fastest time on record for a distance of over 440 miles was made by the Lake Shore and Michigan Southern R.R. from Buffalo to Chicago, in June, 1905, noted above. The fastest long-distance run less than 440 miles was on the New York Central R.R. September 11, 1895, from New York to Buffalo, 436 1-2 miles, in 407 minutes actual time. Average speed, 64 1-3 miles an hour, with two stops and 28 slow-ups, and on January 1, 1903, from Albany to Buffalo, 302 miles, in 295 minutes.

Among the fastest regular trains in the United States, for a shorter distance, are believed to be the New York Central "Empire State Express," between New York and Albany, 143 miles in 175 minutes, and the "Congressional Limited," on the Pennsylvania Railroad, which makes the run from Jersey City to Washington in 4 hours, 46 minutes, a distance of 227 miles. Also the "Pennsylvania Special" over P. R. R. which runs from Jersey City to North Philadelphia, 81 miles, in 83 minutes; from Jersey City to Harrisburg, Pa., 194 miles in 196 minutes.

On August 15, 1898, on P. & R. and C. R. R. of N. J., "Royal Blue Line," between Elizabeth, N. J., and Jenkintown, a distance of 69 miles, in 61 minutes, including 2 "slow-ups," some of the miles being traversed in 38 seconds.

The quickest run between Jersey City and Washington, 231 miles, was made on the Central Railroad of New Jersey, March 2, 1897 (by a special train, bearing Vice-President-elect Hobart and party), in 4 hours 8 minutes, making the running time, including "slow-ups" for taking water, changing engines, etc., 60 miles an hour. This beat the time of the "Aunt Jack" train, made by the Madison Square Theatre Company March 10, 1890, which was 4 hours 18 minutes, each way, going and returning.

Other notable long-distance fast runs: February 14-15, 1897—Pennsylvania Railroad and C., B. and Q., Jersey City to Denver, 1,937 miles, in 48 hours; average speed, 40.3 miles per hour. August 29-31, 1891—Canadian Pacific, Vancouver to Brockville, 2,802 miles, in 77 hours 9 minutes; average speed, 36.32 miles per hour.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, 83 hours 45 minutes; average speed, 39.53 miles per hour.

In October, 1905, the "Harriman Special" made the run from Oakland to Jersey City (3,239 miles) in 73 hours, 12 minutes, or 44.30 miles per hour. In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours, 27 minutes.

The "Scott Special" left Los Angeles, Cal., July 9, 1905, and arrived in Chicago (2,445.5 miles), July 11, having made the run in 44 hours 54 minutes, maintaining an average speed while in motion of 51 miles an hour.

On November 15, 1907, at Clayton, N. J., in a trial test on Pennsylvania R. R. between steam and electric locomotives, the steam engine made 93.6 miles an hour on a specially built seven mile curved track, while the electric locomotive made but 90 miles an hour.

SOME FOREIGN RAILWAY RUNS.

The Northern Railway runs a day express from Berlin to Paris, which covers the distance from Paris to St. Quentin (96¼ miles) in 93 minutes, a speed of 62.1 miles an hour; and the 53¾ miles to the Belgian frontier is covered in 51 minutes at a speed of 63¼ miles an hour. The Eastern Railway Company has an afternoon express from Paris to Bale, which runs the first 304.37 miles in 107 minutes—a speed of 58.5 miles an hour.

The New Railway Law.

DURING the second session of the Sixty-first Congress there was passed an act known as "An act to create a Court of Commerce and to amend the act entitled 'An act to regulate commerce,' approved February 4, 1887." To the public this act is known as the "New Railway law." It was a part of the so-called "Taft Programme," although the act as passed by Congress after a long debate had become so far amended as to bear but little resemblance to the bill as originally reported from the House Committee on Interstate and Foreign Commerce. The bill as originally introduced in the House by Representative Charles W. Townsend of Michigan, was an exact counterpart of a bill drafted at the suggestion of President Taft by Attorney-General George W. Wickersham. This bill was referred to the Committee on Interstate and Foreign Commerce, of which Representative James R. Mann of Illinois is chairman. The committee reported a different bill from that introduced by Representative Townsend. Practically the only unchanged provision of the committee's bill was that providing for the establishment of the Court of Commerce.

The bill was debated in and passed by the House. Coincidently with the House's action the Senate debated a similar measure. Not until June did the two houses come together and pass the compromise bill. It was signed by President Taft and became a law June 18, 1910.

THE COMMERCE COURT.

The Commerce Court is a court of record. It is composed of five judges to be from time to time designated by the Chief Justice of the United States, from among the circuit judges of the United States for the period of five years, except that in the first instance the Court shall be composed of the five additional circuit judges who shall be designated by the President, and who will serve for one, two, three, four and five years respectively, in order that the period of designation of one of the judges shall expire in each year thereafter.

The jurisdiction of the Commerce Court shall be the same as that possessed by circuit courts of the United States and the judges thereof, over all cases of the following kinds:

First—All cases for the enforcement, otherwise than by adjudication and collection of a forfeiture or penalty or by infliction of criminal punishment, of any order of the Interstate Commerce Commission other than for the payment of money.

Second—Cases brought to enjoin, set aside, annul, or suspend in whole or in part any order of the Interstate Commerce Commission.

Third—Such cases as by section three of the act entitled "An act to further regulate commerce with foreign nations and among the States," approved February 19, 1903, are authorized to be maintained in a circuit court of the United States.

Fourth—All such mandamus proceedings as under the provisions of section 20 or section 23 of the act entitled "An act to regulate commerce," approved February 4, 1887, as amended, are authorized to be maintained in a circuit court of the United States.

APPLICABILITY OF THE LAW TO ALL COMMON CARRIERS.

Under section 1 of the new act the applicability of the new railway act was extended as follows: "That the provisions of this act shall apply to any corporation or any person or persons engaged in the transportation of oil or other commodity, except water and natural and artificial gas, by means of pipe lines, and partly by pipe lines and partly by railroad, or partly by pipe lines and partly by water, and to telegraph, telephone and cable companies (whether wire or wireless), engaged in sending messages from one State, Territory or district of the United States to any other State, Territory or district of the United States or to any foreign country, who shall be considered and held to be common carriers within the meaning and purpose of this act. * * * The term "common carrier" as used in this act shall include express companies and sleeping car companies.

REAFFIRMATION OF THE ANTI-REBATE PROVISIONS OF THE HEPBURN ACT.

Under section 2 it is provided that: "No common carrier subject to the provisions of this act shall, directly or indirectly, by any special rate rebate, drawback, or other device, charge, demand, collect or receive from any person or persons a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property." This provision of the act states that violations of the said provision shall be unlawful.

HE LONG AND SHORT HAUL PROVISION.

Under section 4 of the new act it is provided: "That it shall be unlawful for any common carrier subject to the provisions of this act to charge or receive any greater compensation in the aggregate for the transportation of passengers, or of like kind of property, for a shorter than for a longer distance over the same line or route in the same direction, the shorter being included within the longer distance, or to charge any greater compensation as a through route than the aggregate of the intermediate rates subject to the provisions of this act; but this shall not be construed as authorizing any common carrier within the terms of this act to charge or receive as great compensation for a shorter as for a longer distance: *Provided, however*, that upon application to the Interstate Commerce Commission, such common carrier may in special cases after investigation, be authorized by the commission to charge less for longer than for shorter distances for the transportation of passengers or property; and the commission may from time to time prescribe the extent to which such designated common carrier may be relieved from the operation of this section: *Provided, further*, that no rates or charges lawfully existing at the time of the passage of this amendatory act shall be required to be changed by reason of the provisions of this section prior to the expiration of six months after the passage of this act, nor in any case where application shall have been filed before the commission in accordance with the provisions of this section until a determination of such application by the commission.

WATER COMPETITION.

Whenever a carrier by railroad shall in competition with a water route or routes, reduce the rates on the carriage of any species of freight, to or from competitive points, it shall not be permitted to increase such rates unless after hearing by the Interstate Commerce Commission it shall be found that such proposed increase rests upon changed conditions other than the elimination of water competition.

JOINT TRAFFIC AGREEMENTS.

Under section 6 of the law as amended by the recent act the provision is made that "Every common carrier subject to the provision of this act shall file with the commission and print and keep open to public inspection schedules showing all the rates, fares and charges for transportation between points on its own route and points on the route of any other carrier by railroad, pipe line or water, when a through route and joint rate have been established. * * * No change shall be made in the rates, fares and charges or joint rates, fares and charges which have been filed and published by any common carrier in compliance

THE NEW RAILWAY LAW.—*Continued.*

with the requirements of this section, except after thirty days' notice to the commission and to the public published as aforesaid, which shall plainly state the charges proposed to be made in the schedule then in force and the time when the charged rates will go into effect. * * * Every common carrier subject to this act shall also file with said commission copies of all contracts, agreements or arrangements with other common carriers in relation to any traffic by the provisions of the act to which it may be a party."

FINE AND IMPRISONMENT FOR OFFICIALS AND AGENTS OF CORPORATIONS VIOLATING THE RAILWAY LAW.

Under section 10 of the act provision is made for the punishment, by fine or imprisonment of the officials, agents, employés, trustees, receivers, lessees or persons acting for or employed by such corporation, as follows:

For unlawful discrimination such persons shall, in addition to the fine hereinbefore provided for, be liable to imprisonment in the penitentiary for a term of not exceeding two years, or both such fine and imprisonment, in the discretion of the court.

For false billing (by carriers), carrier, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof in any court of the United States of competent jurisdiction within the district in which such offense was committed, be subject to a fine of not exceeding $5,000 or imprisonment in the penitentiary for a term of not exceeding two years, or both, in the discretion of the court, for each offense.

For false billing by shippers shall be deemed guilty of fraud, which is hereby declared to be a misdemeanor, and shall, upon conviction thereof in any court of the United States of competent jurisdiction within the district in which such offense was wholly or in part committed, be subject for each offense to a fine of not exceeding $5,000 or imprisonment in the penitentiary for a term of not exceeding two years, or both, in the discretion of the court.

For inducing common carriers to make unjust discrimination shall, upon conviction thereof in any court of the United States of competent jurisdiction within the district in which such offense was committed, be subject to a fine of not exceeding $5,000, or imprisonment in the penitentiary for a term of not exceeding two years, or both, in the discretion of the court, for each offense; and such person, corporation, or company shall also, together with said common carrier, be liable, jointly or severally, in an action to be brought by any consignor or consignee discriminated against in any court of the United States of competent jurisdiction for all damages caused by or resulting therefrom.

Under section 13 of the act as amended it is provided "That complaints against common carriers shall be filed with the Interstate Commerce Commission and that if within a reasonable time to be specified by the commission, the complaint is satisfied by the carrier, the carrier shall be relieved of liability for the particular violation of the law. If the complaint is not satisfied by adequate reparation for the alleged injury or adjustment by other methods of the difficulty complained of, the commission will investigate the complaint. The commission may subpoena witnesses or demand the production of such books and papers as they may require. They may also invoke the power of the courts to compel the attendance of witnesses. The claim that testimony or evidence will tend to incriminate will not excuse a witness from answering interrogatories."

THE COMMISSION MAY INITIATE INVESTIGATIONS OF ABUSES.

Under the foregoing section the commission may issue orders in investigations begun of its own motion with like power and authority as it would investigate a complaint filed by a shipper. It is further provided in this section that no complaint shall at any time be dismissed because of the absence of direct damage to the complainant.

RIGHT TO PRESCRIBE JUST AND REASONABLE RATES.

Under section 15 of the act, the commission may determine and prescribe just and reasonable rates and classifications to be observed as maximum charges. The commission may determine and prescribe just and reasonable regulations and practices and may order carriers to cease and desist from the full extent of such violation as may be found. Orders of the commission will become effective as prescribed, but in not less than thirty days from the date of their promulgation. Orders of the commission shall continue in force not exceeding two years unless suspended or set aside by the commission or a court. The commission is empowered to prescribe the proper proportion of such joint rates, to be received by each carrier when the carriers themselves fail to agree on divisions of such joint rates. The commission may initiate investigations of new schedules, whether complaint against such schedule has been filed or not. The commission may suspend the new schedule and, after a full hearing, whether completed before or after, the rate, fare, charge, classification, regulation or practice, goes into effect. The suspensions of both the primary and secondary suspensions, may be for a period not exceeding six months. Under the act the burden of proof of the reasonableness of increased rates falls upon the carriers.

RIGHT TO ESTABLISH THROUGH RATES AND JOINT RATES.

The commission may establish through rates and joint rates and classifications. In granting this power the law provides the commission is prohibited from requiring any company, without its consent, to embrace in such joint route, substantially less than the entire length of its railroad and of any intermediate railroad operated under a common management or control therewith, which lies between the terminal of such proposed through route, unless to do so would make such route unreasonably long as compared with another practical through route which could otherwise be established. The right to select a choice of two through routes is given to the shipper with certain provisions as to the reasonableness of the demand.

The commission may determine just and reasonable charge or allowance for services rendered by the owner of property transported or for any instrumentality furnished by the owner and used in such transportation.

COMMISSION'S POWER TO AWARD DAMAGES.

Under section 16 the power to award damages upon hearing of a complaint is delegated to the Interstate Commerce Commission. If a carrier does not comply with an order for the payment of money within the time limit set by the commission the shipper may petition to the United States Court for an order compelling the payment of money. The findings of the Interstate Commerce Commission shall be accepted by the court as the *prima facie* evidence in reparation cases, and the petitioner is not liable for a tax of the cost in the United States Court. The petitioners in these cases will be allowed reasonable attorney's fees in the event of their contention prevailing. Joint plaintiffs may sue joint defendants in court on awards of damages. It shall be the duties of the various different attorneys, under the direction of the Attorney-General of the United States, to prosecute carriers for the recovery of forfeiture made by carriers for non-compliance with the reparation order of the commission and such forfeitures are made payable into the treasury of the United States and are recoverable by suit.

Railroad Pensions in the United States.

THE following table shows the estimated number of employés on the twenty-one roads now having pension systems in force:

In the majority of cases the pension is fixed at 1 per cent. of the average wage for the ten years next preceding retirement, multiplied by the number of years of service For example if an engineman has earned $150 a month on the average during the last ten years of his service and has been in the employ of the company for thirty years, he is retired on a pension of $45 a month In every case the pension fund is supported exclusively by the company, the employés not contributing thereto.

The figures for the Atchison, Topeka & Santa Fé, the Atlantic Coast Line, the Baltimore & Ohio the Buffalo Rochester & Pittsburgh, the Chicago & Northwestern, the Chicago St Paul, Minneapolis and Omaha, the Cleveland Terminal & Valley, the Delaware, Lackawanna & Western the Illinois Central, the Oregon Short Line, the Pennsylvania, the Philadelphia & Reading and the Union Pacific were taken from the most recent report of the United States Commissioner of Labor The other figures were obtained from the railroads direct or, where no information was supplied, were estimated as accurately as possible from the data at hand.

RAILROAD.	No. of Employés.	RAILROAD	No. of Employés
1 Atchison, Topeka & Santa Fé	55 000	12 Houston & Texas Central (included in Southern Pacific)	...
2. Atlantic Coast Line	17.218		125.000
3. Bessemer & Lake Erie Railroad	1,400	13 New York Central	38.563
4 Baltimore & Ohio	55.554	14 Illinois Central	7 600
5. Boston & Albany Railroad (included in New York Central)	...	15 Oregon Railroad & Navigation Co	7 500
6 Buffalo, Rochester & Pittsburgh	4 847	16. Oregon Short Line	125.286
7. Central Railroad of New Jersey	14,000	17. Pennsylvania	24,430
8. Chicago & Northwestern	48,723	18 Philadelphia & Reading	40.000
9. Chicago, St Paul, Minneapolis & Ohio	5.451	19 Rock Island	57.000
10 Cleveland Terminal & Valley Railroad	1.414	20. Southern Pacific	23,000
11. Delaware, Lackawanna & Western	22,273	21 Union Pacific	
		Total	674.259

The following table shows the actual amount paid out yearly and the number of pensioners on thirteen roads:

RAILROAD.	Amount Paid.	No. of Pensioners	RAILROAD.	Amount Paid.	No. of Pensioners.
1. Atchison, Topeka & Santa Fé	$1.341.68	36	8. Del'are Lack'nna & Western	$35 026 62	217
2. Atlantic Coast Line	8.319 10	57	9 Illinois Central	47 126 01	249
3. Baltimore & Ohio	82.972.95	444	10 Oregon Short Line	1.855 15	13
4. Buffalo, Rochester & Pitts	5.936.31	16	11. Pennsylvania	556.175.45	2.894
5. Chicago & Northwestern	89.330 87	392	12. Philadelphia & Reading	63.181 47	221
6. Chicago, St. P, Minn. & O	3,676.55	25	13. Union Pacific	18 980 69	88
7. Clev. Ter. & Valley R.R.	772.25	7	Totals	$914.695 10	4.659

The following table shows the ages of employment and retirement on fourteen roads:

RAILROAD.	Age of Employment.	Age of Retirement.	RAILROAD.	Age of Employment.	Age of Retirement.
1 Atchison, Topeka & Santa Fé	Not specified.	65	8 New York Central	35	65
2 Atlantic Coast Line	45	70	9 Illinois Central	45	70
3 Baltimore & Ohio	Not specified.	65	10 Oregon Short Line	35	70
4 Buffalo, Rochester & Pitts	45	65	11. Pennsylvania	45	70
5 Chicago & Northwestern	35	70	12 Philadelphia & Reading	45	70
6 Chicago St P Minn. & O	35	70	13. Rock Island	35 and 45	70
7 Delaware, Lack & Western	35	70	14 Union Pacific	35 and 45	70

The following table shows the number of years of continuous employment necessary to qualify for pensions on thirteen roads:

RAILROAD.	No. of Years of Continuous Employment.	RAILROAD.	No of Years of Continuous Employment.
1 Atchison, Topeka & Santa Fé	15	8. N Y Cent. { Superannuation	10
2 Atlantic Coast Line	10	8. N Y Cent. { Disability	20
3 Baltimore & Ohio	10	9. Illinois Central	20
4. Buffalo Rochester & Pittsburgh	20	10. Oregon Short Line	20
5 Chicago & Northwestern	20	11 Pennsylvania	30
6 Chicago, St Paul, Minn & Ohio	20	12. Philadelphia & Reading	30
7 Delaware, Lackawanna & Western	25	13. Union Pacific	20

Other lines having pension systems are: Brooklyn Rapit Transit Co., Canadian Pacific Ry., Grand Trunk Ry., Metropolitan Street Ry of N. Y. City.

The U S Steel Corporation dedicated $8,000,000 for a fund with which to pension superannuated and disabled employees. This fund has been consolidated with the $4.000.000 fund created by Andrew Carnegie after he sold out his holdings in the Carnegie Steel Company to the U S. Steel Corporation. The new fund, therefore, will be $12,000,000 and will be known as "The United States Steel and Carnegie Pension Fund,"

(From report issued by the Bureau International de l'Union Télégraphique.)

THE following table sets forth the entire system of submarine cables of the world, including those along the shores and in the bays, gulfs, and estuaries of rivers, but excepting those in lakes and the interior watercourses of continents. The list includes all cables operated by private companies, and in addition thereto under the name of each nation is given the list of cables operated by the government of that nation.

**Welland (ship canal)	26,080,366	1833	26¾	26	14	Connects Lake Ontario and Lake Erie.

‡The Erie Canal, Oswego Canal and Champlain Canal are now being enlarged by the State of New York to a depth of 12 feet, and with locks of a capacity to pass barges having a net tonnage capacity of 2,500 tons each. It is anticipated that this entire enlargement will be completed during the year 1913. The cost of enlarging these three canals was not to exceed $101,000,000 and will probably be within that figure.

§The Cayuga and Seneca Canal will be enlarged to pass barges of the same capacity as the improved Erie Canal at a cost estimated at $7,000,000.

* And improvements. † Navigable depth. ** Welland Canal—An enlargement of this canal has been decided upon.

Cape Cod Canal (Sea Level Ship Canal) about 12 miles long, to connect Massachusetts Bay and Buzzard's Bay, under construction. Date of completion January 1, 1913.

Beaufort Canal (Beaufort, N. C., to Neuse River) under construction and will probably be opened early in 1911.

The Harlem River Ship Canal, connecting the Hudson River and Long Island Sound, by way of Spuyten Duyvil Creek and Harlem River, was opened for traffic on June 17, 1895, and cost about $2,700,000.

Cost of Ocean Greyhounds.

IN 1899 the Auguste Victoria cost about £200,000. The Deutschland, of the Hamburg-American Company, cost £550,000 and the Kaiserin Auguste Victoria nearly £700,000. The Mauretania and Lusitania cannot have cost much less than £1,400,000 each, and the two new giant vessels which are being built for the White Star Line service between Southampton and New York will probably cost nearly as much.

Fleet of Transatlantic Passenger Steamers.

Includes only regular passenger lines from New York

Plymouth to New York	Deutschland	Hamburg-Am.	July 7-12, 1900	5	15	46
New York to Naples	Deutschland	Hamburg-Am.	Jan. 20-28. 1904	7	16	44

Approximate Distances: Sandy Hook (Lightship), New York, to Queenstown (Roche's Point), 2,800 miles; to Plymouth (Eddystone), 2,962 miles; to Southampton (The Needles), 3,100 miles; to Havre, 3,170 miles; to Cherbourg (The Mole), 3,184 knots. The fastest day's run was made by the Mauretania, of the Cunard line, June, 1909—673 knots, or 26.55 knots per hour.

1905 record.—Allen line's turbine Steamer Virginian passed Cape Race June 13, 11 A. M., inward bound, having left Moville on the afternoon of June 9, thus crossing in less than four days.

The Pacific Mail Steamship Company's Steamer City of New York, 3,019 tons, commanded by John W. Philip, Commander United States Navy, left Sandy Hook, New York, December 19, 1875, anchored off Cape Virgins, entrance to Strait of Magellan, January 18, 1876, at 7 P. M., passed Cape Pillar (Pacific entrance) January 22, and arrived at San Francisco 13,533 miles on February 16, at 2 P. M., being the first steamer that ever made that voyage without stopping en route for coal. Time from New York 54 days, 14 hours.

Steamship development as shown in the relative proportions, speed, etc., of the Great Eastern and Mauretania:

Great Eastern.		Mauretania.	
Length	692 ft.	Length	790 ft.
Breadth	80 ft.	Breadth	88 ft.
Displacement	27,000 tons.	Displacement	45,000 tons.
Paddle, Screw and Sail: Speed	13 to 14 knots.	Quadruple Screws	27½ knots (trial speed).

THE RECORD-BREAKERS BETWEEN NEW YORK AND QUEENSTOWN—EAST OR WEST.

Funnel Marks and Night Signals of Transatlantic Lines

Lines.	Funnel Marks.	Night Signals
American	Black, white band, black top	Blue light forward, red light amidships and blue light aft.
Anchor	Black	White lantern, then a red [red.
Atlantic Transp't	Red, with black top	Six ball roman candles, with green-white-
Cunard	Red, with black rings and black top	Blue light and two roman candles, each throwing out six blue balls.
French	Red, with black top	Blue light forward, white light amidships, and red light aft.
Hamburg-Amer.	Express service, buff; regular, black	Two red-white-blue lights, in quick succession, at stern.
Netherlands-Am.	Cream, white band, with green borders	Green light forward and aft, white light under the bridge.
Nor. Ger. Lloyd	Ochre	Two blue-red lights, one forward, one aft.
Red Star	Black, white band, black top	Three red lights, one forward, one aft, and one amidships, simultaneously.
Scandinav.-Amer	Black, red, black; even parts	One white-red, followed by one red-white light.
White Star	Buff, with black top	Two green lights simultaneously.

House Flags of Transatlantic Lines.

Lines.	Flags.	Lines.	Flags.
American	White, with blue spreadeagle in centre.	Netherl'nds-Am	Green, white and green, N. A. S. M. in black letters in the white.
Anchor	Blue spreadeagle on white field.	North Ger. Lloyd	Key and anchor crossed in centre of a laurel wreath, in blue on a white field.
Atlantic Transp't	Red, white, and blue stripes, with stars.		
Cunard	Red flag, golden lion in centre.	Red Star	White swallowtail flag, red star.
French	White flag, red ball in corner, with company's name.	Scandinav.-Amer	Blue, with white Maltese cross.
Hamburg-Amer.	White and blue flag, diagonally quartered, with a black anchor and yellow shield in centre, bearing the letters H.A.P.A.G.	White Star	Red swallowtail flag, containing white star.

Telegraph Rates

BETWEEN New York City and places in United States and Canada are based on ten-word message (address and signature free) with additional charge for extra words. Thus, a rate of 40-3 means 40 cents for the first ten words and 3 cents for each additional word.

NIGHT LETTERS—A new class of telegrams for points in United States only (Canada and Alaska not included) filed before midnight for delivery the following morning. Rates for Night Letters of fifty words or less are the same as for ten word day messages. Each additional ten words one-fifth the basic charge. Example: New York to Chicago, ten words day rate quick delivery 50 cents; fifty-word Night Letter for delivery the following morning, 50 cents. Rates given are Western Union rates.

TELEGRAPH RATES TO FOREIGN COUNTRIES.

These rates are from New York City. The address and signature are included in the chargeable matter, and the length of words is limited to fifteen letters. When a word is composed of more than fifteen letters, every additional fifteen or the fraction of fifteen letters will be counted as a word.

TELEGRAPH RATES—*Continued.*

On November 10, 1910, Clarence H. Mackay, President of the Commercial Cable Company and the Postal Telegraph Company announced an intended reduction in cable rates on plain language (not code) messages from 25 cents for a word not exceeding fifteen letters to 12½ cents for every five letters sent. The plan has been worked out, and, inasmuch as it will require the co-operation of the telegraph lines in Europe, where the governments own the lines, the plan involves a proportionate reduction in the land line rates charged by the European governments, and hence the co-operation of those governments will be necessary.

The Postal Telegraph Cable Company also transacts business in the United States, and in 1910 operated 62,223 miles of poles and 374,866 miles of wire, by means of which it reached 31,715 places.

TELEGRAPH STATISTICS.

THE WESTERN UNION TELEGRAPH COMPANY.

Theodore N. Vail, President; Belvidere Brooks, General Manager. Headquarters, 195 Broadway, New York.

Year.	Miles of Poles and Cables.	Miles of Wires.	Offices.	Messages.	Year.	Miles of Poles and Cables.	Miles of Wires.	Offices.	Messages.

Total telephones in United States, December 31, 1907, 6,118,578 (United States Census); December 31, 1909, 7,084,000, of which 5,142,692 are in Bell system, leaving 1,941,308 rural and other company telephones not connected with Bell system

The independent telephone companies of the United States, which are owned and operated entirely apart from the Bell organization, are represented in the National Independent Telephone Association, which has its headquarters in the McCormick Building, Chicago. There are about 15,000 of these companies, operating a reported aggregate of over 4,000,000 telephones. The capital invested is approximately $400,000,000, the number of stockholders over 500,000, and the income is roughly estimated at about $105,000,000 per annum. The independent companies, which are for the most part financed in the territories which they cover, are particularly strong throughout the middle and far West. They are established in nearly every large city in the United States except those on the Atlantic Coast.

British Railway Accidents.

The summary by the British Board of Trade is as follows:

GREAT BRITAIN AND IRELAND. 1908 AND 1909.

	YEAR. 1909.		YEAR. 1908	
	Killed.	Injured	Killed.	Injured.
Passengers, in train accidents	1	390	...	283
Passengers, other causes	82	2 148	102	2.242
Employés, train accidents	16	129	6	164
Employés, other causes	318	4 599	376	4.976
Other persons, train accidents	...	26	..	7
At highway grade crossings	63	36	51	44
Trespassers	459	133	479	118
Miscellaneous	32	131	29	150
Total	971	7.592	1,043	7,984

A large portion of the trespassers were suicides; in 1909 nearly one-half.

Reports of the Principal Express Companies for 1909.

Electrical Progress in 1910.

IN GENERAL.

During the past year a large number of electrical devices were brought out, and the further use of electricity to the daily needs of life has steadily increased. Electric operated trains have become more than ever competitors of steam, for not only is much of the noise and dirt done away with, especially in terminal stations as the Pennsylvania and Grand Central, New York City, but ease in starting and reaching full speed in a minimum amount of time is secured. In the West and Middle West States of the United States, interurban electric trains carry passengers and express packages at speeds nearly equal to those of steam. In fact, to avoid competition and cutting of rates, many of the steam roads have purchased controlling interest in the adjacent electric lines. In other cases electric roads serve as feeders to the steam.

When given a fair trial in steel and iron rolling mills electric motors have demonstrated their ability to give as satisfactory service as any means of applying power. As the manufacturers of electrical machinery have become familiar with the requirements they have been able to produce motors capable of withstanding the severest conditions. Direct current motors were first tried, and their success has lead to a demand for alternating current. The alternating current squirrel cage induction motor is well adapted for mill service, as the absence of sliding contacts makes possible the construction of an almost indestructible machine. The bearings are the only parts subject to wear, and if these are properly proportioned the motor will stand very hard usage.

The field of electricity in mining has broadened and its many advantages have been further recognized. Electric mining locomotives have proved superior to horse, mule or any other means for hauling cars, for long hauls can be made at a good rate of speed and with the employing of a few men. Induction motors are well suited for coal mines, especially for driving pumps and fans which are run continuously. For hoisting the direct current series motor is particularly adapted, owing to its high starting torque.

For shop purposes, as driving special machine tools, lathes, planers and the like, where heavy work is done, electric motors are superseding the belt drive from the counter shaft. The former has many advantages over the latter: for example, in making a lighter shop, and then again one machine can be used without turning the shafting of several others, thus saving power and the accompanying wear and tear. In pulp and paper mills motors have been installed for running sulphite machines, calenders, beaters, besides centrifugal pumps and other machinery.

The extent to which electricity can be employed for special manufacturing purposes is well illustrated in the manufacture of hats. Here electric motors furnish the most flexible means for driving the machinery. Electric light is best for illuminating the workroom, and electric heat for the finishing processes presents unequalled advantages as to cleanliness, convenience and reliability.

TELEGRAPHY AND TELEPHONY.

Co-operative relations were established between the Western Union Telegraph Company and the American Telephone and Telegraph Company, controlling the Bell telephone system. The object is to provide a supplemental system of universal telephone and telegraph service with the following advantages: 1. Every telephone station is converted into a telegraph station so that a message may be dictated from any Bell telephone to be transmitted by telegraph to any part of the world, and similarly a telegram originating anywhere in the world may be delivered by telephone to the addressee. 2. Twelve million miles of wire are placed at the service of the public for electrical transmission of intelligence. 3. Alternate routes are established between all important points, thereby greatly reducing the chances of interruption of wire service.

The American Telephone and Telegraph Company has completed an underground cable of the Pupin type, available for both telephonic and telegraphic use, between New York and Washington, and it is being extended from New York to Boston. These underground cables, developed by engineers of the American company, are of a new type, whereby two circuits are made to carry at the same time three telephonic messages and eight telegraphic messages, each independent of the other. The circuits in these cables are called "phantom circuits," because some in reality have no physical existence. Similar phantom telephone and telegraphic circuits are being extended overhead from New York to Chicago and from Chicago westward to Omaha and thence to Denver.

A system of collection and delivery of telegrams by telephone has been installed.

The Western Union inaugurated a new class of telegraph messages at cheap rates, called the Night Letter, whereby fifty words may be sent at night for delivery the following morning at the cost of a ten-word day message.

An international congress of telegraph and telephone engineers representing twenty-two nations, including the United States, was held in Paris in September. The principal subjects discussed were long-distance telephony, international standards of transmission and automatic telephone switchboards. After many papers and exhaustive debate the congress did not indorse the automatic switchboard system.

Congress placed telegraph and telephone companies under control of the Interstate Commerce Commission. Railroad or Public Service commissions of twenty-one States exercise varying degrees of supervision and regulation over the telegraph and telephone.

Congress enacted a law requiring all ocean-going steam vessels carrying fifty passengers or more to be equipped with wireless telegraph. More than 2,000 of the world's ships are now equipped with wireless apparatus.

Wellman's airship America carried wireless apparatus and communicated with shore stations while attempting its flight across the Atlantic.

The scope of wireless communication over seas has been greatly extended. Between Glace Bay, Nova Scotia, and Clifden, Ireland, commercial messages are transmitted. At the Glace Bay station the fan-shaped aerial wires are 6,000 feet long and about 100 feet wide, and are supported by thirty masts 250 feet high. The instruments are powerful and have a radius of 3,000 miles.

One of the largest private branch telephone exchanges was installed by the New York Telephone Company in the new Pennsylvania Railroad Station, New York City. The switchboard has six operating positions, and is now equipped with 120 trunks and 400 lines, with an ultimate capacity of 1,000 lines. Direct wires connect the New York switchboard with the Philadelphia station board.

Substitution of the telephone for the telegraph in train despatching has greatly increased. Numerous important railways are being equipped with the new system. A notable instance is the despatch of all trains through the Pennsylvania tunnel terminals in New York by means of the

telephone. Seventeen per cent. of the railroad mileage in the United States is now operated with telephone train despatching.

Various patents were taken out in America and in Europe for improvements in methods of automatic telegraph transmission, some having typewriter keyboards directly connected with the wires, and others using the typewriter to punch holes in paper tape which is fed into a transmitting machine. These methods have been on trial for the past twenty years and their general practicability is yet to be determined. In so-called rapid telegraphy nothing seems to have taken the place of the old Wheatstone method. Three-fourths of all telegraphic transmission is still done by hand use of the Morse key.

ELECTRIC LIGHTING.

Many new types of incandescent and arc lamps have been brought out for street lighting. Of the former the tungsten lamp, manufactured by the Westinghouse Electric and Manufacturing Company, has novel features, as, for instance, the use of unfused joints and the peculiar anchoring of the tip or loop end of the filament. The heavy copper leading in wires are doubled back and curled around themselves, forming a pair of hooks into which are engaged the hooked contact ends of the filament. The top of the filament is anchored by an open link of tungsten wire hooked to the main supporting spring attached to the stem. Of the arc lamps the series multiple metallic flame operating on 110, 250 and 500 volts direct current multiple circuits are worthy of notice. They are most successful where a source of uniform illumination of comparatively high intensity is required, taking energy from constant potential direct current circuits, and where the vapors from the metallic arc are not objectionable. The condensed vapors, which are carried from the arc as the electrodes are consumed, pass from the lamp through a chimney and deposit in the form of a red soot. This deposit is very light and is easily removed.

A patent was granted F. J. Plachon, Paris, France, on a process for making metallic filaments with more regular dimensions and resistances than by the processes now used. The base of the filament is one of the earth metals, such as tungsten, tantalum or molybdenum. An aqueous or alkaline solution of an albuminoid material is mixed with a solution of an alkaline salt of one of the metals and the mixture poured into a weak acid solution. The precipitate thus obtained is washed and is then ready to be formed into filaments.

The advantages of the direct current series arc lamp and the alternating current system of distribution have been obtained by the Cooper Hewitt rectifier, for with it alternating current is changed to direct, which is used for the lamps. The rectifier is applicable to all types of direct current series carbon arc lamps, as the Westinghouse metallic flame; for which it is specially adapted. The latter at 4 amperes has an efficiency as a light producer of nearly double that of the carbon arc and about five times the efficiency at 6.6 amperes.

The Mazda incandescent lamp, when operated at an efficiency of 1.25 watts per candle-power, has proved to be more economical than either carbon or tantalum lamps on all cost of energy above a few cents per kilowatt hour. Improved methods have been devised for making and mounting the filaments of the Mazda lamps. The filament is produced in the form of a long ductile wire, and the connection between it in the lamp and the leading in wires is made by a clamped joint similar to that in tantalum lamps.

ELECTRO-CHEMISTRY AND ELECTRO-METALLURGY.

Electric furnaces were adopted by many of the steel companies both in the United States and Europe. Heroult's electric steel furnace has been in successful operation at several plants of the United States Steel Corporation, and was installed by the Crucible Steel Company, Pittsburgh, Pa., and the Atha Steel Works, Harrison, N. J. In England a number of companies planned to put up Heroult furnaces, three of which will have a capacity of twenty tons apiece. F. Krupp & Co., Essen, Germany, ordered a Girod electric furnace for the production of the highest grade steel.

An improved mercury cell for alkali chloride electrolysis was brought out by J. Whiting, of Boston, Mass. Mercury is placed in the decomposing compartment and held there in a stationary position for a given length of time, thus producing sodium amalgam. The amalgam is next completely drawn off from the compartment and its place taken by another body of mercury free from sodium. By placing several of these compartments in parallel and operating them successfully the cell, while intermittent in principle, is continuous in action.

Sir W. W. Thomson, in a paper read before the British Association at Sheffield, England, suggested the probable discovery of positive ions of electricity. While he did not announce that he had discovered them, yet he gave the impression that he was within easy reach of their discovery.

The behavior of copper slags in the electric furnace was investigated by L. T. Wright. Ferruginous copper slags treated in the electric furnace will yield metallic iron. Mr. Wright showed that the iron recovered contained practically all of the copper, gold and silver, and more than 50 per cent. of the sulphur of the original slag.

It was reported that a German company had solved the problem of electro-plating aluminum, and had been successful with copper, gold, silver and nickel. The rapid oxidation of aluminum by alkaline substances has restricted its use, but if it can be copper-plated it will be in much greater demand than at present.

Among the important patents of the past year is the one granted W. R. Walker, of the United States Steel Corporation, on electric steel refining. The pig iron is treated in an acid-lined Bessemer converter or open hearth to desiliconize and in part decarbonize it, and the metal run into a heated basic-lined mixer. In its passage to the mixer it flows through a spout provided with a skimmer which removes the floating slag, and the metal is thus delivered to the mixer in a nearly slagless condition. In the mixer a basic slag is maintained for aiding the dephosphorizing of the metal or to neutralize the acid slag which may be mixed with the metal. From the mixer charges are drawn from time to time and introduced into basic-lined electric furnaces, where the metal is treated with additions of iron oxide together with burnt lime or limestone. In the electric furnace the metal is dephosphorized and desulphurized.

In a paper presented before the Society of Arts, Sheffield, England, Mr. A. Rosenberg described a process of dry electro-plating one metal with another. The metal to be deposited is mixed in powdered form with some electro-positive metal and with chalk, clay or other inert substances to lessen the rapidity of reaction, to prevent unequal color and to polish the deposited film. The process is known as "Galvanit."

Thomas A. Edison invented a storage battery cell that is particularly adapted for traction service. In outward appearance it differs little from his original cell of 1901, but the structure of the positive plate has been radically modified and other improvements made to increase the capacity and durability. The active material in the positive plate is nickel oxide, while iron oxide is used in the negative electrode. The electrolyte consists of potassium hydrate (21 per cent. solution), to which has been added a small amount of lithium hydrate. The normal specific gravity of the solution is 1.210, which does not change during the charging or discharging. According

to the inventor, the battery cannot be injured by overcharging, it does not deteriorate when left discharged, and it has nearly twice the output or mileage of other batteries weight for weight.

POWER AND TRANSMISSION.

Several large orders for horizontal and vertical steam turbines have been placed during the past year. Turbines are superseding reciprocating engines for generating electricity where the output is large on account of the moderate initial cost, low maintenance charges and economy. Turbines running on the exhaust from blast furnace engines have been installed in many steel works, as, for example, in Newport, England. [Here the steam after leaving the engines is superheated and then flows to two 1,250 kilowatt, 3 phase, 40 cycle, 6,600 volt turbo-alternators.]

Four groups of 110,000 volt oil circuit breakers were put in service by the Southern Power Company on its high-tension lines in the vicinity of Charlotte, N. C. The installation is unique as being the first in which switching apparatus is called upon to break currents of this high potential. They are normally closed by energizing the operating solenoid from a low voltage local circuit, and may be hand operated by a simple mechanical device. Series relays mounted on suspension insulators and inserted directly in the line are provided for automatically tripping the circuit breakers in case of an overload.

The physiological tolerance of alternating current strengths up to frequencies of 100,000 cycles per second were investigated by A. E. Kennelly and E. F. W. Alexanderson. They concluded that there is a marked increase in the tolerance current strength, as the frequency is increased from 11,000 to 100,000 cycles per second. A man can tolerate about 30 milliamperes at 11,000 cycles per second, but nearly half an ampere at 100,000. Between 60 and 11,000 cycles there is only a small change in tolerance current, viz., about 5 to 30 milliamperes.

In general electric motors have further proved the most satisfactory form of power for driving pumps of all classes excepting, of course, very large pumping units in continuous operation. The superiority of motor drive is well attested by the increasing use of motor-driven sets, many of them supplanting steam still in good condition. This superiority is due to the economy with which electric energy can be generated in large central stations, the high operating efficiency of electric apparatus and the ease and certainty of control with a minimum amount of attention.

To meet the demands for a reliable alternating current generator for carrying commercial loads of a low-power factor a special line was brought out by the Westinghouse Electric and Manufacturing Company. The generators are provided with ample ventilating spaces between the field coils and the winding, and a continuous exciting current corresponding to 125 volts on the collector rings can be carried without injurious heating in any part of the field.

The success of the 110,000 volt, 30 cycle transmission line of the Grand Rapids-Muskegon Power Company is noteworthy not only on account of the high voltage carried, but also its freedom from interruption. The line has been in operation for over fifteen months and has given less trouble than those near by of a lower potential.

Gasoline electric generating sets, with the dynamo direct connected to the engine, have become popular for isolated country houses, as there are many uses such sets can be put to besides lighting. For example, charging storage batteries of automobiles, running motors for pumping water, and also for dairy purposes, as churning.

ELECTRIC RAILWAYS.

A turbine electric locomotive, comprising a steam turbine, electric generator and motors, was tested by the Caledonian and North British Railroad. The boiler was of the usual locomotive type and supplied steam to an impulse turbine running at a speed of 3,000 revolutions per minute, which drove a direct current generator. By rheostatic control of the field the output was varied from 200 to 600 volts, and supplied four series railway motors whose armatures were mounted on the driving axles of the locomotive.

Gas electric cars have proved satisfactory on interurban railroads where liquid fuel can be conveniently and cheaply obtained. The General Electric Company brought out both single and double truck cars. In the former the equipment consisted of a direct coupled gas engine and generator with exciter on the same shaft, all completely inclosed and mounted between the axles of the truck and below the car floor. A standard railway motor is mounted on each wheel axle, and the current for these motors is transmitted from the generator through a controller at either end of the car, designed to vary the resistance in the shunt field of the generator and to place the motors progressively in series and parallel. The operation is like that of an ordinary trolley car, but due to the characteristics of the engine and generator there is less liability of overloading by the careless use of the controller. The car is reversed by a handle on the controller without affecting the engine.

A German type of gyrostatically balanced mono-rail electric car was exhibited in New York and attracted considerable attention. The body of the car was mounted on two double axle trucks, one wheel of each truck being driven through a double reduction gear by a direct current series motor. For balancing two gyroscopes revolving in opposite directions were used, each consisting of a 110-pound wheel rotating at a high speed in an air-tight chamber, where the pressure had been lowered almost to a vacuum. Perfect stability was obtained even if a passenger was carried on the side of the car when running on a straight track at four miles an hour.
